WordEngineering

Ken Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.

Abstract

**Thesis Statement:** This dissertation introduces [AlphabetSequence](#) ( [2 Corinthians 10:9-18](#) ). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.cs](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places.

The importance of this work?

- [Follow God, as a character.](#)
- [To track dates and words? And, find meaning, correlation.](#)

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Masler of [Kolonia House](#) (KHouse) is worthy of note, faith ([Hebrews 11](#)). There is indebtedness of the author to [Udy Scheew](#), his Masters degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS; Decler Mendez, Cesar Orcando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

Theory

|---|----------------|---|
| Part  | Example        | Commentary  |
| Sub-domain  | www            | A sub-domain defaults to www.                               |
| Domain  | JesusInTheLamb |   |
| Country code top-level domain (ccTLD)                                 | .com           | An abbreviation for commercial. A default domain extension. |
| Directory and filename  | index.html     |   |
| Fragment  |                |   |
| It is not an e-mail address, since it does not include an at sign, @. |                |   |
| It defaults to port 80.   |                |   |
| It defaults to the homepage.  |                |   |

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Distinct by constraint](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to decipher the book title and the corresponding BookID.

The Scripture Table's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
    cast(BookID as varchar(6))
    + ','
    + cast(ChapterID as varchar(6))
)
FROM Bible..Scripture
Another SQL statement
```

```
; with cte
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
    FROM Bible..Scripture
)
```

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promise and Fulfillment
- Autobiography
- Style of Writing

```
select cnt = count(*)
from   cte

The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_ChapterIDSequence\_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement
```

```
SELECT COUNT(*) FROM Bible..Scripture

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_VerseIDSequence\_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)

is supplementary.
```

The Scripture\_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(8)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(8)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(8)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, as BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

| ScriptureReference | BibleReference |
|--------------------|----------------|
| John 1:1           | 43001001       |

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SOC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact max comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Miller](#) who noted that the first occurrence of the word, [logos](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower word load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning [Door](#) ([Isaiah 15:1](#)). [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact

is for determining the highest value. The SQL statement
```

```
SELECT COUNT(BibleWord) FROM Bible..Exact

is for determining the word count. The SQL statement
```

ALTER TABLE Bible..Exact ADD CONSTRAINT CK\_Exact\_ExactID\_Range CHECK (ExactID BETWEEN 1 AND 12891)

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact

is 789631; this is the count of the words in the KJV Bible.
```

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember](#), [APass](#), [ActToGod](#).

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English [which is being interested](#). ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 4:26](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets [differ slightly](#) between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [http://translate.google.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And, the merge, is the money, convert.](#)
2. 2015-11-03T02:17:00 [The specific, a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and [loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3-5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2-4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the [\(UTC-08:00\) Pacific Time \(US & Canada\) time zone](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord\_view

The HisWord\_view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Mispar Hetrachi method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. " The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Koionia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ([Luke 4:19](#) ).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

| Scales & Measurements |  |  |
|-----------------------|--|--|
| Type of Scale         | Commentary   | Example of Scale   |
| Nominal Scales        | The numbers may serve as tags or labels which are quantitative with no values.   | <ul style="list-style-type: none"><li>Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 <a href="#">Our view of the world attains us</a>.</li><li>Telephone number</li></ul>  |
| Categorical Scales    |  | Dewey Decimal Classification used in libraries   |
| Absolute Scales       | An absolute scale is a count of individual, distinct items in the set.   | <ul style="list-style-type: none"><li>This may be the physical count of word occurrences in the Bible.</li><li>The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books.</li><li>The SQL COUNT() function returns the number of rows that matches a specified criterion.</li><li>The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.</li></ul>  |
| Ordinal Scales        | An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.   | <ul style="list-style-type: none"><li>In an ordered list HTML element, 2025-06-08T09:22:00 <a href="#">the list items are sequentially arranged</a>.</li><li>An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted.</li><li>The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE.</li><li>The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.</li></ul> |
| Rank Scales           | They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.  | <ul style="list-style-type: none"><li>Military ranks</li><li>Mohs scale for hardness (geology) of minerals</li><li>Schofield scale for the strength of peppers</li><li>Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response turing test used in computing to determine whether the user is human in order to deter bot attacks and spam.</li></ul> <p>The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?</p>  |
| Interval Scales       | An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.   | Date difference, UNIX epoch?   |
| Ratio Scales          | These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit. | <ul style="list-style-type: none"><li>HTML input range</li><li>CSS percentage</li></ul>  |

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URL.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

| Functional Dependencies  |   |                                |
|--|---|--------------------------------|
| Determinant  | Functionally Dependent                  | Implementation                 |
| Bible.Scripture.BookID   | Bible.Scripture_View.BookTitle          | Bible.udf_BibleBookIDTitle()   |
| Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID | Bible.Scripture_View.ScriptureReference | Bible.udf_ScriptureReference() |
| Determination is achieved through computed columns.                        |   |                                |

(Allen G. Taylor, 2024).

Index Query Type

| Query Type         | Commentary  | Example   | Structured Query Language (SQL)   |
|--------------------|---|---|---|
| Point query        | It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.   | Useful for searching for a particular verse.  | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>  |
| Multipoint query   | It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.   | Useful for searching for a particular chapter or book.  | <pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>  |
| Range query        | It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound. | Useful for searching for consecutive verses, chapters or books.   | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence &lt;= 5</pre>   |
| Prefix match query | The set is the match of an attribute.   | The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries. | <pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (     SELECT TOP 1 KingJamesVersion     FROM Bible..Scripture_View     GROUP BY KingJamesVersion     ORDER BY COUNT(KingJamesVersion) DESC )</pre> |
| Extremal query     | It returns either the minimum or maximum extreme.   | Statistics  | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (     SELECT MAX( VerseIDSequence )     FROM Bible..Scripture_View )</pre>   |
| Ordering query     | The records returned are sorted.  | The results of the author are normally in ascending order.  | <pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>   |
| Grouping query     | The records returned are grouped.   | Rarely does the author group rows by issuing the group by clause.   | <pre>SELECT BookGroup, COUNT(BookGroup ) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>  |
| Equi-join query    | The records are retrieved from multiple sources.  | The author uses views for table joins.  |   |

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping [a work reference](#).
  - Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
  - The author depends on a typing assistant.

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Conclusion and Fulfillment
- Bibliography
- Style of Writing

Principle 3: Explore Contexts  
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.

Principle 4: Anticipate Risks  
The undesirable outcome and their probability of re-occurrence will include:  
• Data loss or corruption because of issuing the database modification command and lack of timely archiving  
• Hardware, software, or network failure  
• Vendor withdrawal of support  
Microsoft:  
• Introduced .NET core and Model-view-controller (MVC).  
• Inability to restore deprecated Microsoft SQL Server backup versions.  
• Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities  
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.

Principle 6: Define Time Horizon  
What period has God used?  
• 1988, military census age: I Am taking you on a journey.  
• 1997, priesthood age: I have brought something against you, but I Am with you.  
• 2007, generation timespan: This masturbation will bring water.

Principle 7: Generate Multiple Solution Options  
How versatile am I...at amending others? I have to relay my perception to technology providers.

Principle 8: Design Around Constraints  
Relational databases offer the ability to set constraints.  
• Data type  
• Nullable  
• Primary key and unique index  
• Foreign key

Principle 9: Weigh the Pros and Cons  
• Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.  
• The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
  1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
  2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

| Statement             | Commentary   |
|-----------------------|--|
| sp_databases          | The sole work of the author, the WordEngineering database size, is currently 33317504 bytes. |
| sp_server_info        | The database version is Microsoft SQL Server 2022 - 16.0.1000.6                              |
| sp_spaceused          | The WordEngineering database currently uses 32536.63 MB.                                     |
| sp_statistics HisWord | The cardinality of the HisWord table is 114243.  |
| xp_fixeddrives        | Returns a list of physical hard drives and the amount of free space on each one.             |
| xp_msver              | Returns version information about SQL Server.  |

| Statement              | Commentary   |
|------------------------|--|
| Select                 | The select statement for data retrieval is the most popular statement. <u>Most select applies to Bible.</u> Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries. |
| Insert, Update, Delete | The insert, update and delete statements are for data maintenance.   |

| Operator                    | Commentary   |
|-----------------------------|--|
| =, <>, !=, <, <=, !=, >, >= | The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use.</u> != < or/and != >. <u>This is the first time...he is becoming aware...of these expressions.</u> This is the first time...he is becoming aware...of these operators. <u>Quervies for a date or number will search for particular types.</u> |
| BETWEEN                     | This is a range check that accepts a beginning and ending value. It is not highly used.  |
| NULL                        | No value   |
| IN                          | A comma-delimited list of valid options within parenthesis.  |
| LIKE                        | Wildcard filtering   |

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

| Title        | Commentary  |
|--------------|---|
| TOP          | Set a limit of the number of rows returned or a percentage of the rows from the source.                               |
| SET ROWCOUNT | The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows.</u> |

| Title  | Commentary                              |
|--|---|
| Like wildcard  | Preceding or following restriction '%%' |
| Check for NULL   | IS NULL versus (VS) IS NOT NULL         |
| Between range check                                    | Lower and upper limits                  |
| Logical comparison                                     | <, >, =, <=, >=, <>                     |
| Table join superceeds the previous column key equal to | FROM table join primary and foreign key |

Select Clause  
The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause  
The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause  
The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement  
Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column  
Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View  
Enhances tables by compacting and/or extending the information set.

Constraint  
Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
  - Data type and size: String, number, date, logic boolean?
  - Not nullable? Can not be empty?

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Process and Fulfillment
- Autobiography
- Style of Writing

- Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
- Check constraints, for schedule, dated from must precede dated until.
- Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
- Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
  - URIChrist
  - URIEntertainment
  - URIGoogleNews
  - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. is in order of occurrence.

Predicate logic

The choice of SQL Server imposes datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

| The Author Uses the Git Code Repository     |   |   |
|---|---|---|
| Key   | Value   | Commentary  |
| Universal Resource Identifier (URI)         | github.com/KenAdenji  | This is the home page for storing the repositories.   |
| Date Created                                | 2013-04-27  | This is the date of creating the github.com account.  |
| Version                                     | git version 2.29.2.windows.3  | The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update. |
| Configuration Profile                       | git config --list   | The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"    |
| Change Tracking                             | git status  | This will decide the differences between your local copy and the version control code repository.                                 |
| Add Updates                                 | git add   | The git add . command will add all the updates, or the user may add particular directories and files.                             |
| GitHub.com WordEngineering repository clone | MD [WordEngineering CD [WordEngineering git cmd git clone https://github.com/KenAdenji/WordEngineering git remote -v git remote set-url origin git@github.com:KenAdenji/WordEngineering.git git remote -v |   |

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

Programming

| The Author Programs in the Following Tiers and Languages |   |  |
|--|---|--|
| Tier   | Language  | Commentary   |
| Front-End Browser  | HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS) | The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes. |
| Middle-Tier Application                                  | C#, Embedded-SQL  | For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.  |
| Server-Side Backend                                      | Standard Query Language (SQL)   | The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.   |

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using JQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultSetDiv will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers.
- What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ( [Leviticus 19:26](#) ). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
- The author extracts knowledge from data; by finding meaning to the word.
  - The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
  - The actionable insights take, so far, is to computerize the work.
  - The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
  - The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

- Empirical, find implication from the Bible?
- Theoretical, to determine a better way to doing work?
- Computational, is human labor replaceable?
- Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

- The Bible is our primary source of data.
- The author records information sources. This is either a person or media?

What you can do with Data

- Data Acquisition: The Bible is available on the Microsoft Access database.
- Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
- Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
- Visualization / Human Insights:
  - The raw data is viewable on the Microsoft SQL Server Management Studio.
  - The web service, .asmx, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
  - The .html presents the result in a human readable format.

Defining Data

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Promise and Fulfillment
- Autobiography
- Style of Writing

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

### High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of efficiency:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use ~~CSS shortcuts~~ since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster viability, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement.
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

```

### Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [GitHub.com](#) version control.

### Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

### Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

### Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Snapshot](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

### Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

### Application Programming Interface (API)

- The common uri scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eolbraintech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/41906110/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweighs the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes
  - Migration to computed columns
  - Normalization
  - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

### Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.

The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.

An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.

The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

### Problems, Algorithms, and Programs

- Autobiography
- Style of Writing

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.

This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var asciiA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (!isAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - asciiA + 1;
    }
}
```

The cost of executing the for loop is  $O(\text{word.LengthSize})$

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.

The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

| Module                          | Unit  |
|---------------------------------|---|
| GetAPage.html                   | retrieveAlphabetSequence()  |
| AlphabetSequenceWebService.asmx | Query(word)   |
| AlphabetSequence.cs             | ID(word)  |
|                                 | ScriptureReference(int alphabetSequenceIndex).                      |
| DataCommand.cs                  | DatabaseCommand()   |
| WordEngineeringSchema.sql       | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) |

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query\_string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookahead scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

| Module                          | Unit  | Lines of Code |
|---------------------------------|---|---------------|
| GetAPage.html                   | retrieveAlphabetSequence()  | 40            |
| AlphabetSequenceWebService.asmx | Query(word)   | 10            |
| AlphabetSequence.cs             | ID(word)  | 50            |
|                                 | ScriptureReference(int alphabetSequenceIndex).                      | 10            |
| DataCommand.cs                  | DatabaseCommand()   | 90            |
| SQL Server                      | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) | 105           |
| Sum                             |   | 325           |

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.asmx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
  - git status
  - git add
  - git commit
  - git push
- Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
- Config: The web.config file contains the database connection strings; web services user-specific credentials. The system administrator at external locations may customize these information for their specific use.
- Backing services: These are external independent resources, such as the database, SMTP.
- Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
- Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables. The SQL Server encompasses services which are stoppable to do data files backup.
- Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
- Concurrency: The author isolates his applications from the particulars of the base scaling concurrency choice.
- Disposability: The author's take on expendable work includes the following:
  - Pure functions
  - On-demand compilation of web pages and services
  - Adjustable time-out setting for the database and web request threads
  - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
- Development/production parity: By first finalizing non-repetitive work, the author can now focus on specialization activities.
  - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
  - The personnel gap: Dev/ops expertise
  - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
- Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
- Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prominence and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

When

God gives most of His information in a dream, vision or face-to-face.  
How do people place date? On each day of the week ( [Genesis 1-2](#) )? Seniority comes first ( [John 1:15](#), [John 1:27](#), [John 1:30](#) ).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord\_View and Remember\_View tables.

Machine Learning

Our entirety chiefly pertains to Him.  
Multilayer Perceptron (MLP)  
DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.  
DateDifference.aspx is a server-side C# ASP.NET web form.  
The Remember's table computed columns are Transact-SQL and SQL-CLR functions.  
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.  
Code re-use sounds good, but it is dependent on many factors.

Feature

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is  $900 \wedge (2 \wedge 8) = 900 \wedge 256 = 1.932334983228891510545406872202e+756$ .

Degree of Belief

In [GetAPage.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.  
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.  
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

Frequentist Probability

In [GetAPage.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.  
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ( [John 19:30](#) ) . [Specifications...is done](#).

Bayesian Probability

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and (8000 \* 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous  
The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

Discrete  
The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical  
The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary  
The Testament column is either Old or New.

Ordinal  
The identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame  
The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), extensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature  
The most important predictor columns are the Word, Dated, and ContactID.

Outcome  
The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records  
A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.  
The dreams are re-collect-able, and recallable ( [Numbers 12:6-8](#) ).

I have made what I have spoken, ready

Web Design Fundamental

Business Model

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him.

Content Authoring

How query means more ([Isaiah 43:22](#))?

Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search.  
Supplementary information for a href attribute is meta-data and [whos.com](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

|---|-------------------------|--|
| Creation  | Daily, Sabbathical rest | Genesis 1, Genesis 2:1-3   |
| Times of the Jews versus (VS) times of the Gentiles | 490 years               | Luke 21:24, Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5 |
| First resurrection                                  | 1000 years              | Revelation 20:5-6  |

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

| Procedure, function or method call | Commentary  |             |            |                      |                                      |                    |                                    |                       |  |                          |   |                  |   |                    |  |                      |  |                    |  |                           |   |

| Constructor method                 | To create and initialize a class instance.  |             |            |                      |                                      |                    |                                    |                       |  |                          |   |                  |   |                    |  |                      |  |                    |  |                           |   |
| Constructor static method          | To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.   |             |            |                      |                                      |                    |                                    |                       |  |                          |   |                  |   |                    |  |                      |  |                    |  |                           |   |

Steer

| Type                               | Commentary  |
|------------------------------------|---|
| Wake-up orientation database table | This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.   |
| Non-Alphabetic                     | AlphabetSequence may not be appropriate for people that use glyphs or sign languages.   |
| Structured query language (SQL)    | <ul style="list-style-type: none"><li>The proposed changes which will offer query customization?</li><li>The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.</li><li>With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.</li></ul> |

### Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

### How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence

| Term   | Meaning                                    |
|--|--|
| Training dataset or training set               | The recording of the word in the database. |
| Example (or data point, data instance, sample) | Each database row or record.               |
| Predict Label (or target)                      | The corresponding Bible text.              |

| Term                 | Meaning   |
|----------------------|---|
| Linearity assumption | The features alphabet places.                                 |
| Weight               | Since the word is the only feature, it is the only influence. |
| Bias                 | A starting value.   |

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

A type of us: is a kind of us? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.  
HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.  
Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.  
There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

| Element                      | Commentary  |
|------------------------------|---|
| Title tag                    | The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.  |
| Meta Description tag         | This may be upto 155 characters and it indicates the page's content.  |
| Meta tags                    | The other meta names include keywords, robots and author.   |
| Heading tags                 | H1...H6 with H1 being the most important.   |
| Textual content              | Search engines predominantly optimize for text. Other media are larger in size and duration. When did He promise generational growth ( Psalms 22:30 ,Genesis 3:15 ,Genesis 12:7 ,Genesis 13:15 ,Genesis 15:13 ,Genesis 15:18 ,Genesis 17:8 ,Genesis 24:7 ,Genesis 26:3-4 ,Isaiah 53:10 )? |
| Alt attribute on the img tag | Visually impaired people have difficulty comprehending images.  |
| Fully qualified links        | Relative links meet the author's requirement, since is hostable on external sites.  |
| Sitemaps (both XML and HTML) | A sitemap documents the files and their relationships.  |

(Bruce Clay).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.  
This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively. What does God choose as subject? ( John 15:15 )?  
The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: My Condemn The first word is the BookID; the second word is the VerseID.
- 3-Words: Who is your manager? Crazy mister Martin. Mister Martin as a god. The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.
- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

Biblical generation - 40 Biblical years

- 2007...2008 Common Era - the author is 40 years old: the author mentions time.
- 2021...2024 Common Era - the biological mother of the author is 80 years old: the word recorded by the author is time relevance specific.

When I am doing this?

- Pre-condition ( Genesis 3:15 )
- Assertion ( Hebrews 5:8 ,John 20:17 )
- Post-condition ( Genesis 49:9 ,Revelation 5:5 )

2024-11-13T19:12:00 Translation

- 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
- 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (VS) Functional dynamic equivalence (thought-for-thought): BibleWord.html is the former.
- 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

(Tim Wildsmith, 2024).

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it ( Genesis 4:26 )?

- Where?
  - Place of origin ( Matthew 2:1-11 ,John 7:52 ,John 18:5 ,John 18:7 ,Mirah 9:1-2 )
  - Resting place ( Genesis 23 ,Genesis 48:21-22 ,Genesis 49:29-33 ,Genesis 50 ,John 14:1 )
  - Inheritance ( Genesis 48:28 ,Isaiah 53:10 )
  - City of Refuge ( Joshua 20:7-8 ,Numbers 35:15 )
- The author started his tertiary education at Central Piedmont Community College (CPC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
  - Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
  - Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
  - Using the JavaScript fetch keyword, the author places webservice requests.All the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...
  - 2025-10-09T20:35:00 places enormous responsibility on the author.
  - 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... It is okay.
  - 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
  - 2025-10-09T20:52:00
    - Within the author attended University of North Carolina, Charlotte (UNC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
    - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible... revere itself ( Numbers 11:16 ,Acts 6 )?

- 2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.
- 2025-10-09T02:01:00 This is where I want to be... if I am with you.
  - 2025-10-09T02:10:00 Do you place a life... apart from you?

urlPerformance

- webpageetest.org In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souder, 2016-02-10).

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself.

- During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions.

Microsoft SQL Server limitations include:

- Microsoft SQL Server database connection string ApplicationIntent=ReadOnly
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero Zero five eight four one...versus (VS) 5841

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

- The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
- The SQL Server Management Studio table design menu option provides the most flexibility.
- SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. URLMaintenancePage.aspx For example, 2024-11-05T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

- Reviews and Inspections: 2025-07-14T15:34:00 Can I be impartial as others?
  - 2007-08-04 PyCap is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 To what extent do I know the culture of others?

2. Information Hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00

1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.

2. 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.

2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 *long* is a writing tool... where is the speaker?

3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.

4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.

5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.

1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, *.asmx* file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.

2. Application: A dynamic link library [InformationToTransit.dll](#) queries the database.

3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 and retrieve the compared God's word.

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

2025-07-31T13:25:00 What does the link provide?

- 2025-07-31T13:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
- 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
- 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) Availability/Static versus (VS) dynamic?
- 2025-07-31T16:05:00 The iframe tag embeds one HTML document within another.
- 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
- 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
- 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

[Software Engineering: A Modern Approach by Marco Tulio Valente. Use cases](#)

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 he relies on his pursuance of the truth

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

| Interest of the users               |   |  |      |   |  |   |   |   |  |
|-------------------------------------|---|--|------|---|--|---|---|---|--|
| ASP.Net Web Forms - control version | HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version   |  |      |   |  |   |   |   |  |
| Prototype                           | Minimum Viable Product (MVP) build-measure-learn  |  |      |   |  |   |   |   |  |

|                                     | Step  | Task   |      |   |  |   |   |   |  |
|                                     | 1   | Build: The author conceived of a product idea to interpret his dream by building AlphabetSequence. |      |   |  |   |   |   |  |
|                                     | 2   | Measure: Public testing to collect data on its usage.  |      |   |  |   |   |   |  |
| 3                                   | Learn: Validated learning by analyzing the collected data.  |  |      |   |  |   |   |   |  |
| Proprietary                         | Open source, 2025-06-27T20:55:00 and availability of learning materials   |  |      |   |  |   |   |   |  |

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming... Computed Columns

- 2025-05-17T20:16:00 Pure function, referentially transparent:
  - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
  - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Similarity of the Composition.
- 2025-05-22T18:10:00 Immutability:
  - 2025-05-22T18:16:00 Object-oriented technology serves change states.
  - 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
  - 2025-05-22T18:17:00 As is of the need for database storage.
  - 2025-05-22T18:27:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
- 2025-05-22T18:31:00 Practical need for recursion?
- 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINO.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and IHaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute  
As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
- 1. In 2002, when I started recording the word of God, I modeled the [WordEngineering](#) database, HisWord table.
- 2. In 2007, when I was looking for work, I modeled the [IHaveDecidedToWorkOnAGradualImprovingSystem](#) database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate ( Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13 )

- Alphabetic: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
  - Spelling corrections.
  - Verb grammar tense.
  - Synonym versus (vs) opposite.
  - Singular versus (vs) plural.
  - Deprecated.
  - Currency.
  - Locality, regional, custom, preference.
  - Anglicized.

2025-03-21T21:08:00 I am standing among the north-west seats. I was told that out of the 3 promoted people, 2 were made mayors. There is a path to the north-east. 2025-03-21T22:47:00 It is not the only thing... 2025-03-21T22:58:00 Was this all that was said?

| Data Type   | Software   | Commentary  |
|-------------|--|---|
| Varchar     | GetAPage.html  | This is the most prevalent, and earlier focused on.   |
| Integer     | GetAPage.html DateAdd.aspx Number15431.html                  |   |
| Date        | DateDifference.aspx DateYear2010Month09Day09.html            | Jesus Christ refrains from declaring Judgment day ( Luke 4:19-21, Isaiah 61:1-2).   |
| Time        | TimeHourMinute4.html   | 12-hour clock, so far. The time of the day is emphasized; the ninth hour is 2025-03-22T00:12:00 explicitly mentioned ( Matthew 27:46).                            |
| Percent (%) | BiblePercentage.html IAmSeventyPercent70ShoutOfAmdahAFK.html | and there died the third part of the creatures which were in the sea, "even" they that had life; and the third part of the ships was destroyed ( Revelation 8:9). |

2025-03-17T11:47:00 Side with church... or side with the children ( John 7:53, Genesis 21:9, Genesis 27:41 )?

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webservice: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example:

```
SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisKord)
) PercentageOfTotal
FROM WordEngineering..HisKord WHERE Word NOT LIKE '[0-9]%'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisKord)
) PercentageOfTotal
FROM WordEngineering..HisKord WHERE Word LIKE '[0-9]%'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisKord)
) PercentageOfTotal
FROM WordEngineering..HisKord WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisKord)
) PercentageOfTotal
FROM WordEngineering..HisKord

InfoType CountInfo PercentageOfTotal
Alpha 111590 93.740811980346
Numeric 851 0.714879747313
NULL 6600 5.544308263539
Total 119041 100
```

- data-snn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language ( &da 22.2 ).
  1. Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
  2. In the WordEngineering database, TheComingAdventOfTime table, contains learned spoken language translations.
  3. In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
- In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession.
- When?
  1. 2025-03-01T07:13:00 Microsoft Word and past-tense. Mark Boelens of Electronic Data Systems (EDS) and the verb, will, future reference.
  2. 2025-03-01T07:11:00 Online transaction processing (OLTP)... Online analysis processing (OLAP).
  3. How does the computer equip us? 2025-03-01T07:06:00 Improve on paper, the old writing medium?
- There is a datetime attribute which is only viewable inside the HTML source. Metadata? 2025-03-01T07:24:00 Microsoft made the assumption... to automate mark-up?

2025-02-19T12:20:00 What I offer of the truth?

1. Command-line interface (CLI)?
2. No .NET Core support

3. 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
4. The author does not make use of Microsoft SQL Server synonym support
5. The author rarely uses Microsoft SQL Server soundex support
6. Only English, there is no multi-lingua support
7. Limited Bible versions, dictionaries and commentaries
8. Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
9. Microsoft SQL Server will support Regular Expression (RegEx)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00: Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00: Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, taborder.
- 2024-10-04T09:12:00: As much as possible, initially accept the default values with, for example, the date, for example, You may adjust and be precise, later.
- 2024-10-04T09:44:00: Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY, INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T02:44:00: This is what I am unable to do with the graphical user interface (GUI)... this is what I am inspired to do, 2024-10-05T02:49:00: Its interface... remains our reliance, 2024-10-05T02:52:00: I am equipped to doing the same... as I realize.
- 2024-10-05T02:54:00: This point... must allude to one. 2024-10-05T02:59:00: Microsoft Office (HTML). Why not... the machine prefers to do? 2024-10-05T03:01:00: God has done His part... where is my part?
- 2024-10-05T03:05:00: What do I need the other person... to do?
- 2024-10-05T05:03:00: Need after 2024-10-05T05:10:00 ( [I Kings 5:5](#) ), E. F. Codd in 1970, proposed the relational database.

2025-02-23T16:30:00 Company osi data... osi yemi

2025-02-24T00:52:00 In the center-east is a wheel  
2025-02-24T06:35:00 Ending lane, Feminine.  
2025-02-24T06:55:00 2...6

- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00...2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar.

2025-02-10T06:22:10Z In Isaac such your seed be called on, on a narrow road in the north-center. This is either Bingham's or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired the slender female who was wearing light-fitting white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue. The van was heading towards the south-west. There were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

| Datetime            | Word                              | Commentary                       | World Event  | Place | Person | Scripture Reference |

2025-01-31T08:51:00 What title... we are befriending?

1. My first joke was about a screwdriver. I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Mulloz of Central Piedmont Community College (CPC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowe.c for the Yoruba language.
4. My first domain name was commonpeople.org
5. The first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is [www.JesusInTheLamb.com](http://www.JesusInTheLamb.com)

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.

2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Genre: The Bible is divided into two parts: the Old Testament and the New Testament. The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.  
2024-07-12T21:22:22 Making a protection... making a protection

What is best believable ( Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours ( Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13 )?

- In the HisWord table, the order of belief is:
  1. Scenery
  2. Commentary
  3. Word
  4. System generated: DateTime and identity columns
  5. Association columns: ScriptureReference, ContactID, URI
 The author is the authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

What true identity lies apart?

- The Mes
- The king

How my organization is the best?

1. Alphabet places, word spelling, and sentence composition

- BibleReference uses whole numbers for representation.
- Who, what, when, where, why?
- Prophecy and Fulfillment: Keyword Variation

| Word                 | Microsoft SQL Server  | Scikit-learn by David Courneau  | Commentary  |
|----------------------|---|---|---|
| Author's experience  | The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.  | The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. <a href="#">ConversionTableTemperatureMachineLearning.py</a>   | The traditional architecture is client/server.  |
| Software requirement | <ol style="list-style-type: none"> <li>1. <a href="#">Microsoft SQL Server</a></li> <li>2. <a href="#">SQL Server Management Studio</a></li> <li>3. Author's <a href="#">Microsoft</a> database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include: <ul style="list-style-type: none"> <li>▫ Views</li> <li>▫ User defined functions (UDF)</li> <li>▫ Stored procedures</li> </ul> </li> <li>4. Application code layer: <ul style="list-style-type: none"> <li>▫ .asmx</li> <li>▫ Business and database access code</li> </ul> </li> <li>5. User-interface (UI) layer: <ol style="list-style-type: none"> <li>1. Browsers</li> <li>2. .html, .js, and .css files</li> </ol> </li> </ol> | <ol style="list-style-type: none"> <li>1. <a href="#">Python</a></li> <li>2. <a href="#">Machine learning library for example Scikit-learn</a></li> <li>3. Generate training data <a href="#">ConversionTableTemperatureCommaSeparatedValueCSV.cs</a></li> <li>4. Training data which is storable in a .csv file. <a href="#">ConversionTableTemperature.csv</a></li> <li>5. Predictive data analysis <a href="#">ConversionTableTemperatureMachineLearning.py</a></li> </ol> | <ul style="list-style-type: none"> <li>• How proprietary is the architecture?</li> <li>• What is the portability of the code?</li> <li>• Shift away... from server to client.</li> <li>• The words have moved away from... <a href="#">packaged software to distributed software</a>.</li> <li>• Offer only one functionality.</li> </ul> |
| Word                 | Bible Versions  | Dictionaries  | Commentaries  |
| Primary Key          | Scripture reference   | The Bible word has a place in the author's terminology, usage, retention.   | Disparate scripture references which are inconsistent and non-standardized in commentaries. Not aligned with AlphabetSequence.<br>2024-07-13T17:01:00 <a href="#">Where does he see growth?</a>   |
| Proliferate          | Bible publishers, versioning and language translation   | Hebrew translation  | Commentators  |

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord\_view view appends computed columns to the HisWord table.

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

| Keyword   | Software Engineer   | Database Administrator   |
|---|---|--|
| Programming language  | Instruction set: keyword, syntax, Application Programming Interface (API)   | Structured Query Language (SQL) a data sublanguage   |
| Focus language  | Predominantly English   | American Standard Code for Information Interchange (ASCII)...Unicode culture   |
| Time frame  | Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking | Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.                                  |
| Remember human versus reference identities? For example, Bible word versus (VS) scripture reference | Context-sensitive help  | Auto-completion  |
| Location  | Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment. Internet front-end files (.html, .js, .css)      | Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions. |
| Threat? For example, virus  | Memory, program file  | Data file  |
| Customization standard  | Strict  | Flexible   |
| Law versus (VS) traditional practice  | Sacrifice   | Mercy  |
| Compatibility   | Legacy? Backward compatible...re-engineering. New, creativity. Framework.   | Progressive  |

(Itzik Ben-Gan, 2023-07-03)

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

### Focusing on the Word

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord\_View.

2024-06-15T21:28:00 What is pertaining  
Prior to this word coming, I uploaded the

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 To who... I exchange... my good?

Rule 3: Systematic treatment of null values:

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model

INFORMATION\_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule  
2024-06-20T18:39:00 It looks at the data

2024-06-20 18:39:00 It looks at the data as a whole

### Structured Query Language (SQL) sublanguage

| Sublanguage                        | Command                                | Usage  |
|------------------------------------|--|--|
| Data query language (DQL)          | Select                                 | Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.  |
| Data definition language (DDL)     | Create or alter or drop schema objects | The create statement is used once for each new object. The alter statement is mainly for an existing object.   |
| Data manipulation language (DML)   | Insert, Update, Delete, Truncate       | <p>Manipulation may fail in the following cases:</p> <ul style="list-style-type: none"> <li>Primary key or unique index duplication. A primary key column may not be null.</li> <li>Invalid datatype or extra large data size or out-of-range</li> <li>Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datatype will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.</li> </ul> |
| Data control language (DCL)        | Grant, Deny, Revoke                    |  |
| Transaction control language (TCL) | Begin, Commit, Rollback transaction    |  |

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:  
A base or derived relationship should comply with an operation to

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 What part of yourself... do I desire as My future?  
Rule 9: Logical data independence:

2024-06-22T17:02:00 The opinion of someone else... is beside me.

Rule 10: Integrity independence:

The author is not implementing constraints

Rule 11: Distribution independence:  
The user is not aware that the data and logs are in separate files. Replication and mirroring are other means of ensuring redundancy.

Rule 12: The nonsubversion rule

Row processing such as cursor must abide by integrity rules and constraints like set processing

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposive: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26)

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08)

What did He dispose of in making man ( Genesis 2:7, Genesis 6:3 )?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

What is remembrance...associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

| Keyword  | Commentary  |          |
|----------|---|----------|

(Jack Hyman, March 2024).

Time for?

- Birth ( Acts 7:26 )
  - Family ( Acts 5:31 )
  - People ( Hebrews 3:9 )
- Allowing a person the entirety of time
- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
  - The author's familiarization with JavaScript meant client-side work.
  - What I am good at doing...is what he is good at making. ( Genesis 41:32-57, Genesis 1:1-1:2, Genesis 4:26 )
  - Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
    - 1. GetAPage.html serves as a gateway to specialized links.
    - 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
  - Technical writer: Do you write it as a manual? Do you write it as describing the functionality. ( Daniel 9:24 )?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... Why I do it?

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences...companion?
- Experimenting...as the same?

Influence

- Data:
  - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
  - For over 2 decades, the author has continuously received word that he constantly records and queries. Siquilates?
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
  - Language translation
  - Familiarity with the subject and tradition. Apply domain knowledge.
  - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. We all make our following.
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this regurgitation may be redundant. What programming skills are in demand?

- Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
- Simply creating a HTML anchor to a source url
- Fetching, parsing, and building the results of a web service

Our comparing our trade ( 1 Samuel 25 ) To be conformable of age.

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ( Zephania 1:8 )

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
  - HisWord table Word Column: As much as God spoke it

- Title

- Autobiography
- Style of Writing

What do I desire...as part of significance?

- Moses? Prophet ( Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15 )
- Abraham? Seed ( Genesis 17:5, Genesis 15:2, Genesis 22:2, Genesis 22:12-18, Hebrews 11:17-19 )

The drawback of the relational approach?

- Centralized versus (VS) distributed storage?
- Unique foreign key? Master-child? Hierarchical?
- Duplicable
- Maintainability
- Expertise and familiarity? Isolated.
- Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
- When is capacity...full enough?
  - Databases may reside inside multiple files.
  - Although databases may store different file types. This wasn't the original intention.
  - Databases are abstractions.

Lacking expertise?

- Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
- Quality Assurance (QA): Some changes break existing code.
- Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
- Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00  
What substitution...we have ahead?

| Post Resurrection | Pre Resurrection | Scripture Reference   |
|-------------------|------------------|---|

Accessibility to name?

- The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Iie eyan mi ion to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

| Word              | Scripture Reference   |
|-------------------|---|
| Burial place      | Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13 |
| Birth place       | Matthew 2:6   |
| Matriach's origin | Genesis 25:20, Genesis 28                                     |

Information Flow

Sharing His word; is following His deed.

(Charles M. Kotlerok).

With asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to \*, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order. Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordId, Dated) or nullable ( 1 Samuel 3:19 )

| For                         | Against        |

Reference ( Matthew 11:14 )

In telling the future, there are two parts: prophecy and fulfillment ( Revelation 19:10 ). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

| What prize at the target?   |  |   |                              |
|---|--|---|------------------------------|
| Prize   |  | Target  | Scripture Reference          |
| Koeep.exe   |  | Diversified language                                  | Genesis 11:9, Revelation 7:9 |
| http://github.com/KenAdenji/WordEngineering/tree/main/TIS/Gradual |  | I have decided to work on a gradual improving system. | Psalm 133                    |

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

- Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
- Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
- Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:

| .aspx  | .aspx.cs  |
|--|---|
| http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx                    | http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs                |
| http://github.com/KenAdenji/WordEngineering/blob/main/TIS/Gradual/Contacts/ContactsList.aspx | http://github.com/KenAdenji/WordEngineering/blob/main/TIS/Gradual/Contacts/ContactsList.aspx.cs |

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3c
sc-status sc-substatus COUNT(*)
200 0 285115
304 0 9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache. HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -i:w3c
-----
```

