

is for determining the highest value. The SQL statement

- | Scales & Measurements | | |
|-----------------------|--|---|
| Type of Scale | Commentary | Example of Scale |
| Nominal Scales | The numbers may serve as tags or labels which are quantitative with no values. | <ul style="list-style-type: none"> Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us. Telephone number |
| Categorical Scales | | Dewey Decimal Classification used in libraries |
| Absolute Scales | An absolute scale is a count of individual, distinct items in the set. | <ul style="list-style-type: none"> This may be the physical count of word occurrences in the Bible. The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. The SQL COUNT() function returns the number of rows that matches a specified criterion. The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query. |
| Ordinal Scales | An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it. | <ul style="list-style-type: none"> In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation. |
| Rank Scales | They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems. | <ul style="list-style-type: none"> Military ranks Mohs scale for hardness (geology) of minerals Scoville scale for the strength of peppers Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response Turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. |

Type of Scale	Commentary	Example of Scale
		The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	<ul style="list-style-type: none">• HTML input range• CSS percentage

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()
Determination is achieved through computed columns.		

(Allen G. Taylor, 2024).

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)</pre>
Extremal query	It returns either the minimum or maximum extreme.	Statistics	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)</pre>
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	<pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	<pre>SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping a work reference.
 - Even though Yoruba is the native language of the author, he still and invariably relies on translate.google.com.
 - The author depends on a typing assistant.
- Principle 3: Explore Contexts
- Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
- The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
 - Hardware, software, or network failure
 - Vendor withdrawal of support
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
 - Inability to restore deprecated Microsoft SQL Server backup versions.
 - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
- The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
- What period has God used?
- 1988, military census age: I Am taking you on a journey.
 - 1997, priesthood age: I have brought something against you, but I Am with you.
 - 2007, generation timespan: This miasurbation will bring water.
- Principle 7: Generate Multiple Solution Options
- How versatile am I... at amending others? I have to relay my perception to technology providers.
- Principle 8: Design Around Constraints
- Relational databases offer the ability to set constraints.
- Data type
 - Nullable
 - Primary key and unique index
 - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

- There are 2 types of DBMS. These are:
- Shared file-based: For example, Microsoft Access
 - Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author, the WordEngineering database size, is currently 33351360 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1050.2
sp_spaceused	The WordEngineering database currently uses 32569.69 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 121880.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies</u> to Bible. Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <, <=, !<, >, >= !>	The operators listed will check for a single value. The operators that consist of !, will check for non-matches. <u>In most cases, rarely is this in use.</u> !< or/and !>. <u>This is the first time ...he is becoming aware...of these expressions. This is the first time ...he is becoming aware...of these operators. Querying for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Fortz, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows</u> .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction '%%'
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, >=, <>
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose7 datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository

Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdeniji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.

