WordEngineering

Ken Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence](#) ([2 Corinthians 10:9-18](#)). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.cs](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places.

The importance of this work?

- [Follow God, as a character.](#)
- [To track dates and words? And, find meaning, correlation.](#)

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Masler of [Kolonia House \(KHouse\)](#) is worthy of note, faith ([Hebrews 11](#)). There is indebtedness of the author to [Udy Scheew](#), his Masters degree supervisor, at the [University of Technology, Sydney \(UTS\)](#), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS; Decler Mendez, Cesar Orcando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate supervisor at the [University of Wollongong \(UOW\)](#), NSW 2522, Australia.

Theory

Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename	index.html	
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Distinct by constraint](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to decipher the book title and the corresponding BookID.

The Scripture Table's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
    cast(BookID as varchar(6))
    + '-'
    + cast(ChapterID as varchar(6))
)
FROM Bible..Scripture
Another SQL statement
```

```
; with cte
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
    FROM Bible..Scripture
)
```

- Title

- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promise and Fulfillment
- Autobiography
- Style of Writing

```
select cnt = count(*)
from   cte

The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement
```

```
SELECT COUNT(*) FROM Bible..Scripture

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)

is supplementary.
```

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(8)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(8)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(8)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SOC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact max comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Miller](#) who noted that the first occurrence of the word, [logos](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower word load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning [Door](#) ([Isaiah 15:1](#)). [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact

is for determining the highest value. The SQL statement
```

```
SELECT COUNT(BibleWord) FROM Bible..Exact

is for determining the word count. The SQL statement
```

ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact

is 789631; this is the count of the words in the KJV Bible.
```

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember](#), [APass](#), [ActToGod](#).

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is [being interested](#). ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 4:26](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets [differ slightly](#) between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [http://translate.google.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And, the merge, is the money, convert.](#)
2. 2015-11-03T02:17:00 [The specific, a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and [loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3-5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2-4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the [\(UTC-08:00\) Pacific Time \(US & Canada\) time zone](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The HisWord_view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Misgar](#), [Hechtrachi method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. " The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Koionia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ([Luke 4:19](#)).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

Scales & Measurements		
Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	<ul style="list-style-type: none">Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us.Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	<ul style="list-style-type: none">This may be the physical count of word occurrences in the Bible.The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books.The SQL COUNT() function returns the number of rows that matches a specified criterion.The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	<ul style="list-style-type: none">In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged.An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted.The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE.The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	<ul style="list-style-type: none">Military ranksMohs scale for hardness (geology) of mineralsSchofield scale for the strength of peppersCompletely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. <p>The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?</p>
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	<ul style="list-style-type: none">HTML input rangeCSS percentage

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URL.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()
Determination is achieved through computed columns.		

(Allen G. Taylor, 2024).

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)</pre>
Extremal query	It returns either the minimum or maximum extreme.	Statistics	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)</pre>
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	<pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	<pre>SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts

Principle 2: Check Assumptions

- This whole thing started with keeping [a work reference](#).
- Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
- The author depends on a typing assistant.

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Conclusion and Fulfillment
- Author Biography
- Style of Writing

Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.

Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
- Hardware, software, or network failure
- Vendor withdrawal of support
Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
- Inability to restore deprecated Microsoft SQL Server backup versions.
- Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.

Principle 6: Define Time Horizon
What period has God used?
- 1988, military census age: I Am taking you on a journey.
- 1997, priesthood age: I have brought something against you, but I Am with you.
- 2007, generation timespan: This masturbation will bring water.

Principle 7: Generate Multiple Solution Options
How versatile am I...at amending others? I have to relay my perception to technology providers.

Principle 8: Design Around Constraints
Relational databases offer the ability to set constraints.
- Data type
- Nullable
- Primary key and unique index
- Foreign key

Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Statement	Commentary
sp_databases	The sole work of the author, the WordEngineering database size, is currently 33317504 bytes.
sp_server_info	The database version is Microsoft SQL Server 2022 - 16.0.1000.6
sp_spaceused	The WordEngineering database currently uses 32536.63 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 114243.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies to Bible.</u> Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Operator	Commentary
=, <>, !=, <, <=, !=, >, >=	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use.</u> != < or/and != >. <u>This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators.</u> <u>Quervies for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows.</u>

Title	Commentary
Like wildcard	Preceding or following restriction '%%'
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, >=, <>
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause
The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause
The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause
The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement
Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column
Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View
Enhances tables by compacting and/or extending the information set.

Constraint
Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promises and Fulfillment
- Autobiography
- Style of Writing

- Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
- Check constraints, for schedule, dated from must precede dated until.
- Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
- Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server imposes datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.
GitHub.com WordEngineering repository clone	MD [WordEngineering CD [WordEngineering git cmd git clone https://github.com/KenAdenji/WordEngineering git remote -v git remote set-url origin git@github.com:KenAdenji/WordEngineering.git git remote -v	

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using JQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultSetDiv div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers.
- What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
- The author extracts knowledge from data; by finding meaning to the word.
 - The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
 - The actionable insights take, so far, is to computerize the work.
 - The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
 - The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

- Empirical, find implication from the Bible?
- Theoretical, to determine a better way to doing work?
- Computational, is human labor replaceable?
- Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

- The Bible is our primary source of data.
- The author records information sources. This is either a person or media?

What you can do with Data

- Data Acquisition: The Bible is available on the Microsoft Access database.
- Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
- Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
- Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service, .asmx, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The .html presents the result in a human readable format.

Defining Data

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Privacy and Fulfillment
- Autobiography
- Style of Writing

- Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
- Qualitative Data: These are rarely measurable and are personal interpretation.

A brief introduction to Statistics and Probability

At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses.

(Microsoft)

Data

Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

Standard

The author imports complete, not NULL nor empty data, such as the Bible and the dictionaries. The author achieves data validity by constraining and restricting inputs. Since this is not a commercial work, Key Performance Indicators (KPIs) are not vital. The author references and is not tampering with authoritative Bible work; this helps to make sure correctness - accuracy, consistency, integrity. Timeliness is effectual in the single user data entry table, HisWord.

