WordEngineering

Ken Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.

Abstract

Thesis Statement: This dissertation introduces `AlphabetSequence` ([2 Corinthians 10:9-18](#)). The `AlphabetSequenceIndex` is the result of a pure function to sum alphabet places `AlphabetSequence.cs`. The `AlphabetSequenceIndexScriptureReference` are the offsets from the beginning and the ending of the Scripture. The `AlphabetSequenceIndexScriptureReference` consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the `AlphabetSequenceIndex` verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places.

The importance of this work?

- Follow God, as a character.
- To track dates and words? And, find meaning, correlation.

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Missler of [Koinonia House](#) ([KHouse](#)) is worthy of note, faith ([Babylon_11](#)).

There is indebtedness of the author to Liz Schegog, his Masters degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS; Deelder Mendez, Cesar Orcando, Ricardo Lamas and Peter Mline. The author stretches his open hand to Robyn A. Lindley, his Doctorate supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

Theory

2004-11-10 [www.JesusInTheLamb.com](#)

Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename	index.html	
Fragment		
		It is not an e-mail address, since it does not include an at sign, @.
		It defaults to port 80.
		It defaults to the homepage.

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a `composite primary key`, which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are `varchar(MAX)` columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK ((([ChapterID]>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VersesID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK ((([VerseID]>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Design by contract](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to decipher the book title and the corresponding BookID.

The Scripture Table's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
    cast(BookID as varchar(6))
    +
    cast(ChapterID as varchar(6))
)
FROM   Bible..Scripture
```

Another SQL statement

```
; with cte
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
    FROM   Bible..Scripture
)
```

* Title
 * Abstract
 * Acknowledgments
 * Theory
 * Results and Discussion
 * Prophecy
 * References
 * Appendices
 * Background
 * Prophecy and Fulfillment
 * Autobiography
 * Style of Writing

```

select cnt = count(*)
from cte
The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.
The Scripture Table's VerseIDSequence Column
When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

SELECT COUNT(*) FROM Bible..Scripture
will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31102)
will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, the SQL statement

ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
is supplementary.
The Scripture_View BibleReference Column
The SQL statement

((right('00' + CONVERT([varchar](2), [BookID], 0)), 2)) + right('000' + CONVERT([varchar](3), [ChapterID], 0)), 3)) + right('000' + CONVERT([varchar](3), [VerseID], 0)), 3))
will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1

```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.
 Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving Separation of concerns (SoC).

The Exact Table

The Exact table's primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Missler](#) who noted that the first occurrence of the word, [love](#) is in [Genesis 2:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Interpreted Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning [floor](#) ([Joshua 15:2](#)). Word Occurrences is dynamic, and it supports the other versions of the Bible.

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```

SELECT MAX(ExactID) FROM Bible..Exact
is for determining the highest value. The SQL statement

SELECT COUNT(BibleWord) FROM Bible..Exact
is for determining the word count. The SQL statement

ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spire, of it being a query item. Future implementation, may issue the SQL statement

CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)

SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
is 789631; this is the count of the words in the KJV Bible.
The Exact Table's BibleWord Column
These are the words that occur in the Bible, in the order of their occurrences. The author sets the primary key, the constraint, by issuing the SQL statement

ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
The Exact Table's FirstOccurrenceScriptureReference Column
This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.
The Exact Table's LastOccurrenceScriptureReference Column
This is the reference to the scripture where the word last occurs in the Bible; If there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.
The Exact Table's Difference Column
This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.
The Exact Table's Occurrence Column
This is the pervasiveness of the word, how often is the word used in the Bible?
The WordEngineering Database
The WordEngineering SQL Server database, mainly consists, of four tables - HisWord, Remember, APass, ActToGod.
The HisWord Table
The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format (Numbers 12:5b). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is being interpreted. (Matthew 1:23, Mark 5:41, Mark 15:34, John 1:18, John 1:41, Acts 4:36); so also, there are translations of Yoruba words to English.
There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the http://translate.google.com web page.
The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings (1 Corinthians 12:30, 1 Corinthians 14). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-27T22:55:00 And the merge is the money convert.
2. 2015-11-27T22:17:00 The specific a language.

  The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an insert trigger, will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and loss of data.
  The HisWord table, commentary column, contains implicit information. The communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities. As with the commandments on the first day, there is a command, and there may be an action/response. The command is in the word column God created light (Genesis 1:3-5). The action is in the commentary column; God separated the light from the darkness (Genesis 1:1-2, 4).
  Microsoft SQL Server generates sequential numbers for its HisWordID identity column. The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the primary and/or foreign key, the backbone of the Referential Integrity Constraint.
  The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the \(UTC-08:00\) Pacific Time \(US & Canada\) time zone. There is a preference for the Coordinated Universal Time \(UTC\) format.
  A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?
  HisWord view
  The HisWord view comprises of the computed columns deducted from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the resilient AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the AlphabetSequence.html to calculate the computed values identified above. The AlphabetSequence is like Gematria, Mispar Hebreach method. Titles of God.
  The Remember Table
  The Remember table tries to correlate the period between a prophecy and its fulfillment. ^ The terminus a quo DatedFrom is when the prophecy begins, and it marks the the date of issue or establishing of the prophecy. The terminus ad quem DatedUntil is when a prophecy partially or entirely comes to pass. (Koinonia House). DateDifference.aspx is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from wikipedia.org by Jimmy Wales.
  To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs (Luke 4:19).
  APass
  First, inside and last dates.
  ActToGod
  This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

```

Scales & Measurements

Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	<ul style="list-style-type: none"> Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attracts us. Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	<ul style="list-style-type: none"> This may be the physical count of word occurrences in the Bible. The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. The SQL COUNT() function returns the number of rows that matches a specified criterion. The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	<ul style="list-style-type: none"> In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. An Identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	<ul style="list-style-type: none"> Military ranks Mohs scale for hardness (geology) of minerals Schofield scale for the strength of peppers Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response tuning test used in computing to determine whether the user is human in order to deter bot attacks and spam. <p>The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?</p>
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	<ul style="list-style-type: none"> HTML input range CSS percentage

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies

Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID	Bible.Scripture_View.ScripatureReference	Bible.udf_ScripatureReference()

Determinism is achieved through computed columns.

(Allen G. Taylor, 2024).

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. If it is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)</pre>
External query	It returns either the minimum or maximum extreme.	Statistics	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)</pre>
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	<pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	<pre>SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts

Principle 2: Check Assumptions

- This whole thing started with keeping a work reference.
- Even though Youuba is the native language of the author, he still and invariably relies on translate.google.com.
- The author depends on a typing assistant.

• Title
• Abstract
• Acknowledgments
• Theory
• Results and Discussion
• Methodology
• References
• Appendices
• Background
• Prophecy and Fulfillment
• Autobiography
• Style of Writing
Principle 3: Explore Contexts Information sought was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
Principle 4: Anticipate Risks The undesirable outcome and their probability of re-occurrence will include: <ul style="list-style-type: none">◦ Data loss or corruption because of issuing the database modification command and lack of timely archiving◦ Hardware, software, or network failure◦ Vendor withdrawal of support◦ Microsoft .NET framework changes<ul style="list-style-type: none">▪ Introduced .NET core and Model-view-controller (MVC).▪ Ability to restore deprecated Microsoft SQL Server backup versions.◦ Command-line reverse-engineering of database script does not conform with the newly released data types.
Principle 5: Assign Priorities The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
Principle 6: Define Time Horizon What needs have Grown? <ul style="list-style-type: none">◦ 1999, desktop app: I am taking you on a journey.◦ 1999, priesthood app: I have brought something against you, but I Am with you.◦ 2007, generation timestamp: This masturbation will bring water.
Principle 7: Generate Multiple Solution Options How versatile am I... at amending others? I have to relay my perception to technology providers.
Principle 8: Design Around Constraints Relational databases offer the ability to set constraints. <ul style="list-style-type: none">◦ Data type◦ Null value◦ Primary key and unique index◦ Foreign key
Principle 9: Weigh the Pros and Cons Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns. <ul style="list-style-type: none">◦ The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HitWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URL column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 2. Second Normal Form (2NF): The ActoGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL.

SQL Usage

Database Information

Statement	Commentary
sp_database	The sole work of the author, the WordEngineering database size, is currently 33317504 bytes.
sp_server_info	The database version is Microsoft SQL Server 2022 - 16.0.1000.6
sp_spaceused	The WordEngineering database currently uses 32536.63 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 114243.
xp_fixeddrives	Returns a list of physical hard drives and amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies to Bible..Scripture_View</u> . Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <=, !=, !=, !=	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use, < or /and !=. This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Querying for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows</u> .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction %%
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, !=, >
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleaning

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?

- [Title](#)
- [Abstract](#)

- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

- Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
- Enclosed in a transaction block for atomicity, consistency, isolation, durability.
- Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
- Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it a data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URICovenant
 - URIScript
 - URIScriptNews
 - URITestimony
 - URITestimonyWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

[The set we will mostly deal with](#) is the HisWord table. [Is in order of occurrence.](#)

Predicate logic

[The choice of SQL Server impose?](#) datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdeniji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	<pre>1. git clone https://github.com/KenAdeniji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdeniji/WordEngineering.git 4. git remote -v</pre>	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supplied the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is reusable. The strict mode adds the additional keyword that helps in eliminating variable rules.
- For other variables, such as issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, general methods are referable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers. What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
1. The author extracts knowledge from data; by finding meaning to the word.
 2. The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
 3. The actionable insights take, as far, to computerize the work.
 4. The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
 5. The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

1. Empirical, find Implication from the Bible?
2. Theoretical, to determine a better way to doing work?
3. Computational, is human labor replaceable?
4. Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

1. The Bible is our primary source of data.
2. The author records information sources. This is either a person or media?

What you can do with Data

1. Data Acquisition: The Bible is available on the Microsoft Access database.
2. Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
3. Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
4. Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service .asmx file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The .html presents the result in a human readable format.

Defining Data

1. Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
2. Qualitative Data: These are rarely measurable and are personal interpretation.

- Autobiography
- Style of Writing

A brief introduction to Statistics and Probability

At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses.

(Microsoft)

Data

Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

Standard

The author imports complete, not NULL nor empty data, such as the Bible and the dictionaries.

The author achieves data validity by constraining and restricting inputs. Since this is not a commercial work, Key Performance Indicators (KPIs) are not vital.

The author references and is not tampering with authoritative Bible work; this helps to make sure correctness - accuracy, consistency, integrity.

Timeliness is effected in the single user data entry table, HisWord.

Unified Modeling Language (UML)

Class

The information which the author documents in this section of the paper is the Data Declaration Language (DDL) and Data Dictionary, which is available at [GitHub.com SQLServerDataDefinitionlanguageDDL Repository](https://github.com/SQLServerDataDefinition/languageDDL_Repository). The Data Manipulation Language (DML) is too large to fit into the GitHub.com repository, and it is intellectual property. For the people that have access to the database, this private information is available by generating the database script.