Key	Value	Commentary
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdeniji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdeniji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalist page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DatedFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordCass/DonFrederickAde.html> 2023-02-17..2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. <http://github.com/KenAdeniji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js>

```
fetchRender: async function
(
    fetchUrl,
    fetchRequest,
    callback,
    uiDisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uiDisplay, rowColumn);
        })
    } catch (e) {
        uiDisplay.innerHTML = e;
    }
};
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conciliation, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using JQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript Iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers.
- What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
- The author extracts knowledge from data; by finding meaning to the word.
 - The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
 - The actionable insights take, so far, is to computerize the work.
 - The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
 - The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

- Empirical, find implication from the Bible?
- Theoretical, to determine a better way to doing work?
- Computational, is human labor replaceable?
- Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

- The Bible is our primary source of data.
- The author records information sources. This is either a person or media?

What you can do with Data

- Data Acquisition: The Bible is available on the Microsoft Access database.
- Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
- Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
- Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service, .aspx, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The .html presents the result in a human readable format.

Defining Data

- Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
- Qualitative Data: These are rarely measurable and are personal interpretation.

- ### Problem

- Title

- Theory
- Results and Discussion
- Terminology
- References
- Axioms
- Background
- Existence and Fulfillment
- Autobiography
- Style of Writing

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (!IsAlph(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete. The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.aspx	Query(word)
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [PostBack](#), and the `query_string` has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right [.NET Framework Data Providers](#). The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50
DataCommand.cs	DatabaseCommand()	10
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	90
Sum		105
		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the [Github.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in Github.com are:
 - git status
 - git add
 - git commit
 - git push
- Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
- Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for there specific use.
- Backing services: These are external independent resources, such as the database, SMTP.
- Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
- Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables. The SQL Server encompasses services which are stoppable to do data files backup.
- Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
- Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
- Disposability: The author's take on expendable work includes the following:
 - Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
- Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.
 - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: Dev/ops expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
- Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth percularities.
- Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Existence and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

When

God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week ([Genesis 1-2](#))? Seniority comes first ([John 1:15](#), [John 1:27](#), [John 1:30](#)).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

Machine Learning

Our entirety chiefly pertains to Him.

Multilayer Perceptron (MLP)

DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DateDifference.aspx is a server-side C# ASP.NET web form.
The Remember's table computed columns are Transact-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.

Feature

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900^2 \approx 810,000$; $900^3 \approx 729,000,000$; $900^4 \approx 656,100,000,000$; $900^5 \approx 590,495,900,000,000$; $900^6 \approx 531,441,000,000,000,000$.

Degree of Belief

In [GetAPage.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

Frequentist Probability

In [GetAPage.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ([John 19:30](#)) . Specifications...is done.

Bayesian Probability

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and (8000×26) , 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

Discrete

The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary

The Testament column is either Old or New.

Ordinal

The identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), extensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature

The most important predictor columns are the Word, Dated, and ContactID.

Outcome

The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.
The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

Web Design Fundamental

Business Model

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him.

Content Authoring

How query means more ([Isaiah 43:22](#))?

Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search.
Supplementary information for a href attribute is meta-data and [uhohs.com](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

Characteristic

Resilient

2023-10-05T10:13:00

A rest

Word	Commentary	Scripture Reference
Jesus Christ	Son of God	<u>Hebrews 5:8</u>
Titiles	Levi	<u>Hebrews 7</u>

2023-08-29T12:02:00 No land ties				
Birth name	Title	Physical place	Spiritual place	Scripture Reference
Jesus	King of the Jews	Bethlehem, Egypt	Jerusalem	Matthew 2:1
Moses	Prince of Egypt	Egypt	High mountain	Exodus 2:10

Word	Jacob	Jesus Christ
Covenant	Abrahamic	Messianic
Sacrifice	Isaac	Jesus Christ
Patriarch	Abraham, Isaac, Jacob	Jesus Christ
People	Israelite, Jew	Christian
Fear	Isaac	God

What will relate as 1 grow? 841 occurrences of king David in the Old Testament.		
Word	Commentary	Scripture Reference
Genealogy	Abraham, David, Jesus Christ	Matthew 1:17
Reign for a generation	Moses, Saul, David, Solomon	Deuteronomy 29:5 , Judges 3:11 , Judges 8:28 , 1 Samuel 4:18 , 2 Samuel 5:4 , 1 Kings 2:11 , 1 Kings 11:42 , 2 Kings 12:1 , 1 Chronicles 29:27 , 2 Chronicles 9:30 , 2 Chronicles 24:1
Biography	David, Jesus Christ	1 Chronicles 29:29 , Ruth 4:17 , Ruth 4:22 , Psalms 40:7 , Hebrews 10:7 , Matthew 5:18 , Psalms 1 , Samuel 2 , Samuel 1 , Chronicles 2 , Chronicles
Davidic covenant		Psalms 89:3 , Isaiah 55:3 , Jeremiah 33:21

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

Steer	
Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	<p>The proposed changes which will offer query customization?</p> <ul style="list-style-type: none"> • The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. • With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns.

Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

The Terminology of Machine Learning in Relation to AlphabetSequences

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.

Term	Meaning
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

A type of us: is a kind of us? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.

HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1..H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. <u>When did He promise generational growth?</u> (Psalms 22:30 , Genesis 3:15 , Genesis 12:7 , Genesis 13:15 , Genesis 15:13 , Genesis 15:18 , Genesis 17:8 , Genesis 24:7 , Genesis 26:3-4 , Isaiah 53:10)?
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

(Bruce Clay).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.

This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 What does God choose as subject? ([John 15:15](#))?

The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: My Condemn The first word is the BookID; the second word is the VerseID.
- 3-Words: Who is your manager? Crazy mister Martin. Mister Martin as a good, The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

Biblical generation - 40 Biblical years

1. 2007...2008 Common Era - the author is 40 years old; the author mentions time.
2. 2021...2024 Common Era - the biological mother of the author is 80 years old; the word recorded by the author is time relevance specific.
3. Actor... role commencement date?
 - 2025-01-15T04:49:00 You look at life... and you feel down, A politician who is probably Bola Tinubu, said how he became a politician.
 - 2026-01-16T07:51:00 A person was making fun of Dikembe Mutombo on his draft day. Dikembe Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

2026-02-22T14:06:00 What He meant to be use?

- Moses ([Hebrews 11:23-29](#), [Acts 7:20-44](#), [Numbers 27:12-23](#), [Hebrews 7:11-28](#))

2026-02-19T20:33:00

From: Andrea Holzmann Andrea@sherlocktalent.com
Sent: Thursday, February 19, 2026 17:55
To:
Subject: Your SQL Server background caught our  -- 10-20 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:
 SQL Server DBA & User Support Specialist – 100% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

#SQLServer #DBA #RemoteContract

			2026-02-10T22:26:00 <u>What utterance... remain the same?</u> 2026-02-10T22:41:00 <u>What has God decided... for our future apart.</u> (Genesis 11:9 , Exodus 12)?

2026-02-02T15:00:00 Naming, counting, timing, ordering, sampling

Terminology	Word	Relational database
Naming	God's first commandment to the first man, Adam, was for him to name the animals.	For a relational database, the various objects are named.
Counting	God counted the days during creation.	Count() keyword.
Timing	The greater light, the sun, and the lesser light, the moon, are signs.	GetDate() returns the date and time.
Ordering	Greatest commandment, greatest among us, honor thy father and thy mother	ORDER BY ASC, ORDER BY DESC. Lag or lead.
Sampling	Wandering years	ORDER BY newid()

2026-01-31T17:44:00 Remi Adenji said she submitted her research thesis titled, Open-Source persistence. In the center-east, a male was taunting the Russians.

2026-02-02T20:10:00

1. Genealogy ([John 3:16](#), [Matthew 1:12](#)).
2. Role ([Genesis 3:15](#), [Matthew 2:2](#), [Matthew 27:37](#)).

When I am doing this?

- Pre-condition ([Genesis 3:15](#)).
- Assertion ([Hebrews 5:8](#), [John 20:17](#)).
- Post-condition ([Genesis 49:9](#), [Revelation 5:5](#)).

2024-11-13T19:12:00 Translation

1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (VS) Functional dynamic equivalence (thought-for-thought): [BibleWord.html](#) is the former.
3. 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

(Tim Wildsmith, 2024).

2026-01-28T19:01:00 Analytics

1. 2026-01-28T19:01:00 At Albertsons Lucky, Charter Square at the Bank of America (BoFA) customer service desk, the German Store Manager, John Holtz, was attending to an Asian father, older son, and younger daughter, who did acrobatics. The word came on Paseo Padre Parkway between Blackstone Way and Seward Drive, on an overhead bridge, Highway 880 south, at the south of the 1st of 4, driving lanes.

When is it all he asked for... He persuaded in doing?

New Testament

2025-12-07T20:58:00 Is AlphabetSequence prophetic?

1. Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
2. Will the date match historical events?
3. 2026-01-06T13:56:00 You are using... the Bible... is it supportive?
4. 2026-01-20T04:00:00 Words prepare for activity.

2026-01-10T10:37:00 Interpret

- 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bollywood. Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic, they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

2026-01-13T08:18:00 Biblical Interpreters

1. Reverence to God ([Genesis 41:16](#), [Daniel 2:23](#), [Daniel 4:26](#), [Daniel 5:23](#)).
2. Witness ([Genesis 41:13](#), [Genesis 41:54](#), [Daniel 5:31](#)).

2025-12-26T15:49:00 To... the event of the day? Remain ([Genesis 22:14](#))

At Milk & Honey Cafe, I was attended to by Amy Hsueh Tm, who previously said, I work here, and Audrey Russel. I saw a young Hindi couple sitting in the north-center. I saw some males, and a single woman at Yifang Taiwanese Fruit Tea, and at Albertsons Lucky, Charter Square. Their nationalities are Chile and Peru.

2025-12-25T12:26:00 Trend Analysis

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
- 1. WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.
- 2. SacredText table: 2025-12-25T12:41:00 Is nearer to the whole set.

2025-12-24T15:46:00 Word Re-use

Word	Commentary
<u>What word are part of His? Is what word He use as His.</u>	Composite primary key, foreign key, and index; rollback or commit transaction; primary-child table, orphan record
	Outer join
	like % ?
	< or/and >

2025-12-15T12:52:00 When was it leading? When was it lagging? When was it exact?

Title	Actor	Scripture Reference	Leading, lagging, exact
Romance of Redemption	Ruth	Ruth 1:6 , Ruth 1:22 , Ruth 2:7-9 , Ruth 2:14 , Ruth 2:17 , Ruth 2:19 , Ruth 2:21 , Ruth 2:23 , Ruth 3:1-2 , Ruth 3:8 , Ruth 3:10 , Ruth 3:13 , Ruth 3:18 , Ruth 4:7 , Ruth 4:9-10 , Ruth 4:13-15	Exact

2025-12-20T10:43:00 Relationship between... number and the Bible?

Percentage	Commentary	Scripture Reference	Sacred Text
75%	Wo 75%	Matthew 7:10 , Jonah 3 , 1 Kings 2 , 1 Samuel 21:3	Greek Kingdom Daniel 2:38

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, .js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order. tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location - HisWord table, Word column. The surrounding related information is inferred and subjective ([Matthew 16:23](#)).

2025-12-25T21:46:00 Time to first frame

When did He define His rule. ([Genesis 18:19](#))?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

Layman	Know their God
When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases.	Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.
I used to rely on my education and experience.	Now I draw on expert opinion? 2025-12-04T22:00:00 Expert facts , 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. What scenarios for the other?

2025-07-31T13:25:00 **What does the link provide?**

1. 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
2. 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
3. 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) availability? Static versus (VS) dynamic?
4. 2025-07-31T16:05:00 The frame tag embeds one HTML document within another.
5. 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var; const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
6. 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
7. 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.

2025-12-05T06:50:00 Scene 1 : I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and theorems.

2025-12-05T12:09:00 [What did He turn to... as usage?](#) (2 [Chronicles 16:9](#))? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.

2025-12-06T15:26:00 [What does He associate... with me... and how do I be the guide?](#)

2025-11-23T00:28:00 **What have you... used... the Bible for (John 20:31, Acts 17:11, John 5:39, Joshua 1:8, Daniel 9:2)?**

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text — reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion ([Acts 17:11](#)).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?
8. Compare times? For example, during the time the Bible was written, Jews worshipped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 **Absent... of the same.**

A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 [Can we determine... to be usage?](#)

- Nullable
- Outer join
- Union
- Default
- Like

urlPerformance

1. [urlperformance.org](#) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

Microsoft SQL Server limitations include:

- [Microsoft SQL Server database connection string ApplicationIntent=ReadOnly](#)
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero [Zero five eight four one](#), versus (VS) [5841](#)

2025-07-30T10:22:00 **Schema changes**

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
2. The SQL Server Management Studio table design menu option provides the most flexibility.
3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [USMaintenancePage.aspx.cs](#) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 **10 Best Influences on Software Engineering**

1. Reviews and Inspections: 2025-07-14T15:34:00 [Can I be impartial as others?](#)
 - 2007-08-04 [FixCop](#) is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 [To what extent do I know the culture of others?](#)
 - [JSLink: The JavaScript Code Quality and Coverage Tool](#)
 - 2018-01-05 [VSCode Madras Validation Service](#)
2. Information Hiding: 2025-07-17T20:45:00 Addressing. 2025-07-18T19:33:00
 1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
 2. 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.
 3. 2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 [Kazuo](#) is a writing tool... where is the speaker?
 3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.
 4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.
 5. 2025-07-18T21:03:00 Multiter: Separation into client presentation, application, and server data management.
 1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
 2. Application: A dynamic link library [InformationInTransit.dll](#) queries the database.
 3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 **Software documentation**

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 [and retrieve the contained God's word.](#)

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

The impetus for database recording was to re-use.

2025-06-29T04:18:00 **Use Case Interpret Word**

[Software Engineering: A Modern Approach by Marco Tulio Valente Use-cases](#)

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 **Use Case WordEngineering**

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 **To replicate God's Word?**

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 [he relies on his resource of the truth](#)

2025-06-27T20:10:00 **Minimum Viable Product (MVP) and A/B Testing (or split testing)**

2025-05-17T20:07:00 Functional Programming... Computed Columns

- 2025-05-17T20:16:00 Pure function, referentially transparent:
 - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Similarity of the Composition.
- 2025-05-22T18:10:00 Immutability:
 - 2025-05-22T18:16:00 Object-oriented technology serves change states.
 - 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 - 2025-05-22T18:17:00 Ao is of the need for database storage.
 - 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
- 2025-05-22T18:31:00 Practical need for recursion?
- 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for Linq.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and IHaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
 - In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
 - In 2007, when I was looking for work, I modeled the IHaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 - Spelling corrections.
 - Verb grammar tense.
 - Synonym versus (vs) opposite.
 - Singular versus (vs) plural.
 - Deprecated.
 - Currency.
 - Locality, regional, custom, preference.
 - Anglicized.
 - Religion.
 - Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 - Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways... and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

```

2025-03-21T21:08:00 I am standing among the north-west seats. I was told that out of the 3 promoted people, 2 were made mayors. There is a path to the north-east. 2025-03-21T22:47:00 It is not the only thing. 2025-03-21T22:58:00 Was this all that was said?

DataType	Software	Commentary
Varchar	GetAPage.html	This is the most prevalent, and earlier focused on.
Integer	GetAPage.html DateAdd.aspx Number15431.html	
Date	DateDifference.aspx DateYear2010Month09Day09.html	Jesus Christ refrains from declaring Judgment day (Luke 4:19-21, Isaiah 61:1-2).

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- **data-webservice:** An invocable web service to provide supporting information. Via a web address, url and query string.
- **data-code:** With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example:

InfoType	CountInfo	PercentageOfTotal
Alpha	111590	93.740811989146
Numeric	851	0.714879747313
NULL	6600	5.544308263539
Total	119041	100

2025-01-31T08:51:00 What title... we are befriending?

- My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
- My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPCC). My English speech oral communication classmate.
- The first independent self-inspired software written by the author is Kowe.c for the Yoruba language.
- My first domain name was commonpeople.org
- The first website I published and contributed to was Christianity.com
- I am known for the AlphabetSequence algorithm
- The first book I wrote is titled Ocean Senior
- The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.
2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Bible arrangement: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophesy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Get-Location
- Holliness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible.

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.

2024-07-12T21:22:00 Making a protection...making a projection.

What is best believable (Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours. (Numbers 3:12. Numbers 3:41. Numbers 3:45. Numbers 3:46. Numbers 8:18. Acts 10:9-16. Romans 2:25-29. Colossians 2:11. 1 Corinthians 7:19. Galatians 6:12-13)?

- In the HisWord table, the order of belief is:
 - Scenery
 - Commentary
 - Word
 - System generated: DateTime and identity columns
 - Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

What true identity lies apart?

- The Messiah
- The king

How my organization is the best?

- Alphabet places, word spelling, and sentence composition
- Arabic numbers systems

What measures, forever?

The author is linking words spoken to related verses and dictionaries.