Unified Modeling Language (UML)

Class

The information which the author documents in this section of the paper; is the Data Declaration Language (DDL) and Data Dictionary, which is available at [GitHub.com/SQLServerDataDefinitionLanguageDDL_Repository](#). The Data Manipulation Language (DML) is too large to fit into the GitHub.com repository, and it is intellectual property. For the people that have access to the database, this private information is available by generating the database script. Contact is a primary entity, and it identifies the people and organizations that the author has a relationship with. These affiliations are family, friends, business, or public service links. Also recordable are their street, e-mail, web addresses, and telephone numbers. The author stores the various information exchanges with these people. A known date of birth, is for notification of the subject's birthday and relative age. To keep up with the privacy and sensitivity of this personal information, the author is not sharing this highly confidential data. The relationship between a contact and its related information is one-to-many; that is a contact may have multiple addresses. The other 2 types of relationships are one-to-one, and many-to-many. A URI is a link to a web resource that will add to the audience's knowledge. The author notes the address and the date, when the author became aware of this information. The content at an address is either textual, audio, video, or image? For URIs, the author rarely explicitly specifies the entire http protocol and directory post-fix, /. An incomplete address will not validate as an input url type. The author only records the [Wikipedia](#) address' at the place of reference since it is easy to associate the title with the Wikipedia address. Exists or does not exist? The `transact-sql` exists clause is useful for checking the existence of an object and if so, drop the object. This is applicable prior to re-creating the object. Please note that the metadata information is lost and the create or alter statement supersedes this approach. The exists clause is also useful in queries for determining the existence of a resultset. These classes are important asset for the anniversary triggers; in the Remember entries.

Database and Application Server Source Files

The author chose a multi-tier architecture for building the application. The database layer is made-up of tables, views, stored procedures, functions. The database tables are easily storable and movable to other storage media. The SQL Server's data definition language (DDL), now supports `DateTime2`, and its date range extend between January 1, 1 CE through December 31, 9999 CE. Some dates in [Wikipedia](#) mention these dates. The `HisWord_view` contains computed columns, which depend on entries in the `HisWord` table. The author extracts database information by building query statements. The application layer is the bridge between the user interface layer and the database layer. The application layer compiles into a single [Dynamic-Link Library \(DLL\)](#), called `InformationInTransit.dll`. The application layer consists of four namespaces, namely, `InformationInTransit.DataAccess`, `InformationInTransit.ProcessCode`, `InformationInTransit.ProcessLogic`, `InformationInTransit.UserInterface`. What the author builds on the server; is accessible to all the clients. What is the lifetime of this code, and what neutrality does it condone? The author started out with [GRABE II](#). The lines of code for the application layer are in the C# and embedded SQL.

Client Browser Source Files

- HTML5 (.html)
- JavaScript (.js)
- Cascading Style Sheets (.css)

The .HTML files will work in all browsers; that support AJAX. Most of the interactive web pages are reliant on JavaScript to work, mainly because they use Ajax to interact with the server. Each .HTML file, performs specific task, and may have a corresponding back-end associate, web service. The unobtrusive JavaScript file [9432.css](#) contains re-usable code that is not .HTML files specific. The .HTML files originally contained the .CSS specifications; however, the author now places styling information in a single external file, [9432.css](#). This will reduce the sizes of the .HTML files, and it helps to achieve a consistent user interface. The work of the author is interactive, and there are links to questions and answers pages. Most of the input entries are textual, but some are numeric, datetime, select options. The answers are mostly in tabular format.

(Vaibhav Verdhan).

A HTML document contains:

- Text content: The author informs the reader by describing His word.
- References to other files: The author refers to external files, such as UML images.
- Markup:
 - Elements: The anchor tag is the most specific.
 - Attributes and Values: The author benefits from the introduction of the customizable data- prefix attribute.

(Elizabeth Castro).

Cascading Style Sheets (CSS)

- Base Rules: A base rule is an element and not a class nor ID selector. The author does not use CSS Resets. The author issues element selectors for the `html`, `body`, `table` and `row`.
- Layout Rules: There are no layout rules, such as header nor footer.
- Module Rules: The table of content (TOC) is for page navigation that the author offers using class names.
- State Rules: A state rule is for toggling, such as using JavaScript to set the visibility.

(Jonathan Snook).

Web Services

There is standardization on the first .NET web services architecture, .ASMX.

(FrederikBulthoff, 2019) In most cases, there is a one-to-one mapping between the .HTML, .ASMX, .CS files, and the database relational table, Bible. Scripture. For simplicity and clearance of use, the .HTML and .ASMX files, support one operation. `GetAPage.html` is the workhorse for word utterances. `GetAPage.html` will send AJAX requests to multiple .ASMX files and operations. `GetAPage.html` is a cumulation of separate .HTML files. All the web services files support the SOAP request format and return JSON. JQuery accepts the POST, HTTP verb. The author stringified the data he passes to the web service in the body of the message. Errors are unforeseen, in the rare case, the author logs errors on the back-end, and display quantitative message. Security is lacking; this is permissible; since the author only queries information.

The web service code, .asmx, file is not necessary, does not have a place, when there is no server database access ([Numbers 19:2](#), [2 Chronicles 15:3](#), [John 15:25](#), [Romans 2:12](#), [Romans 3:21](#), [Romans 3:28](#), [Romans 7:8](#), [Romans 7:9](#), [1 Corinthians 9:21](#), [Hebrews 9:22](#)).

The Web Service Description Language (WSDL) is available, for example, by specifying the URI, `AlphabetSequenceWebService.asmx?WSDL`. To generate a proxy code, issue the following command; `wsdl.exe /language:CS /namespace:InformationInTransit.ProcessLogic /out:"AlphabetSequenceWebServiceProxy.cs" http://localhost/WordEngineering/Nordunion/AlphabetSequenceWebService.asmx?WSDL`. The Web Services Discovery Utility (disco) command: `disco.exe "http://e-comfort.epraintech.com/WordEngineering/Nordunion/AlphabetSequenceWebService.disco"` will generate the companion files; `AlphabetSequenceWebService.disco`, `AlphabetSequenceWebService.wsdl`, and `results.discomap`

A lecture of our beginning (Hafidha Na'im, 2016) The business rule is storable and processable in C#, (.cs), source files. The dynamic link library, (.dll), is callable from everywhere. `GetAPage.html` computes `AlphabetSequence` from a simple logic, which is easily representable everywhere. The `AlphabetSequenceIndexScriptureReference` is retrievable from the Bible, using non-complex SQL query. The `BibleWord` and `HisWord` reference, requires substantive query. The Bible dictionary returns dataset from the local database. The author can not make a business decision, to go to a web service, to retrieve what is locally readable.

Database Size

The `usp_DatabaseLogSize` stored procedure is for determining the size of the databases data files; and it is available at [T-SQL to find Data Log Size and Other Useful Information -SQL 2000/2005/2008/R2](#).

Database Size					
Name	Data Files	Data MB	Log Files	Log MB	Total Size MB
Bible	5	304	1	82	386
BibleDictionary	5	38	1	17	55
WordEngineering	5	138	1	1816	1954

Database Standard

Database Design

- The relational model is for storing information in tables.
- The author normalizes data using Object-relational mapping.
- All the databases are OLTP (Online Transactional Processing), not OLAP (Online analytical processing).
- Avoid deadlock occurrences by not permitting user database updates.
- All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
- Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

- The secretive `web.config` file contains the database access information.
- The `web.config` file does not explicitly mention the user login name nor password.
- Give access rights to roles, not to specific login identities nor user names.

Database Data Types

- Choose matching data types between the database and application layers.
- Only pick `varchar(max)` and `nvarchar(max)` as the data type, when it is essential to store large data.
- Prefer the decimal type, when recording the amount in currency rather than using the float type.

Nullable Type

- Consider defaulting textual data to empty string; instead of NULL.

Indexes

- Database changes lags with indexes.
- The field sequence in indexes should follow the frequency of usage.
- When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

- Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
- Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
- Use Camel casing for naming parameters and local variables.

(ABB Asa Brown Boveri)

Performance

The web page components practice of the author, include:

- Keep the count of web page components to a minimum
- Specialize input entries by using the most simple and basic component
- Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

- The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
- Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
- The author standardized on the `img` image format because there are few colors.
- In the year 2008, when the author tried to move away from `html` table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promise and Fulfillment
- Autobiography
- Style of Writing

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of efficiency:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use ~~CSS shortcuts~~ since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness! The author currently builds the entire table, and he sets the innerhtml of the div. For faster viability, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement.
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

-----
```