Contact is a primary entity, and it identifies the people and organizations that the author has a relationship with. These affiliations are family, friends, business, or public service links. Also recordable are their street, e-mail, web addresses, and telephone numbers.

The author does not store highly confidential data.

The relationship between a contact and its associated information is one-to-many; that is a contact may have multiple addresses. The other 2 types of relationships are one-to-one, and many-to-many.

A URI is a link to a web resource that will add to the audience's knowledge. The author notes the address and the date, when the author became aware of this information. The content at an address is either textual, audio, video, or image? For URIs, the author rarely explicitly specifies the entire http protocol and directory post-Rx, / . An incomplete address will not validate as an input url type. The author only records the Wikipedia address' at the place of reference since it is easy to associate the title with the Wikipedia address.

Exists or does not exists? The transact-sql exists clause is useful for checking the existence of an object and if so, drop the object. This is applicable prior to re-creating the object. Please note that the metadata information is lost and the create or alter statement supersedes this approach. The exists clause is also useful in queries for determining the existence of a resultset.

These classes are important asset for the anniversary triggers; in the Remember entries.

Database and Application Server Source Files

The author chose a multi-tier architecture for building the application. The database layer is made-up of tables, views, stored procedures, functions. The database tables are easily storable and movable to other storage media. The SQL Server's data definition language (DDL), now supports DataTiered, and its date range extend between January 1, 1 CE through December 31, 9999 CE. Some dates in Wikipedia mention these dates. The HisWord_view contains computed columns, which depend on entries in the HisWord table. The author extracts database information by building query statements.

The application layer is the bridge between the user interface layer and the database layer. The application layer compiles into a single Dynamic-link library (DLL), called InformationInTransit.dll. The application layer consists of four namespaces, namely, InformationInTransit.DataAccess, InformationInTransit.ProcessCode, InformationInTransit.ProcessLogic, InformationInTransit.UserInfo. What the author builds on the server; is accessible to all the clients. What is the lifetime of this code, and what neutrality does it consume? The author started out with [dBASE II](#). The lines of code for the application layer are in the C# and embedded SQL.

Client Browser Source Files

- HTML5 (.html)
- JavaScript (.js)
- Cascading Style Sheets (.css)

The HTML files will work in all browsers; that support AJAX. Most of the interactive web pages are reliant on JavaScript to work, mainly because they use Ajax to interact with the server. Each HTML file, performs specific task, and may have a corresponding back-end associate, web service. The unobtrusive JavaScript file 9432.css contains reusable code that is not .HTML files specific. The .HTML files originally contained the .CSS specifications; however, the author now places styling information in a single external file, 9432.css. This will reduce the sizes of the .HTML files, and it helps to achieve a consistent user interface.

The work of the author is interactive, and there are links to questions and answers pages. Most of the input entries are textual, but some are numeric, datetime, select options. The answers are mostly in tabular format.

(Vaibhav Verdhan).

A HTML document contains:

- Text content: The author informs the reader by describing His word.
- References to other files: The author refers to external files, such as UML images.
- Markup:
 - Elements: The anchor tag is the most specific.
 - Attributes and Values: The author benefits from the introduction of the customizable data- prefix attribute.

(Elizabeth Castro).

Cascading Style Sheets (CSS)

- Base Rules: A base rule is an element and not a class nor ID selector. The author does not use CSS Resets. The author issues element selectors for the html, body, table and row.
- Layout Rules: There are no layout rules, such as header nor footer.
- Module Rules: The table of content (TOC) is for page navigation that the author offers using class names.
- State Rules: A state rule is for toggling, such as using Javascript to set the visibility.

(Jonathan Snook).

Web Services

There is standardization on the first .NET web services architecture, .ASMX.

(FrederikBulthoff, 2019) In most cases, there is a one-to-one mapping between the .HTML, .ASMX, .CS files, and the database relational table, Bible..Scripture. For simplicity and cleavage of use, the .HTML and .ASMX files, support one operation, GetPage.html is for web utterances. GetPage.html will send AJAX requests to multiple ASMX files and operations. GetPage.html is a cumulation of separate .HTML files. All the web services files support the SOAP request format and return JSON. JQuery accepts the POST, HTTP verb. The author stringified the data to pass to the web service in the body of the message. Errors are unforeseen, in the rare case, the author logs errors on the back-end, and display quantitative message. Security is lacking; this is permissible; since the author only queries information.

The web service code, .asmx is not necessary, does not have a place, when there is no server database access ([Numbers 19:2, 2 Chronicles 15:3, John 15:25, Romans 2:12, Romans 3:21, Romans 3:28, Romans 7:8, Romans 7:9, 1 Corinthians 9:21, Hebrews 9:22](#)).

The Web Service Description Language (WSDL) is available, for example, by specifying the URL, [AlphabetSequenceWebService.asmx?wsdl](http://localhost/WordEngineering/WordinUnion/AlphabetSequenceWebService.asmx?wsdl). To generate a proxy code, issue the following command; wsdl.exe /language:c# /namespace:InformationInTransit.ProcessLogic /out:/AlphabetSequenceWebServiceProxy.cs : http://localhost/WordEngineering/WordinUnion/AlphabetSequenceWebService.asmx?wsdl

InformationInTransit.ProcessLogic /out:/AlphabetSequenceWebService.disco : http://e-comfort.epraintech.com/WordEngineering/WordinUnion/AlphabetSequenceWebService.disco, AlphabetSequenceWebService.disco, AlphabetSequenceWebService.wsdl, and results.discomap

A lecture of our beginning, (Hafida N., im, 2016) The business rule is storables and processable in C#, (.cs), source files. The dynamic link library, (.dll), is callable from everywhere. GetPage.html computes AlphabetSequence from a simple logic, which is easily representable everywhere. The AlphabetSequenceIndexExcriptureReference is retrievable from the Bible, using non-complex SQL query. The BibleWord and HisWord reference, requires substantive query. The Bible dictionary returns dataset from the local database.

The author can not make a business decision, to go to a web service, to retrieve what is locally resideable.

Database Size

The usp_DatabaseLogSize stored procedure is for determining the size of the databases data files; and it is available at [T-SQL to find Data Log Size and Other Useful Information -SOI_2000/2005/2008/B2](#).

Database Size

Name	Data Files	Data MB	Log Files	Log MB	Total Size MB
Bible	5	304	1	82	386
BibleDictionary	5	38	1	17	55
WordEngineering	5	138	1	1816	1954

Database Standard

Database Design

1. The relational model is for storing information in tables.
2. The author normalizes data using Object-relational mapping.
3. All the databases are OLTTP (Online Transactional Processing), not OLAP (Online analytical processing).
4. Avoid deadlock occurrences by not permitting user database updates.
5. All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
6. Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

1. The secretive web.config file contains the database access information.
2. The web.config file does not explicitly mention the user login name nor password.
3. Give access rights to roles, not to specific login identities or user names.

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and varchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asea Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23doctoralDissertation.html documentation file which includes css.

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Methodology](#)
- [References](#)
- [Anercides](#)
- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracer or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area.
2. Transmission delay - The time it takes for a packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use CSS@import; since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chatiness? The author currently builds the entire table, and he sets the inheritance of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement.
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [GitHub.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Snapshot](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.ehrarmtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root URL practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and it is a good practice to do so.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/41906110/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweights the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.

The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDate or UntilDate column.

An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.

The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Conclusion
- References
- Appendices
- Background
- Prophecy and Fulfillment
- Autobiography
- Style of Writing

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set comprises 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.

This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToLower();
var asciiA = 65;
for
(
    var index = 0, lengthSize = word.length;
    index <= lengthSize;
    ++index
)
{
    if (Isalpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - asciiA + 1;
    }
}
```

The cost of executing the for loop is $O(\text{word.lengthSize})$

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.

The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.asmx	Query(word)
AlphabetSequence.cs	ID(word)
DataCommand.cs	ScriptureReference(int alphabetSequenceIndex), DatabaseCommand()
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query_string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models, First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookahead scripture references. Such as, when there is no book title, then this default to the earlier book title.

Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.asmx	Query(word)	10
AlphabetSequence.cs	ID(word)	50
	ScriptureReference(int alphabetSequenceIndex)	10
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 300 lines of database interaction. A unit of code should not exceed 15 lines.

All the web services (.asmx) files return JSON on default; the AlphabetSequenceWebService.asmx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators.

In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

1. Codebase: The WordEngineering application is storables in the GitHub.com version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:

1. git status
2. git add
3. git commit
4. git push

2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.

3. Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for there specific use.

4. Backing services: These are external independent resources, such as the database, SMTP.

5. Build, release, run: These are the stages that a code goes through. Code compilation is deferable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.

6. Processes: The author uses a single process for the entire application. This is managed by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables.

7. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.

8. Concurrency: The author isolates his applications from the particulars of the base scaling concurrency choice.

9. Disposability: The author's talk on expendable work includes the following:

- Pure functions
- On-demand compilation of web pages and services
- Adhesive architecture, stateless, and stateful request threads

10. Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.

- The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.

- The personnel gap: Dev/ops expertise

- The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.

11. Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.

12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

- Title
 - Abstract
 - Acknowledgments
 - Theory
 - Results and Discussion
 - Methodology
 - References
 - Appendices
 - Background
 - Prophecy and Fulfillment
 - Autobiography
 - Style of Writing
- When**
God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week (*Genesis 1:2*? Seniority comes first (*John 1:15, John 1:27, John 1:30*).)
- Where**
The author refers to the physical location or scenery of participation.
- Why**
The endeavor of the author is to share the word.
- Artificial Intelligence**
- Deep Learning**
Utterances are storables in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.
- Machine Learning**
Our entirely chiefly pertains to Him.
- MultiLayer Perceptron (MLP)**
DataDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DataDifference.aspx is a server-side C# ASP.NET web form.
The Remember table computed columns are Transact-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.
- Feature**
He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.
- Factors of Variation**
These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.
- Depth of the Computational Graph**
The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.
- Depth of the Probabilistic Modeling Graph**
This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.
- Probability**
Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900^8 = 900 \times 256 = 1.932334983228891510545406872202e+756$.
- Degree of Belief**
In *GetBible.html* the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the HisWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.
- Frequentist Probability**
In *GetPage.html* the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done (*John 19:30*). Specifications...is done.
- Bayesian Probability**
Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?
- Random variable**
The AlphabetSequenceIndex may range between 1 and (8000 * 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.
- Probability Mass Functions**
Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.
(Ian Goodfellow, 2016)
- Statistics Terms**
- Key Terms for Data Types**
- Continuous**
The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.
- Discrete**
The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.
- Categorical**
The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.
- Binary**
The Testament column is either Old or New.
- Ordinal**
The identity columns are all ordinal, following an ascending order.
- Key Terms for Rectangular Data**
- Data frame**
The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), extensible mark-up language (XML), JavaScript Object Notation (JSON) file format.
- Feature**
The most important predictor columns are the Word, Dated, and ContactID.
- Outcome**
The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.
- Records**
A row in a spreadsheet is comparable to a database table record.
(Bruce et al. 2017)
- Software Engineering**
- Programmer's Workbench (PWB)**
This technology will make all the before and current versions of the code accessible, re-viewable, and testable.
All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future events are useful for remembrance entries. As the author technically matures, he automates manual work.
The dreams are re-collect-able, and recallable (*Numbers 12:6-8*).
- I have made what I have spoken, ready
- Web Design Fundamental**
- Business Model**
The Bible fits man's perception. The author adapts to what he learns.
- Project Management**
The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.
- Information Architecture**
How will this scriptural text bring new originality? What events of today, follow the text?
- Page Design**
What He brings to us, is a form of Him.
- Content Authoring**
How query means more (*Isaiah 43:22*)
- Linking Strategy**
This is what I have destined; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right-clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and whois.com.
- (Jakob Nielsen, 2000)
- Web**
We will make advancement over Tim Berners-Lee earlier idea of a unified web:
 1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
 2. Single Page Application (SPA) will circumvent the unit of navigation.
 3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
 4. Clients such as browsers store information on cookies, local and session storage.
(Jakob Nielsen, 2000).
- Hypertext**
The author presents this dissertation in a hypertext format. The table of contents is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.
(Department of Computer Science at the University of Cape Town).
- Characteristic**
- Resilient

• Title

• Results and Discussion
• Methodology
• References
• Appendices
• Background
• Prophecy and Fulfillment
• Autobiography
• Style of Writing

Declarative

SQL, Ling, CSS are declarative languages, but JavaScript is a functional language.

Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.

The C# class container model and the optional namespace alias content the author.

Cascading Style Sheets (CSS) is modular, and its rules trickle down.

Continuous

Placing the App_Config file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.

A single batch file, with a single command line, builds the only .dll, InformationInTransit.dll
 csc /out:InformationInTransit.dll /target:library /recurse:*.cs /
 reference:System.DirectoryServices.AccountManagement.dll,"bin\Debug\HtmlAgilityPack.dll","bin\Debug\MongoDB.Bson.dll","bin\Debug\MongoDB.Driver.dll","bin\Debug\Newtonsoft.Json.dll",
 "[Windows]\Microsoft.NET\Framework\v4.0.30319\WPFLib\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.ConnectionInfo.dll","C:\Program Files (x86)\Microsoft
 SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Dmf.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Sdk.Sfc.dll","Microsoft.VisualStudioBasic.dll" /nowarn:162,168,219,618,649 /unsafe

After testing, InformationInTransit.dll is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the xcopy command for serving future requests.

WhatsApp content of a server-side file with .aspx or .asmx extension changes, the ASP.NET framework automatically re-compiles for serving future requests.
 [Quote by John Resig] for making Ajax calls to the server. The recent fetch command is also useful in later cases. [jQuery helps to load the latest copy of the author's JavaScript repository 2432.js; since browser caching occurs for JavaScript files for a length of time.

The single .css file 943.css is callable at the bottom of each .html file's head node; JavaScript statements are in the last lines of the .html files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will reference a HTML node before the declaration of its definition.

Set a Database to Single-User Mode