- BibleReference uses whole numbers for representation.
- Who...what...when...where...why?
- Prophesy and Fulfillment: Keyword Variation

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
Author's experience	The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.	The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. ConversionTableTemperatureMachineLearning.vx	The traditional architecture is client/ server.
Software requirement	<ol style="list-style-type: none">Microsoft SQL ServerSQL Server Management StudioAuthor's HisWord database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include:<ul style="list-style-type: none">ViewsUser defined functions (UDF)Stored proceduresApplication code layer:<ul style="list-style-type: none">.asmxBusiness and database access codeUser-interface (UI) layer:<ol style="list-style-type: none">Browsers.html, .js, and .css files	<ol style="list-style-type: none">PythonMachine learning library, for example, Scikit-learnGenerate training data ConversionTableTemperatureCommaSeparatedValuesCSV.csTraining data which is storable in a .csv file: ConversionTableTemperature.csvPredictive data analysis ConversionTableTemperatureMachineLearning.vx	<ul style="list-style-type: none">How proprietary is the architecture?What is the portability of the code?Shift away... from server to client.The world has moved away from... packaged software to distributed software.Offer only one functionality.
Word	Bible Versions	Dictionaries	Commentaries
Primary Key	Scripture reference	The Bible word has a place in the author's terminology, usage, retention.	Disparate scripture references which are inconsistent and non-standardized in commentaries. Not aligned with AlphabetSequence. 2024-07-13T17:01:00 <u>Where does he see growth?</u>
Proliferate	Bible publishers, versioning and language translation	Hebrew translation	Commentators

Relational Model

- The author progressed from authoring disparate HTML files to recording information in a relational database.
- This transition offers an opportunity to analyze tables, columns and rows.
- Functional dependencies of relationships between columns are determined.
- The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Software Engineer versus (VS) Database Administrator

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment. Internet front-end files (.html, .js, .css).	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

(Itzik Ben-Gan, 2023-07-03).

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Codd's 12 rules

Focusing on the Word.

- Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).
Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View.
2024-06-15T21:28:00 What is pertaining to the data?

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Conclusion and Fulfillment
- Autobiography
- Style of Writing

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.
2024-06-18T16:30:00 To allow... I exchange... my page?

Rule 3: Systematic treatment of null values:
2024-06-18T21:49:00 Unknown or inappropriate.
- Identify columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:
INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:
2024-06-20T18:39:00 It looks at the data as a whole.

Structured Query Language (SQL) sublanguage		
Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fall in the following cases: <ul style="list-style-type: none">Primary key or unique index duplication. A primary key column may not be null.Invalid datatype or extra large data size or out-of-rangeConstraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:
Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:
A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:
Batch and end-user operations are not impaired when changes are made to physical storage or access method.
2024-06-22T15:13:00... 2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.
2024-06-22T15:36:00 What part of yourself... do I desire as My future?

Rule 9: Logical data independence:
2024-06-22T17:02:00 The opinion of someone else... is beside me.

Rule 10: Integrity independence:
The author is not implementing constraints.

Rule 11: Distribution independence:
The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:
Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposeful: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us.
The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man (Genesis 2:7 Genesis 6:3)?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ([Matthew 23:14](#), [Acts 8:37](#), [Acts 15:34](#), [3 John 1:15](#))
14. Naming of words ([Genesis 32:28](#), [Genesis 35:10](#), [Genesis 47:27](#))
15. We have been doing unconvincing power
16. I said, I heard, 2021-04-11T08:37:00 I at a location to the North, probably 99 Ranch Market or Marina Food, or Daiso. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight, I said, 6 9, in my sleep, while dreaming, I heard (via tin), 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does He volunteer as time? AlphabetSequence is resource minimal:
 1. Doable by hand
 2. Compute: Not technologically demanding
 3. Maturity: Since 2002
18. Separation into Seemings.
19. Is this a finalized work, and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... and not waved... by the grammatical correctness.

To co-operate as we are. [Robert Estienne](#) English Alphabet

2017-03-06T00:00:00 A Comparance of Age

Divided as separated. Go this way, that way.
I want to program, but I don't want to match two programs together, except for deep thought.
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ([Genesis 37:5-11](#), [Genesis 30:24](#), [Genesis 40-41](#)).
TCP/IP is separable into four layers; these are the link, Internet, transport and application layers. No breaking ([Matthew 19:8](#)).

Marriage

Marriage is not a practice, in the life after, resurrection ([Matthew 22:30](#), [Mark 12:25](#), [Luke 20:35](#), [Revelation 21:2](#), [2 Corinthians 11:2](#)). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. It is more of a father that wants you, Jesus resurrected, after three days ([Matthew 12:40](#), [Matthew 26:61](#), [Matthew 27:40](#), [Matthew 27:63](#), [Mark 8:31](#), [Mark 14:58](#), [Mark 15:29](#), [Luke 2:46](#), [John 2:19](#), [John 2:20](#), [2 Corinthians 11:2](#), [Revelation 21:9](#), [Revelation 22:17](#)). The breaking of device ([Psalms 34:20](#), [John 19:36](#)).
On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASP.NET are server-side logic.
The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logic; but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.
The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

Visibility ([John 4](#))

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript.
The database contains the real information, that makes-up the result set.

Lifecycle ([John 3:3](#), [John 3:7](#))

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany ([Matthew 4:6](#), [Matthew 18:10](#))

What are the pairing?
The client started as HTML, but now has JavaScript and CSS.
CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.
JSON and XML have made in-roads.

To each resemblance

1. Where His word expected mine? When I get a word from God I could do the following?
 1. Write the word in my notepad, and never refer to it again.
 2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 3. Produce an artifact based on the word.

What do I desire... as part of significance?

1. Moses' Prophet ([Exodus 4:10-16](#), [Numbers 12:6-8](#), [Deuteronomy 18:15](#)).
2. Abraham's Seed ([Genesis 12:5](#), [Genesis 15:2](#), [Genesis 22:2](#), [Genesis 22:12-18](#), [Hebrews 11:17-19](#)).

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchy?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is capacity... full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00 What substitution... we have #1945?		
Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7 , Revelation 22:2 , Revelation 22:14 , John 6:35 , John 6:48
Book of life	The word of God	Philippians 4:3 , Revelation 3:5 , Revelation 13:8 , Revelation 17:8 , Revelation 20:12 , Revelation 20:15 , Revelation 21:27 , Revelation 22:19
Antichrist	Father's name	1 John 2:18 , 1 John 2:22 , 1 John 4:3 , 2 John 1:7 , John 5:43
Man of sin	Comforter	2 Thessalonians 2 , John 16:7

What did He find... as useful

What did He find... as useful (Matthew 21:42 , Mark 12:10 , Luke 20:17)	
Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: <ul style="list-style-type: none">• Client/Server autonomy. Client embedded-SQL.• 1. The datetime column defaults.2. The identity column is auto-generable.3. Computed column: What can the computer do for us?
Microsoft sqcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com , drive.google.com , github.com/kenadenji , kenadenji.wordpress.com
Refer to dates.	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was "le eyan mi lon to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2 , Genesis 23:20 , Genesis 49:30 , Genesis 50:13
Birth place	Matthew 2:6
Matriach's origin	Genesis 25:20 , Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kotzerok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order. Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable

(1 Samuel 3:19)

Numbers in verses

- He expressed good as how He felt (Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:12, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22).
- He expressed start and end of time (Genesis 1:1, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:19, Genesis 1:23, Genesis 1:31, Genesis 2:1-4).
- King of the Jews (Matthew 27:11, Matthew 27:29, Matthew 27:37, Mark 15:2, Mark 15:9, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:33, John 18:39, John 19:3, John 19:19, John 19:21).

To be actual things

- Pronunciation (Luke 1:13, Luke 1:60)
- Application (Luke 1)
- Spelling (Luke 1:63)
- Reference (Matthew 11:14)

In telling the future, there are two parts: prophecy and fulfillment (Revelation 19:10). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

What prize at the target?		
Prize	Target	Scripture Reference
Keep.exe	Diversified language	Genesis 11:9, Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/IIS/Gradual	I have decided to work on a gradual improving system.	Psalm 133

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

- Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
- Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
- Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:	
.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs
http://github.com/KenAdenji/WordEngineering/blob/main/IIS/Gradual/Contacts/ContactsList.aspx	http://github.com/KenAdenji/WordEngineering/blob/main/IIS/Gradual/Contacts/ContactsList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3c
sc-status sc-substatus COUNT(*)
280 0 28515
384 0 9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -i:w3c

Productivity

- Productivity is the measure of unit tasks completed within a time frame or at a cost.
- A project cost is its work hours. A work day is 8 hours. A work month is ≈176 work hours. A work year is ≈2000 work hours.
- The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
- To predict productivity? Re-use.
- Metric:
 - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe. It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(De)Lean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

To know my part as His?

- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- [I have decided to work on a gradual improving system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? [To recognize the following as 1 \(2 Samuel 3:32 \)](#) ?
- [Who it comes to \(Hebrews 11:24 \)](#) ?
- [What is the following? List of C-family programming languages](#)
- [The mechanism of selecting people?](#)
- [What portion of the same do I have?](#)
- [What I keep member of \(John 17:12 \)](#) ?
- [What did He find as suitable for him \(Genesis 39:9, Daniel 1:17, Daniel 1:16, Genesis 1:26-27 \)](#) ?
- [What did He find re-occurring as him?](#) Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not aPostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: The simple 2025-07-11T18:17:00 [AJAX... only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [9432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \(Mark 7 \)](#)? 2025-07-12T16:44:00 [What did He do?](#) [How did I do \(Luke 1:41, Luke 1:44, Matthew 3, John 3 \)](#)?