Productivity

- Productivity is the measure of unit tasks completed within a time frame or at a cost.
- A project cost is its work hours. A work day is 8 hours. A work month is =176 work hours. A work year is =2000 work hours.
- The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
- To predict productivity? Re-use.
- Metric:
  - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
  - Machine Instructions Metric: This is the size or count of the machine instructions.
  - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
  - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
  - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
  - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

- Style of Writing

| Strategy                  | Description  |
|---------------------------|--|
| Focus on quantity         | AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.  |
| Wait to judge             | AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?                 |
| Think outside the box     | While the initial focus was on the Bible, written word; research now includes spoken word.                   |
| Combine and improve ideas | The author solicits input from others.   |
| Keep focus on the problem | Database recording resulted from the effort to determine when? The author has concentrated on this timeline. |
| Set a time limit          | Elaborious work is avoided.  |

(De)Lean Tolbert Smith).

#### Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

#### Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(De)Lean Tolbert Smith).

#### Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

To know my part as His?

- ContactMaintenance.aspx is a replica copy of a Microsoft wizard master-detail example. I have decided to work on a gradual improving system is a reverse-engineering clean room implementation of Microsoft hotmail.com.
- What are you able to do now that you weren't able to do before? To recognize the following as I ( 2 Samuel 3:39 ) ?
- Who it comes to ( Hebrews 11:24 ) ?
- What is the following? List of C-family programming languages
- The mechanism of selecting people?
- What notion of the same do I have?
- What I been member of ( John 17:12 ) ?
- What did He find as suitable for him ( Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27 ) ?
- What did He find as suitable for him? Seed of Jesse, king like David, son of David

#### Fixing our website's JavaScript performance

- Long tasks:
  - Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 Sets the input value of the various element IDs, and submits the query.
  - Optimize your rendering patterns:
    - Eliminating layout thrashing: 2025-07-11T18:17:00 AJAX - only refresh updates.
    - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 table inner elements sub-ordinates.
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
  - The author does not use inline JavaScript.
  - The author minimally uses internal JavaScript for page-specific event handlers.
  - The author always uses an external JavaScript file, 9432.js, for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 What contribution I have... as someone else ( Mark 7 )? 2025-07-12T16:44:00 What did He do? How did I do ( Luke 1:41, Luke 1:44, Matthew 3, John 3 )?

(Mozilla DebugBear, 2024-10-08).

#### Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. Alunda's Law comes into recognition in GetAPage.html, by performing multiple tasks with Web Services and measuring with performance.now().

| URL   | Load time | Page size | Commentary  |
|---|-----------|-----------|---|
| 2015-10-23DoctoralDissertation.html   | 379 ms    | 33.5 kB   | 2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size. |
| http://e-comfort.esphraimtech.com/WordEngineering/WordUnion/ BecauseWeAreHellThisIsOurDefinition.html | 5.96 s    | 3.3 kB    | BecauseWeAreHellThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.   |

| Network                                 |  |  |

#### Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to re-gurgitate the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partially, is our governance.

#### The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

#### Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro ( Daniel%2012:4 )

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ( Revelation 3:7, Revelation 5:5, Revelation 22:16 ). Joseph ( Genesis 37:2, Genesis 37:9, Genesis 37:19, Genesis 39:12-18 ).

Why we Accumulate the Same ( Matthew 26:53, Revelation 9:16, Revelation 7:4-8 )

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ( Genesis 2:2-3, 2 Samuel 11:4, 2 Samuel 12:24, Ruth 3:1, Ruth 3:8, Ruth 3:18 ). Knew versus lay.

#### Wanting a Member of...

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.

| What relates a place...as one another? Observance of a particular use? |                |  |
|--|----------------|--|
| Place  | Actor          | Scripture Reference  |
| Garden of Eden   | Adam           | Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24 |
| Field  | Cain and Abel  | Genesis 4:2-4:15   |
| Land of Nod, on the East of Eden                                       | Cain           | Genesis 4:16   |
| Enoch  | Cain and Enoch | Genesis 4:17   |

What right of things?

| Word       | Scripture Reference |
|------------|---------------------|
| Work word  | John 14:10          |
| Charity    |                     |
| Timeliness | Deuteronomy 18:22   |

| The business of telling us apart? |                      |  |
|-----------------------------------|----------------------|--|
| Word                              | Scripture Reference  | Commentary   |
| Naming                            | Genesis 2, Genesis 4 | The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name. |
| Profession                        | Genesis 4            | The author developed an interest in Biblical studies while undergoing tertiary education.  |
| To help someone generate size?    |                      |  |

What did He see as His? A remodelling of the last ( Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14 )?

AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ( Genesis 3:8 )?

### Description

### Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

## Computer Listing

The software is available at <http://github.com/KenAdeniji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

### Technical Field

Seeing the Bible as enlightening to man.

## Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

## Lessons Learned

- Etem word: Leading up to 2008-03-07, I was not fully reading the word of the LORD. ([Job 32:12-13](#))
- I used to ask God for a word. To realize where my opinion lies?
  - *Familiarization with data.*
- You previously stored your work in a database. You worked on a text in .html files. 2012-10-23 You chose to return to database content. What is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original story? Draw intelligence from your work ([Job 22:21-23](#))? One of Myself offered as many as I use?
- Words heard between waking up and walking outside are written in the author's backpocket's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for others? Is how I needed Him. Putting Him into words.
- My time away from the family, United States of America (USA), may have helped me gain independence.
  - In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. *How can we bring a life extent ours?*
  - *Do I decide the truth? Do I choose the truth?*
  - *The importance of the Word is how it is made.*
  - Post-dated: God convicted me, I do not take the plight of the people to heart. Author Bart STATION, Bay Street Emergency BN.com Fire Alarm Panel 8. FDC Building A 5604-5634. To mean I decide the story?
  - *How did they handle the Messiah? (Luke 1:38) Crossing the divide? To need someone as I? (Genesis 15:2-7) You know Me as capable of you? I (Samuel 7:16, Romans 4:19)?*
  - The Yordub sentence. Ma foelgon du, I will use wisdom to block it.
  - *No difference in comparison.*
  - *How useful you have been in determining wisely? How diversification the changes? (Genesis 4:1)*
- The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
- On the other hand, you may not want to work with the word, commentary, and deducting meaning. When the word is as easy when it is in English, except when it is in Yorduba, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. *A step to do is never forgotten of the LORD. Whose obscurity has He solved?*
- *What can we be, in the midst of a people, pertaining to God? (Matthew 19:12)?*
- *What do you know how to use, as you desire yours?*
- *Rich of God. Reach of God.*
- *How many are others? (Daniel 11:41)?*
- *I have to resent God, as I am allowed to be.*
- How I want it to be: he wants it to be? *When does the word prompt the answer? (Acts 10:11).*
- People have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Built or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work ([1 Samuel 25:28](#))? Needs to be met?
- The author will record the publishing and receipt.
- An identifier and possibly foreign key is possibly null, empty when it is unknown, non particular, or it associates with the author.
- *I didn't shift...until the movement? (Acts 1:8).*
- *Did he ask you to do it? (John 8:44).*
- *By Him, about Him? (Genesis 1:1, Genesis 4:26).*
- *Timothy urgency? (Matthew 26:45-46, Mark 14:42).*
- *Could you need one part of Me and not deserve another? Biblical Calendar...Gregorian Calendar.*
- When can we do without AlphabetSequence? A place in the Bible justifies the word.
- On my side, you may not want to work with the word, clarity is this. We are inside a building as we heard that food is being given away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center.
- 04:27 Dizzy sleepy. 20:13 Beni or Buki, I forgot who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
- What past the time ([Isaiah 61:2, Luke 4:19](#))?
- What is in use?
- *That chooses I, When I read the Bible, I adapt to the role I take.*
- Relative to the world ([Proverbs 3:5](#)).
- If the words do not join? Consider separating or putting the lesser word in the commentary column.
- Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
- If the word and scenery do not fit exactly, it may be a larger sentence.
- When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
- What I have learnt from Bill Gates, through using the software from Microsoft.
  - Normalize the retail database for on-line translation processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
  - The HisWord table may be unnecessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
  - What value can we attain to this work?