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [GitHub.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Besture](#)
2. [Attach](#)
3. [Snapshot](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common uri scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eobraintech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/41906110/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweighs the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.

The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.

An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.

The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promise and Fulfillment
- Autobiography
- Style of Writing

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.

This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var asciiA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (!IsAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - asciiA + 1;
    }
}
```

The cost of executing the for loop is $O(\text{word.LengthSize})$

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.

The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.asmx	Query(word)
AlphabetSequence.cs	ID(word)
	ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query_string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookahead scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.asmx	Query(word)	10
AlphabetSequence.cs	ID(word)	50
	ScriptureReference(int alphabetSequenceIndex).	10
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.asmx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 - git status
 - git add
 - git commit
 - git push
- Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
- Config: The web.config file contains the database connection strings; web services user-specific credentials. The system administrator at external locations may customize these information for their specific use.
- Backing services: These are external independent resources, such as the database, SMTP.
- Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
- Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables. The SQL Server encompasses services which are stoppable to do data files backup.
- Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
- Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
- Disposability: The author's take on expendable work includes the following:
 - Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
- Development/production parity: By first finalizing non-repetitive work, the author can now focus on specialization activities.
 - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: Dev/ops expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
- Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
- Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Promises and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

When

God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week ([Genesis 1-2](#))? Seniority comes first ([John 1:15](#), [John 1:27](#), [John 1:30](#)).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

Machine Learning

Our entirety chiefly pertains to Him.
Multilayer Perceptron (MLP)
DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DateDifference.aspx is a server-side C# ASP.NET web form.
The Remember's table computed columns are Transact-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.

Feature

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900 \wedge (2 \wedge 8) = 900 \wedge 256 = 1.932334983228891510545406872202e+756$.

Degree of Belief

In [GetAPage.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

Frequentist Probability

In [GetAPage.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ([John 19:30](#)) . [Specifications...is done](#).

Bayesian Probability

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and (8000 * 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous
The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.
Discrete
The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.
Categorical
The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary
The Testament column is either Old or New.

Ordinal
The identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame
The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), extensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature
The most important predictor columns are the Word, Dated, and ContactID.

Outcome
The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records
A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.
All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.
The dreams are re-collect-able, and recallable ([Numbers 17:6-8](#)).

I have made what I have spoken, ready

Web Design Fundamental

Business Model
The Bible fits man's perception. The author adapts to what he learns.

Project Management
The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture
How will this scriptural text bring new originality? What events of today, follow the text?

Page Design
What He brings to us, is a form of Him.

Content Authoring
How query means more ([Isaiah 43:22](#))?

Linking Strategy
This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search.
Supplementary information for a href attribute is meta-data and [whos.com](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:
1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext
The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

Base method call	Calling an inherited method which may have an override clause																				
Method overloading	Calling a method that exhibits the signature																				
Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.																				
Constructor method	To create and initialize a class instance.																				
Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.																				

Steer

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	<ul style="list-style-type: none">The proposed changes which will offer query customization?The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.

Term	Meaning
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

A type of us: is a kind of us? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.
HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.
Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.
There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1...H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. When did He promise generational growth (Psalms 22:30 ,Genesis 3:15 ,Genesis 12:7 ,Genesis 13:15 ,Genesis 15:13 ,Genesis 15:18 ,Genesis 17:8 ,Genesis 24:7 ,Genesis 26:3-4 ,Isaiah 53:10)?
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

(Bruce Clay).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.
This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively. What does God choose as subject? (John 15:15)?
The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: My Codename The first word is the BookID; the second word is the VerseID.
- 3-Words: Who is your manager? Crazy mister Martin, Mister Martin as a god, The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.
- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

Biblical generation - 40 Biblical years

- 2007...2008 Common Era - the author is 40 years old: the author mentions time.
- 2021...2024 Common Era - the biological mother of the author is 80 years old: the word recorded by the author is time relevance specific.

When I am doing this?

- Pre-condition (Hebrews 3:15)
- Assertion (Hebrews 5:8 ,John 20:17)
- Post-condition (Genesis 49:9 ,Revelation 5:5)

2024-11-13T19:12:00 Translation

1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (VS) Functional dynamic equivalence (thought-for-thought): BibleWord.html is the former.
3. 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

(Tim Wildsmith, 2024).

2025-10-09T20:02:00 Our opinion... among others, 2025-10-09T21:12:00 What I am doing... where will you find it (Genesis 4)?

- The author started his tertiary education at Central Piedmont Community College (CPC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
 1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
 3. Using the JavaScript fetch keyword, the author places webservice requests.

All the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...

1. 2025-10-09T20:35:00 places enormous responsibility on the author.
2. 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... it is okay.
3. 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
4. 2025-10-09T20:52:00
 - When the author attended University of North Carolina, Charlotte (UNC), to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
 - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible... reverse itself (Numbers 11:16 ,Acts 6)?

2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.

- 2025-10-09T02:01:00 This is where I want to be... if I am with you.
- 2025-10-09T02:10:00 Do you place a life... apart from you?

urlPerformance

1. [webpagetest.org](#) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself.

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions.

Microsoft SQL Server limitations include:

- Microsoft SQL Server database connection string ApplicationIntent=ReadOnly
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Verbinary columns can be large.
- Leading zero Zero five eight four one, versus (VS) 5841

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
 1. The SQL Server Management Studio table design menu option provides the most flexibility.
 2. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [URLMaintenancePage.aspx.cs](#) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 Can I be impartial as others?
 1. 2007-08-04 ExCop is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 To what extent do I know the culture of others?
 2. [Squint: The JavaScript Code Quality and Coverage Tool](#)
 3. 2018-01-05 W3C Markup Validation Service
2. Information Hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00
 1. During His Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
 2. 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload. 2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry

application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 Kogg is a writing tool... where is the speaker?

3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.

4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.

5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.

1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.

2. Application: A dynamic link library InformationInTransit.dll queries the database.

3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 and retrieve the compared God's word.

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

2025-07-31T13:25:00 What does the link provide?

1. 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.

2. 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.

3. 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) Availability? Static versus (VS) dynamic?

4. 2025-07-31T16:05:00 The frame tag embeds one HTML document within another.

5. 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?

6. 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?

7. 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

Software Engineering: A Modern Approach by Marco Tulio Valente. Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

- The user enters the word to interpret
- The system determines by using regular expressions the data type of the word
- The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
- The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

- The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
- The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
- The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
- The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
- The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

- WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
- Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 he relies on his own source of the truth

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming... Computed Columns

- 2025-05-17T20:16:00 Pure function, referentially transparent:
 - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Singularity of the Composition.
- 2025-05-22T18:10:00 Immutability:
 - 2025-05-22T18:16:00 Object-oriented technology serves change states.
 - 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 - 2025-05-22T18:17:00 As is of the need for database storage.
 - 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
- 2025-05-22T18:31:00 Practical need for recursion?
- 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINQ.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity constraints. The ActiGod table manages major and minor column relationships. The URI and HaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container:
 - In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
 - In 2007, when I was looking for work, I modeled the HaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13.)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 - Spelling corrections.
 - Verb grammar tense.
 - Synonym versus (vs) opposite.
 - Singular versus (vs) plural.
 - Deprecated.
 - Currency.
 - Locality, regional, custom, preference.
 - Anglicized.
 - Religion.
 - Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 - Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways... and when did he section ways?

2025-01-25T10:26:00 Mighty men of David? Arranged according to accomplishment? Men killed (2 Samuel 21)?

2025-09-08T13:03:00 What do you search by?

2025-09-08T14:05:00 Before you can search... you must have a query... parameter.

Five Ws	Example	Usage	Scripture Reference
Actor	Jesus Christ	Meta name? Author	Revelation 19:10
When	Sabbatical rest	document.lastModified	Daniel 9:2
Where	Jerusalem	id attribute	Daniel 9:2

2025-03-11T08:20:00 Data Type

2025-03-21T21:08:00 I am standing among the north-west seats. I was told that out of the 3 promoted people, 2 were made mayors. There is a path to the north-east. 2025-03-21T22:47:00 It is not the only thing. 2025-03-21T22:58:00 Was this all that was said?

Data Type	Software	Commentary
Varchar	GetAPage.html	This is the most prevalent, and earlier focused on.
Integer	GetAPage.html DateAdd.aspx Number15431.html	
Date	Datedifference.aspx DateYear2010Month09Day09.html	Jesus Christ refrains from declaring judgment day (Luke 4:19-21, Isaiah 61:1-2).
Time	TimeHourMinute44.html	12-hour clock, so far. The time of the day is emphasized; the ninth hour is 2025-03-22T00:12:00 explicitly mentioned (Matthew 27:46).
Percent (%)	BiblePercentage.html IAmSeventyPercent70SheelOfAmdahAFix.html	and there died the third part of the creatures which were in the sea, 'even' they that had life; and the third part of the ships was destroyed (Revelation 8:9).

2025-03-17T11:47:00 Side with church... or side with the children? John 7:51, Genesis 21:9, Genesis 27:41-7?

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webservice: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example:

```
SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE 'X[0-9]X'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word LIKE 'X[0-9]X'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
) PercentageOfTotal
FROM WordEngineering..Hisword
```

InfoType	CountInfo	PercentageOfTotal
Alpha	111590	93.748811989146
Numeric	851	0.714879747313
NULL	6000	5.344308263539
Total	119041	100

- data-ssn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language (Acts 22:2).
 - Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
 - In the WordEngineering database, TheComingAdventOfTime table, contains learned spoken language translations.
 - In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
- In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession.
- When?
 - 2025-03-01T07:13:00 Microsoft Word and past-tense. Mark Boelens of Electronic Data Systems (EDS) and the verb, will, future reference.
 - 2025-03-01T07:11:00 Online transaction processing (OLTP)... Online analysis processing (OLAP).
 - How does the computer equip us? 2025-03-01T07:06:00 Improve on paper, the old writing medium?
- There is a datetime attribute which is only viewable inside the HTML source. Metadata? 2025-03-01T07:24:00 Microsoft made the assumption... to automate mark-up?

2025-02-19T12:20:00 What I offer of the truth?

- Command-line interface (CLI)?
- No .NET Core support
- 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
- The author does not make use of Microsoft SQL Server synonym support
- The author rarely uses Microsoft SQL Server soundex support
- Only English, there is no multi-lingua support
- Limited Bible versions, dictionaries and commentaries
- Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
- Microsoft SQL Server will support Regular Expression (Regex)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, taborder.
- 2024-10-04T09:12:00 As much as possible, initially accept the default values, with, for example, the date columns. You may adjust and be precise, later.
- 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY_INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T02:44:00 This is what I am unable to do with the graphical user interface (GUI)... this is what I am inspired to do. 2024-10-05T02:49:00 Its interface... remains our reliance. 2024-10-05T02:52:00 I am equipped to doing the same... as I realize.
- 2024-10-05T02:54:00 This point... must allude to one. 2024-10-05T02:59:00 Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine pretends to do? 2024-10-05T03:01:00 God has done His part... where is my part?
- 2024-10-05T03:05:00 What do I need the other person... to do?
- 2024-10-05T05:03:00 Read after. 2024-10-05T05:10:00 (J Kings 5:5)? E. F. Codd in 1970, proposed the relational database.

2025-02-23T16:30:00 Company.osi data... osi yemi.

- 2025-02-24T00:52:00 In the center-east is a wheel.
- 2025-02-24T06:35:00 Ending lane, Feminine.
- 2025-02-24T06:55:00 2...6

- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob.
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00...2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar.

2025-02-10T06:22:00 In Isaac shall your seed be called. I am on a narrow road in the north-center. This is either Bing's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing tight-fitting white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running from the center-west, upper, and turning towards the south-west. There were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

Datetime	Word	Commentary	World Event	Place	Person	Scripture Reference
2009-09-30T10:32:00	Mister Adeniji		Ken Lewis announces his resignation from Bank of America (BoFA)			
2017-10-18T10:00:00	Olohun ni mo fi be... wa si biyi.	God I beg you with... come here.	Kenneth Chenuault announces his resignation from American Express (AmEx)			

Work... holiness

The Exhaustive Concordance of the Bible, generally known as Strong's Concordance, is a Bible concordance, an index of every word in the King James Version, constructed under the direction of American theologian James Strong. Bible dictionaries and commentaries, Terminology... characterization. How do you tweet? Frequency, grammar, composition, ranking? AlphabetSequence builds on Bible verse separation. How representative am I of my people (Philippians 3:5)?

Work	Holiness	Scripture reference
Ken Lewis of Bank of America (BoFA)	Kenneth Chenuault of American Express (AmEx)	
The fall of man	Cain and Abel	Genesis 3, Genesis 4
Census 20 years and older	Priesthood training commences at the age of 25 years old, and priesthood service at the age of 30 years old.	Numbers 1:3, Numbers 8:24-26

2025-03-28T19:12:00 What we are receiving. (2 Samuel 12:24)?

- At University of Ife, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Oloyede started driving us to school.
- In Lagos, Bentiloluwa graduated from Abati Nursery and Primary School to Ikaja Grammar School, prior to my twin sibling and I are attending Abati Nursery and Primary School.
- I lived with Romulo Lira prior to Romulo Lira graduating from Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC) and Romulo Lira returning to his home country, Venezuela.
- I was deported to Nigeria, shortly after the passing away of my adopted mother, and shortly before the separation of Major Lawal from Aunt Taiwo.
- Bentiloluwa and Ademiloluwa, Uncle Demola and Damola, You must be involve... for someone to use you. 2025-03-28T18:30:00 I consider father and son relationships. What we are... is how we are made after. I started tutoring computers to Hajara Adeola, a French lecturer, and wife of Fola Adeola, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritic alphabets.

(Mustafa Suleyman, Michael Bhaskar, 2023-09-05).

2025-09-14T09:24:00 Contemporary.

- Creation (Genesis 1:16, Genesis 1:26,Genesis 2:4, Genesis 2:16-25, Genesis 3:15-16, Hebrews 11:4)
- Born King of the Jews (Matthew 2:2, Luke 1:19, Luke 1:43-44)
- End times (Revelation 5:5, Revelation 21:23, Revelation 22:2, Revelation 22:8-9)

2025-09-14T13:07:00 What exclusively I use? 2025-09-14T17:40:00 Naming versus (VS) Called? Referred

- When: Called — In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)
- Who: Naming — God, man (Genesis 1:1, Genesis 1:26, Genesis 5:2)

A continuous... following

- Bible groups is the arrangement: Pentateuch, major and minor prophets, Gospel, Pauline Epistles, General Epistles...
- Doctrine of Imminency? Imminent
- Apocalyptic
- Word schedule
 - Prophecy and fulfillment
 - Dream or vision... interpretation
 - Speaking in tongues or unknown language... translation
- Old and new
- Everything Has Its Time (Ecclesiastes 3:1-8)
- Anniversary

2025-01-31T08:51:00 What title... we are befriendng?

- My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
- My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPCC). My English speech oral communication classmate.
- The first independent self-inspired software written by the author is Kowe.c for the Yoruba language.
- My first domain name was commonpeople.org
- The first website I published and contributed to was Christianity.com
- I am known for the AlphabetSequence algorithm
- The first book I wrote is titled Ocean Senior
- The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece T-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east. 2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Bible arrangement: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible. 2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions. 2024-07-12T21:22:00 Making a protection... making a projection.

What is best believable (Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours (Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13)?

- In the HisWord table, the order of belief is:
 - Scenery
 - Commentary
 - Word
 - System generated: DateTime and identity columns
 - Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

What true identity lies apart?

- The Messiah
- The King

How my organization is the best?

- Alphabet places, word spelling, and sentence composition
- Arabic numbers systems

What measures forever?

The author is linking words spoken to related verses and dictionaries.

- BibleReference uses whole numbers for representation.
- Who, what, when, where, why?
- Prophecy and Fulfillment: Keyword Variation

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
------	----------------------	----------------------------------	------------

- Autobiography
- Style of Writing

Keyword	Find what	Replace with	Scripture Reference
Location	Egypt	Promised Land	Acts 7:3-7
Vocation	Ruler and a judge	Ruler and a deliverer	Acts 7:10, Acts 7:27, Acts 7:35

What is remembrance...associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

Keyword	Commentary												
Volume	sp_spaceused @objname = 'HisWord'												
	<table><tr><th>Keyword</th><th>Value</th></tr><tr><td>Rows</td><td>115689</td></tr><tr><td>Reserved</td><td>28296 KB</td></tr><tr><td>Data</td><td>17104 KB</td></tr><tr><td>Index_Size</td><td>9648 KB</td></tr><tr><td>Unused</td><td>1544 KB</td></tr></table>	Keyword	Value	Rows	115689	Reserved	28296 KB	Data	17104 KB	Index_Size	9648 KB	Unused	1544 KB
	Keyword	Value											
	Rows	115689											
	Reserved	28296 KB											
	Data	17104 KB											
	Index_Size	9648 KB											
	Unused	1544 KB											
Velocity	The author does manual data entry.												
Variety	At the beginning, the author parsed XML files into textual relational tables.												

(Jack Hyman, March 2024).

Data Types

HisWord table
Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly) or Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth (Acts 7:20)
- Family (Acts 5:31)
- People (Hebrews 3:9)

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- What I am good at doing...as what he is good at making (Genesis 41:32-57, Genesis 1:1-1:2, Genesis 4:26)
- Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
 1. GetAPage.html serves as a gateway to specialized links.
 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality (Daniel 9:24)?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... [Why I do it?](#)

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences...companion?
- Experimenting...as the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. [Stipulates?](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time
 - Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our followings.](#)
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reargumentation may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

[Our connecting our trade \(1 Samuel 25 \)](#) - To be conformable of age.

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
 4. GetAPage.html HisWord section: Time variant
- For a period of time...we are as we seem we are? What needs a success (Genesis 4:7, Matthew 14:8, Mark 6:25)?

(John Calvin Maxwell, 2023).

- Style of Writing

The drawback of the relational approach?

- Centralized versus (VS) distributed storage?
- Unique foreign key? Master-child? Hierarchical?
- Duplicable