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abundant's Law](#) comes into recognition in [GoldPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#). [pingdom](#)

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
https://e-comfort.ephraimtech.com/WordEngineering/WordUnion/BecauseWeAreHellThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreHellThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Lifecycle

Lifecycle	
Period	Commentary
2000-10-05	Registered the WordEngineering trademark.
2002	Commenced recording the word from the LORD in the Microsoft SQL Server relational database, introduced the AlphabetSequence algorithm, and started developing Biblical applications using the Microsoft .NET and the ASP.NET framework, and coded with the C# language.
2015	Migrated to HTML files and web services using AJAX. What is resideable at home is present abroad. This will continue the separation of duty approach. The benefit includes making accessible our work; focused user interface renewal. Open standard and performance gain.
2025-07-26T19:17:00	There is a table structure for repeat which would repeat the information in the preceding record. There is also a table structure for parable.

Interconnection

Technology	Commentary	
Web pages	The bulk of the author's web pages are in 3 separate virtual directories.	
	Virtual Directory	Commentary
	http://e-comfort.eshramtech.com/InformationInTransit	<ul style="list-style-type: none"> • http://e-comfort.eshramtech.com/InformationInTransit/ContentMaintenance.aspx Master-detail gridview • http://e-comfort.eshramtech.com/InformationInTransit/URIMaintenanceWebForm.aspx URI tables with a vertical view.
	http://e-comfort.eshramtech.com/Gradual	Recruiters contact details. Master page with user components.
	http://e-comfort.eshramtech.com/WorldEngineering	AJAX website. Shared .dll. Stand-alone pages with hyperlinks to related information.

Development History

Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.
Programming Style	This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.

A Causal to Hearing Words:

He said and He did. Word work (Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at Ohlone College, in the Fremont and Newark campuses.
- Read books and magazines at Barnes & Noble, Borders, Walden Pond Books, Wal-Mart and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Solitary living at Newark City in California, Palms.
- Fast, everyday, only ate, once a day, in the evening, I ate Nomura Holding Kuhn rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revolution.
- I was living on a meager income (Exodus 2:15-25)
- Only familiar with Case-based Reasoning and Use-Case.
- Alphabet Sequence is abecedary.
- Set-based: Effort to record everything Bible code.
- This is a man: he wanted to know about his favorite (Daniel 1:3-21, Daniel 9:23, Daniel 10:11, Daniel 10:19)
- Observance (John 5:19)
- Personalization of Realization (Proverbs 25:17)
- I will make the difference (Deuteronomy :26:5, Ezekiel 16:3)
- What we all ought to be?
- 1997-12-31 I will not entertain Nada. Prophets make New Year predictions.

[illegible]

What did He know as one? First, pre-eminence
join.

Word	Member	Scripture Reference
God	Trinity	<u>Genesis 1:1-2, John 1</u>
Day	Time	<u>Genesis 1, Genesis 2:1-3</u>
Babel	Language	<u>Genesis 11:9</u>

Written about us how many?

Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Sign a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly a database work. That is the author records the data. What the authors hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is usable in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node in the web.config. When the user decides to stabilize and admit no further changes, then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of work, meets today's expectations. The addition of the ACToGodb table, demonstrates the maturity of the author, since it advances from data to information.

The author, first wrote his history, in multiple stand-alone files .HTML, .XML. (Acts 7:22). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a `ContactMaintenance.aspx` server-side page as a user-interface (UI) to record contact information. This page remains active, till today

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

Adoptability:

- What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the words. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
- What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequencesIndex by hand. To determine the AlphabetSequencesIndexScriptureReference, you need to know the count of chapters and verses.
- This manual work is not easy to compute, which is not error prone.
- The Biblical account wrote dreams and visions thousands, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.
- Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this work as a reference. The widely acceptance of a work, accompanies preference and prevalence.
- The result of the Bible, is how we use it. The emphases of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

How to go about it:

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry.

Guidelines and tools

A relational database is a substitute for text processing

Stakeholder:

I am the primary contributor and beneficiary.

Output

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown.

Lessons Learned

- Esteem word: Leading up-to 2008-03-07, I was not fully recording the word of the LORD ([Job 23:12](#)).
- I used to ask God for a word? To realize where my opinion lies?
- Familiarization with data.
- You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Joshua 22:11](#))? One of Myself offering as many as I use?
- Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him. Putting Him into words.
- My time away from the family, United States of America (USA), may have helped me gain independence.

- Post-dated: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station, Bay Street Emeryville BN.com Fire Alarm Panel 8. FDC Building A 5604-5634. [To mean, I decide the story?](#)
- [How did they handle the Messiah? \(Luke 1:38 \)? \[Crossing the divide? To need someone as I \\(Genesis 15:2 \\)? You know Me as capable of you? \\(1 Samuel 17:36, Romans 4:19 \\)?\]\(#\)](#)
- The Yoruba sentence, [Ma fẹ́gbàni dín](#), will use wisdom to block it.
- [No difference in comparison.](#)
- [How useful you have been in determining wisely? How diversification the changes? \(Genesis 4 \)?](#)
- The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
- Difficulty level? Our work is divisible into the word commentary, and the system assuming. When the word is from God, the data entry is easy when it is in Yoruba, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. [A step to do is never forgotten of the LORD. Whose obscurity has He solved?](#)
- [What can we be, in the midst of a people, pertinent to God? \(Matthew 19:12 \)?](#)
- [What do you know how to use, as you desire yours?](#)
- [Rich of God, Reach of God.](#)
- [How many are others? \(Daniel 11:41 \)?](#)
- [I have to present God, as I am allowed to be.](#)
- How I want it to be; how He wants it to be? [When does the word exempt the answer? \(Acts 10:11 \).](#)
- People have asked me how I do it. My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Built or buy? Another thing of note is storage? How often should I backup and archive my memory and to the north-center, I saw an innocent man walking up a hill eastward with some clothes that were carrying guns, arms, weapons. They told him who they were, undignified people, and they told him to depart. 2025-05-26...2025-11-08=166 days (5 biblical months, 16 days) (5 months, 1 week, 6 days)
- What is the use?
- [That chooses I.](#) When I read the Bible, I adapt to the role I take.
- Relative to the world ([2 Peter 3:12](#)).
- If the words do not join? Consider separating or putting the lesser word in the commentary column.
- Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
- If the word and scenery do not fit exactly, it may be a larger scenario.
- When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
- What I have learnt from Bill Gates, through using the software from Microsoft.
 - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
 - The BibleWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 - What value can we attain to this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26, I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Milk & Honey Café, Pegasus Center. Hsueh Amy Tim took their order, and she was the waitress.

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it. (Genesis 4:26)?

1. Where?
 - Vocation ([Matthew 4:19, Mark 1:17](#))
 - Place of origin ([Matthew 2:1-11](#), [John 7:52](#), [John 18:5](#), [John 18:7](#), [Micah 5:2](#), [Isaiah 9:1-2](#))
 - Resting place ([Genesis 23](#), [Genesis 48:21-22](#), [Genesis 49:29-33](#), [Genesis 50](#), [John 14:13](#))
 - Inheritance ([Ezekiel 44:28](#), [Isaiah 53:10](#))
 - City of Refuge ([Joshua 20:7-8](#), [Numbers 35:15](#))
- The author started his tertiary education at Central Piedmont Community College (CPC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
 1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
 3. Using the JavaScript fetch keyword, the author places webservice requests.
- At the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...
 1. 2025-10-09T20:35:00 places enormous responsibility on the author.
 2. 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... it is okay.
 3. 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
 4. 2025-10-09T20:52:00
 - When the author attended University of North Carolina, Charlotte (UNC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
 - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible... reverse itself (Numbers 11:16, Acts 6)?

2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.

- 2025-10-09T02:01:00 [This is where I want to be... if I am with you.](#)

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself.

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions.

Considering processing and storing

[How can I pass knowledge...as sharing?](#) ([Genesis 2:7](#), [2 Peter 1:21](#))?

- Computers consist of microprocessors and memory. A memory is either:
 1. Read only memory (ROM)
 2. Random access memory (RAM)
 3. Hard disk
- Object-orientation combines code with data.
 1. Code - method

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Conclusion and Fulfillment
- Bibliography
- Style of Writing

- 2. Data - field or property
 - A relational database offers the opportunity... [to organize and store data](#).
 - The ID attribute in HTML files for url hashes is case-sensitive, and it serves for spot reference, and while it is a fragment address, [it is the entire unit](#). A relational database may support the like and between keywords for the partial and range restrictions respectively. [No le-se-range checking](#). It cannot do range checking. [There are no abnormality, in certainty](#).

What mentions the name?

- Variable and relative? Time, number ([Genesis 1:1](#), [Genesis 1:16](#), [Genesis 2:2-3](#), [Genesis 2:16-17](#)).
- Constant? Name ([Genesis 2:19-23](#), [Exodus 3:14](#)).

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to regurgitate the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partially, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro ([Daniel%2012:4](#))

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ([Revelation 3:7](#), [Revelation 5:5](#), [Revelation 22:16](#)). Joseph ([Genesis 37:2](#), [Genesis 37:9](#), [Genesis 37:19](#), [Genesis 39:12-18](#)).

Why we Accumulate the Same ([Matthew 26:53](#), [Revelation 9:16](#), [Revelation 7:4-8](#))

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#)). Knew versus lay.

Wanting a Member of...

In the first words, in the Bible, God referred to the beginning. Of his work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.

What relates a place...to one another? Observation of a particular use?

Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8 , Genesis 2:10 , Genesis 2:15 , Genesis 3:23-3:24
Field	Cain and Abel	Genesis 4:8-4:15
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?

Word	Scripture Reference
Work word	John 14:10
Charity	
Timeliness	Deuteronomy 18:22

The business of telling us apart?

Word	Scripture Reference	Commentary
Naming	Genesis 2 , Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?

Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did he see as his? A remodeline of the last ([Daniel 9:24-27](#), [Revelation 3:12](#), [Revelation 21:2](#), [Revelation 2:7](#), [Revelation 22:2](#), [Revelation 22:14](#))?

The author will wait a conciliation with time?

AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words?

Bible dictionary and commmentary. As a result of who are we? When does the scenario introduce God ([Genesis 3:8](#))?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/Xenodermis>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 [However, time substantiated itself](#). The author suggests that Baptism of the Holy Spirit ([Acts 1:2](#)), is achievable in individual locations as a [prestage](#) to the 3rd temple in Jerusalem.