2023-01-22T11:37:00 However, time substantiated  
itself? The author suggests that Baptism of the Holy  
Spirit ( Acts 1-2 ), is achievable in individual locations  
as a prestage to the 3rd temple in Jerusalem.

| Keyword                  | Scripture Reference                                 |
|--------------------------|---|
| Place of Residence       | <a href="#">Acts 1:4</a> , <a href="#">Acts 1:8</a> |
| Sign                     | <a href="#">Acts 1:3</a> , <a href="#">Acts 1:5</a> |
| Place of Worship         | <a href="#">Acts 2:1</a>                            |
| Speak with other tongues | <a href="#">Acts 2:2-11</a>                         |
| Worshippers              | <a href="#">Acts 2:5</a>                            |
| Leader                   | <a href="#">Acts 2:14-24:7</a>                      |

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

## Lifecycle

| Lifecyle            |   |
|---------------------|---|
| Period              | Commentary  |
| 2000-10-05          | Registered the WordEngineering trademark.   |
| 2002                | Commenced recording the word from the LORD in the Microsoft SQL Server relational database, introduced the AlphabetSequence algorithm, and started developing Biblical applications using the Microsoft .NET and the ASP.NET framework, and coded with the C# language.         |
| 2015                | Migrated to HTML files and web services using AJAX. <u>What is readable at home is present abroad.</u> This will continue the separation of duty approach. The benefit includes making accessible our work; focused user interface renewal. Open standard and performance gain. |
| 2025-07-26T19:17:00 | There is a table structure for repeat which would repeat the information in the preceding record. There is also a table structure for parable.  |

## Interconnection

| Technology | Commentary  |  |
|------------|---|--|
| Web pages  | The bulk of the author's web pages are in 3 separate virtual directories.   |  |
|            | Virtual Directory   | Commentary   |
|            | <a href="http://e-comfort.esnaintech.com/InformationInTransit">http://e-comfort.esnaintech.com/InformationInTransit</a> | <ul style="list-style-type: none"> <li><a href="http://e-comfort.esnaintech.com/InformationInTransit/ContactMaintenance.aspx">http://e-comfort.esnaintech.com/InformationInTransit/ContactMaintenance.aspx</a> Master-detail gridview</li> <li><a href="http://e-comfort.esnaintech.com/InformationInTransit/UTMaintenanceWebForm.aspx">http://e-comfort.esnaintech.com/InformationInTransit/UTMaintenanceWebForm.aspx</a> URI tables with a vertical view.</li> </ul> |
|            | <a href="http://e-comfort.esnaintech.com/Gradual">http://e-comfort.esnaintech.com/Gradual</a>                           | Recruiters contact details. Master page with user components.  |
|            | <a href="http://e-comfort.esnaintech.com/WorkEnvironerms">http://e-comfort.esnaintech.com/WorkEnvironerms</a>           | AJAX website. Shared .dll. Stand-alone pages with hyperlinks to related information.   |

### Development History

| God doesn't use inform ( Psalms 81:5, John 16:30 ). He mandates. |   |
|--|---|
| Technology   | Commentary  |
| Relational Database  | After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.   |
| Server-side Programming, Back-end                                | The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable. |
| Programming Style  | This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.   |

## A Causal to Hearing Words

He said and He did. Word work ( Genesis 11:1-9 ). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include:

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer classes at [Chico State College](#), in the Fremont and Newark campuses.
- Read books and magazines at [Barnes & Noble](#), [Borders](#), [Walden Pond Books](#), [Wal-Mart](#) and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Solitary living at [Brewers City in California](#), [Palmdale](#).
- Fast, everyday, only ate, once a day, in the evening. I ate [Nomura Holdings](#) Kokuho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the world's revolution.

| Title                    | Description   | Commentary  | Universal Resource Index (URI)             |
|--------------------------|---|---|--|
| Accessor Pattern         | Get and set an attribute by using a property.   | The boundary to a property value. Readonly is achievable by disabling the set method.   |  |
| Delegation Pattern       | Composition substitutes for inheritance.  | The author does not inherit any class. But the author delegates by using composition to include existing services.  | <a href="#">BibleBook.cs</a>               |
| Factory Pattern          | Create subclasses from one or more methods.   | At runtime, instantiate a variable object.  | <a href="#">BallFactory.java</a>           |
| Immutable Pattern        | An immutable object is unchangeable after creation.   | A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuffer object is changeable. |  |
| Marker interface Pattern | The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable. | A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.                                       | <a href="#">BibleBook.java</a>             |
| Singleton Pattern        | Only a single instance is creatable.  | At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.   | <a href="#">SingletonPatternBible.java</a> |

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates

(Unified Modeling Language)

Value

## Classification

2025-08-21T14:21:00 When assume there are the same as himself... one see himself. ( Judges 11:7 ) Did you not thrust me out of my father's house... saying I am the son of a harlot?

At the intersection of Taylor Street and 17th Street.

- Pharaoh's dream of 7 years of plenty followed by 7 years of famine in Egypt and worldwide interpretation by Joseph ( [Genesis 41](#) )

• The inspiration for my work is Bible studies. Chuck Missler of *Jezebelia House* preached the Abomination of Desolation will occur in the midst of the week after the enforcement of the covenant, 3.5 biblical years, 42 biblical months, 1260 days.

• 2025-07-10T21:25:08 I rode the AC Transit bus 1818 route 232 bus from the intersection of Paseo Padre Parkway and Fremont Boulevard to the intersection of Paseo Padre Parkway and Sward Drive. I saw Audrey Thibaux and Romain Thibaux on Sward Drive between Roussillon Avenue and France Road. Romain Thibaux said always taking your note.

- Technology trend: Microsoft Windows and Microsoft Office which offers a common interface, menu layout and consistent labeling. Client/Server. World Wide Web (www) hyperlink. Web services.
- Testimony: I Am taking you on a Journey... Out of Egypt have I called My son ( [Genesis 1:2](#) ).
- Countries: Passage of time.

| Actor        | Word       | Scripture Reference                                  |
|--------------|------------|--|
| Abraham      | Land, seed | <a href="#"><u>Genesis 13:8-18</u></a>               |
| Jesus Christ | Sheep      | <a href="#"><u>Matthew 26:31, Zechariah 13:7</u></a> |

1. 1983-1988, Charlotte, North Carolina (NC), United States of America (USA)
1. During my 3 Associate degrees' graduation ceremony, Doctor Richard Hagemeyer asked if I would like to go to Africa?
2. At Central Piedmont Community College (CPC), I tutored in the personal computer (PC) laboratory with Laura Lawhorne and her African-American female supervisor.
3. My first contract was at Sunhealth Corporation.
4. At Central Real-Estate, I was a technician with 2 African American females, that probably attended school together, and then lived together. The telephone operators were mostly African American females, including my stepmother.
5. At McKey Real-Estate, I was contracted to develop an R-Base 5000 5GL application.

What part of me?

What did He associate with His being? What growing up have I chosen alike ( Exodus 2:19 )

### There are duplicates in the Bible

### Contribution

### The Contribution of the Author's Historical Information

| Actor   | Word   | Scripture Reference   |
|---------|--|---|
| Abraham | Seed; Abrahamic covenant, Davidic covenant, Messianic covenant | <a href="#">Genesis 12:7</a> , <a href="#">Matthew 1:17</a> |
| Moses   | Season; civil calendar, religious calendar                     | <a href="#">Exodus 12:2</a>                                 |

2025-06-29T18:34:00 What our part we share?

2025-06-09T12:52:00 What must I hold as truth? What must I perform as truth? When does God add? What I bring to Israel... is all my people

1. King Saul ( 1 Samuel 15:22. )
2. King David ( 1 Samuel 30:18-31. )
3. King Solomon ( 1 Kings 10:1-10. )

2025-05-28T18:40:00 How did He position?

1. Joseph ( Genesis 50:20 )

2025-06-07T15:13:00 What we have as a later use?

1. 2025-06-07T17:22:00 Joseph ( Genesis 41:34-36 )

2025-05-15T22:09:00 What did He call time?

1. In the beginning ( Genesis 1:1, John 1:1-2.)
2. Declaration of our adopted Father to His only-begotten Son ( Psalms 2:7, Hebrews 5:5)

2025-05-14T15:08:00 What did He make variable... what did He associate with age?

- Role: Army, Priest, King of the Jews ( Numbers 1:3, Numbers 4:30, Numbers 8:24-25, Matthew 2:2 )

2025-05-07T01:29:00 Kehinde (the last-born of the twins) ( Genesis 45:6 )

2025-05-13T16:52:00 What did He start... that I improve

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 What apart I have set as necessary?

[soloist.ai/onboarding?utm\\_source=new-tab&utm\\_medium=firefox-desktop&utm\\_campaign=native-article-cards](https://soloist.ai/onboarding?utm_source=new-tab&utm_medium=firefox-desktop&utm_campaign=native-article-cards)

Hong Kong was driving to Albertsons Lucky, Brookvale. Hong Kong drove me from their house to 99 Ranch Market.

I cut my finger nails. I shaved my beard. I cut my hair.

Is Koko still with you? Ni mi se ri be mo. Is Koko still w

about Ademiloluwa. I had a run-in with the police... which was fruitless.

1. The Holy spirit ( Genesis 1:2, Genesis 2:7, John 1:33, John 16:7, 2 Thessalonians 2:7, Acts 1:4-5 )
2. Man ( Genesis 1:26-31, Genesis 2:18-25, Genesis 49:26, Matthew 2:23, Revelation 13:18, Genesis 41:34-36, I Corinthians 7:1-9, I Corinthians 7:36 )

## 2025-04-30T04:03:00 Timeline of WordEngineering

2025-05-15T05:45:00 Difference of many?

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

1. My counterpart has yours.
2. The tool a man...has render as Himself. ( John 16:7, Matthew 16:18, John 4:14, John 6:35, Matthew 26:17-19 ) ?
3. What did they produce. ( Genesis 4 ) ?
4. Sociality of view. ( Genesis 12:11, Genesis 13:10, Genesis 22:14 ) ?

1. 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
2. 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification

2025-04-25T10:53:00 What attribute the word? Autobiography... tying it into Biblical event.

[www.JesusInTheLamb.com](http://www.JesusInTheLamb.com)

1. Who? - Jesus Christ ( [John 8:56](#); [Genesis 22:13](#) )
2. What? - Passover Lamb ( [John 1:29](#); [Genesis 22:8](#) )
3. When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations ( [Matthew 1:17](#) )
4. Where? - Golgotha ( [Matthew 27:33](#); [Mark 15:22](#); [John 19:17](#) )
5. Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission ( [Hebrews 9:22](#) )

## 2025-04-05T09:04:00 Composable Design

2025-04-05T13:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. How will I dictate His use as a person?

(Juval Löwy of IDesign, 2019)

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophectic attempt to understand technology, and its application to Christianity. The only date observed at the beginning was the calculation of the crucifixion of Christ. This is not defamatory, nor inflammatory.
- 2025-04-24T13:45:00 While the author is aware of other sources of information and conjecture, the author is undaunted.