- Maintainability
- Expertise and familiarity? Isolated.
- Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
- When is cascading...full enough?
- Databases may reside inside multiple files.
 - Although databases may store different file types. This wasn't the original intention.
 - Databases are abstractions.

Lacking expertise?

- Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
- Quality Assurance (QA): Some changes break existing code.
- Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
- Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00
What substitution...we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

What did He find... as useful

What did He find...as useful (Matthew 21:42, Mark 12:10, Luke 20:17)?

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: <ul style="list-style-type: none">Client/Server autonomy. Client embedded-SQL.<ul style="list-style-type: none">The datetime column defaults.The identity column is auto-generable.Computed column: What can the computer do for us?
Microsoft sqlcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenadenji, kenadenji.wordpress.com
Refer to dates.	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

- The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was ile eyan mi ion to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13
Birth place	Matthew 2:6
Matriach's origin	Genesis 25:20, Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day, as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order. Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (1 Samuel 3:19)

For	Against
Prudent	Disposable
Hyperlink	Diversion
Quality Assurance (QA)	Prone to error

Typing Assistant

What are we replacing person with? Jeremiah 31:15. This is a long trend of disruption... word resonances with AlphabetSequence (Index, Scripture Reference). These are also A record is insertable only once. There may be multiple updates.

For	Against
Man	Machine

Numbers in themes

- He expressed good as how He felt (Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:12, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22).
 - He expressed start and end of time (Genesis 1:3, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:19, Genesis 1:23, Genesis 1:31, Genesis 2:1-4).
 - King of the Jews (Matthew 2:7, Matthew 27:11, Matthew 27:29, Matthew 27:37, Mark 15:2, Mark 15:9, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:33, John 18:39, John 19:3, John 19:19, John 19:21).
- To be actual things
- Pronunciation (Luke 1:13, Luke 1:60)
 - Application (Luke 1)
 - Spelling (Luke 1:63)
 - Reference (Matthew 11:14)

In telling the future, there are two parts: prophecy and fulfillment (Revelation 19:10). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause

(Kevin Kline, Regina O. Obe, Leo S. Hsu)

logparser

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
 2. A project cost is its work hours. A work day is 8 hours. A work month is ≈ 176 work hours. A work year is ≈ 2000 work hours.
 3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
 4. To predict productivity? Re-use.
5. Metric:
- Executable Size Metric: is the code largeness. It does not fully consider the unutilized array data. It includes library code which reduces complexity. It is not a language-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, `wc` command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Reaction Point Analysis (RPA): It looks ahead and estimates the amount of work a program will require. It details the inputs, outputs and basic computation. RPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde)

Word speaking. What did He use?

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(DeLean Tolbert Smith)

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.

- Processes and Fulfillment
- Autobiography
- Style of Writing

Strategy	Description
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

To know my part as His?

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to regurgitate the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the From/Until Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partially, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro ([Daniel%2012:4](#))

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ([Revelation 3:7, Revelation 5:5, Revelation 22:16](#)). Joseph ([Genesis 37:2, Genesis 37:9, Genesis 37:19, Genesis 39:12-18](#)).

Why we Accumulate the Same ([Matthew 26:53, Revelation 9:16, Revelation 7:4-8](#))

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3, 2 Samuel 11:4, 2 Samuel 12:24, Ruth 3:1, Ruth 3:8, Ruth 3:18](#)). Knew versus lay.

Wanting a Member of...

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.

Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24
Field	Cain and Abel	Genesis 4:8-4:13
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?

Word	Scripture Reference
Work word	John 14:10
Charity	
Timeliness	Deuteronomy 18:22

Word	Scripture Reference	Commentary
Naming	Genesis 2, Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?

Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelling of the last ([Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14](#))?

The author will want a conciliation with time?

AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ([Genesis 3:8](#))?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/KenAdeniji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

Lessons Learned

- Eaten word: Leading up to 2008-03-07, I was not fully recording the word of the LORD (Job 23:12).
 1. I used to God for a word? To realize where my opinions lies?
 2. Familiarization with data.
 3. I previously stored your work in a database. You worked on a text in .html files. 2002-10-23 You chose to transfer to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work (Jobna 22:11.)? One of Myself offering as many as I use?
 4. Words heard between waking up and walking outside are written in the author's backpicks notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him.
 Putting Him into words.
 My time away from the family, United States of America (USA), may have helped me gain independence.
 In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life, except ours?
 Do I decide the truth? Do I choose the truth?
 The importance of the Word is how it is made.
 I'm dated. God Convinced me, I do take the plight of the people to heart. MacArthur BART Station, Bay Street Emeryville Blm.com Fire Alarm Panel 8. FDC Building A 5604-5634. To mean, I decide the story?
 How did they handle the Messiah (Luke 1:38)? Crossing the divide? To need someone like I (Genesis 15:2)? You know Me as capable of you? (1 Samuel 17:36, Romans 6:19)?
 The Yordna sentence. Ma fogban di... I will wisdom to block it.
 5. No difference in communion.
 How useful you have been in determining wisely? How diversification the changes? (Genesis 4:1)
 The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
 Difficulty level: Our work is divisible into writing the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The commentaries added, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What am I able to do how He types me. As I wrote this paragraph, I am contemplating with my own words and I sought assistance from Him. A step to do is never forgotten of the LORD. Whose obscurity has He solved?
 What can we be, in the midst of a people, certaining to God (Matthew 19:12)?
 What do you know how to use, as you desire yours?
 Rich of God, Reach of God.
 How many are others (Daniel 11:4) ?
 I have to present God, as I am allowed to be.
 How I want to be; how He wants to be? When does the word prompt the answer? (Acts 10:11).
 People like to add more to do the word? I do my word? My twin sibling calls my word, data entry, I record it all, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I wanted to personally store my information, or look for a cloud provider? Build or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for an instant. What is on the hard disk may be lost when the computer does it or there is a virus and intruder attack. How do we resume our work (1 Samuel 25:28)? Needs to be met?
 The author will record the publishing and receipt.
 An identifier and possibly foreign key is a variable null, empty, when it is unknown, non particular, or it associates with the author.
 I didn't shift, until the movement (Acts 1:6).
 Did he ask you to do it? (John 8:44).
 By Him about Him (Genesis 1:4, Genesis 4:26).
 Timon, antioch, (Matthew 26:45-46, Mark 14:42).
 Could you need one part of Me and not deserve another? Biblical Calendar... Gregorian Calendar.
 When can we do without AlphabetSequence? A place in the Bible justifies the word.
 O mo Bunni, Clari re, You know Bunni, Clari is this. We are inside a building and we heard that food is being giving away at West 1. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center.
 04:27 Dzyu sleepy, 20:13 Beni or Buki, I forget what? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
 What past the time (Isaiah 6:12, Luke 4:19)?
 What is in use?
 That chooses I, When I read the Bible, I adapt to the role I take.
 Relative to the word (2 Peter 3:5).
 If the words do not join? Consider separating or putting the lesser word in the commentary column.
 Do I determine I know?
 Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
 If the word and scenery do not fit exactly, it may be a larger scenario.
 When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
 What I have learnt from Bill Gates, through using the software from Microsoft.
 Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
 Relational table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 What does can we as little the work?

2023-01-22T11:37:00 However, time substantiated itself? The author suggests that Baptism of the Holy Spirit (Acts 1-2), is achievable in individual location as a prestage to the 3rd temple in Jerusalem.

Keyword	Scripture Reference
Place of Residence	Acts 1:4, Acts 1:8
Sign	Acts 1:3, Acts 1:5
Place of Worship	Acts 2:1
Speak with other tongues	Acts 2:2-2:11
Worshippers	Acts 2:5
Leader	Acts 2:14-2:47

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO)

Lifecycle

Lifestyle	
Period	Commentary
2000-10-05	Registered the WordEngineering trademark.
2002	Commenced recording the word from the LORD in the Microsoft SQL Server relational database, introduced the AlphabetSequence algorithm, and started developing Biblical applications using the Microsoft .NET and the ASP.NET framework, and coded with the C#.
2015	Migrated to HTML files and web services using AJAX. <u>What is resisable at home is resenet abroad.</u> This will continue the separation of duty approach. The benefit includes making accessible our work; focused user interface renewal. Open standard and performance gain.
2025-07-26T19:17:00	There is a table structure for repeat which would repeat the information in the preceding record. There is also a table structure for parable.

Development History

God doesn't use inform. (Psalms 81:5, John 16:30). He mandates

Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.
Programming Style	This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.

A Causal to Hearing Words

He said and He did. Word work (Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at [Ohlone College](#), in the Fremont and Newark campuses.
- Read books and magazines at [Barnes & Noble](#), [Borders](#), [Walden Pond Books](#), [Wal-Mart](#) and public libraries.
- Listen to Christian commentaries.
- Sexual abstinence and celibacy.
- Solitary living at [Newark City in California](#): [Patmos](#).
- Fast, everyday, only ate, once a day, in the evening. I ate [Nemura Holdings](#) Kokuho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revolution.
- I was living on a meager income ([Ecclesi 2:15-25](#)).
- Only familiar with [Case-based Reasoning](#) and [Use-Case](#).
- Alphabet=Sequence is [abecedary](#).
- Set-based: Effort to record everything [Bible code](#).
- **This is a man: he wanted to know about his favorite.** ([Daniel 1:3-21](#), [Daniel 9:23](#), [Daniel 10:11](#), [Daniel 10:19](#))?
- **Personalization of Realization** ([Proverbs 25:2](#))?

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following the rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates

(Petr Travkin)

(Unified Modeling Language)

Common Structure

A model composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.
 A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.
 Comments do not impact programmatically, they only serve as guides for readers.
 A directed relationship may exist between a collection of source and target.
 A namespace is a container separator.
 An import facilitates the admittance of an external namespace.
 Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.
 A constraint represents the range of valid values that a member may have.
 A dependency replicates changes between the supplier/client.

- A **back** of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime.
- A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators.
- An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.
- A Boolean is either true or false and it is normally used for validation.
- A real is a number with decimal relevance, such as ratios and percentages.

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHelpers.Exact](#). The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable](#). [IReligiousServerManagementObjectsSMO](#). A child may override a parent's virtual member.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.

Signals and receptions are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.

Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-behind.

For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule.

In C# version 9, a method may offer a covariant return type.

2025-09-03T21:12:00 What is the immediacy of God's future?

2025-09-03T21:27:00 What does God bring to pass as Him alone? Begotten Son, creation, covenant, passover, commandment
2025-09-03T21:38:00

1. Declare the word (Ezekiel 40:4)
2. Understand the matter, and consider the vision (Daniel 9:23)
3. 2025-09-03T21:41:00 Preach the word (2 Timothy 4:2)

2025-09-04T05:58:00 Teaching from? The Bible, education, experience, volition, Holy Spirit.

Nearest for bandwidth, most especially video? Most visited, popularity ranking?

2025-08-21T21:01:00 What partnership... did He share?

1. Joseph (Genesis 39:9)
2. Angel Gabriel (Daniel 10:21)

2025-08-21T14:21:00 When assume there are the same as himself... one see himself. (Judges 11:7) Did you not thrust me out of my father's house... saying I am the son of a harlot?

Kentucky Fried Chicken (KFC) and Taco Bell (TB).

3 pieces of chicken,
coleslaw,
mashed potato and gravy,
drink,
biscuit.

At the intersection of Taylor Street and 17th Street.

1. Joseph: (Genesis 41:33, Genesis 50:20, Genesis 50:25)
2. Daniel: (Daniel 2:37-38, Daniel 2:49, Daniel 12:13)

2025-07-31T11:52:00 What appearance as the same?

- Pharaoh's dream of 7 years of plenty followed by 7 years of famine in Egypt and worldwide interpretation by Joseph ([Genesis 41](#))

2025-07-17T12:54:00 How as clear as possible

- The inspiration for my work is Bible studies. Chuck Missler of the La House preached the Abomination of Desolation will occur in the midst of the week after the enforcement of the covenant, 3.5 biblical years, 42 biblical months, 1260 days.
- 2025-07-10T21:25:08 I rode the AC Transit bus 1818 route 232 bus from the intersection of Paseo Padre Parkway and Fremont Boulevard to the intersection of Paseo Padre Parkway and Sward Drive. I saw Audrey Thibaux and Romain Thibaux on Sward Drive between Roussillon Avenue and France Road. Romain Thibaux said always taking your note.

2025-07-12T06:24:00 Epoch timestamp: 1752278400 Bringing... such... as myself

- Technology trend: Microsoft Windows and Microsoft Office which offers a common interface, menu layout and consistent labeling. Client/Server. World Wide Web (www) hyperlink. Web services.
- Testimony: I Am taking you on a journey... Out of Egypt have I called My son ([Genesis 1:2](#)).
- Countries: Passage of time.

2025-07-11T09:42:00 What can I find... as part of me (Genesis 6:3)

2025-07-10T01:30:00 My adopted father said my twin sibling and I do not fight. What the feeling are... as I know alike?

2025-07-10T03:34:00 Decler Mendez said I attended Central Piedmont Community College (CPCC), and my twin sibling attended Johnson C. Smith University (JCSU). I unsuccessfully tried to locate either the GetAPage.html or AlphabetSequence.html page for Decler Mendez to view.

2025-07-10T04:32:00 There was a written text that included the comparison between extensible markup language (XML) and the other data structures. My twin sibling answered data bindings shared by other people. 2025-07-10T05:04:00 Data storage versus (VS) data arrangement. 2025-07-10T07:20:00 What did he assure... he will lead of? 2025-07-10T10:07:00 Beware the yeast of the Pharisees ([Matthew 16:6](#)). 2025-07-10T11:50:00 Teresa Keng, Milk & Honey Cafe. Red in the hallway... to the lobby. [This day is this scripture fulfill in your eyes \(Luke 4:21 \)](#).

1. 1983-1988, Charlotte, North Carolina (NC), United States of America (USA)
1. During my 3 Associate degrees' graduation ceremony, Doctor Richard Hagemeyer asked if I would like to go to Africa?
2. At Central Piedmont Community College (CPCC), I tutored in the personal computer (PC) laboratory with Laura Lawhorne and her African-American female supervisor.
3. My first contract was at Sunhealth Corporation.
4. At Central Corporation I was a technician with 2 African American females, that probably attended school together, and then lived together. The telephone operators were mostly African American females, including my stepmother
5. At McKee Real-Estate, I was contracted to develop an R:Base 5000 SGL application.

What part of me?

1. When making man, God made some choices:
 1. Form: In His image
 2. Location: Garden of Eden
 3. Vocation: Caretaker

4. Helper: Eve
5. Model: First man, mother of all the living.
2. How can we resemble His use?
1. As a software engineer, I replicate my work.
2. When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
3. I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
4. I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
5. Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike (Exodus 2:19)?

There are duplicates in the Bible.

Type	Commentary
Name	<div>Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2 Samuel 12:24 - 2 Samuel 12:25 - 1 Samuel 25:5 - 1 Samuel 25:25).</div> <div><ul style="list-style-type: none">Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes namesName changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle PaulName misspelling, Rahel for Rachel. A rewording of your view.Referring to people with their alias, sons of Zebedee, sons of Thunder, BoanergesMultiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple</div>
Historical Account	<div><ul style="list-style-type: none">Deuteronomy - RemembranceMonarchy - Kings versus ChroniclesGospels - Our LORD's, life storyApocalyptic - Daniel versus Revelation</div>
Quotation	<div><ul style="list-style-type: none">Retelling previous eventsProphecy fulfillmentAnswers based on scripture</div>
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12:5

These duplicates may introduce statistical error and require clarification.

2025-05-13T16:52:00 What did He start... that I improve

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 What apart I have set as necessary?

solist.ai/onboarding?utm_source=new-tab&utm_medium=firstfox-desktop&utm_campaign=native-article-cards
Hong Kong was driving to Albertsons Lucky, Brooklake. Hong Kong drove me from their house to 99 Ranch Market.
I cut my finger nails. I shaved my beard. I cut my hair.
Is Koko still with you? Ni mi se si he no, is Koko still with you? That is why I don't see it like that anymore. 2025-05-06T17:09:00 (what) What is beyond a place? 19:09 (color to show) 2025-05-06T18:52:00 I am referring to my conversation with Benitoluwa about Ademiloluwa. I had a run-in with the police... which was fruitless.

1. The Holy spirit (Genesis 1:2, Genesis 2:7, John 1:33, John 16:7, 2 Thessalonians 2:7, Acts 1:4-5)
2. Man (Genesis 1:26-31, Genesis 2:18-25, Genesis 49:26, Matthew 2:23, Revelation 13:18, Genesis 41:34-36, 1 Corinthians 7:1-9, 1 Corinthians 7:36)

2025-04-30T04:03:00 Timeline of WordEngineering

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mappings.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

1. My counterpart has yours.
2. The tool a man has render as Himself (John 16:7, Matthew 16:18, John 4:14, John 6:35, Matthew 26:17-19) ?
3. What did they produce (Genesis 4) ?
4. Sociality of view (Genesis 12:11, Genesis 13:10, Genesis 22:14) ?

1. 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
2. 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 What attribute the word? Autobiography... tying it into Biblical event.

www.JesusInTheLamb.com

Saint James the Apostle Catholic Church. 34700 Fremont Boulevard. At the intersection of Fremont Boulevard and Ferry Lane. On the 3rd day, he lifted up his eyes. 3rd block from east. 5 poles east. 3 poles west.

1. Who? - Jesus Christ (John 8:56, Genesis 22:13)
2. What? - Passover Lamb (John 1:29, Genesis 22:8)
3. When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations (Matthew 1:12)
4. Where? - Golgotha (Matthew 27:33, Mark 15:22, John 19:17)
5. Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission (Hebrews 9:22)

2025-04-05T09:04:00 Composable Design

2025-04-05T13:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. How will I dictate His use as a person?

(Juval Löwy of IDesign, 2019).

2025-04-24T11:20:00 What did he see... as on their side?

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophetic attempt to understand technology, and its application to Christianity. The only date observed at the beginning was the calculation of the crucifixion of Christ. This is not