Keyword	Scripture Reference
Place of Residence	Acts 1:4 , Acts 1:8
Sign	Acts 1:3 , Acts 1:5
Place of Worship	Acts 2:1
Speak with other tongues	Acts 2:2-2:11
Worshippers	Acts 2:5
Leader	Acts 2:14-2:47

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

RACI matrix. RACI is an abbreviation for Responsible, Accountable, Consulted, and Informed

Stakeholder	Task
Responsible	The actual person doing the work.
Accountable	The person that is answerable for the correct completion of the deliverable or task. Only one person is accountable for each task or deliverable.
Consulted	The subject matter experts (SMEs) that participate in two-way communication.
Informed	The recipients of one-way progress report.

Task	Responsible	Accountable	Consulted	Informed

Create implementation material	Technical Writer	Project Manager	Business Subject Matter Expert (SME), Technical Personnel	

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Conclusion and Fulfillment
- Autobiography
- Style of Writing

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BailFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travin).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.

A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.

Comments do not impact programatically, they only serve as guides for readers.

A directed relationship may exist between a collection of source and target.

A namespace is a container separator.

An import facilitates the admittance of an external namespace.

Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.

A constraint represents the range of valid values that a member may have.

A dependency replicates changes between the supplier/client.

Value

Lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (V5) decimal, date versus (V5) datetime.

A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators.

An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.

A Boolean is either true or false and it is normally used for validation.

A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHelper.cs Exact.cs](#)

The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable UtilitySQLServerManagementObjectsSMO.cs](#) A child may override a parent's virtual member.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.

Signals and receptors are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.

Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-be-side.

For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule.

In C# version 9, a method may offer a covariant return type.

2025-09-03T21:12:00 What is the immediacy of God's future?

2025-09-03T21:27:00 What does God bring to pass as Him alone? Begotten Son, creation, covenant, passover, commandment.

2025-09-03T21:38:00

1. Declare the word ([Exekiel 40:4](#))
2. Understand the matter, and consider the vision ([Daniel 9:23](#))

- During my 3 Associate degrees' graduation ceremony, Doctor Richard Hagemeyer asked if I would like to go to Africa?
- At Central Piedmont Community College (CPCC), I tutored in the personal computer (PC) laboratory with Laura Lawhorne and her African-American female supervisor.
- My first contract was at Sunhealth Corporation.
- At Central Corporation I was a technician with 2 African American females, that probably attended school together, and then lived together. The telephone operators were mostly African American females, including my stepmother.
- At McKey Real-Estate, I was contracted to develop an R-Base 5000 5GL application.

					2004-07-11	Oranjees	The Oranjees are your wickets.

What part of me?

- When making man, God made some choices?
 - Form: In His image
 - Location: Garden of Eden
 - Vocation: Caretaker
 - Helper: Eve
 - Model: First man, mother of all the living.
- How can we resemble His use?
 - As a software engineer, I replicate my work.
- When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
- I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
- I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
- Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike (Exodus 2:12)?

There are duplicates in the Bible.

Type	Commentary
Name	<p>Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2 Samuel 12:24 - 2 Samuel 12:25 - 1 Samuel 25:5 - 1 Samuel 25:25).</p> <ul style="list-style-type: none">Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes namesName changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle PaulName misspelling, Rahel for Rachel. A rewording of your view.Referring to people with their alias, sons of Zebedee, sons of Thunder, BoanergesMultiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	<ul style="list-style-type: none">Deuteronomy - RemembranceMonarchy - Kings versus ChroniclesGospels - Our LORD's, life storyApocalyptic - Daniel versus Revelation
Quotation	<ul style="list-style-type: none">Retelling previous eventsProphecy fulfillmentAnswers based on scripture
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12:5

These duplicates may introduce statistical error and require clarification.

Contribution

The Contribution of the Author's Historical Information

Unit	Value
Metric	Word, number, date, timespan
Dream	Unique
Freight	Free
Cost and Price	Free
Expiry Date	Indefinite
Ownership	Shareable
Audience	Bible scholars
Technology	Practicable low entry point with optional matured technology

2025-07-04T13:33:00 What part of the same He realize?

Actor	Word	Scripture Reference
Abraham	Seed; Abrahamic covenant, Davidic covenant, Messianic covenant	Genesis 12:7, Matthew 1:12
Moses	Season; civil calendar, religious calendar	Exodus 12:2

2025-06-29T18:34:00 What our part we share?

Part	Requester	Audience	Fulfiller	Duration	Scripture Reference
Ear	Apostle John	Church	The reader and the hearer of the book of Revelation	Shortly come to pass	Revelation 2:7, Revelation 3:22
Head	Jesus Christ	The 12 disciples	Simon Peter	End-times	Matthew 16:18, Daniel 2:32, Daniel 2:37-38

2025-06-09T12:52:00 What must I hold as truth? What must I perform as truth? When does God add? What I bring to Israel... is all my people.

- King Saul (1 Samuel 15:22)
- King David (1 Samuel 30:18-31)
- King Solomon (1 Kings 10:1-10)

2025-05-28T18:40:00 How did He position?

- Joseph (Genesis 50:20)

2025-06-07T15:13:00 What we have as a later use?

- 2025-06-07T17:22:00 Joseph (Genesis 41:34-36)

2025-05-15T22:09:00 What did He call time?

- In the beginning (Genesis 1:1, John 1:1-2)
- Declaration of our adopted Father to His only-begotten Son (Psalms 2:7, Hebrews 5:5)

2025-05-14T15:08:00 What did He make variable... what did He associate with age?

- Role: Army, Priest, King of the Jews (Numbers 1:3, Numbers 4:30, Numbers 8:24-25, Matthew 7:2)
- 2025-05-07T01:29:00 Kehinde (the last-born of the twins) (Genesis 45:6)

K	E	H	I	N	D	E
1st position, beginning	2nd position	3rd position	4th position, center	5th position	6th position	7th position, ending
11th alphabet	5th alphabet	8th alphabet	9th alphabet	14th alphabet	4th alphabet	5th alphabet

2025-05-13T16:52:00 What did He start... that I improve

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 What apart I have set as necessary?

solost.ei/cnboarctno?utm_source=news&utm_medium=freflow-desktop&utm_campaign=native-article-cards
Hong Kong was driving to Albertsons Lucky, Brookvale. Hong Kong drove me from their house to 99 Ranch Market.

I cut my finger nails. I shaved my beard. I cut my hair.

Is Koko still with you? Ni mi se ri be mo. Is Koko still with you? That is why I don't see it like that anymore. 2025-05-06T17:09:00 (what) What is beyond a place? 19:09 (color lo show) 2025-05-06T18:52:00 I am referring to my conversation with Benituluwa about Ademiloluwa. I had a run-in with the police... which was fruitless.

- The Holy spirit (Genesis 1:2, Genesis 2:7, John 1:33, John 16:7, 2 Thessalonians 2:7, Acts 1:4-5)
- Man (Genesis 1:26-31, Genesis 2:18-25, Genesis 49:26, Matthew 2:23, Revelation 13:18, Genesis 41:34-36, 1 Corinthians 7:1-9, 1 Corinthians 7:36)

2025-04-30T04:03:00 Timeline of WordEngineering

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

2024-12-21T06:02:00 We don't have to be surrounded.

From my bedroom, I walked into the light of the upstairs lobby to wear my Spyder Active trousers that I purchased from Costco on 2024-03-21. Where does God reveal Himself? There are 47 occurrences of the word light in the King James Version (KJV) of the Bible Gospel books. Google.com may have a statistics attribute for providing additional/specific information. Alternatively, what type of information... am I searching for? Image, audio, video, news, statistics... 2024-12-21 05:25:50.117 [icr.org/books/defenders/629](#) Pharaoh's magicians were somehow able to duplicate the first two plagues. 2024-12-21T07:18:00 May rank statistics?

1. 2024-12-21T06:18:00 Locality... between people ([Exodus 1:10](#)).

2024-12-21T07:45:00 What accurate proceeding?

1. 2024-12-21T07:52:00 In the event... of time... there I Am ([Genesis 1:1](#), [Genesis 1:14-19](#), [Revelation 21:23](#)).

2024-12-16T08:00:00 Metric Scalability: In the order of their mentioning

1. 2024-12-16T08:00:00 Time: beginning, evening, morning, day, season, year, generation, month, die
2. 2024-12-16T09:27:00 Place: earth, city, house, kingdom, country, tribe

2024-12-10T15:23:25 The Journey to WordEngineering

1. 2024-12-14T12:14:00 Availability ([Daniel 2:33-35](#), [Daniel 2:41-43](#)) Wake-up orientation: My right foot is in the center and on the top of my left foot.
- After the author completed his 3 Associates degrees, the president of Central Piedmont Community College (CPCC), doctor Richard Hagemeyer, asked the author if he would like to go to Africa?
 - After the author completed his Bachelors degree, the author did technician work in separate telephone call areas, and the upgrade of Borland Turbo C language software that prints labels for the offsite storage of reel tapes.
 - After the author completed his Master's degree, the author did database replication between the central database and remote databases.
 - The author's doctorate study was based on intelligent appliance security and storage.
2. 2024-12-14T15:48:00 Scalability ([Genesis 41:34-36](#), [Genesis 41:47-49](#), [Genesis 41:53-57](#))
- When the contract of the author was terminated where he first did database replication, the author commenced a lead software engineer role in a client/server trainee and apprenticeship project.
 - The author initially used a Sybase PowerSoft Watcom Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE).
 - The Polish heart attack survivor project manager restricted workers to 40 hours a week.
- Do you not believe I will provide your need?
3. 2024-12-14T17:23:00 Security: What do we have as sufficiently strong? ([Daniel 6:22](#))?
4. 2024-12-14T18:25:00 Agility: The idea of the author is not... Comprehensive of people.
1. 2024-12-14T16:33:00 What we have of the east?
2. 2024-12-14T22:15:00 How can we prove you wrong... we are right. ([1 Samuel 22:2](#)) ?