1. Faith ( [Hebrews 11:1-2, Hebrews 11:8-19](#) )
2. Without the camp ( [Hebrews 13:11-13](#) )
3. Rest ( [Hebrews 4:8](#) )
4. Reverence ( [Daniel 4-5](#) )

- Prophecy
  1. Passover Lamb: Our LORD's Supper
  2. Beware of the Yeast of the Pharisees ( [Matthew 16:5-12](#) )
  3. Fig tree ( [Matthew 21:19-21](#) )
  4. Cock crow ( [Matthew 26:34](#), [Mark 14:72](#) )
- Fulfillment
  1. Temptation of Christ ( [Matthew 4:1-11](#), [Luke 4:1-13](#), [Deuteronomy 8:3](#), [Deuteronomy 6:13](#), [Deuteronomy 6:16](#), [Mark 1:13](#) )

- Who: Seed of the woman versus seed of Satan
- Where: Revived Roman Empire
  - 1. When: Interrupted after the completion of the first 69 weeks, which commenced from the commandment to rebuild Jerusalem
  - 2. Time span: 2520 days, punctuated in the midst of the week with the Abomination of Desolation.
  - 3. Completion followed by: 1000 years.

1. 2025-02-13T07:05:00 God counted the days during creation... God blessed the day of rest, the 7th day

1. 2025-01-20T07:37:00 12,000 virgins from the tribes of Israel, sum of 144,000 ( [Revelation 14:4](#) )

1. 2025-01-15:22:00 Data: It is primarily the word of God, in the WordEngineering database, HisWord table, Word column. With supportive information in the other columns on the HisWord table. The information in the other tables, such as, the Remember, Areas, AcctOfGates tables are extractable and computable from the HisWord table.

2. 2025-01-15:29:00 Teachable: Can a student learn to generate this data, as you have? The only pre-requisite is the Holy Spirit.

3. 2025-01-15:42:00 Textual: The author hears the word. The author is able to transcribe the words. The accent of the author is not fluent. The author is not artistically inclined, nor trained at capturing and transmitting audio or video.

4. 2025-01-15:46:00 Customization: How is this word supposed to be used? When the author receives the word, he makes effort to temporarily record the word on paper. At a convenient time, the author records the word on a computer electronically.

5. 2025-01-15:47:00 Question: How is this word supposed to be used? What is the result of this thing? 2025-01-15:48:00 What is the favor, only to me? [Daniel 12:13, Daniel 11:45, Daniel 10:21, Daniel 9:27, Daniel 7:28, Daniel 6:27, Daniel 5:31, Daniel 4:37, Daniel 3:30, Daniel 2:49, Daniel 1:21, 1:7]

6. 2025-01-15:46:30:30 What according to the same [Daniel 9:24, Daniel 9:24] 2025-01-15:46:30:30 Your adopted father once chastised you. What are you not like your twin sibling, asking. He said you were not preaching. He asked, se won lo. Are they using the software at Dagang Panyaku Center (DHC)?

7. 2025-01-15:47:00 At the intersection of 4732 Midland Commerce and Decoy Terrace. What do we need... each other for? Be example [Daniel 9:24, Genesis 4:7, Genesis 4:24-26] 2025-01-15:47:14:00 Milk & Honey Cafe, Pegasus Center, 34265 Fremont Boulevard, Fremont, California (CA) 94555. What is transpire? What have you included?

1. 70 years in Babylon ( Daniel 9:2 )
2. Reverence ( Daniel 5:17-31 )
3. Lot ( Daniel 12:13 )

1. 2025-02-07 23:30: Going along with the prognosis of the LORD, I feel my best utilization at the moment is to re-cap my history. To look at how I technically made decisions, in light of the spirit. With Chuck Missler as a mentor, he fed information technology companies, and tutored bible classes. Not to explain the bible, but give an understanding of scripture. I found out that PowerPoint that my software engineering skills were not fully developed during my Master's degree programme at the University of Technology, Sydney (UTS). It may be that I did understand the paradigm shift, client/server, or personal, PowerBuilder/ Master-slave lacking. I had not led a team software project, nor taught a non-technical female student to transition into software engineering. These opportunities and challenges to train a female prodigy include:

- The Iranian Persian female student at Central Piedmont Community College (CPCC), specifically Computer/ (PC) laboratory 3 Pascal programs;
- Teaching Hajira Adeola of a French lecturer, the wife of Fola Adeola, the co-founder of Guaranty Trust Bank (GTB), how to use a personal computer (PC).
- Helping Hajira Stevens of Powerpoint with how-to-use a client/server tool as a spreadsheet.

2. At Electric Data Systems (EDS)/Westpac the reference table had a composite primary key that consisted of major and minor columns.

- At Daigaku Honyaku Center (DHC) the reference table I wrongly implemented as a singleton instance.

3. Up-to-now, what I have are raw ideas which need refinery expertise. 2025-02-08T23:23:00 [you have used - how do you use?](#)

1. Work distribution
2. Database modeling includes normalization
3. At Daigaku Honyaku Center (DHC) there were 2 duplicate product tables, and a plan in place to differentiate product items and prices by their colors
4. C# static classes are not instantiable, but they support extension methods which allow a static method to be called from a class name.

2025-01-31T17:37:00 [How will I assist Him \(Numbers 3:45\)](#)?

Initially, your work was original. 2025-01-31T17:41:00 Now... [your work is supplementary to Holy Spirit \(1 Corinthians 2:2\)](#). 2025-01-31T17:46:00 Now... 2025-01-31T17:46:00 With Richard Temo a mabwa-bono Canadian student helper, and Andria a Greek descent female of Tembo Elders, I did not keep track of the amount of money loaned nor repayment. With Paul Walat, a New-Zealander, and Kerry Walton, a Greek-descent nurse of New Century Software, I did not keep track of hours worked, hourly rate, nor the amount of money loaned nor repayment. Doctor Makana Talaiyah and I spoke about the Los Angeles (LA) fire, and doctor Makana Talaiyah said it was about 4 miles away from his home, place, Makana Talaiyah said it was due to global warming and wind, and may occur again in 2-3 years' time. Specially... again?... algorithm? Trademark... patent (1 Corinthians 3:12-14).

2025-01-31T17:59:00 With AlphaBeeSoftware, you were making the Bible... useful. 2025-01-31T17:11:00 What application... have I used? 2025-01-31T17:11:00 What applies... as the same? 2025-01-31T17:12:00 What exactly... as the author... applied?

2025-01-31T17:13:00 How can... the motorist... stay the same? 2025-01-31T17:14:00 What exactly as passed something? 2025-01-31T17:15:00 How were we made as God? 2025-01-31T17:15:00 [What opportunity has He given \(Hebrews 1:2\)](#)...

1. 2025-01-11T17:23:22 [gyrfprocessor.com/2025-01-11T18:11:00/join-estimation-internals-in-sql-server-2016/](https://www.gyrfprocessor.com/2025-01-11T18:11:00/join-estimation-internals-in-sql-server-2016/) by Dmitry Piliugin: [It was built with transport model...](#), in question? Extensible Markup Language (XML)... JSON (JavaScript Object Notation). [ContactMaintenance.aspx](#) joins contact information, but it is in a master-detail hierarchy. 2025-01-13T09:46:00 [SQL Server 2016: Scalar UDF Estimation and Project Normalization April 25, 2018](#) by Dmitry Piliugin: [When searching by Bible groups... these are scalar functions.](#) 2025-01-13T11:40:00 [Do we have to be part of this \( Acts 7:25. Genesis 37:20 \)?](#)

1. 2025-01-28T12:32:00 Rating: 2025-01-28T13:01:00 earthly... heavenly ( Luke 1:19, Psalms 8:5, Hebrews 2:2, Hebrews 2:7, Matthew 26:53, Matthew 19:14 )

- 2025-01-27T16:58:00 Sharing is hard: An address may be a domain, page, anchor, or more recently, text fragments. An address may also be for a single or multiple e-mail addresses. The advent of client/server computing... 2025-01-27T17:19:00 introduced the concept of sharing information... to complete a task. Asynchronous JavaScript and XML (AJAX) supports activities such as background data exchange, and partial page refresh.
- 2025-01-27T18:16:00 Ranking is hard
- 2025-01-27T19:25:00 Crows are where: Where am I supposed to be needing? Jesus Christ included people ( Mark 10:40 ). 2025-01-27T19:30:00 The author sought adaptation to the Bible.
- 2025-01-27T19:25:00 Crows are not so wise
- 2025-01-27T20:02:00 End to end: The first database, may, after time, not be a single island, managed by one person, but it may grow into an enterprise application

Today:

- 2024-12-27T00:20:00 In the north-east, there is a href, hyperlink reference, to an e-mail address. In the north-west, I found a ur, web address, when I looked deeper. 2017-12-04 When is day of malto address?
- 2017-12-02T07:14:00 A young lady came to visit me. I introduced her to my adopted father and uncle Irie. She does documentation, probably more specifically technical writing. She has written a lot of papers, but we would like to supplement them. The site is the Onysekwe family SAMP-Tech business. She is returning to Europe, where she intends to sit for a university coordinated examination.

2. Latest employer, Daigaku Honyaku Center (DHC):

- 2007-09-25T01:49:00 Guy Kawasaki, Asian angel of death.
- 2008-09-11 September 22. Hayward Hall of Justice, 24405 Amador Street Hayward, California (CA) 94544, 510-690-2700.

3. Next of kin, Bentulawa Adegoke Abimbola Adeniji

- 1999-05-07 Iie yan mi, lon lo yi. It is my person's house, you are going to. Christening of Ademiloluwa.
- 1999-05-07 Her husband ko kin be soro bedtime. A separate ar. e. Her husband does not speak to her at bedtime. Will separate self.

4. Tribes in Nigeria

- 2014-04-13 Santa Clara, Ito female. Tammy. Ezinne translated sweet mother. Barnes & Noble (BN.com) El Cerrito Plaza. You are acknowledging that you are different...but you want to die for the people of God.
- 2024-05-04 Nor Ahluasua, Light. 6' 1" basketball high school forward. Both sides of my family are Hausa not Ibibio. Nordstrom, Emeryville.

From my bedroom, I walked into the light of the upstairs lobby to view my Spyder Active trousers that I purchased from Costco on 2024-03-21. Where does God reveal Himself? There are 47 occurrences of the word light in the King James Version (KJV) of the Bible. Google.com may have a statistics attribute for providing additional/specific information. Alternatively, what type of information... am I searching for? Image, audio, video, news, statistics... 2024-12-21 05:25:50.117 [kcr.org/books/defenders/629](https://www.kcr.org/books/defenders/629)

2. 2024-12-16T09:27:00 Place: earth, city, house, kingdom, country, tribe

1. 2024-12-14T21:12:40:00 Availability ([Genesis 2:33-35](#), [Daniel 2:41-43](#)) Wake-up orientation: My right foot is in the center and on the top of my left foot.  
After the author completed his 3 Associates degrees, the president of Central Piedmont Community College (CPCC), doctor Richard Hagemeyer, asked the author if he would like to go Africa?  
After the author completed his Bachelor's degree, the author did technician work in separate telephone call annals, and the upper part of the Portland Turbo C language software that prints labels for the offshore storage of real tapes.  
After the author completed his Master's degree, the author did database replication between the central database and remote databases.

2. 2024-12-12-1415:48:00 Scalability ([Genesis 41:34-36](#), [Genesis 41:17-19](#), [Genesis 37:21-22](#))  
When the contract of the author was terminated where he first did database replication, the author commenced a lead software engineer role in a client/server team and apprenticeship project.  
The author initially used a Sybase PowerSoft Watcom Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE).  
The Polish heart attack survivor project manager restricted workers to 40 hours a week.  
**Do you not believe I will provide your need?**  
2024-12-12-1417:23:00 Security: **What do you have as sufficient security?** ([Daniel 6:22](#))  
The author's security is the use of the author is not... Comprehensive use of people.