- After the author completed his Bachelors degree, the author did technician work in separate telephone call areas, and the upgrade of Borland Turbo C language software that prints labels for the offsite storage of reel tapes.
- After the author completed his Master's degree, the author did database replication between the central database and remote databases.
- The author's doctorate study was based on intelligent appliance security and storage.
- 2. 2024-12-14T15:48:00 Scalability (Genesis 41:34-36, Genesis 41:47-49, Genesis 41:53-57)
 - When the contract of the author was terminated where he first did database replication, the author commenced a lead software engineer role in a client/server trainee and apprenticeship project.
 - The author initially used a Sybase Powersoft Watcom Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE).
 - The Polish heart attack survivor project manager restricted workers to 40 hours a week.
- Do you not believe I will provide your need?
- 3. 2024-12-14T17:23:00 Security: What do we have as sufficiently giving. (Daniel 6:22)?
- 4. 2024-12-14T18:25:00 Agility: The idea of the author is not... Comprehensive of people.
- 2021-01-04... 2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)
- Is the date before or after?
- 1. 2024-12-14T16:33:00 What we have of the past?
- 2. 2024-12-14T22:15:00 How can we prove you wrong... we are right. (1 Samuel 22:2) ?

(Haishai Bai, 2019).

2021-01-04 14:22:14.250 Relational database Will target Tuesday December thirty first (Daniel 12:13, Matthew 22:41-46, Matthew 4:7, Deuteronomy 6:16) ? 2024-12-31

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering (Daniel 9:2). Is there a date? Not null.
- Calculate the date difference between the beginning of the prophecy and the ending of the prophecy (Daniel 9:24-27)
- 2021-01-04... 2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)
- Is the date before or after?

2024-12-13T14:00:01 What I have that is partial to me (John 16:7, 2 Samuel 7:15, Luke 18-13) ? Holy Spirit

- You are still partial to self

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest (Matthew 22:36-40, Matthew 18:1-4, Matthew 23:11)
- New (John 13:34, Hebrews 8:13, 2 Corinthians 5:17)
- Z...1 (Genesis 2:24, Genesis 41:25)

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit (Luke 24:49, 2 Thessalonians 2:7)
- Time representation (Matthew 24:14)
- Trade of man (Revelation 13:16-18)
- No changes to the Word (Deuteronomy 4:2, Revelation 22:18-19)
- End-times (1 Peter 4:7, Genesis 6:13)
- Recompense (Job 42:10-17, Job 1:2)

Entity-Relationship Model

2024-11-05T02:41:00 Who's personality... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does? I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To delegate the use? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, eventually, SQL Server is a service.
2. 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part... to follow the truth. 2024-10-28T06:06:00 What issue has He contributed... that should be my outcome? Initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no.

The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKley Real Estate, I worked on a R-base 5000 application.

These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 What is suitable... for replacement?

Initially, I registered the trademark, WordEngineering. After offering me a work, Ocean Senior, I afterwards, was issued the domain name, www.JesusInTheLamb.com. (Revelation 21:23, Revelation 21:2, Revelation 2:17). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walthers. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Him? With HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham (Ezekiel 33:24).
- Consistency with the Bible (Genesis 25:23)?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/qsrc/mediacore/mv1feRhs.aspx>
- 2019-12-07 http://google.com/books/edition/Design_for_How_People_Think/UFSODwAAQBA7IenIqBQw=1&printsec=frontcover

Separating realizable

- Baptism of John... Baptism of the spirit (Acts 2:1)
- Dead... resurrection (Hebrews 11:12)
- Ishi, husband (Hosea 2:16)
- Antichrist (2 John 1:2)

No separation... in bonding. What did He ask for unity in? Land, man, Man, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel (Genesis 2:8, Genesis 2:15, Genesis 3:23-24, Genesis 4:10-17)
- Jesus Christ: Church - Peter (Matthew 16:18)

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in. (Numbers 3:8, Numbers 24, Romans 1, Acts 13:38)?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years (Genesis 15:13, Acts 7:6)
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau (Genesis 25:28, Genesis 27:5, Genesis 28:22, Genesis 31:38, Genesis 31:41)
- Children and grandchildren: Benjamin, Joseph, Judah (Genesis 42:36, Genesis 43:14)

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27, Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1, Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?
- Ratio percentage versus (VS) quantity? At 3 for 9? GroupPics.com
- In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness (Daniel 5:5, Daniel 5:11, Daniel 5:26, Daniel 5:30-31, Genesis 4:3, Genesis 4:8, Genesis 4:12-14)
- Quantification (Daniel 6:5)
- Original self (Daniel 5:17)
- How we let Him know. (1 Corinthians 5:7, Acts 23:5)?
- I want not a...
- I want not a... user meaning there are...
- A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming (Genesis 2:19-20, Genesis 2:23, Genesis 3:20, Genesis 4:1, Genesis 4:25-26)
- Reverence (Genesis 4:26, Exodus 20:7, Deuteronomy 5:11)
- Interpret (Genesis 37:9, Hebrews 11:23-30, Daniel 5) to each entirely its own.

2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.

1. 2024-07-12T06:25:00 How much period... we have the same?
 - Teles integrates programmable script and audio recording. MP3 is an industry standard.
 - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give description?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Axioms
- Background
- Conclusion and Fulfillment
- Autobiography
- Style of Writing

- The continuation of myself... is all I am allowed.
 - One side... the decider.
1. IBM PC compatible:
At Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
- The computers were IBM, Apple, Radio Shack
 - The programming languages were Microsoft's Basic and Borland's Turbo Pascal
 - The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE
2. IBM employee:
- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:
- In Sydney, Australia, the author received an end-of-year gift of wine from IBM- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How-to verify the work of the spirit?

- Is it compatible with the Bible (John 10:30, John 17:22, 1 John 5:8)?
- Is this a link (Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 5:3)?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a... result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect...out of the Bible (Daniel 5:31)?

1. When is the Bible specific about time (Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54)?

How admissible is the word (Genesis 41, Daniel 2)?

GetAPage.html depends on the word.

What did I fit into a place?

1. Ark of the Covenant
2. Temple
3. Jerusalem
4. Judah
5. Israel

What did He see Himself as?

1. Joseph (Genesis 37:9)
2. Moses (Acts 7:25)

Robert Law Joss

- 2024-06-05T04:49:00 Technically...reliable? Maturity...saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we deserve as our own...what do we reserve as others?
- 2024-06-05T04:49:00 Are we doing...the part of God? 2024-06-05T04:49:00 What was I working for? 2004-09-16 Bob Joss said North Atlantic Treaty Organization (NATO). 2024-06-05T05:07:00 Hmm. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can. Is America a godly nation? Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering>git push fatal: unable to access 'https://github.com/KenAdenji/WordEngineering/': Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The_Network_is_the_Computer 2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 faeces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55.053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What offering I have for people?			
Speak face-to-face	Dream or vision	Commentary	Scripture Reference
Moses	Other prophets	Leader	Numbers 12:6-8
Jesus Christ	Other teachers	Authority	Matthew 7:29

What does He involve?		
Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many (Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2)
- More at the same (John 15).

When did Israel seek no region...as its own (Acts 1:6)?

1. The prophets
2. New Testament
1. The Gospels: King of the Jews, the disciples
2. Pauline Epistles, General Epistles
3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have stopped using people as Myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task...divulgable?

2024-11-20T05:38:00 Ordering

2024-11-20T07:59:00 Do I make a separation between physical and spiritual?

- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13)
- Levitical priesthood (Hebrews 2:14, 1 Samuel 3, Numbers 2)
- Sitting on a high place: Humble... exalt (Luke 14:7-11)
- Baptism: Washing of feet (John 13)
- Marriage: Younger before the firstborn? (Genesis 29:26)

What will count forever?	
Word	Scripture Reference
Believer in Jesus Christ	John 11:26
Kingdom of God	Daniel 2:44-45
Charity	1 Corinthians 8:1, 1 Corinthians 13:1, 1 Corinthians 13:2, 1 Corinthians 13:3, 1 Corinthians 13:4, 1 Corinthians 13:8, 1 Corinthians 13:13, 1 Corinthians 14:1, 1 Corinthians 16:14, Colossians 3:14, 1 Thessalonians 3:6, 2 Thessalonians 1:3, 1 Timothy 1:5, 1 Timothy 2:15, 1 Timothy 4:12, 2 Timothy 2:22, 2 Timothy 3:10, Titus 2:2, 1 Peter 4:8, 1 Peter 5:14, 2 Peter 1:7, 3 John 1:6, Jude 1:12, Revelation 2:19
First resurrection	Revelation 20:5-6
Promised Land	Revelation 3:12, Revelation 21:2
Messianic Covenant	Jeremiah 31:31-33
Divided according to the children of Israel	Deuteronomy 32:8

What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said. What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the decoration (Revelation 17:10). Appreciate as (Matthew 16:18)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15

- Title

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2

God	Actor
	Moses
	Jesus
Name	Jehovah (Exodus 6:3) Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:12) Bethlehem (Matthew 2:1-18, Luke 2:1-20, John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping...man grouping...2025-04-1804:06:00 (Genesis 48:4)?

2025-04-1706:16:00 Do we choose...a realization of Him?

- 2024-07-09T18:30:00 He has always out it in...context of time.
- 2024-09-15T13:39:00 How our part...is never...desig as lastine?
- 2022-08-08T19:00:00 Dispossess the Devil?
- 2024-07-23T09:22:00 To be an African...Nation.
- 2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5)

What I am rendering? To what particular use is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45.)?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53.)...

1. Salvation (Exodus 14:13)