(Haishi Bai, 2019).

2021-01-04 14:22:14.250 Relational database Will target Tuesday December thirty first ([Daniel 12:13](#), [Matthew 22:41-46](#), [Matthew 4-7](#), [Deuteronomy 6:16](#)) ? 2024-12-31

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering ([Daniel 9:2](#)). Is there a date? Not null.
 - Calculate the date difference between the beginning of the prophecy and the ending of the prophecy ([Daniel 9:24-27](#))
- 2021-01-04...2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)
- Is the date before or after?

2024-12-13T14:00:01 What I have that is partial to me ([John 16:7](#), [2 Samuel 7:15](#), [Luke 18-13](#)) ? Holy Spirit

- You are still partial to self

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest ([Matthew 22:36-40](#), [Matthew 18:1-6](#), [Matthew 23:11](#))
- New ([John 13-34](#), [Hebrews 8:13](#), [2 Corinthians 5:17](#))
- 2...1 ([Genesis 2:24](#), [Genesis 41:25](#))

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit ([Luke 24:49](#), [2 Thessalonians 2:7](#))
- Time representation ([Matthew 24:14](#))
- Trade of man ([Revelation 13:16-18](#))
- No changes to the Word ([Deuteronomy 4:2](#), [Revelation 22:18-19](#))
- End-times ([1 Peter 4:7](#), [Genesis 6:13](#))
- Recompense ([Job 42:10-17](#), [Job 1:2](#))

Entity-Relationship Model

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To designate the user? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, functionally, SQL Server is a service.
2. 2024-11-03T04:52:00 Significant: What you do with so few? Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part... to follow the truth. 2024-10-28T06:06:00 What input has He contributed... that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no.

The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKelley Real Estate, I worked on a R:base 5000 application.

These 3 non-academic Central Piedmont Community College (CPCC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 What is suitable... for replacement?

Initially, I registered the trademark, WordEngineering. After offering me a book, Ocean Senior, I afterwards, was issued the domain name, [www.JesusInTheLamb.com](#). ([Revelation 21:23](#), [Revelation 21:2](#), [Revelation 2:17](#)). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walkers. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Him? With HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
 - I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham ([Ezekiel 33:24](#)).
- Consistency with the Bible ([Genesis 25:23](#))?

How they report you?

- 2007-03-14 Chester Gordon Bell [http://research.microsoft.com/barc/mediapresentation/hylifebits.aspx](#)
- 2019-12-07 [http://google.com/books/edition/Design+for+How+People+Think/UFSP0wAAQBAJ?hl=en&pg=18&printsec=frontcover](#)

Separating realizable

- Baptism of John... Baptism of the spirit ([Acts 2:1](#))
- Dead... resurrection ([Hebrews 11:12](#))
- Ishi, husband ([Isaiah 2:16](#))
- Antichrist ([2 John 1:2](#))

No separation... in bonding. What did He ask for unity in? Land, man, Man, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel ([Genesis 2:8](#), [Genesis 2:15](#), [Genesis 3:23-24](#), [Genesis 4:10-17](#))
- Jesus Christ: Church - Peter ([Matthew 16:18](#))

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in. ([Numbers 3:8](#), [Numbers 24](#), [Romans 1](#), [Acts 13:38](#))?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ([Genesis 15:13](#), [Acts 7:6](#))
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau ([Genesis 25:28](#), [Genesis 27:5](#), [Genesis 28:22](#), [Genesis 31:38](#), [Genesis 31:41](#))
- Children and grandchildren: Benjamin, Joseph, Judah ([Genesis 42:36](#), [Genesis 43:14](#))

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27 , Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2 , John 3:16 , John 3:18 , Hebrews 11:17 , 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1 , Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?
Ratio percentage versus (VS) quantity? At 3 for 97 GroupPrice.com
- In the 1st scene, at Albertsons Lucky's Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness ([Daniel 5:5](#), [Daniel 5:11](#), [Daniel 5:26](#), [Daniel 5:30-31](#), [Genesis 4:3](#), [Genesis 4:8](#), [Genesis 4:12-14](#))

- What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful. (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said. What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning. (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the deception. (Revelation 12:10). Appreciate as. (Matthew 16:18).?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15
Lead	Matthew 23:9, John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present. (Deuteronomy 32:8).?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way. (Genesis 1:26).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:29

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work. Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.		
Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? (Deuteronomy 18:15)		
God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping...man grouping: 2025-04-1804:06:00 (Genesis 48:4).?

2025-04-17T06:16:00 Do we choose...a realization of Him?

- 2024-07-09T18:30:00 He has always put it in...context of time.
- 2024-09-15T13:39:00 How our part...is never...desire as testing?
- 2022-08-08T19:00:00 Dispossess the Devil?
- 2024-07-23T09:22:00 To be an African's...Nation.
- 2024-09-24T11:01:00 I have brought shame to my people...The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of orivilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

1. Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5)

What I am rendering? To what particular use...is me. (Matthew 16:18).?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45).?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53)...

1. Salvation (Exodus 14:13)
2. Commit (Luke 23:46, Psalms 31:5)

What personifies the time?

1. First and Last Adam (1 Corinthians 15:45)
2. Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)

What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including how baba ti wan. Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. (1 Timothy 6:17).

How do you reference the Bible?		
Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Iota

- References
- Appendices
- Background
- Conclusion and Fulfillment
- Autobiography
- Style of Writing

- Late
- Call
- Thanksgiving
- Where am I, as a human being?
- The life of associating something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword Noun.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I collaborate fact with what I know?

On behalf, of someone, I seem		
Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?		
Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age.		Scripture Reference
Title	Time	
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:5, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:12
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you, than you are. (Ephesians 3:18).

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?	
Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?		
Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: JSHint, ExCoq
- Questionnaire: RatingRank, InDefine

Prepared for Time

On 2019-04-04T09:00:00 andrea.nguyen@gmail.com will telephone me about the role with Google's co-founder Larry Page jobs.lever.co/kltvhwak.aero/701c6d9a-2d8a-4727-a345-d4a93d6dccc277?agencyId=a3b8e0b44-7127-4709-ad71-6eb8ea5f7403 Andre

Nguyen asked how I spend my day? 2026-01-19T11:32:00 You have tried to supplement....what God has given you.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our opinion? This projection may result in entries of new records

in the Remember and APass tables. Where are people, his relation?

However, he is present, that is how I use.

If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.

- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Siward Drive, Fremont, California (CA) 94555

How do we develop...our next time. (Genesis 37:19-20, Daniel 6:5)?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

What we do minimally, is how we do enormously.

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- ScriptureReference.html Requires Bible knowledge and place in the Bible.
- BibleWord.html Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance (Matthew 10:19-20).
- Where am I, resemblance of how I am made (1 Corinthians 14)?

What does He choose as example?

- God rested on the Sabbath day (Luke 23:56)
- Jesus Christ (Daniel 9:24-27, 1 Corinthians 15:45, 1 Corinthians 15:47)
- Man such as King David (2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5)
- Place such as Sodom (Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8).
- Other living things (Numbers 22:21-33).

6. Update rollback

What is the repository? If the user only needs to store the Word from God, a text file is sufficient? A comma-separated value (CSV) may suffice for multiple columns. AlphabetSequence considers the whole word. Separate words into?

1. Buzz word
2. Keyword
3. Parts of speech
4. Simple versus (VS) complex

This part is my existence, which I will never recover. Can I reason as a god will listen?

1. Adam named the animals (Genesis 2:19-20)
2. Prostrate Simeon (Judges 12:6)
3. Pray continually (Luke 18:1-8)

How to...use the word? My earlier work has been to refer to the word: To look for one I deem as I? Mo fe wa productive in the word? I want to be productive in the word? Where My word has developed His need (2 Kings 8:5)?

The select inputs do not have default values. The Scripture table is a one-to-one mapping between the Bible version and column. These arrangements are futile when there are inconsistencies in the Bibles versions separations. An alternative is to have a table for each version. Publishers issue Bible version. What does the Bible teach us about twins? Full-Text search? We have given preference to the word, not the commentary, which is subjective.

Word to Today

The remember table correlates the events and the calendar. Currently, the author is manually deriving the entries for the Remember table. When there is an association, then the author considers the first, last, relevant mentions.

1. To forget time is reasonable (Revelation 21:23, Matthew 17:5, Mark 9:7, Luke 9:35)
2. What replaces time (Ruth 1:13)?

The gain from automating this process will include:

1. Limiting human labor
2. Speeding up the task
3. Reducing storage need

Don't Feel Left Alone.html

He Handicaped Time; as His Usage	
Title	Scripture Reference
Servitude	Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2
Fulfillment	Luke 9:31
Incentive	Daniel 12:13, Isaiah 53:12

We may need, human help, to determine, the theme-of-the-day? The author's work is record specific, GetAPage.html. Further work may consider the entries for a particular date, datetime range, or HisWordID set basket? What this information have in common? On 2022-01-10, I will recall that the birthday of biological mother is coming up, on 2022-01-12. I should pray about this and reinforce effort. What is He, starting to say? Is there going to be a safe development to this design? There is key to reason. This work is not defamatory nor inflammatory.

Reuse

1. Issue a SQL database query statement SQLToHTMLTable.html. This is the most raw form of querying the database, but it offers the most flexibility, and it does not restrict, to pre-built application.
2. Navigate the web pages from a client browser 2019-10-05ArtifactDescription.html WhenThePastorIsPreachingYouDontWithTheScriptureToComeInSubsequent.html
3. Build a web service requestor, without the limitations of Cross-origin resource sharing (CORS).
4. Download the DLLs, or the source files, and customize, if necessary WordEngineering

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship? [How wife](#) SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE 'Bknew' and KingJamesVersion LIKE 'Xknew' [wife child](#) SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE 'Bwife' and KingJamesVersion LIKE 'Xchild'

WordToNumberHelper.cs

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language AlphabetSequence.cs. Later work, saw translation to:

- AlphabetSequence.c
- AlphabetSequence.cpp
- AlphabetSequence.go
- AlphabetSequence.java

Perhaps, other programming languages should have their own sample code. The author is only conversant in English and Yoruba, additional work will be to see the use in other lingua franca. And, the priest said, Are one only for me?