```
ALTER DATABASE WordEngineering
SET SINGLE_USER
WITH ROLLBACK IMMEDIATE;
GO
ALTER DATABASE WordEngineering
SET READ_ONLY;
GO
ALTER DATABASE WordEngineering
SET MULTI_USER;
```

If the research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases.

The author will place non-Microsoft DLLs in the virtual directory bin sub-directory, and the author will refer to Microsoft DLLs in the web.config file.

The web.config is generally consistent across deployment, the only variable is the database server name, and when the application and database server exists on the same machine, the connectionStrings may use Data Source=(local);Initial Catalog=master;Integrated Security=SSPI. This means that the author will explicitly specify the database, object owner, and system object name. The Application pool will take care of the security. There are no environment variables, in use, at this time. The HTML files, when calling web services, will specify the full virtual directory path, but when appending css and JavaScript files, relative directories will suffice, full path directory and filename is unnecessary and an overkill.

The author standardized on Microsoft SQL Server as relational database of choice. There are several alternatives in the market. All database interaction goes through one access point, DataCommand.cs, only this single file needs re-work if there is a database variety change.

Writing the first version of code, for the first time, it will initialize the static variables. The ScriptReference.html will issue a unique quote-of-the-day, every day; and a random quote, every time. The author program uses the release version of jQuery, which is most up-to-date. The web services, such as, Safaria.org, should not need code-revisit. The code in the third-party libraries, such as, Newtonsoft.Json.dll, is consistent, and should rarely need re-deployment.

The application is mostly stateless except for the database read.

Internet Information Service (IIS) HyperText Transfer Protocol (HTTP) by default runs on port 80, like other web servers, but this is modifiable.

Using the current architecture, the author takes care of concurrency and deadlocks; because database writes rarely occur and are short, reads are tolerant.

The threads are simple and conclusive; therefore, there are small start-up and short-down periods.

There is unity between the development and production team, environment, and time frame. The same knowledge worker can write, deploy, and run code.

The author has experience, reporting web server logs, using WebTrends. The author relies on Event Viewer for logging and monitoring exceptions. The SQL Server Management Studio offers the Error Log, for viewing the database activities.

The SQL Server Maintenance Plan is for scheduling full database and transaction log backup, periodically.

To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal *, for all columns. Rarely does the author join tables, minimizing the work and resultant, in a set-level language.

(B2B Developer's Guide).

HTML5**Semantic Elements**

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept.

Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

Communication of God

- Audio: God first communicated with me by His Word.
- mit-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

Biblically

What did the Jews used numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babel: One language and one speech ([Genesis 11:1](#); [Genesis 11:9](#))
- Witness: Two or three ([Deuteronomy 17:6](#), [Deuteronomy 19:15](#), [Matthew 18:16](#), [2 Corinthians 13:1](#), [1 Timothy 5:19](#), [Hebrews 10:28](#), [Revelation 11:3](#))
- No man could number ([Revelation 7:9](#), [Matthew 10:30](#), [Luke 12:7](#))

How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus ([Genesis 5:2](#), [Genesis 16:11](#), [Genesis 17:19](#), [Luke 1:13](#), [Isaiah 7:14](#), [Matthew 1:23](#))
- God name changes such as, Abram to Abraham, Sarai to Sarah, Jacob to Israel ([Genesis 17:5](#), [Genesis 17:15](#), [Genesis 32:28](#), [Genesis 35:10](#))
- Family naming, such as, Eve, Cain, Seth ([Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25](#))

The word is the author's file naming convention.

What did He decide to join in?

Word	Scripture Reference
Levitical Priesthood	Luke 1:1
Davidic Covenant	Luke 1:32
But thou, Bethlehem Ephrathah, though thou be little among the thousands of Judah, yet out of thee shall he come forth unto me that is to be ruler in Israel; whose going forth have been from of old, from everlasting.	Micah 5:2

What will relate as I grow? 841 occurrences of king David in the Old Testament.

Word	Commentary	Scripture Reference
Genealogy	Abraham, David, Jesus Christ	Matthew 1:17
Reign for a generation	Moses, Saul, David, Solomon	Deuteronomy 29:5, Judges 3:11, Judges 8:28, 1 Samuel 4:18, 2 Samuel 5:4, 1 Kings 2:11, 1 Kings 11:42, 2 Kings 12:1, 1 Chronicles 29:27, 2 Chronicles 9:30, 2 Chronicles 24:1
Biography	David, Jesus Christ	1 Chronicles 29:29, Ruth 4:17, Ruth 4:22, Psalms 40:7, Hebrews 10:7, Matthew 5:18, Psalms, 1 Samuel, 2 Samuel, 1 Chronicles, 2 Chronicles
Davidic covenant		Psalms 89:3, Isaiah 55:3, Jeremiah 33:24

What regularity of changes?

Event	Frequency	Scripture Reference
Creation	Daily, Sabbathical rest	Genesis 1, Genesis 2:1-3
Times of the Jews versus (VS) times of the Gentiles	490 years	Luke 21:24, Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5
First resurrection	1000 years	Revelation 20:5-6

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

Procedure, function or method call	Commentary																				
Pascal language	A procedure does not return a value, whereas a function does.																				
C# language	<table border="1"> <thead> <tr> <th>Method call</th> <th>Commentary</th> </tr> </thead> <tbody> <tr> <td>Instance method call</td><td>Calling a method of a class instance</td></tr> <tr> <td>Static method call</td><td>Calling a static method of a class</td></tr> <tr> <td>Extension method call</td><td>Calling an instance method that was added to a class</td></tr> <tr> <td>Asynchronous method call</td><td>Calling a method and not waiting for the completion of the task</td></tr> <tr> <td>Base method call</td><td>Calling an inherited method which may have an override clause</td></tr> <tr> <td>Method overloading</td><td>Calling a method that exhibits the signature</td></tr> <tr> <td>Operator overloading</td><td>Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.</td></tr> <tr> <td>Constructor method</td><td>To create and initialize a class instance.</td></tr> <tr> <td>Constructor static method</td><td>To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.</td></tr> </tbody> </table>	Method call	Commentary	Instance method call	Calling a method of a class instance	Static method call	Calling a static method of a class	Extension method call	Calling an instance method that was added to a class	Asynchronous method call	Calling a method and not waiting for the completion of the task	Base method call	Calling an inherited method which may have an override clause	Method overloading	Calling a method that exhibits the signature	Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.	Constructor method	To create and initialize a class instance.	Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.
Method call	Commentary																				
Instance method call	Calling a method of a class instance																				
Static method call	Calling a static method of a class																				
Extension method call	Calling an instance method that was added to a class																				
Asynchronous method call	Calling a method and not waiting for the completion of the task																				
Base method call	Calling an inherited method which may have an override clause																				
Method overloading	Calling a method that exhibits the signature																				
Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.																				
Constructor method	To create and initialize a class instance.																				
Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.																				

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization? <ul style="list-style-type: none"> The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associative with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URL, location and scenery columns.

Humans are familiar with the recording of information into tables. The DateComputation.html is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.

<ul style="list-style-type: none"> • Title • Abstract • Acknowledgments • Theory • Results and Discussion • Methodology • References • Appendices • Background • Prophecy and Fulfillment • Autobiography • Style of Writing
<p>1. Where?</p> <ul style="list-style-type: none"> - Location (Matthew 4:19, Mark 1:17) - Place of origin (Matthew 2:1-11, John 1:57, John 18:5, John 18:7, Micah 5:2, Isaiah 9:1-2) - Resting place (Genesis 23, Genesis 48:21-22, Genesis 49:29-33, Genesis 50, John 14:1) - Inheritance (Ezekiel 44:28, Isaiah 53:10) - City of Refuge (Joshua 20:7-8, Numbers 35:1-5) <p>• The author started his tertiary education at Central Piedmont Community College (CPCC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?</p> <p>• Re-use?</p> <ul style="list-style-type: none"> 1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results. 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database. 3. Using the JavaScript fetch keyword, the author places webservice requests. <p>All the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps.</p> <ul style="list-style-type: none"> 1. 2025-10-09T20:35:00 places enormous responsibility on the author. 2. 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... it is okay. 3. 2025-10-09T20:46:00 How do they... pursue the level... you have attained? 4. 2025-10-09T20:52:00 <ul style="list-style-type: none"> • When the author attended University of North Carolina, Charlotte (UNCC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering. • 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible... reverse itself (Numbers 11:16, Acts 6)?

2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.

- 2025-10-09T02:01:00 [This is where I want to be... if I am with you.](#)
- 2025-10-09T02:10:00 [Do you place a life... apart from you?](#)

urlPerformance

1. [webpage-test.org](#) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself.

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions.

Microsoft SQL Server Limitations include:

- [Microsoft SQL Server database connection string ApplicationIntent=ReadOnly](#).
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero [Zero five eight four one](#), versus (VS) [5841](#)

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.

2. The SQL Server Management Studio table design menu option provides the most flexibility.

3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [URIMaintenancePage.aspx.cs](#) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 Can I be impartial as others?

◦ 2025-07-08:04 [EcOn](#) is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines.

◦ 2025-07-17:00 [The JavaScript Code Quality and Coverage Tool](#)

◦ 2018-01-05 [WCF Markup Validation Service](#)

2. Information Hiding: 2025-07-17T20:46:00 Addressing: 2025-07-18T19:33:00

◦ 1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.

◦ 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... While the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.

◦ 2025-07-18T19:51:00 0555 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The Infrastructure was a client/server web-based system. 2025-07-18T20:08:00 What does it bring to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a letter that speaks? 2025-07-18T20:12:00 Kafka is a writing tool... where is the speaker?

◦ 3. During his Doctorate's degree programme at the University of Wolongong, the author learned to program smart cards by using the C programming language.

◦ 2025-07-18T20:50:00 The choice of the AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.

◦ 5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.

◦ 1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.

◦ 2. Application: A dynamic link library [InformationInTransit.dll](#) queries the database.

◦ 3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

[GetAPage.html](#) offers the user the opportunity to enter the word, 2025-07-13T18:42:00 and retrieve the compared God's word.

2025-07-13T18:53:00 How to install and use the code

[GetAPage.html](#) is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

2025-07-31T13:25:00 What does the link provide?

1. 2025-07-17T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.

2. 2025-07-17T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.

3. 2025-07-17T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) Availability? Static versus (VS) dynamic?

4. 2025-07-17T15:46:00 The frame tag embeds one HTML document within another.

5. 2025-07-17T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?

6. 2025-07-17T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class, attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?

7. 2025-07-17T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

[Software Engineering: A Modern Approach](#) by Marco Tulio Valente. Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

- 1. - The user enters the word to interpret
- 2. - The system determines by using regular expressions the data type of the word
- 3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
- 4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing

3b- If the word is a negative integer, the system should inform the user to enter a valid word

3c- 2025-06-28T22:10:00 If non-English alphabets flag?

4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

- 1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
- 2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
- 3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
- 4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
- 5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible

2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 [he relies on his pursuance of the truth](#)

2025-06-27T20:10:00 Minimum Viable Product (MVP) and A/B Testing (or split testing)

Interest of the users

ASP.Net Web Forms - control version		HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version	
		Minimum Viable Product (MVP) build-measure-learn	
Step	Task		
Prototype	1 Build: The author conceived of a product idea to interpret his dream by building AlphabetSequence.		
	2 Measure: Public testing to collect data on its usage.		
	3 Learn: Validated learning by analyzing the collected data.		
Proprietary	Open source, 2025-06-27T20:55:00 and availability of learning materials		

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming... Computed Columns

1. 2025-05-17T20:16:00 Pure function, referentially transparent:
 In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:10:00 The author only considered the King James Version (KJV). Singularity of the Consensus.

2. 2025-05-22T18:00 Immutability:
 1. 2025-05-22T18:16:00 Object-oriented technology serves change states.
 2. 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 3. 2025-05-22T18:17:00 No is of the need for database storage.
 4. 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.

3. 2025-05-22T18:31:00 Practical need for recursion?

4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINQ,
```