2. Commit (Luke 23:46, Psalms 31:5)

What personifies the time?

1. First and Last Adam (1 Corinthians 15:45)
2. Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)

What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love babe ti won. Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. (1 Timothy 6:17.)

How do you reference the Bible?

Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:2
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2, Hebrews 11:25

What is the Bible divisible to?

Utter	Judges 12:6

Why numbers are preferred?

Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association...with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does he want as a set? O pe. In Yoruba?
 - Complete
 - Late
 - Call
 - Thanksgiving
- Where am I, as a human being?
- The life of appointing something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword Noun.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I collaborate fact with what I know?

On behalf, of someone, I seem

Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:31

What substitution lies ahead?

Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age.

Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 2:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:17
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?

Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you, than you are. (Ephesians 3:18).

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?

Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [Elixir](#), [Go](#), [Java](#)
- Questionnaire: [RatingBar](#), [TextField](#)

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@gmail.com will telephone me about the role with Google's co-founder Larry Page [jobs.lever.co/kitthawk_aero/701c6d9a-2d8a-4727-a345-d493d6dc777a](#)gencyls=3b8e0b44-7127-4709-ad21-5eb8ea5f7401 Andre

Nguyen asked how I spend my day?

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our mission? This projection may result in entries of new records

in the Remember and APass tables. Where are people, his relation?

However, he is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Sward Drive, Fremont, California (CA) 94555

How do we develop...our past time. (Genesis 37:19-20, Daniel 6:5)?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

What we do minimally is how we do extensively.

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- ScriptureReference.html Requires Bible knowledge and place in the Bible.
- BibleWord.html Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance (Matthew 10:19-20).
- Where am I, remembrance of how I am made (1 Corinthians 14)?

What does He choose as example?

- God rested on the Sabbath day (Luke 23:56)
- Jesus Christ (Daniel 9:24-27, 1 Corinthians 15:45, 1 Corinthians 15:47)
- Man such as King David (2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5)
- Place such as Sodom (Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8).
- Other living things (Numbers 22:21-33).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy (2 Samuel 12:14). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence (Isaiah 23:15, Isaiah 23:17, Jeremiah 25:11, Jeremiah 25:12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5). Listed below are some of the repeated reinforcements.

Samson's Birth (Judges 13)

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazarite son (Judges 13:2-5).

The same angel appears to Manoah and his wife (Judges 13:6-25). The angel reinforces the their responsibility and defers reverence to God.

The Birth of the Messiah (Luke 1)

Foretelling the birth of John the Baptist (Luke 1:5-25, Malachi 4:5). Transitioning the present to the after (Luke 1:17).

Foretelling the birth of Jesus Christ (Luke 1:26-38). Continuing the Davidic line (Luke 1:32-33, 2 Samuel 7:12-13, 2 Samuel 7:16).

The Baptism of Cornelius (Acts 10)

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band (Acts 10:1).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining (Luke 5:4-11, John 21:3-6, Matthew 17:24-27, Acts 10:2-16). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in (Genesis 14:10); and in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days (Genesis 25:8, Genesis 35:29). The last occurrence of the word, full, in the Bible, occurs in (Revelation 21:3). Living a presence (Jeremiah 28:11). To creating a future full of all. To creating a future free of all.

10/9/2023,

To	398-05-08
Time Span	128 days (4 biblical months, 8 days) (4 months, 5 days)
Prophecy	I have brought something against you, but I Am with you.
Fulfillment	Out of Egypt, have I called My son (Isaiah 11:1 , Matthew 2:15). My girlfriend, went to Kings Cross and subsequently Campsie, to sleep with another Yoruba man, at my enemies house. 2020-05-02 You were going through, your not being necessary. 1997-12-31 + 7 Biblical Years = 1997-12-31 + 2520 days = 2004-11-24 Silvani Liveup. 1604-02-03...1998-05-08 = 400 Biblical years = 400 * 360 = 144000 days (Genesis 15:13 , Revelation 7:4): Do you not believe, that I will provide your need? 1996-02-14... 1998-05-08, 814 days (2 biblical years, 3 biblical months, 4 days) (2 years, 2 months, 3 weeks, 3 days). 1996-06-06... 1998-05-08, 701 days (1 biblical year, 11 biblical months, 11 days) (1 year, 11 months, 1 day). 1995-10-15... 1996-02-14, 122 days (4 biblical months, 2 days) (3 months, 4 weeks, 2 days). 1996-02-14... 1996-10-15, 244 days (8 biblical months, 4 days) (8 months, 1 day). 122 / 366 = 0.33333333333333333333333333333333.

From	2003-12-12
To	2014-09-25
Time Span	3940 days (10 bibical years, 11 bibical months, 10 days) (10 years, 9 months, 1 week, 6 days)
Prophecy	You don't have the beast line, you are my beast line.
Fulfillment	Published on Mar 29, 2015 (Rabbi Jonathan Cahn reveals how he learned about the two cows with the number 7 on their heads having appeared in America. The news about the first one was spread on the 1st day of the Shemitah Year 7th year, the 2nd one was born on that same day on the begining of the Shemitah Year on September 25th, 2014. What do they stand for?). These video sections have been published at the Jim Bakker Show on March 25 and 26, 2015.

From	2004-03-23
To	2004-11-10
Time Span	232 days (7 bibical months, 22 days) (7 months, 2 weeks, 4 days)
Prophecy	Do you want a book, Ocean Senior.
Fulfillment	www.JesusInTheLamb.com Walking in the Lamb, you shall follow Me.

From	1973-01-01
To	2004-07-11
Time Span	11514 days (31 bibical years, 11 bibical months, 24 days) (31 years, 6 months, 1 week, 3 days)
Prophecy	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent (45%). Epoch timestamp: 1089504000.
Fulfillment	2004-01-01...2004-07-11 192 days (6 bibical months, 12 days) (6 months, 1 week, 3 days). 2008-06-12T10:00:00 Interview. Forty five percent, 45%, day Gregorian calendar. 16th & Mission Bart Station. Walk up Mission, from the 2000 block. Van Ness Muni Stop. Interviewers: Mike, Matthew, Raj Giri. Allaire Cold Fusion. Adobe. We don't know disame alike, as the two of us.

From	1939-04-03
To	2004-07-16
Time Span	23846 days (66 bibical years, 2 bibical months, 26 days) (65 years, 3 months, 2 weeks)
Prophecy	<u>Tuskegee Airman money to train</u> .
Fulfillment	Self, 1 in 1000, African descent United States of America (USA) religious men abstain as mercenaries to Germany. Leviticus. Father's land. Air drop. <u>Atomic bombinos of Hiroshima and Nagasaki</u> .

From	2008-03-11
To	2011-03-11
Time Span	1095 days (3 bibical years, 15 days) (3 years)
Prophecy	2008-03-11 <u>September 22</u> 2007-09-25 <u>Guy Kawasaki</u> Asian angel of death. At the time of this prophecy, the author was working at <u>Daiisaku Horvaku Center (DHC)</u> . Ku means die in the <u>Yoruba language</u> .
Fulfillment	<u>2011 Tohoku earthquake and tsunami</u>

From	1944-09-26
To	2008-01-17
Time Span	23123 days (64 bibical years, 2 bibical months, 23 days) (63 years, 3 months, 3 weeks)
Prophecy	Human Apartheid. Hispanics that were born in the USA are being sent home. There must be a litmus test to determine their state of origin. Involvement of Germany.
Fulfillment	<u>Jan Brewer Arizona SB 1070</u> .

From	1969-10-04
To	2010-01-25
Time Span	14723 days (40 bibical years, 10 bibical months, 23 days) (40 years, 3 months, 3 weeks)
Prophecy	
Fulfillment	Dear America, your loom angle of contract is dead.

From	1977-08-23
To	2025-06-23
Time Span	17471 days (48 bibical years, 6 bibical months, 11 days) (47 years, 10 months, 1 day)
Prophecy	
Fulfillment	10 c... US government.

From	1969-10-04
To	2010-01-25
Time Span	14723 days (40 bibical years, 10 bibical months, 23 days) (40 years, 3 months, 3 weeks)
Prophecy	
Fulfillment	Dear America, your loom angle of contract is dead.

From	2011-05-29
To	2011-09-09
Time Span	103 days (3 bibical months, 13 days) (3 months, 1 week, 4 days)
Prophecy	I spoke to Disrael today, he said Israel must prepare for war, within twenty nine days. Played lawn tennis with some Hindi people.
Fulfillment	<u>2011 attack on the Israeli Embassy in Egypt Islamic State of Iraq and the Levant (ISIL)</u> .

From	2014-09-30
To	2016-09-30
Time Span	731 days (2 bibical years, 11 days) (2 years, 1 day)
Prophecy	We need to replace the cook top as the current is too old and not worth fixing. Cost will be \$659 supply and install of cooktop and dispose of old one.
Fulfillment	<u>Joshua 6:26 Shimon Perez</u> .

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- * At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
 1. an African American female senior, Gayle;
 2. an African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony
- 3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - * My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning, 2004-12-25/27:20:00. What strange... of the neighborhood?
 - * Plans to build a traffic light for my property.
- 4. In a multicultural church where I was part of the congregation, Bernie Alpkaum mentored. Perry drove me to church. I went to altar calls for masturbation prayers.

1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

They had varying mother... but one father ([Genesis 32:28](#))

2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward

1. Post 9-year-old re-location from Ile-Ife to Lagos
 1. Patriach, brother Yemo
 2. Captain of the Nigerian national hockey team
 3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
 4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him

- Where did he serve... a people?
- Where did I... remove myself from the past (Genesis 31:41)?
- What apart... are new?
- Spending time... to reality?

Faith An Yao

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Process and Fulfillment
- Autobiography
- Style of Writing

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
 - I contracted at Sunheath Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has he made.(Genesis 32:28. Genesis 3:3. Genesis 4:12.)? What word reminds. (Mark 11:23.)?

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.

(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent...where is it needed?