Data Residence

Where should the data reside? Database, JSON or XML files?

Which side, the love felt?

SQL returns records in rows; there is a result set. Would we, be able, to amalgamate the result set? For example, how can we, find themes in the Bible? When you enter a topic, can we return a trend? Clustering, can we return a number; as its present (1 Kings 19:11-13)?

Where I arrive, is where He as conclusively use

Initially, when I got a word, I made efforts to expound, on this word; but now, I share the word, and wait on God to reinforce the word, or share a new theme. 2019-05-30 My ancestral home is Ile-Ife, the site of the Odrumiyi staff. My search for the word, Staff, inspired relating the Bible to my life. Staff, first occurs in, (Genesis 32:10). In my ninth year, my twin sibling and I, relocated from Ile-Ife Staff School to Lagos. In our tenth year, we visited London. In my 32nd year, I re-located to the United States of America (USA).

I Am letting myself, be many as a people.

God intended man, to be a personal use. The work of the author is an individual effort, and it targets a singular person. The author separates his work into web pages, but the user may click on a hyperlink, to get more information, and sometime do additional work. The work of the author, builds on the efforts of other people, like the Bible, dictionary and commentary. The HisWord table and associated queries, only currently refers to the contribution of the author. How could we, specialize our work? Who uses, and for what? The setting, is it normal? What are the influence of God, as a person? What are His contribution, solely to man? What part of Him, as He analyzed, as a person? What role, as man, placed on Me? What stimulate you, as a human being; is where My opinion placed? The author read the Bible and listened to His word, prior to the introduction of AlphabetSequence. Where do we follow, His partnership? He has said the word; I have collaborated with Him.

Outstanding Work

The source code and schema are available at Github.com. This means that the public can review and make updates to the original work of the author. This aged work is not up-to-date with the industry trend, such as cloud computing, mobile applications, decentralized ledger, nosql. Part of the justification for this immaturity, is the need to maintain a low entry point and capture a wide audience for its adoption.

Who's for social networking sites like WordPress, Github, Twitter, LinkedIn, Facebook, etc. When nothing without Me, is sufficient without Me, Where I retain. I use grammarcheck.net. I am proposing a specialization to correct scripture reference. For example, there are many questions and answers, but a further development is to automate the task of correction (Luke 3:23, Matthew 27:41-46, Matthew 27:28, Mark 7:3, Genesis 38). They are not one another. When does He say a word, when does He put a thought (Daniel 5:25-28)? Ability to say.

When does He talk in the past, present or future? Which is the information container? The ActToGod table, Major column value, Comparative verse; supercedes the WordsInTheBible table; which is the exact word for the King James Version (KJV) and not all versions of the Bible; and doesn't take into consideration the English language British versus American spelling, such as favour versus favor, nor the generic word, such as, man versus men. When is this, anointing of the Spirit (1 Samuel 2:28, Luke 2:52)?

Can you create a fictitious record in the Contact table, that meet later fulfillment. This record in the contact table will contain a word that is placeable in the title or company field/column. This information is substantiable in the commentary column of the CaseBasedReasoning table. This is compatible to Ghost city. A bit column is settable, for this contact. It allows to keep the contact ID as a foreign key. A record to be someone else.

The effort of the author is to share and comprehend the word of God. What can the author provide to the other; to substantiate the work of the author? God made man as similar to Him to see how life can be? If I spoke the same, how am I the same? I know, I am. The love of being the same supercedes feeling the same. Being in the spirit; is alluding to the sufficiency of men.

When did He immediately get what He wanted?					Scripture Reference
Who	What	When	Where	Why	
Abraham	Sacrifice	3 days	Mount	Tempt	Genesis 22
Jesus Christ	Sacrifice and resurrection	3 days	Jerusalem at Golgotha	Tempt	Matthew 27:33, Mark 15:22, John 19:17, Matthew 16:21, Matthew 17:23, Matthew 20:19, Matthew 27:64, Mark 9:31, Mark 10:34, Luke 9:22, Luke 13:32, Luke 18:33, Luke 24:7, Luke 24:24, Luke 24:46

Terminology - Words and Meaning

When you write a thesis, it is a paradigm work, shift in thinking, and it should contain a terminology section. The practice of the author will be to list existing words, and include their meanings. For technical jargons, the author will rely on the Internet, as a definition resource. If the author is introducing a new word, the author will explain its meaning, but this is rare. WordEngineering Created of an intellect.

Client-Side Programs

The norm of today is to build with HTML, JavaScript, CSS.

Database

The database of choice is Microsoft SQL Server. Prior to specializing on SQL Server, the author experienced fifth generation scripting languages such as dBase, R:BASE, Clipper, Access, FoxPro; other relational databases, like Oracle, SQL Anywhere from Watcom, Sybase, and Informix. When the author applies the Microsoft implementation of SQL, Transact-SQL and SQL CLR or SQL CLR (SQL Common Language Runtime) the author risks not being vendor-agnostic.

HyperText Markup Language (HTML)

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously.

HTTP Client (or Web Browser)

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and its gives us the opportunity to test our Microsoft implemented software in a non-proprietary, vendor neutral environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, mobile telephones emulators and simulation.

HTTP Server

The author use Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

Latency

This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page.

Linking

This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

Machine Learning

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P, if its performance at tasks in T, as measured by P, improves with experience E (Goodfellow et al. 2016). Machine Learning takes as input: data and answers and derives rules (Blesch et al. 2020).

Page Size

The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files.

Page Title

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

Semantic HTML

This is the choice of a particular HTML tag, to reinforce its meaning and content.

Server-Side Programs

Ever circulating?

Style Sheet

The author prefers linked to embedded style sheet.

Web Application

The everyday web pages of the author include:

1. [GetAPage.html](#)
2. [BibleWord.html](#)
3. [ScriptureReference.html](#)
4. [ScriptureReference.aspx](#)

[SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis 22, Daniel 9:24-27, John 1:1, Jude](#)

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the IDX_Scripture_VerseIDSequence, where the clause is on the VersesIDSequence column. The IDX_Scripture_VerseIDSequence indexes on the VersesIDSequence column; it is not a covering index, since the Select column-list includes the BookID, ChapterID, VerseID; therefore, the PK_Scripture is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

(Don Jones)

Performance Monitor - SQL Server Objects

https://content.marketingshera.com/lean/realto/1a.pdf	
SQL Server Objects	Commentary
SQLServer:Access Methods	Logical data access.
SQLServer:Buffer Manager Object	Physical data access. Such as, Buffer cache hit ratio, is how often, data is accessible from memory, rather than the hard disk.

Background

1967-10-15 + 75 years (Years 9:2041-9:2046) (Years 3:22-23). The date of recording this information is 2020-10-23, born 1967-10-15, 1603545400
 1967-01-01 to the date of the author's 17th Biblical birthday (Years 3:22-23). The author was born on 1967-10-15, 1603545400
 Jesus Christ began His ministry at the age of thirty, and the estimate is that He served for three years (Luke 3:23). The author was born on 1967-10-15, 1603545400
 32 biblical years, 8 biblical months, 6 days (32 years, 2 months, 2 weeks, 3 days). 1967-10-15 B.C. - 1967-10-15 A.D. = 1435155 days = 47196 months = 3933 years. My thirtieth, 30th, Biblical years birthday will occur on 1967-10-05. My thirty-third, 33rd, Biblical years birthday will occur on 2000-04-24. Between 1967-10-15 and 1968-04-24 are 172 days (5 months, 2 weeks, 6 days). Between 1967-10-15 and 1968-10-15 are 366 days (1 biblical year, 6 days) (1 year, 1 day). Between 1967-10-15 and 1969-10-15 are 730 days (2 biblical years, 6 days) (2 years, 1 day). Between 1967-10-15 and 1970-10-15 are 1095 days (3 biblical years, 6 days) (3 years, 1 day). Between 1967-10-15 and 1971-10-15 are 1460 days (4 biblical years, 6 days) (4 years, 1 day). Between 1967-10-15 and 1972-10-15 are 1825 days (5 biblical years, 6 days) (5 years, 1 day). Between 1967-10-15 and 1973-10-15 are 2190 days (6 biblical years, 6 days) (6 years, 1 day). Between 1967-10-15 and 1974-10-15 are 2555 days (7 biblical years, 6 days) (7 years, 1 day). Between 1967-10-15 and 1975-10-15 are 2920 days (8 biblical years, 6 days) (8 years, 1 day). Between 1967-10-15 and 1976-10-15 are 3285 days (9 biblical years, 6 days) (9 years, 1 day). Between 1967-10-15 and 1977-10-15 are 3650 days (10 biblical years, 6 days) (10 years, 1 day). Between 1967-10-15 and 1978-10-15 are 4015 days (11 biblical years, 6 days) (11 years, 1 day). Between 1967-10-15 and 1979-10-15 are 4380 days (12 biblical years, 6 days) (12 years, 1 day). Between 1967-10-15 and 1980-10-15 are 4745 days (13 biblical years, 6 days) (13 years, 1 day). Between 1967-10-15 and 1981-10-15 are 5110 days (14 biblical years, 6 days) (14 years, 1 day). Between 1967-10-15 and 1982-10-15 are 5475 days (15 biblical years, 6 days) (15 years, 1 day). Between 1967-10-15 and 1983-10-15 are 5840 days (16 biblical years, 6 days) (16 years, 1 day). Between 1967-10-15 and 1984-10-15 are 6205 days (17 biblical years, 6 days) (17 years, 1 day). Between 1967-10-15 and 1985-10-15 are 6570 days (18 biblical years, 6 days) (18 years, 1 day). Between 1967-10-15 and 1986-10-15 are 6935 days (19 biblical years, 6 days) (19 years, 1 day). Between 1967-10-15 and 1987-10-15 are 7300 days (20 biblical years, 6 days) (20 years, 1 day). Between 1967-10-15 and 1988-10-15 are 7665 days (21 biblical years, 6 days) (21 years, 1 day). Between 1967-10-15 and 1989-10-15 are 8030 days (22 biblical years, 6 days) (22 years, 1 day). Between 1967-10-15 and 1990-10-15 are 8395 days (23 biblical years, 6 days) (23 years, 1 day). Between 1967-10-15 and 1991-10-15 are 8760 days (24 biblical years, 6 days) (24 years, 1 day). Between 1967-10-15 and 1992-10-15 are 9125 days (25 biblical years, 6 days) (25 years, 1 day). Between 1967-10-15 and 1993-10-15 are 9490 days (26 biblical years, 6 days) (26 years, 1 day). Between 1967-10-15 and 1994-10-15 are 9855 days (27 biblical years, 6 days) (27 years, 1 day). Between 1967-10-15 and 1995-10-15 are 10220 days (28 biblical years, 6 days) (28 years, 1 day). Between 1967-10-15 and 1996-10-15 are 10585 days (29 biblical years, 6 days) (29 years, 1 day). Between 1967-10-15 and 1997-10-15 are 10950 days (30 biblical years, 6 days) (30 years, 1 day). Between 1967-10-15 and 1998-10-15 are 11315 days (31 biblical years, 6 days) (31 years, 1 day). Between 1967-10-15 and 1999-10-15 are 11680 days (32 biblical years, 6 days) (32 years, 1 day). Between 1967-10-15 and 2000-10-15 are 12045 days (33 biblical years, 6 days) (33 years, 1 day). Between 1967-10-15 and 2001-01-01 = 11766 days (32 biblical years, 8 biblical months, 6 days) (32 years, 2 months, 2 weeks, 3 days). 1967-10-15 B.C. - 1967-10-15 A.D. = 1435155 days = 47196 months = 3933 years. My thirtieth, 30th, Biblical years birthday will occur on 1967-10-05. My thirty-third, 33rd, Biblical years birthday will occur on 2000-04-24. Between 1967-10-15 and 1968-04-24 are 172 days (5 months, 2 weeks, 6 days). Between 1967-10-15 and 1968-10-15 are 366 days (1 biblical year, 6 days) (1 year, 1 day). Between 1967-10-15 and 1969-10-15 are 730 days (2 biblical years, 6 days) (2 years, 1 day). Between 1967-10-15 and 1970-10-15 are 1095 days (3 biblical years, 6 days) (3 years, 1 day). Between 1967-10-15 and 1971-10-15 are 1460 days (4 biblical years, 6 days) (4 years, 1 day). Between 1967-10-15 and 1972-10-15 are 1825 days (5 biblical years, 6 days) (5 years, 1 day). Between 1967-10-15 and 1973-10-15 are 2190 days (6 biblical months, 23 days) (6 months, 2 weeks, 5 days). Between 0032-04-06 and 1967-10-15, is 706935 days (1963 biblical years, 8 biblical months, 15 days) (1935 years, 6 months, 1 week, 1 day)
 04-0270833 Biblical generations, 80.529766 years of years.