(Ben Wedig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction
 Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URL and HaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The lang attribute is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
- 1. In 2002, when I started recording the word of God, I modeled the WordEngineering_database, HisWord table.
- 2. In 2007, when I was looking for work, I modeled the IHaveDecidedToWorkOnAGradualImprovingSystem_database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writer assistant may suggest word changes:

 1. Spelling corrections.
 2. Verb grammar tense.
 3. Synonym versus (vs) opposite.
 4. Singular versus (vs) plural.
 5. Deprecated.
 6. Currency.
 7. Locale, regional, custom, preference.
 8. Registered.
 9. Religion.
 10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 11. Personal extension. Longevity. Insertion. Customization. Adaptation.
 - When did he part ways... and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

```

Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webservice: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example:

```
SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
(
    COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word NOT LIKE '%[0-9]%'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
(
    COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word LIKE '[0-9]%'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
(
    COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word IS NULL
UNION
SELECT 'total' AS InfoType, COUNT(*) CountInfo,
(
    COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord
```

- data-ssn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language (Acts 22:2)
- 1. Accessible from a webpage, the author hand-coded translations from the Bible by using a New Testament phrase.
- 2. In the WordEngineering database, TheComingAdventOfTime table, contains learned spoken language translations.
- 3. In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
- In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession;
- When?
 1. 2025-03-01T09:13:00 Microsoft Word and past-tense, Mark Bodens of Electronic Data Systems (EDS) and the verb, will, future reference.
 2. 2025-03-01T07:11:00 Online transaction processing (OLTP)... Online analysis processing (OLAO).
 3. How does the computer equip us? 2025-03-01T07:06:00 Improve on paper, the old writing medium?
- There is a datetime attribute which is only visible inside the HTML source. Metadata! 2025-03-01T07:24:00 Microsoft made the assumption... to automate mark-up?

2025-02-19T12:20:00 What I offer of the truth?

1. Command-line interface (CLI)?
2. No .NET Core support
3. 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
4. The author does not make use of Microsoft SQL Server synonym support
5. The author rarely uses Microsoft SQL Server soundex support
6. Only English, there is no multi-lingual support
7. Limited Biblia versions, dictionaries and commentaries
8. Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
9. Microsoft SQL Server will support Regular Expression (RegEx)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, step, type, etc.
- 2024-10-04T10:12:00 As much as possible, initially accept the default values, with, for example, the date columns. You may adjust and be precise, later.
- 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY, INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T02:44:00 This is what I am unable to do with the graphical user interface (GUI)... this is what I am inspired to do. 2024-10-05T02:49:00 Its interface... remains our reliance. 2024-10-05T02:52:00 I am equipped to do the same... as I realize. 2024-10-05T02:54:00 This point... must allude to one. 2024-10-05T02:59:00 Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine pretends to do? 2024-10-05T03:01:00 God has done His part... where is my part?
- 2024-10-05T03:05:00 What do I need the other person... to do?
- 2024-10-05T03:09:00 Need after 2024-10-05T03:10:00 (1 Kings 5:5)? E. F. Codd in 1970, proposed the relational database.

2025-02-23T16:30:00 Company osi data... osi yemi.

- 2025-02-24T00:52:00 In the center-east is a wheel.
 2025-02-24T06:35:00 Ending Jane_Feminine
 2025-02-24T06:55:00 ... 6
- The Jewish day begins at 6pm.
 - Nathaniel was either listed in the Bible as the 6th or 8th son of Jacob.
 - Moses' leadership commenced in his third season.
 - Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00...2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar.

- 2025-02-10T05:41:00 Until the land has its rest. I saw a house in the center-west.
 2025-02-10T06:22:00 In Isaac shall your seed be called. I am on a narrow road in the north-center. This is either King's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing tight white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running, and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

2017-10-18T10:00:00	Olohan ni mo fi be... wa si biyi.	God I beg you with... come here.	Kenneth Chenuaih announces his resignation from American Express (AmEx)			

Work... holiness

The Exhaustive Concordance of the Bible, generally known as Strong's Concordance, is a Bible concordance, an index of every word in the King James Version, constructed under the direction of American theologian James Strong. Bible dictionaries and commentaries. Terminology... characterization. How do you test? Frequency, grammar, composition, ranking? AlphabetSequence builds on Bible verse separation

<http://representative.am/1ofmypeople/> (Philippians 3:5)?

Work	Holiness	Scripture reference
Ken Lewis of Bank of America (BoFA)	Kenneth Chenuaih of American Express (AmEx)	
The fall of man	Cain and Abel	Genesis 3_Genesis 4
Census 20 years and older	Priesthood training commences at the age of 25 years old, and priesthood service at the age of 30 years old.	Numbers 1:3 Numbers 8:24-26

2025-03-28T19:12:00 What we are receiving (2 Samuel 12:24)?

- At University of Ife, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Oloyede started driving us to school.
- In Lagos, BenitoUna graduated from Abati Nursery and Primary School to Ikeja Grammar School, prior to my twin sibling and I are attending Abati Nursery and Primary School.
- I was born in Venezuela, prior to moving to Benito Una, Benito Una Central Secondary School, Benito Una, Venezuela.
- I was deported to Nigeria, shortly after the passing away of my adopted mother, and shortly before the separation of Major Laval from Aunt Taiwo.
- BenitoUna and Ademiloluwa, Uncle Denola and Damola. You must be involve... for someone to use you. 2025-03-28T18:30:00 I consider father and son relationships. What we are... is how we are made after. I started tutoring computers to Hajara Adeola, a French lecturer, and wife of Fola Adeola, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritic alphabets.

(Mustafa Suleyman, Michael Bhaskar, 2023-09-05)

2025-09-14T09:24:00 Contemporary

- Creation (Genesis 1:16, Genesis 1:26-Genesis 2:4, Genesis 16-25, Genesis 3:15-16, Hebrews 11:4)
- Born King of the Jews (Matthew 2:2, Luke 1:19, Luke 1:43-44)
- End times (Revelation 5:5, Revelation 21:23, Revelation 22:2, Revelation 22:8-9)

2025-09-14T13:07:00 What exclusively I use? 2025-09-14T17:40:00 Naming versus (VS) Called? Referred

- When: Called – In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)
- Who: Naming – God, man (Genesis 1:1, Genesis 1:26, Genesis 5:2)

A continuous... following

- Bible groups is the arrangement: Pentateuch, major and minor prophets, Gospel, Pauline Epistles, General Epistles...
- Doctrine of Imminency? Imminent
- Apocalyptic

2025-01-31T08:51:00 What title... we are befriending?

1. My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPCC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowc.e for the Yoruba language.
4. My first document was a simple Microsoft Word document.
5. My first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.
2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Bible author: Who wrote the Bible? The Bible starts with the books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Prophecy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word: synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, vizible.

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.

2024-07-12T21:22:00 Making a protection...making a projection.

What is best believability (Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours (Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13)?

- In the HisWord table, the order of belief is:

1. Scenery
2. Commentary
3. Word
4. System generated: Date/time and identity columns
5. Associative columns: ScriptureReference, ContactID, URI

The author is an authority on the HisWord table.

▪ SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

What true identity lies apart?

- The Messiah
- The king

How my organization is the best?

- 1. Alphabet places, word spelling, and sentence composition
- 2. Arabic numbers systems

What measures forever?

The author is linking words spoken to related verses and dictionaries.

- BibleReference uses whole numbers for representation.
- Who, what, when, where, why?
- Prophecy and fulfillment: Keyword Variation

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
Author's experience	The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.	The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. ConversionTableTemperatureMachineLearning.py	The traditional architecture is client/server.
Software requirement	1. Microsoft SQL Server 2. SQL Server Management Studio 3. Author's HisWord database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include: - Views - User defined functions (UDF) - Stored procedures 4. Application code layer: - .asmx - Business and database access code 5. User-interface (UI) layer: - 1. Browser - 2. HTML, JS, and CSS files	1. Python 2. Machine learning library, for example, Scikit-learn 3. Generate training data ConversionTableTemperatureCommaSeparatedValueCSV.csv 4. Training data which is storables in a .csv file. ConversionTableTemperature.py 5. Predictive data analysis ConversionTableTemperatureMachineLearning.py	<ul style="list-style-type: none"> ▪ How proprietary is the architecture? ▪ What is the portability of the code? ▪ Shift away... from server to client. ▪ The world has moved away from... packaged software to distributed software. ▪ Offer only one functionality,

Word	Bible Versions	Dictionaries	Commentaries
Primary Key	Scripture reference	The Bible word has a place in the author's terminology, usage, retention.	Disparate scripture references which are inconsistent and non-standardized in commentaries. Not aligned with AlphabetSequence. 2024-07-13T17:01:00 Where does he see growth?
Proliferate	Bible publishers, versioning and language translation	Hebrew translation	Commentators

Relational Model

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant, but it is not always unique; therefore, it is not its primary key.

View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Software Engineer versus (VS) Database Administrator

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events.	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment. Internet front-end files (.html, .js, .css).	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

(Itzik Ben-Gan, 2023-07-03).

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Codd's 12 rules

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View.

2024-06-15T21:28:00 What is pertaining to the data?

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 To who... I exchange... my god?

Rule 3: Systematic treatment of null values.

Identity columns cannot be null

▪ Date/Time type columns will default to the system's datetime

▪ The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

- Autobiography
- Style of Writing

2024-06-20T18:39:00 It looks at the data as a whole.

Structured Query Language (SQL) sublanguage

Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fail in the following cases: <ul style="list-style-type: none"> ◦ Primary key or unique index duplication. A primary key column may not be null. ◦ Invalid datatype or extra large data size or out-of-range. ◦ Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 What part of yourself... do I desire as My future?

Rule 9: Logical data independence:

2024-06-22T17:02:00 The opinion of someone else... is beside me.

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Integrative: There is a set of various systems and alone work.
5. Persuasive: The user inputs a system-specific query, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man. (Genesis 2:7, Genesis 6:3.)?

(Matt Chanoff, Merrick Furst, Daniel Sabah, Mark Wegman, Arvind Krishna, 2023-11-07).

A conversion page

Customize the content of an url! This is how the web page implements this technology. This is how-to implement it in your preferred technology.

Keyword	Find what	Replace with	Scripture Reference
Religion	Idolatry	Monothestic	Acts 7:40-43
Learning	Egyptian	Hebrew	Acts 7:22
Location	Egypt	Promised Land	Acts 7:3-7
Vocation	Ruler and a Judge	Ruler and a deliverer	Acts 7:10, Acts 7:27, Acts 7:35

What is remembrance...associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