3. 2024-12-1417:33:00 What [How we have the case?](#)  
2024-12-1417:22:15:00 How can we [grow your energy](#), [we are right](#) ([1 Samuel 22:2](#))

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering ( [Daniel 9:2](#)). Is there a date? Not null
- Calculate the date difference between the beginning of the prophecy and the ending of the prophecy ( [Daniel 9:24-27](#)).  
2021-01-04...2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)  
Is the date before or after?

- Greatest (Matthew 22:36-40, Matthew 18:1-4, Matthew 23:11)
- New (John 13:34, Hebrews 8:13, 2 Corinthians 5:17)
- 2...1 (Genesis 2:24, Genesis 41:25)

- Baptism of the Spirit (Luke 24:49, 2 Thessalonians 1:7)
- Time representation (Matthew 24:14)
- Trade of man (Revelation 13:16-18)
- No changes to the Word (Deuteronomy 4:2, Revelation 22:18-19)
- End-times (1 Peter 4:7, Genesis 6:13)
- Recompense (Job 42:10-17, Job 1:2)

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, punctually. SQL Server is a service
2. 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKey Real Estate, I worked on a R:base 5000 application.

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the content. If this is a word from scripture, then I attribute the reference.  
2024-10-17T21:38:00 I take the spirit ... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

- God chooses people to work with. For example, Abraham ( [Ezekiel 33:24](#) )
- Consistency with the Bible ( [Genesis 25:23](#) )?

What the society produce? What the society produce... what can happen?

Ratio percentage versus (V5) quantity? 7.3 for 97 group.com

In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed ahead. The others followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw inside Jmli. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not leave aunt Taiwo to the venue, but my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.

• Timelines ( Daniel 5:5, Daniel 5:11, Daniel 5:26, Daniel 5:30-31, Genesis 4:3, Genesis 4:8, Genesis 4:12-14 )

• Quantification ( Daniel 6:1 )

• Distinction self ( Daniel 5:12 )

• How we get them know ( 1 Corinthians 5:7, Acts 2:15 )

• I want not...  
I want not a... using meaning there are...  
A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

- Naming ( Genesis 2:19-20, Genesis 2:23, Genesis 3:20, Genesis 4:1, Genesis 4:25-26.
- Reverence ( Genesis 4:26, Exodus 20:7, Deuteronomy 5:11 )
- Interpret ( Genesis 37:9, Hebrews 11:23-30, Daniel 5 ) to each entirely its own.

- 1. 2024-07-12T06:25:00 How much period... we have the same?
  - Telsis integrates programmable script and audio recording. MP3 is an industry standard.
  - The author made a transition from one-time manufactured hardware to maintainable software.

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming

- International Business Machines (IBM):
  - An association of being alike... is the assurance of the same.
  - The continuation of myself... is all I am allowed.
  - One side... the decider.
- 1. IBM PC compatible:
  - At Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
  - The computers were IBM, Apple, Radio Shack
  - The programming languages were Microsoft's Basic and Borland's Turbo Pascal
  - The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE
- 2. IBM employee:
  - In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
  - In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails
- 3. IBM event:
  - In Sydney, Australia, the author received an end-of-year gift of wine from IBM
  - In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
  - In San Francisco, California, the author attended an evening after-work party that was organized by IBM
  - In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).  
How-to verify the work of the spirit?  

- Is it compatible with the Bible ( John 10:30, John 17:22, 1 John 5:8 )?

  
**Is this a link ( Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 5:3 )?**

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.  
**How as a... result of what?** Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

**What exactly can we expect... out of the Bible ( Daniel 5:31 )?**

- 1. When is the Bible specific about time ( Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54 )?

**How admissible is the word ( Genesis 41, Daniel 2 )?**

Get a Page.html depends on the word.  
**What did I fit into a place?**

1. Ark of the Covenant
2. Temple
3. Jerusalem
4. Judah
5. Israel

What did He see Himself as?

1. Joseph ( Genesis 37:9 )
2. Moses ( Acts 7:25 )

**Effect of the Progress ( Luke 1:1-4, Daniel 9:22-23 )?**

- 1...many ( Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2 )
- More at the same ( John 15 ).

**When did Israel... seek no region... as its own ( Acts 1:6 )?**

1. The prophets
2. New Testament
  1. The Gospels: King of the Jews, the disciples
  2. Pauline Epistles, General Epistles
  3. Revelation, starting with the letters to the 7 churches in Asia Minor

**We now fold our task**

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have stopped using people as Myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedtoWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task... duplicable?

2024-11-20T05:38:00 Ordering  
2024-11-20T07:59:00 Do I make a separation between physical and spiritual?

- Forerunner: Jesus and John the Baptist ( Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13 )
- Levitical priesthood ( Hebrews 7:14, 1 Samuel 3, Numbers 3 )
- Sitting on a high place: Humble... exalt ( Luke 14:7-11 )
- Baptism: Washing of feet ( John 13 )
- Marriage: Younger before the firstborn? ( Genesis 29:26 )

| What will count... forever?                 |  |
|---|--|
| Word  | Scripture Reference  |
| Believer in Jesus Christ                    | John 11:26   |
| Kingdom of God                              | Daniel 2:44-45   |
| Charity                                     | 1 Corinthians 8:1, 1 Corinthians 13:1, 1 Corinthians 13:2, 1 Corinthians 13:3, 1 Corinthians 13:4, 1 Corinthians 13:8, 1 Corinthians 13:12, 1 Corinthians 14:1, 1 Corinthians 16:14, Colossians 3:14, 1 Thessalonians 3:6, 2 Thessalonians 1:3, 1 Timothy 1:5, 1 Timothy 2:15, 1 Timothy 4:12, 2 Timothy 2:22, 2 Timothy 3:10, Titus 2:2, 1 Peter 4:8, 1 Peter 5:14, 2 Peter 1:7, 3 John 1:6, Jude 1:12, Revelation 2:19 |

| Messianic Covenant                          | Jeremiah 31:31-33  |
| Divided according to the children of Israel | Deuteronomy 32:8   |

What I use people for ( Job 35:6-8 )?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to... that you may find me useful ( Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2 ).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said, What are the other activities of God? The spirit of God moved. He saw it was god ( Genesis 1 ). When one finds good? That is the meaning ( Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26 ). We demonstrate... how we are. It is not misleading... That is the decision ( Revelation 12:10 ). Appreciate as ( Matthew 16:18 )?

**What is the supplement?**

| Word                 | Commentary  | Scripture Reference                                |
|----------------------|---|--|
| Greatest Commandment | Love the LORD thy God. Love thy neighbor as thy self. | Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31 |
| Forerunner           | The law and the prophets were until John              | Luke 16:16   |

**Is this generation the same?**

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.  
Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

| What specially like Him? ( 1 Corinthians 15 ) I spoke to task. |                        |  |
|--|------------------------|--|
| Event  | Feature                | Scripture Reference                                  |
| Creation   | Image of our ancestors | Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38 |
| Redemption   | Image of the Son       | 1 John 3:2   |
| Do you know mine? ( Deuteronomy 18:15 )                        |                        |  |

| Place of Origin  | Egypt ( Exodus 2:19 )  | Bethlehem ( Matthew 2:1-18, Luke 2:1-20, John 7:42 ) |

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place, situation, man, grouping, 2025-04-1804:06:00 ( Genesis 48:4 )?

2025-04-1706:16:00 Do we choose...a realization of him?

- 2024-07-09T18:30:00 He has always put it in...context of time.
- 2024-09-15T13:39:00 How our path...it never...desires as nation?
- 2022-08-08T19:00:00 Dispossess the Devil?
- 2024-07-23T09:22:00 To be an African's...Nation.
- 2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture ( Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5 )

What I am rendering? To what particular use...is me ( Matthew 16:18 )?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony ( Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45 )?

What is the reward of the past?

From that day ( 1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53 ) ...

1. Salvation ( Exodus 14:13 )
2. Commit ( Luke 23:46, Psalms 31:5 )

What personifies the time?

1. First and Last Adam ( 1 Corinthians 15:45 )
2. Firstborn ( Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23 )

What does authoring the word do? To shed as much light as our opening ( Genesis 1:1-1:5, Luke 4:16-4:32, John 1:2-1:11 ) .

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love babe ti won. Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not deserve. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness ( 1 Timothy 6:17 ) .

| How do you reference the Bible?   |  |            |

| Actor                      | The law and the prophets: Can I prepare man for an event of time?             | Amos 3:7            |
| Event                      | When does man decide His future is as reminded? Connecting the past as I use. | Genesis 1, John 1   |

To Reckon as Size

- Light ( Genesis 1:16 )
- Sabbath ( Genesis 2:2-3 )
- Autonomy ( Genesis 4:9 )

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. *What exactly I know, as necessary of me? How numerous we are made.*
- *You do remember based on the date, do you need to collect the date, if you don't do remember?*
- *What does he want as a set? O pe. In Yoruba?*
  - Complete
    - Late
    - Call
    - Thanksgiving
- Where am I, as a human being?
- *The life of appointing something as myself.*

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword **Noun**.
- **Letters in the English language?**
- **The word? Is to associate the reference.**
- **How could I collaborate fact with what I know?**

| On behalf, of someone, I seem |               |                      |
|-------------------------------|---------------|----------------------|
| Actor                         | Type          | Scripture Reference  |
| Jesus Christ                  | Passover Lamb | John 1:29, John 1:36 |
| John the Baptist              | Forerunner    | John 1:31            |

What did He see Himself as?

What did He see Himself as?

| Alias        | Scripture Reference |
|--------------|---------------------|
| Son of God   | Matthew 16:13-20    |
| Son of David | Matthew 22:42       |
| Son of Man   | 1 Corinthians 15:45 |
| Word         | John 1              |

There is more to you, than you are. ( Ephesians 3:18 ).

We want personal data, when is public data sufficient?  
From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

| Type  | Commentary                            |
|-------|---------------------------------------|
| Man   | Election - Did He share His hope?     |
| Place | Promised Land - Where I will inhabit? |

As the Open?

| Actor        | Commentary                          | Scripture Reference             |
|--------------|-------------------------------------|---------------------------------|
| Adam         | The first man will need a companion | Genesis 1:26-31, Genesis 2:6-25 |
| Jesus Christ | Transformation of the spirit        | John 3                          |

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [Editor](#), [iACo](#)
- Questionnaire: [RatingRank](#), [IoDefine](#)

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@gpm.com will telephone me about the role with Google's co-founder Larry Page [jobs.lever.co/kitthawk\\_aero/701c6d9a-2d8a-4727-a345-d493d6dc777a?encyId=3b8e0b44-7127-4709-ad21-5eb8ea5f7401](#) Andre Nguyen asked how I spend my day?

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads. When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our mission? This projection may result in entries of new records in the Remember and APass tables. Where are people, his relation?  
However, he is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Sward Drive, Fremont, California (CA) 94555

How do we develop...our past time. ( Genesis 37:19-20, Daniel 6:5 )?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

What we do minimally is how we do extensively.  
God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- ScriptureReference.html Requires Bible knowledge and place in the Bible.
- BibleWord.html Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ( Matthew 10:19-20 ).
- Where am I, remembrance of how I am made ( 1 Corinthians 14 )?

What does He choose as example?