[illegible]

The singular word, centurion, occurs twenty-one times in the Bible; its plural word, centurions, occurs three times in the Bible; therefore, centurion(s), occurs twenty-four times in the Bible.

In Australia, the author first worked at:
Australian Army Headquarters Training Command
Suakin Drive
Georges Heights NSW 2088
Telephone 61 2 9960 9452
Fax 61 2 9960 9452

The word, covenant, occurs twenty-four times in the New Testament. The word, marriage, occurs sixteen times in the New Testament.

The United Nations began on 1945-10-24, between then, and 1988-10-15, are 15697 days (43 biblical years, 7 biblical months, 7 days) (42 years, 11 months, 3 weeks). $(24 - 20) / (70 - 20) = 8\%$ (Numbers 1:3, Psalms 90:10)

1966 Nigerian coup d'état occurred between 1966-01-15 and 1966-01-16 and the author was born on 1967-10-15, 638 days, after

Riafra commenced on 1967-05-30, and 1967-10-15 is 138 days, after.

Between when Summer traditionally begin, June 21, and October 15, is a span of (3 mo

October 15, is the forty-fifth day, in the September, October, November, December cycle.

Between September 22 and October 15, is 23 days (23 days) (3 weeks, 2 days).

Between October 15 and when Winter starts, December 21, is a span of 67 days (2 biblical months, 7 days) (2)

Between October 15 and when Winter ends, March 20, is a span of 157 days (5 biblical months, 7 days) (5 mo

Military Occupation Six-Day War was fought between 1967-06-05 and 1967-06-10. I was born on 1967-10-15, and 9 Biblical months, before that, then, was, 1967-01-18. Between 1967-01-18 and 1967-06-10 is 143 days (4 biblical months, 23 days) (4 months

2 Biblical years, after I was born, is 1969-10-04. I was accepted to the United Nations on 1949-05-11, between then and 1969-10-04, is 7451 days (20 biblical years, 8 biblical months, 11 days) (20 years, 4 months, 3 weeks, 2 days). The adoption of the United Nations Partition Plan for Palestine occurred on 1947-11-29, between then, and 1969-10-04, is 7980 days (22 biblical years, 2 biblical months) (21 years, 10 months, 6 days). The 1948 Arab-Israeli War commenced on 1948-05-15, between then, and 1969-10-04, is 7812 days (21 biblical years, 8 biblical months, 12 days) (21 years, 4 months, 2 weeks, 4 days). The 1948 Arab-Israeli War ended on 1949-01-10, between then, and 1969-10-04, is 7513 days (20 biblical years, 10 biblical months, 13 days) (20 years, 2 days).

years, 6 months, 3 weeks, 3 days).

Approximately, the author became a fetus, eight weeks after conception, on 1967-03-15. Between when Israel became a nation, 1948-05-14, and 1967-03-15 is 6879 days (19 biblical years, 1 biblical month, 9 days) (18 years, 10 months). Between when United Nations Partition Plan for Palestine 1947-11-29, and 1967-03-15, is 7046 days (19 biblical years, 6 biblical months, 26 days) (19 years, 3 months, 2 weeks). Between when the American Revolutionary War began, 1775-04-19, and 1967-03-15, is 80791 days (194 biblical years, 8 biblical months, 11 days) (191 years, 10 months, 3 weeks, 3 days). Between when the American Revolutionary War ended, 1783-09-03, and 1967-03-15, is 67032 days (186 biblical years, 2 biblical months, 12 days) (183 years, 6 months, 3 weeks, 3 days).

months, 1 week, 5 days). Between when the American Revolutionary War ratification

Between the beginning of the 400 Silent Years and 1967-10-15, are 864,455 days.

Between the end of the 69th week, 0032-04-06, and 1967-10-15, are 706935 days (1963 biblical years, 8 biblical months, 15 days).

Between 1967-10-15 and 2020-06-03 are 19225 days (53 biblical years, 4 biblical months, 25 days) (52 years, 7 months, 2 weeks, 5 days).
The Yoruba tribe speak the Yoruba language and the Yorubas are in the South West of Nigeria. The Yorubas practice the Christian and Moslem religions. The East of Nigeria include the Ibo who speak the Ibo language and are mainly Catholic. The Hausas

The Yoruba tribe speak the Yoruba language and the Yorubas are in the South West of Nigeria. The Yorubas practice the Christians and Moslems religions. The East of Nigeria include the Ibos who speak the Igbo language and are mainly Catholics. The Hausas and Fulanis are in the North of Nigeria. At the Highways 990 South and 990 East, the road separates into two, the Alameda Boulevard, West direction, and Escomont Boulevard, East direction.

Kove's innovation is, like the typist can type *glaucē*, alphabets by using the function keys combined with the alternate, control, and shift keys. Line drawing is also possible with Kove. Kove will translate languages.

Between 1997–1998, the author pursued his Doctorate at the University of Wollongong, New South Wales (NSW), Australia; and he visited Villawood Detention Center, a place for illegal migrants and asylum seekers, every Friday, as a Christian missionary. One of those migrants, a Ghanaian, had been at the detention center for up-to six-years, and he corresponded with immigration officials, regularly. The author thought of building a website that will allow these migrants to share their experiences with the rest of the world.

Like Jacob, the author's biological father is the second born, and the author is the second twin. Option B: Facing Adversity, Building Resilience, and Finding Joy. I lived in Australia, Down Under, which is in the Asia-Pacific geographical region, for seven years; we

Massacre of the Innocents. 1967-10-15...1967-12-28, 74 days (2 biblical months, 14 days) (2 months, 1 week, 6 days). 1966-12-28...1967-12-28, 291 days (9 biblical months, 21 days) (9 months, 2 weeks, 3 days). 2003-12-28...2004-07-11, 196 days (6 biblical months, 16 days) (6 months, 1 week, 6 days). 2004-07-11...2004-12-28, 170 days (5 biblical months, 20 days) (5 months, 2 weeks, 3 days).

Prophecy & Fulfillment

From 1997-12-31

[illegible]

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- * At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
 1. an African American female senior, Gayle;
 2. an African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony
- 3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - * My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning, 2004-2012-2022:00:00. What estrangement of the neighborhood?
 - * Plans to build a traffic light for my property.
- 4. In a multicultural church where I was part of the congregation, Bernice Alspaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.

1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?
 They had younger mother... but one father ([Genesys.32-28](#)).
 2024-12-11T16:48:00 M Hair. Located in: Paseo Padre Shopping Center, Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward
 2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble you?

1. Post 9-year-old re-location from Ile-Ife to Lagos
 1. Patriach, brother Yemo
 2. Captain of the Nigerian national hockey team
 3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
 4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him

- Where did he serve... a people?
- Where did I... remove myself from the past (Genesis 31:41)?
- What apart... are new?
- Spending time... to reality?

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
 - I contracted at Sunheath Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has he made.(Genesis 32:28. Genesis 3:3. Genesis 4:12.)? What word reminds. (Mark 11:23.)?

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.

(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent...where is it needed?