Keyword	Commentary	
	sp_spuseused @objname = 'HisWord'	
Volume	Rows	115689
	Reserved	28296 KB
	Data	17104 KB
	Index_Size	9648 KB
	Unused	1544 KB
Velocity	The author does manual data entry.	
Variety	At the beginning, the author parsed XML files into textual relational tables.	

(Jack Hyman, March 2024).

Data Types

HisWord table

Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly)

Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth (Acts 7:20)
- Family (Acts 5:13)
- People (Hebrews 3:19)

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.

• The author's familiarization with JavaScript meant client-side work.

• What I am good at doing... is what He is good at making. (Genesis 4:13-57, Genesis 1:1-1:2, Genesis 4:26).

• Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html

1. GetAPage.html serves as a gateway to specialized links.

2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.

• Technical writer: Do you write it as a manual? Do you write it as describing the functionality. (Daniel 9:24)?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice

• BibleWord may not be deductible until ignoring the parts of speech

• Date difference difficulty lengthens between the biblical and the Gregorian calendar

- Style of Writing

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... [Why I do it?](#)

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences... companion?
- Experimenting...as the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. [Scriptures2](#).

Is there a need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?

- Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time

Choosing a closer relationship with God.

- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our following.](#)

- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this regurgitation may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

[Our comparing our trade. \(1 Samuel 25.\) To be conformable of use.](#)

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ([Joshua 1:8](#))

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetPage.html BibleWord section: King James Version (KJV) dependant
 4. GetPage.html HisWord section: Time variant

[For a period of time, we are as we seem are? What needs a success? \(Genesis 4:7, Matthew 14:8, Mark 6:25\)?](#)

(John Calvin Maxwell, 2023).

Chuck Missler of Koinonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2024-11-03 21:33:37.887 Pattern of assembling.	2024-11-03T11:58:00 What we bring...as amount...to what?
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him.	The author is relating the word spoken to him to the Bible.
Chuck Missler was preaching from his understanding of the Bible.	The author is relating to people. Coming from experience with people.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	You were trying to reach the Bible...through your word.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	Interaction with Him...I start writing words received when I sleep. I introduced words when I shower.
Chuck Missler uses the Bible... I used myself?	What I used...Chuck Missler uses the Bible... I used myself?
2025-04-09T15:38:00 What did you set out to achieve as a personal mission? Hal Lindsey suggested to Chuck Missler that he convert a Christian ministry hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Missler from pursuing a doctorate degree in Physics.	2025-04-10T04:17:00 Scene 1: Laurenti is driving me, and I mentioned the first name of Nadia Madjia, but I did not disclose her last name; therefore, I am not gossiping. Laurenti drove further and Laurenti asked if I was talking of Nadia that I now infer to be Nadia Camonezi. Scene 2: A man concedes that he has lived in Fremont, since he moved from further away.
2025-04-10T14:14:00 How the Bible can be... worthy/use?	2025-04-10T04:46:00 Limitation per person. (Ezekiel 3:17-21). AlphabetSequence takes specific places... out of the Bible.
2025-04-10T14:14:00 Jennifer Melow gave 2 breads buns to Danielle Hall to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. Career decision?	2025-04-10T06:47:00 When did he desire... a people as I. (Genesis 2:20-25, Genesis 4:3-17)?
	2022-05-26T14:05:00 What events in Abraham's life are additions? 2025-03-29T16:15:00 I am reminded of the presence of others. (Ezekiel 33:17).

Word	Commentary	Scripture Reference
Partner	Sarah, Hagar, Keturah	Genesis 11:28
Pilgrimage	Canaan	Genesis 12:1-5
Guidian	Lot	Genesis 12:6-5
Possessional Blessing		Genesis 14:19

Seed	Ishmael and Isaac	Genesis 16:11
Name change	From Abram to Abraham	Genesis 17:5
Making mention at ages	75 years old when he departed out of the land of Haran, had lived in Canaan for 10 years, 86 years old when Hagar bare Ishmael to Abram, 99 years old God's request to walk before Him and be perfect, 100 years old gave birth to Isaac, 175 years lived	Genesis 12:4, Genesis 16:3, Genesis 16:16, Genesis 17:1, Genesis 21:5, Genesis 25:7
To do without someone	Separation from his wives and sons, from the physical to the spiritual	Genesis 15:13, Genesis 21:12, Genesis 22:2, Genesis 23, Genesis 25:6, Acts 7:5-6, Hebrews 11:17-19
Sarah - the first matriach	What seems natural as bringing?	Genesis 18:12, 1 Peter 3:6

Date	Type	Word	Commentary
2004-07-11	Money currency	English pound 45 percent	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%
2008-03-11	Calendar	September 22	

Considering processing and storing

[How can I pass knowledge...as sharing. \(Genesis 2:7, 2 Peter 1:21\)](#)

- Computers consist of microprocessors and memory. A memory is either:

- 1. Read only memory (ROM)
- 2. Random access memory (RAM)
- 3. Hard disk

- Object storage combines code with data.

- 1. Code - method
- 2. Data - field or property

- A relational database offers the opportunity... to program and store data.

- The ID attribute in HTML files for url hashtag is case-sensitive, and it serves for spot reference, and while it is a fragment address, it is the entire unit. A relational database may support the like and between keywords for the partial and range restrictions respectively. [Ko le se range checking](#). It cannot do range checking. There are no abnormality...in certainly.

[What mentions the name?](#)

- Variable and relative? Time, number ([Genesis 1:1, Genesis 1:16, Genesis 2:2-3, Genesis 2:16-17](#)).

- Constant? Name ([Genesis 2:19-23, Exodus 3:14](#)).

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's datetime attribute and the time node give datetime information.

AlphabetSequence concerns include:

1. How essential are we... to the personification of God?
2. The spirit man holds
3. How do we... see... His view as ours. ([Genesis 18:19](#)?)
4. How are we acceptable... to whom is new? How does God, build up, to His word ([1 Samuel 9:15-17](#)?)
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining

• Title
• Abstract
• Acknowledgments
• Theory
• Results and Discussion
• Methodology
• References
• Appendices
• Background
• Prophecy and Fulfillment
• Autobiography
• Style of Writing
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible Verses (Matthew 23:14, Acts 8:37, Acts 15:34, 3 John 1:15)
14. Naming of words (Genesis 32:28, Genesis 35:10, Genesis 47:22)
15. We have been created in the image of God
16. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 is too short, light, I said, 6.9, in my sleep, while dreaming, I heard (six ten), 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does He volunteer as time? AlphabetSequence is resource minimal:
1. Doable by hand
2. Compute: Not technologically demanding
3. Maturity: Since 2002
18. Migration into SQL
19. Is there a transient database, and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... and not swayed... by the grammatical correctness.

To co-operate as we are. Robert Estienne English Alphabet

2017-03-06T00:00:00 A Comparison of Age

Divided as separated. Go this way, that way.

I want to program, but I don't want to match two programs together, except for deep thought.

See when God grants increase, such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt (Genesis 37:5-11, Genesis 30:24, Genesis 40:41).

TCP/IP is separable into four layers; these are the link, Internet, transport and application layers. No breaking (Matthew 19:8).

Marriage

Marriage is not a practice, in the life after resurrection (Matthew 22:20, Mark 12:25, Luke 20:35, Revelation 21:2, 2 Corinthians 11:2). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. It is more of a father that wants you. Jesus resurrected, after three days (Matthew 24:40, Matthew 26:61, Matthew 27:40, Matthew 27:63, Mark 8:31, Mark 14:58, Mark 15:29, Luke 2:46, John 2:19, John 2:20, 2 Corinthians 11:2, Revelation 21:9, Revelation 22:12).

The breaking of device (Psalm 34:20, John 19:36).

The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logic. Both ASPX and ASMX are server-side logic.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript.

The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?

The client started as HTML, but now has JavaScript and CSS.

CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.

JSON and XML have made in-roads.

To each resemblance

1. Where His word...expected mind? When I get a word from God I could do the following?

1. Write the word in my notes, and never refer to it again.

2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.

3. Produce an artifact based on the word.

What do I desire...as part of significance?

1. Moses? Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).

2. Abraham? Seed (Genesis 17:5, Genesis 15:2, Genesis 22:2, Genesis 22:12-18, Hebrews 11:17-19).

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?

2. Who designs key? Master-child? Hierarchical?

3. Duplication

4. Maintainability

5. Expertise and familiarity? Isolated.

6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?

7. When is capacity...full enough?

1. Databases may reside inside multiple files.

2. Although databases may store different file types. This wasn't the original intention.

3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).

2. Quality Assurance (QA): Some changes break existing code.

3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.

4. Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00

What substitution...we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:22, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

What did He find...as useful?

What did He find...as useful (Matthew 21:42, Mark 12:10, Luke 20:17)?

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: <ul style="list-style-type: none"> Client/Server autonomy. Client embedded-SQL. 1. The datetime column defaults. 2. The identity column is auto-generable. 3. Computed column: What can the computer do for us?
Microsoft sqlcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Word	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenadenji, kenadenji.wordpress.com
Refer to dates	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was It eyan mi lon lo yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13
Birth place	Matthew 2:6
Matriach's origin	Genesis 25:20, Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting ascending or descending order, Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare applications rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generated (HisWordID, Dated) or nullable ([1 Samuel 3:19](#))

For	Against
Prudent	Disposable
Hyperlink	Diversion
Quality Assurance (QA)	Prone to error

Location	Scenery
Transaction commit rollback	Data cleansing

Typing Assistant

What are we replacing person with Jeirmiah

1:15-16 This is a long trend of disruption... word resonances with AlphabetSequence (Index, Scripture Reference, page, article). A record is insertable only once. There may be multiple updates.

For	Against
Man	Maching

Numbers in themes

- He expressed good as how He felt. ([Genesis 1:4](#), [Genesis 1:10](#), [Genesis 1:12](#), [Genesis 1:18](#), [Genesis 1:21](#), [Genesis 1:25](#), [Genesis 1:31](#), [Genesis 2:8](#), [Genesis 2:12](#), [Genesis 2:17-18](#), [Genesis 3:5-6](#), [Genesis 3:22](#)).
- He expressed start and end of time. ([Genesis 1:1](#), [Genesis 1:5](#), [Genesis 1:13](#), [Genesis 1:19](#), [Genesis 1:23](#), [Genesis 1:31](#), [Genesis 2:1-4](#)).
- King of the Jews. ([Matthew 2:2](#), [Matthew 27:11](#), [Matthew 27:27](#), [Matthew 27:37](#), [Mark 15:2](#), [Mark 15:9](#), [Mark 15:12](#), [Mark 15:18](#), [Mark 23:3](#), [Luke 23:37](#), [John 18:33](#), [John 18:39](#), [John 19:3](#), [John 19:19](#), [John 19:21](#)).

To be actual things

- Pronunciation ([Luke 1:13](#), [Luke 1:60](#))
- Application ([Luke 1](#))
- Spelling ([Luke 1:63](#))
- Reference ([Matthew 11:14](#))

In telling the future, there are two parts: prophecy and fulfillment ([Revelation 19:10](#)). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

What prize at the target?		
Prize	Target	Scripture Reference
Kowe.exe	Diversified language	Genesis 11:9 , Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/IIS/Gradual/	I have decided to work on a gradual improving system.	Palms 133

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains databatables and ASP.NET uses GridViews.

This is visible in:

.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs

```
logparser.exe "SELECT sc_status, sc_substatus, COUNT(*) FROM *.log GROUP BY sc_status, sc_substatus ORDER BY sc_status" -i:w3c
sc-status sc-substatus COUNT(ALL *)
200      0          185115
304      0          9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.

HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -i:w3c

Task completed with parse errors.

Parse errors:

1356596 parse errors occurred during processing (To see details about the parse error(s), execute the command again with a non-zero value for the "-e" argument)

Statistics:

Elements processed: 266572

Elements output: 20

Execution time: 84.46 seconds (00:01:24.46)

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.

2. A project cost is its work hours. A work day is ≈176 work hours. A work year is ≈2000 work hours.

3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.

4. To predict productivity? Re-use.

5. Metrics:

- Executable Size Metric: Is the code largeness. It does not fully consider the uninitializable array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
- Machine Instructions Metric: This is the size or count of the machine instructions.
- Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
- Statement Count Metric: It excludes comments, blank lines, and spaces as a statement that spreads across multiple lines.
- Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
- McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(DeLean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word, research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (V)S buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(DeLean Tolbert Smith).

To know my part as His?

- ContactMaintenance.aspx is a replica copy of a Microsoft wizard master-detail example.
- I am able to work with a visual interface system is a reverse-engineering clean room implementation of Microsoft hotmail.com.
- What are you able to do now that you weren't able to do before? To recognize the following as 1. (2 Samuel 3:29) ?
- Who it comes to? (Hebrews 11:24:1 ?)
- What is the following? List of C-family programming languages
- The mechanism of selecting people?
- What notion of the same do I have?
- What I keep member of (John 17:12) ?
- What did He find as suitable for him? (Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27) ?
- What did He find re-occurring as? Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 Sets the input value of the various element IDs, and submits the query.
- Optimize your rendering patterns:
1. Minify CSS files. 2025-07-11T18:17:00 AM minify external audios.
Using efficient CSS selectors: The simple 2025-07-11T18:37:00 table inner elements sub-ordinates.
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
1. The author does not use inline JavaScript.
2. The author minimally uses internal JavaScript for page-specific event handlers.
3. The author always uses an external JavaScript file, 9432.js, for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 What contribution I have... as someone else. (Mark 7:) 2025-07-12T16:44:00 What did He do? How did I do? Luke 1:41, Luke 1:44, Matthew 3, John 3:) ?

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. Ahmad's Law comes into recognition in GetAPage.htm, by performing multiple tasks with Web Services and measuring with performance.now().

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ephraimtech.com/WordEngineering/WordUnion/BecauseWeAreHellThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreHellThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.
Network			
Unit	Value	Commentary	
Internet speed Testing download..	8.54 Megabits per second		
Internet speed Testing upload..	4.74 Megabits per second

Progress																	
After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the relevant information, and they do not have to re-generate the entire database. The author was living in Newark, and working from Fremont.																	
The author recorded, the FrontUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.																	
Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore non standard derivation.																	
The history, this way, is to say: at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partiality, is our governance.																	
The Basic of Facilitating the Truth																	
Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.																	
How do we give actuality? I have the written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.																	
Even though our memory is finite, we find that our truths are easily residing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.																	
Our work, so much depends on data entry. The Remember table relies on relationship deductive reasoning.																	
Can we look back at history, as we precede our future																	
An angel said to prophet Daniel, many shall run to and fro (Daniel[202:4])																	
Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mention of king David, talk of movement (Revelation 3:7, Revelation 5:5, Revelation 22:16). Joseph (Genesis 37:2, Genesis 37:9, Genesis 37:19, Genesis 39:12-18).																	
Why we Accumulate the Same (Matthew 26:53, Revelation 9:16, Revelation 7:4-8)																	
Samuel anointed David, during king Saul's reign. The choice, one makes, ahead (Genesis 2:2-3, 2 Samuel 11:4, 2 Samuel 12:24, Ruth 3:1, Ruth 3:8, Ruth 3:18). Knew versus lay.																	
Wanting a Member of...																	
In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.																	
In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.																	
When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.																	
What relates a place...as one another? Observance of a particular use?																	
<table border="1"> <thead> <tr> <th>Place</th><th>Actor</th><th>Scripture Reference</th></tr> </thead> <tbody> <tr> <td>Garden of Eden</td><td>Adam</td><td>Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24</td></tr> <tr> <td>Field</td><td>Cain and Abel</td><td>Genesis 4:8-4:15</td></tr> <tr> <td>Land of Nod, on the East of Eden</td><td>Cain</td><td>Genesis 4:16</td></tr> <tr> <td>Enoch</td><td>Cain and Enoch</td><td>Genesis 4:17</td></tr> </tbody> </table>			Place	Actor	Scripture Reference	Garden of Eden	Adam	Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24	Field	Cain and Abel	Genesis 4:8-4:15	Land of Nod, on the East of Eden	Cain	Genesis 4:16	Enoch	Cain and Enoch	Genesis 4:17

Light	Sun, Moon: Evening and day, Sabbath																
Man	Image of God, helper, seed																
What did He see as His? A remodeling of the last? (Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14)?																	
The author will want a conciliation with time?																	
AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?																	
That is what we are trying to say, how can we make ample use of time? Word of God, Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God (Genesis 3:8)?																	
Description																	
Cross references to related applications																	
The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.																	
Computer Listing																	
The software is available at http://github.com/KenAdenijj . These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.																	
Technical Field																	
Seeing the Bible as enlightening to man.																	
Description of Related Art																	
To find if a relationship exists between the Bible and what we receive today?																	
Lessons Learned																	
<ul style="list-style-type: none"> • Esteem word: Leading up-to 2008-03-07, I was not fully recording the word of the LORD (Job 23:12). • I used to ask God a word? To realize where my opinion lies? • Familiarization with data? • You would store your work in a database. You worked on a text in atom files. 202-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work or intelligence from your work (Joshua 22:11)? One of Myself offering as many as I use? • Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him. Putting Him into words. • My time away from the family, United States of America (USA), may have helped me gain independence. • In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life...except ours? • Do I decide the truth? Do I choose the truth? • The importance of the Word is how it is made. • People, God, connoted, I do not talk, the plight of the people to heart. MacAuthor BART Station, Bay Street Emeryville BN.com Fire Alarm Panel 8, FDC Building A 5604-5634. To mean...I decide the story? • How did the handle...Messiah? (Luke 1:38)? Crossing the divide? To need someone as I? (Genesis 15:2)? You know Me as capable of you? (1 Samuel 17:36, Romans 4:19)? • The Youbua sentence, Ma fojobon di...I will use wisdom to block it. • No difference in companion. • How useful you have been in determining wisely? How diversification changes? (Genesis 4:17) • The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation. • Difficulty level! Our work is divisible into writing the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The context of the word, sentence, story, is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. As a result, I do never forget on the LORD. Whose obscurity Has he solved? • What can we be...in the midst of a people...pertaining to God? (Matthew 13:12)? • What do you know how-to use...as you desire yours? • Rich of God, Reach of God. • How many are others? (Daniel 1:14)? • I have to present God...As I am allowed to be. • How I want it to be; How He wants it to be? When does the word around the answer? (Acts 10:11) • People, God, connoted, I do not talk, the plight of the people to heart. My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I could possibly store all infomation, or look for a cloud provider? Build or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work (1 Samuel 25:27)? Needs to be met? • The author will record the publishing and receipt. • An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author. • I didn't shift...until the movement? (Acts 1:8). • Did He ask you to do it? (John 8:41). • By Him, about Him, in Him, for Him. My twin sibling calls my work, data entry. • Doubtless, L When I read the Bible, I adapt to the role I take. • Relative to the world? (Ephesians 3:3). • If the words do not join? Consider separating or putting the lesser word in the commentary column. • Do I determine I know? • Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling. • If the word and scenery do not fit exactly, it may be a larger scenario. • When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own? • What I have learnt from the Gates, through using the software from Microsoft. <ul style="list-style-type: none"> - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data. The BibleWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work? - What value can we attain to this work? 																	
2023-01-22T11:37:00 however, time submitted																	
2023-01-22T11:37:00 however, time submitted																	
The author suggests that Baruch of the Holy Spirit (Acts 1:12), is achievable in individual locations as a passage to the 3rd temple in Jerusalem.																	
<table border="1"> <thead> <tr> <th>Keyword</th><th>Scripture Reference</th></tr> </thead> <tbody> <tr> <td>Place of Residence</td><td>Acts 1:4, Acts 1:8</td></tr> <tr> <td>Sign</td><td>Acts 1:3, Acts 1:5</td></tr> </tbody> </table>			Keyword	Scripture Reference	Place of Residence	Acts 1:4, Acts 1:8	Sign	Acts 1:3, Acts 1:5