- God rested on the Sabbath day ( Luke 23:56 )
- Jesus Christ ( Daniel 9:24-27, 1 Corinthians 15:45, 1 Corinthians 15:47 )
- Man such as King David ( 2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5 )
- Place such as Sodom ( Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8 ).
- Other living things ( Numbers 22:21-33 ).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy ( 2 Samuel 12:14 ). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ( Isaiah 23:15, Isaiah 23:17, Jeremiah 25:11, Jeremiah 25:12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5 ). Listed below are some of the repeated reinforcements.

Samson's Birth ( Judges 13 )

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazirite son ( Judges 13:2-5 ).

The same angel appears to Manoah and his wife ( Judges 13:6-25 ). The angel reinforces the their responsibility and defers reverence to God.

The Birth of the Messiah ( Luke 1 )

Foretelling the birth of John the Baptist ( Luke 1:5-25, Malachi 4:5 ). Transitioning the present to the after ( Luke 1:17 ).

Foretelling the birth of Jesus Christ ( Luke 1:26-38 ). Continuing the Davidic line ( Luke 1:32-33, 2 Samuel 7:12-13, 2 Samuel 7:16 ).

The Baptism of Cornelius ( Acts 10 )

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band ( Acts 10:1 ).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining ( Luke 5:4-11, John 21:3-6, Matthew 17:24-27, Acts 10:2-16 ). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in ( Genesis 14:10 ); and in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days ( Genesis 25:8, Genesis 35:29 ). The last occurrence of the word, full, in the Bible, occurs in ( Revelation 21:3 ). Living a presence ( Jeremiah 28:11 ). To creating a future full of all. To creating a future free of all.

- The screenshot shows the IntelliJ IDEA IDE with the 'AlphaRefSequence' class open. The class is a 'Case' and has several methods: 'Data', 'Index', 'Length', 'Drop', 'Main', 'ScriptureReference', 'TestRef', 'WhatRefThatStarts', and 'YourOwnWhatRefData'. The 'Main' method is highlighted. The 'Properties' tab is active, showing the 'Id' property as 'ScriptureReference' and the 'Word' property as 'Word'. The 'ScriptureReference' property is also highlighted.

[SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis 22, Daniel 9:24-27, John 1:1, Jude](#)

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK\_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the IDX\_Scripture\_VerseIDSequence, where the clause is on the VerseIDSequence column. The IDX\_Scripture\_VerseIDSequence indexes on the VerseIDSequence column; it is not a covering index, since the Select column-list includes the BookID, ChapterID, VerseID, and the PK\_Scripture is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

2019-10-05ArtifactDescription.html

The author's country of birth, Nigeria, gained independence on, 1960-10-01, a Biblical generation before the end of the second millennium (olural millennia). There are 2570 days between 1960-10-01 and the author's date of birth, 1967-10-15. Nigeria became a republic on 1963-10-01. The difference in days between when Nigeria became a republic, 1963-10-01, and 1967-10-15; is 1475 days; 4 Biblical years, 1 month, 5 days; 4 Gregorian years, 2 weeks. The difference in days, between the creation of Lagos State, 1967-05-27 and the author's date of birth is 141 days (4 biblical months, 21 days) (4 months, 2 weeks, 4 days).

1967-10-15 to 75 Biblical years is 2041-09-10 ([Genesis 12:4](#)).  
 1984-07-17 is the date of the author's 17th Biblical birthday ([Genesis 37:2](#)). The date of recording this information is 2020-12-23, Epoch timestamp: 1603545400  
 Jesus Christ began His ministry at the age of thirty, and the estimate is that He served for three years ([Luke 3:23](#)). The author was born on 1967-10-15 thirty-three years before the end of the second millennium. 1967-10-15, 2000-01-01 = 11766 days (32 biblical years, 123 calendar years, 3 days) 1967-10-15 B.C. - 1967-10-15 A.D. = 1434551 days = 47196 months = 79393 years. 79393 years = 3001 biblical years. 3001 biblical years = 3001 years = 1997-05-10. The author's 30th birthday is 1997-05-10.  
 Jesus Christ was crucified on 2000-04-24. Between 1967-10-15 and 1968-04-04 are 172 days (5 biblical months, 22 days) (5 months, 2 weeks, 6 days). Between 1967-10-15 and 1968-10-15 are 366 days (1 biblical year, 6 days) (1 year, 1 day). Between 1967's Easter Day, 1967-03-26, and 1967-10-15, is 203 days (6 biblical months, 23 days) (6 months, 3 weeks, 5 days). Between 2023-04-06 and 1967-10-15, is 79933 days (1663 biblical years, 8 biblical months, 15 days) (1935 years, 6 months, 1 week, 1 day) 49.09270833 Biblical generations, 280.52976166 years of years.

<sup>(5-2)</sup> At the age of twelve, Jesus Christ, His father and mother, at the temple, in Jerusalem, He author worshiped at Saint Edward's Catholic Church on 20-07-01 or 19, 35 Biblical years, after coming to the U.S. (Luke 2:42; Matthew 9:18; Mk 6:5; Mark 5:42). The age of debarment, Israelism, occurred in 1988, twelve-years, before the beginning of the third millennium; and forty-years after Israel's independence. The author first visited the United States of America, as a two-year-old child; and he re-located to Australia before the age of twenty-four. Deported at the age of twenty; and returned before turning thirty-two; a two-year period before (Nehemiah 5:14): 20:01–12: 20 = 12? (Ezodus 4:12)? Decay Tectonics, South Center. Past the house of James. What are beyond out of merit? Merit the word. The birthday of biological month is 1948-01-12. The birthday of paternal aunt is 1948-01-30. The average day of the month [3] 1 + 2 = 4? 2 + 1 = 3? It was depicted as a 20 year old, just prior to my 21st birthday. Can you make me a sign? Can you form a map 1641th verse. 1614 – 816 = 798. Between 1999-01-22 and 2002-06-12, there were 7812 days (21 biblical years, 8 biblical months, 12 days) (21 years, 4 months, 3 weeks). 360 × 12 = 4320, the telephone country code for Nigeria is **234**. Moses lived for 120 biblical years, 120 × 360 = 43200. At twice most moment, 12PM, the elapsed time is forty three thousand, two hundred, 43200, seconds. The author's ancestral home is Ile-Ife. The author's place of birth is Lagos. When the author's biological parents re-located to the United States of America (USA), and he re-located to Ile-Ife, Lagos the economic capital of Nigeria, and Ile-Ife is the cradle of the Yoruba land. The author re-located from Staff School, University of Ife, as a student, to his father's home, which was located in Ibadan, Oyo State, Nigeria. The author has been visiting his father's home since 1990, and he has been living there since 1993. Information Publishing Services (IPS) White International Online.

The singular word, centurion, occurs twenty-one times in the Bible; its plural word, centurions, occurs three times in the Bible; therefore, centurion(s), occurs twenty-four times in the Bible.

In Australia, the author first worked at:  
Australian Army Headquarters Training Command  
Suakin Drive  
Georges Heights NSW 2088  
Telephone 61 2 9960 9452  
Fax 61 2 9960 9452

The word, covenant, occurs twenty-four times in the New Testament. The word, marriage, occurs sixteen times in the New Testament.

1962 Nigerian coup d'état occurred between 1966-01-15 and 1966-01-16 and the author was born on 1967-10-15, 638 days, after. Baba commenced on 1967-05-30, and 1967-10-15 is 138 days, after.

Between Summer traditionally begin, June 21, and October 15, is a span of 3 (months, 3 weeks, 3 days).

October 15, is the forty-fifth day, in the September, October, November, December cycle.

Between September 22 and October 15, is 23 days (23 days) (3 weeks, 2 days).

Between October 15 and when Winter starts, December 21, is a span of 67 days (2 biblical months, 7 days) (2 months, 6 days).

Between October 15 and when Winter ends, March 20, is a span of 157 days (5 biblical months, 7 days) (5 months, 5 days).

During Leap years, between the preceding October 15, May 7, are 205 days (6 biblical months, 25 days).

Military Occupation Six-Day War was fought between 1967-06-05 and 1967-06-10. I was born on 1967-10-15, and 9 Biblical months, before that, then, was, 1967-01-18. Between 1967-01-18 and 1967-06-10 is 143 days (4 biblical months, 23 days) (4 months, 23 days).

2 Biblical years, after I was born, is 1969-10-04. Iraq was accepted to the United Nations on 1949-05-11, between then and 1969-10-04, is 7451 days (20 biblical years, 8 biblical months, 11 days) (20 years, 4 months, 3 weeks, 2 days). The adoption of the United Nations Partition Plan for Palestine occurred on 1947-11-29, between then and 1969-10-04, is 7980 days (22 biblical years, 2 biblical months) (21 years 10 months, 6 days). The 1948 Arab-Israeli War commenced on 1948-05-15, between then, and 1969-10-04, is 7812 days (21 biblical years, 8 biblical months, 12 days) (21 years, 4 months, 2 weeks, 4 days). The 1948 Arab-Israeli War ended on 1949-01-10, between then, and 1969-10-04, is 7513 days (20 biblical years, 10 biblical months, 13 days) (20

[illegible]

Between the beginning of the 400 Silent Years and 1967-10-15, are 864,455 days.

Between the end of the 70th week, if there had been no interruption, 0039-03-01, and 1967-10-15, are 704415 days (1956 biblical years, 8 biblical months, 15 days).

The Yoruba tribe speak the Yoruba language and the Yorubas are in the South West of Nigeria. The Yorubas practice the Christians and Moslems religions. The East of Nigeria include the Ibos who speak the Igbo language and are mainly Catholics. The Hausas and Fulanis are in the North of Nigeria. At the Highway 880 South Fremont Exit, the road separates into two, the Alvarado Boulevard, West direction, and Fremont Boulevard, East direction.

Kowe's original language is English, but he speaks a number of other languages, including Germanic languages and Indonesian. He is also bilingual in the Australian Aboriginal languages of the Wiradjuri and the Wiradjeri. Kowe is an editor, for typing. Kowe's innovation is that he types in Germanic alphabets by using the function keys combined with the alternate, control, and shift keys. Line drawing is also possible with Kowe. Kowe would translate languages.

Between 1997 - 1998, the author pursued his Doctorate at the University of Wollongong, New South Wales (NSW), Australia, and he visited Villawood Detention Center, a place for illegal migrants and asylum seekers, every Friday, as a Christian missionary. One of those migrants, a Ghanaian, had been at the detention center for up-to six years, and he corresponded with immigration officials, regularly. The author thought of building a website that will allow these migrants to share their experiences with the rest of the world.

**Massacre of the Innocents.** 1967-10-15, 1967-12-28, 74 days (2 biblical months), 14 days (2 months), 1 week, 6 days; 1956-12-28, 1967-12-28, 291 days (9 biblical months, 21 days) (9 months, 2 weeks, 3 days); 2003-12-28...2004-07-11, 196 days (6 biblical months, 16 days) (5 months, 1 week, 6 days) [2004-02-11, 2004-12-28, 120 days] (5 months, 14 days) (2 months, 2 weeks, 3 days).

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
  1. In the year 2024, the author will turn 57 years old.
  2. In the year 2024, Faith An Yao will turn 18 years old.
  3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
  - I contracted at Sunheath Corporation. I added report columns. Legal (8.5 x 14 inches)
  - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
  - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has he made.( Genesis 32:28. Genesis 3:3. Genesis 4:12.)? What word reminds.( Mark 11:23.)?

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.

(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent...where is it needed?