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

Lifecycle

Period	Commentary
2000-10-05	Registered the WordEngineering trademark.
2002	Commenced recording the word from the LORD in the Microsoft SQL Server relational database, introduced the AlphabetSequence algorithm, and started developing Biblical applications using the Microsoft .NET and the ASP.NET framework, and coded with the C# language.
2015	Migrated to HTML files and web services using AJAX. What is residence at home, is present abroad. This will continue the separation of duty approach. The benefit includes making accessible our work; focused user interface renewal.
Open standard and performance gain.	
2025-07-26T19:17:00	There is a table structure for repeat which would repeat the information in the preceding record. There is also a table structure for parable.

Interconnection

Technology	Commentary								
The bulk of the author's web pages are in 3 separate virtual directories.									
Web pages	<table border="1"> <thead> <tr> <th>Virtual Directory</th> <th>Commentary</th> </tr> </thead> <tbody> <tr> <td>http://e-comfort.ehraimtech.com/InformationInTransit</td> <td>Master-detail gridview URl tables with a vertical view.</td></tr> <tr> <td>http://e-comfort.ehraimtech.com/Gradual</td> <td>Recruiters contact details. Virtual Directory	Commentary								
http://e-comfort.ehraimtech.com/InformationInTransit	Master-detail gridview URl tables with a vertical view.								
http://e-comfort.ehraimtech.com/Gradual	Recruiters contact details. Master page with user components.								
http://e-comfort.ehraimtech.com/WordEngineering	AJAX website. Shared .dll. Stand-alone pages with hyperlinks to related information.								
Technology									
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.								
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.								
Programming Style	This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.								

Development History

God doesn't use inform. ([Psalms 81:5](#), [John 16:30](#)). He mandates.

Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.
Programming Style	This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.

A Causal to Hearing Words

He said and He did. [Word work](#) ([Genesis 11:1-9](#)). The authority to know... and discern... between things. At the beginning of WordEngineering, my practice will include:

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at [Online College](#), in the Fremont and Newark campuses.
- Read books and magazines at [Barnes & Noble](#), [Borders](#), [Walden Pond Books](#), [Wal-Mart](#) and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Sexually live chastely, [Sexual living at the crossroads](#), California, [Parsons](#).
- Fast, everyday, only ate, once a day, in the evening. I ate [Nomura Holdings](#) Kukko rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revelation.
- I was living on a meager income ([Exodus 2:15-25](#)).
- Only familiar with [Case-based Reasoning](#) and [Use-Case](#).
- AlphabetSequence is [abecadary](#).
- Set-based: Effort to record everything [Bible code](#).
- This is a man he wanted to know about his favorite. ([Daniel 1:3-21](#), [Daniel 9:23](#), [Daniel 10:11](#), [Daniel 10:19](#).)
- Personalization of [Bible](#) ([Proverbs 25:2](#).)?
- I will make the difference ([Deuteronomy 26:5](#), [Ezekiel 16:3](#).)?
- What we all ought to be?
- 1997-12-31 I will not entertain Nazis. Prophets make New Year predictions.

In Australia, I got involved with the prison ministry at the Villawood Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contract consulting was at the Department of Training Education Committee (DTEC), so I had an understanding of interpreting and skillfully re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. This influenced my desire to practice another Christian literature and improve my communication. How could I relate to less fortunate people? How may I be the one giving? How can I let the Holy Spirit partake on my side? What are these roles for, and how will I be a mediator? What do I share as a bargain? All these are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable, humans are useful. Where does a side take the rest? What I am finding out, is how necessary I am as a person? How do I do my part in participating? What can you take from me, and make as your own? My words may not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you say. When the times, programming lines, lines of code, play out a scenario. So words make meaning as sufficiency. Whose life have I lived to complexity? To the full of His deed ([John%2015:24](#))? What can His prove relate to me?

Word	Member	Scripture Reference
God	Trinity	Genesis 1:1-2, John 1
Day	Time	Genesis 1, Genesis 2:1-3
Babel	Language	Genesis 11:9

Written about us how many?

Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Sign a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly, a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is usable in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node in the web.config. When the user decides to stabilize and admit no further changes; then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of word, meets today's expectation.

The author, first wrote his history, in multiple stand-alone files. HTML, XML, ([Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a ContactMaintenance.aspx server-side page as a user-interface (UI) to record contact information. This page remains active, till today.

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

I have a product; where is the method?

Adaptability:

1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
2. What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
3. The Biblical accomodates dreams and visions textually, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generalities of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this works as a reference. The widely acceptance of a work, accompanies preference and prevalence.
5. The result of the Bible, is how we use it. The emphasises of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

[How to go about it?](#)

Purposes

The author's original intention was to record God's word. This later led to finding the word's background and implication.

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry.

Guidelines and tools

A relational database is a substitute for text processing.

Stakeholders

I am the primary contributor and beneficiary.

Outputs

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown.

(Alison Cox).

RACI matrix. RACI is an abbreviation for Responsible, Accountable, Consulted, and Informed

Create implementation material	Technical Writer	Project Manager	Business Subject Matter Expert (SME), Technical Personnel	

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BallFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Comparable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practices.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The author has been going at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travkin).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.

A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.

Comments are present in the code, they only serve as guides for readers.

A directed relationship may exist between a collection of source and target.

A namespace is a container separator.

An import facilitates the admittance of an external namespace.

Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.

A constraint represents the range of valid values that a member may have.

A dependency replicates changes between the supplier/client.

Value

If a value is null, a class type may place less sense of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime.

A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators.

An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.

A Boolean is either true or false and it is normally used for validation.

A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHelper.cs](#), [Exact.cs](#). The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScribable](#), [UtilitySQLServerManagementObjectsSMO.cs](#). A child may override a parent's virtual methods.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.

Signals and receptions are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.

Microsoft .NET supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-beside.

For the Java language, there must be a correlation between package and directory names. Microsoft .NET does not impose such consistency. But the author abides by this rule.

In C# version 9, a method may offer a covariant return type.

2025-09-03T21:12:00 What is the immediacy of God's future?

What part of me?

1. When making man, God made some choices?
 1. Form: In His image
 2. Location: Garden of Eden
 3. Vocation: Caretaker
 4. Helper: Eve
 5. Model: First man, mother of all the living.
2. How do we remember His use?
 1. As a software engineer, I replicate my work.
 2. When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
 3. I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
 4. I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
 5. Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike ([Exodus 2:19](#))?

There are duplicates in the Bible.

Type	Commentary
Name	Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2, Samuel 12:24, 2, Samuel 12:25, 1, Samuel 25:5, 1, Samuel 25:25). <ul style="list-style-type: none"> • Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes names • Name changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul • Name misspelling, Rahel for Rachel. A rewording of your view. • Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges • Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	<ul style="list-style-type: none"> • Doctrinology - Remembrance • Monarchy - Kings versus Chronicles • Gospels - Our LORD's, life story • Apocalyptic - Daniel versus Revelation
Quotation	<ul style="list-style-type: none"> • Retelling previous events • Prophecy fulfillment • Answers based on scripture
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12:5

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1); God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many2

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

1. My counterman has yours.
2. The tool a man... has render as Himself. ([John 16:7](#), [Matthew 16:18](#), [John 4:14](#), [John 6:35](#), [Matthew 26:17-19](#)) ?
3. What did they produce. ([Genesis 4:7](#)) ?
4. [Societal View](#). ([Genesis 12:11](#), [Genesis 13:10](#), [Genesis 22:14](#)) ?
1. 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
2. 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 What attribute the word? Autobiography... tieing it into Biblical event.[www.JesusInTheLamb.com](#)

Saint James the Apostle Catholic Church. 34700 Fremont Boulevard. At the intersection of Fremont Boulevard and Ferry Lane. On the 3rd day, he lifted up his eyes. 3rd block from east. 5 poles east. 3 poles west.

1. Who? - Jesus Christ ([John 3:16](#), [Genesis 22:13](#))
2. Where? - The Promised Land ([Joshua 1:2](#), [Joshua 1:3](#))
3. When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations ([Matthew 1:17](#))
4. Where? - Golgotha ([Matthew 27:33](#); [Mark 15:22](#); [John 19:17](#))
5. Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission ([Hebrews 9:22](#))

2025-04-05T09:04:00 Composable Design

2025-04-05T11:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. [How will I dictate His use as a person?](#)
 (Juval Löwy of Design, 2019).

2025-04-24T11:20:00 What did he see... as on their side?

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophetic attempt to understand technology, and its application to Christianity. The only date observed at the beginning was the calculation of the crucifixion of Christ. This is not defamatory, nor inflammatory.
- 2025-04-24T13:45:00 While the author is aware of other sources of information and conjecture, the author is undaunted.

2025-04-07T09:40:00 What he found out...without?

1. Faith ([Hebrews 11:1-2](#), [Hebrews 11:8-19](#))
2. Without the camp ([Hebrews 13:11-13](#))
3. Rest ([Hebrews 4:8](#))
4. Reverence ([Daniel 4:5](#))

2025-02-22T05:31:00 Our continuation of what we have here

2025-02-22T06:19:00 Akekah the binding of Isaac ([Genesis 22:12](#), [Genesis 22:20](#))
[youtube.com/watch?v=ySuTx9VHhXo](https://www.youtube.com/watch?v=ySuTx9VHhXo)
 2018-07-01... 2025-02-22+2428 days (6 biblical years, 8 biblical months, 28 days) (6 years, 7 months, 3 weeks, 2 days)

2025-02-24T13:07:00 With equal remembrance

- Prophecy
- 1. Passover Lamb: Our LORD's Supper
- 2. Beware of the yeast of the Pharisees ([Matthew 16:5-12](#))
- 3. Fig tree ([Matthew 21:19-21](#))
- 4. Cock crow ([Matthew 26:34](#), [Mark 14:72](#))
- Fulfillment
- 1. Temptation of Christ ([Matthew 4:1-11](#), [Luke 4:1-13](#), [Deuteronomy 8:3](#), [Deuteronomy 6:13](#), [Deuteronomy 6:16](#), [Mark 1:13](#))

70th Week of Daniel ([Daniel 9:24-27](#))2025-02-24T16:25:00 Do I bring the future as one of ours, or one of people?

- Who: Seed of the woman versus seed of Satan
- Where: Revived Roman Empire
- 1. When: Interrupted after the completion of the first 69 weeks, which commenced from the commandment to rebuild Jerusalem.
- 2. Time span: 2520 days, punctuated in the midst of the week with the Abomination of Desolation.
- 3. Completion followed by: 1000 years.

2025-02-13T02:58:00 Bible meaning

1. 2025-02-13T07:05:00 God counted the days during creation... God blessed the day of rest, the 7th day.

2025-01-20T02:59:00 What is like? It is late at night, and I am riding a train with a few intermittent stops. The train will make its first early morning stop at Strathfield railway station at 6AM. In the center, there were free donated rectangular paper boxed fruit drinks. There was also a yellow banana wrapped in a transparent container. 2025-01-20T14:39:00 [They keep on insisting... on their brand of Christianity](#). Just before walking northward to the intersection of Paseo Padre Parkway and Blackstone Way.

1. 2025-01-20T07:37:00 12,000 virgins from the tribes of Israel, sum of 144,000 ([Revelation 14:4](#)).

2025-01-15T15:22:00 What our lesson has?

1. 2025-01-15T15:22:00 Data: It is primarily the word of God, in the WordEngineering database, HisWord table, Word column. With supportive information in the other columns on the HisWord table. The information in the other tables, such as, the Remember, APass, ActToGrid tables are extractable and computable from the HisWord table.
2. 2025-01-15T15:22:00 Can a student learn the gospel as you have? The only prerequisite is the Holy Spirit.
3. 2025-01-15T15:22:00 Textual: The word has been written. The author is able to transcribe the words. The accent of the author is not fluent. The author is not articulately refined, nor trained at capturing and transmitting audio or video.
4. 2025-01-15T16:02:00 Customization: How is this word supposed to be used? When the author receives the word, he makes effort to temporarily record the word on paper. At a convenient time, the author records the word on a computer electronically.
5. 2025-01-15T16:07:00 How can my approach serve? 2025-01-15T16:08:00 What is the result of this thing? 2025-01-15T16:08:00 [What extent is the favor only to me?](#) ([Daniel 12:13](#), [Daniel 11:45](#), [Daniel 9:27](#), [Daniel 8:27](#), [Daniel 7:28](#), [Daniel 6:27](#), [Daniel 5:31](#), [Daniel 4:37](#), [Daniel 2:49](#), [Daniel 1:21](#)?)
6. 2025-01-15T19:14:00 At the intersection of 4737 Mallard Common and Decoy Terrace. [What do we need... each other for? As example.](#) ([Daniel 9:24](#), [Genesis 4:7](#), [Genesis 24:26](#)...) 2025-01-15T19:14:00 Milk & Honey Cafe, Pegasus Center, 34265 Fremont Boulevard, Fremont, California (CA) 94535. [What is transparent? What have you included?](#)

2025-02-21T13:28:00 When did he search... a reference as a usage?

1. 70 years in Babylon ([Daniel 9:2](#))
2. Reverence ([Daniel 5:17-31](#))
3. Lot ([Daniel 12:13](#))

2025-02-08T20:06:00 Paseo Padre Parkway just before the overhead bridge south, between Siward Drive and Blackstone Way, walking northward [What are you working with?](#)

1. 2025-02-08T22:32:00 Going along with the prognosis of the LORD, I feel my best utilization at the moment is to re-cap my history. To look at how I technically made decisions, in light of the spirit. With Chuck Misler as a mentor, he led information technology companies, and tutored Bible classes. Not to explain the Bible, but give an understanding of scripture. I found out at PowerSoft that my software engineering skills were not fully developed during my Master's degree programme at the University of Technology, Sydney (UTS). It may be that I did understand the paradigm shift, client/server or specifically, PowerBuilder! Master-slave lacking. I had not led a team software project, nor taught a non-technical female student to transition into software engineering. That was odd.
- The Italian female student at Central Piedmont Community College (CPC), personal computer (PC) laboratory 3 Pascal programs.
- Teaching Hajar Adelita a French lecturer; the wife of Fola Adelita, the co-founder of Guaranty Trust Bank (GTB), how to use a personal computer (PC).
- Helping Jenny Stevens of Powersoft with how to use a client/server tool as a spreadsheet.
- At Electronic Data Systems (EDS)/Westpac the reference table had a composite primary key that consisted of major and minor columns.
- At Daigaku Honkyaku Center (DHC) there were 2 duplicate product tables, and a plan in place to differentiate product items and prices by their colors.

3. Up-to-now, what I have are raw ideas which need refinery expertise. 2025-02-08T23:23:00 [You have used... how do you use?](#)

2025-02-09T20:52:00 Paseo Padre Parkway just before the overhead bridge south, between Siward Drive and Blackstone Way, walking northward. Do you have to partition?

1. Work distribution
2. Database modeling includes normalization
3. At Daigaku Honkyaku Center (DHC) there were 2 duplicate product tables, and a plan in place to differentiate product items and prices by their colors.
4. C# static classes are not instantiable, but they support extension methods which allow a static method to be called from a class name.

2025-01-31T13:07:00 How will I assist him? (Numbers 3:45-37) Initially, your work was original. 2025-01-31T15:41:00 Now... your work is supplementary to Holy Spirit. (1 Corinthians 2:2) 2025-01-31T16:00:00... 2025-01-31T16:19:00 With Richard Tembo a Zimbabwe-born Canadian student minister and Andrina a Greek descent friend of Pentecostal, I did not keep track of the amount of money loaned or repayment. Wm Paul Watson, a New-Zealander, and Kerry Watson, a Greek-descent nurse of New Century Software, I did not keep track of hours worked, hourly pay rate, nor the amount of money loaned nor repayment. Doctor Makani Talayeh and I spoke about the fire, and doctor Makani Talayeh said it was about 4 miles away from his home, place. Makani Talayeh said it was due to global warming and wind, and may occur again in 2-3 years' time. Specify anchor, algorithm? Trademark... patent? 1 Corinthians 3:12-14.)
 2025-01-31T17:09:00 With AlphabetSequence, you were making the Bible... useful. 2025-01-31T17:11:00 What applies... have I used? 2025-01-31T17:11:00 What applies... as the same? 2025-01-31T17:12:00 What exactly... as the author... applied? 2025-01-31T17:13:00 How can... the motorist... stay the same? 2025-01-31T17:14:00 What exactly as passed somebody? 2025-01-31T17:15:00 How we are made as God? 2025-01-31T17:15:00 What opportunity has He given? (Hebrews 1:2)?

(Dmitry Pilugin).

2025-01-11T18:41:00 Database optimization

1. 2025-01-11T17:23:22 queryprocessor.com_2025-01-11T18:41:00 Join Estimation Internals in SQL Server April 24, 2018 by Dmitry Pilugin - It was built with transport model... in question? Extensible Markup Language (XML)... JSON (JavaScript Object Notation). ContactMaintenance.aspx Joins contact information, but it is in a master-detail hierarchy. 2025-01-13T09:46:00 SQL Server 2016: Scalar UDF Estimation and Project Normalization April 25, 2018 by Dmitry Pilugin : When searching by Bible groups... these are scalar functions... 2025-01-13T11:40:00 Do we have to be part of this? (Acts 7:25, Genesis 37:20)?

(Dmitry Pilugin).

2025-01-27T16:58:00 The Power of Networks

2025-01-28T10:45:00 The three Rs of the Internet Age: rating, ranking and recommending

1. 2025-01-28T12:32:00 Rating: 2025-01-28T13:01:00 earthly... heavenly... Luke 1:19, Psalms 8:5, Hebrews 2:2, Hebrews 2:7, Matthew 26:53, Matthew 19:14.)
2. 2025-01-29T13:35:00 Recommending (Philippians 1:9-11)

2025-01-27T16:58:00 Six Principles That Connect Our Lives

1. 2025-01-27T16:58:00 Sharing is hard: An address may be for a domain, page, anchor, or more recently, text fragments. An address may also be for a single or multiple e-mail addresses. The advent of client/server computing... 2025-01-27T17:19:00 introduced the concept of sharing information... to complete a task. Asynchronous JavaScript and XML (AJAX) supports activities such as background data exchange, and partial page refresh.
2. 2025-01-27T18:16:00 Ranking is hard
3. 2025-01-27T18:56:00 Crowds are wise: Where am I supposed... to be people? Jesus Christ included people. (Mark 10:40). 2025-01-27T19:00:00 The author... sought adaptation to the Bible.
4. 2025-01-27T19:25:00 Crowds are not wise
5. 2025-01-27T19:33:00 Divide and conquer: In his first role at the then leading client/server technology provider, PowerSoft, the author's task was to migrate the marketing spreadsheet to a client/server architecture. The steps would have included:
 a. Reverse-engineer the application to the client/server system.
 b. Reverse-engineer with p-SDesigner the cells into database schema and tables
 c. Migrate the data from a spreadsheet and populate the database
 d. Regularly, manage the data, and set up the database maintenance wizard, including backup
6. 2025-01-27T20:02:00 End to end: The first database, may, after time, not be a single island, managed by one-person, but it may grow into an enterprise application

(Christopher G. Brinton, Mung Chiang, 2016).

2024-12-27T08:08:00 Mediate between me and my people

1. Today...
 2024-12-27T08:20:00 In the north-east, there is a href, hyperlink reference, to an e-mail address. In the north-west, I found a url, uri, web address, when I looked deeper. 2017-12-04 When-is day of mailing address?
 2024-12-27T02:14:00 A young lady came to visit me. I introduced her to my adopted father and uncle Nihi. She does documentation, probably more specifically technical writing. She has written a lot of papers, but we would like to supplement them. The site is the Onyekwere family SAAP-Tech business. She is returning to Europe, where she intends to sit for a university coordinated examination.
2. Latest employee Daigaku Honkyaku Center (DHC):
 - 2007-09-25T01:49:00 Guy Kawasaki, Asian angel of death.
 - 2008-01-31 September 22, Hayward Hall of Justice, 24405 Amador Street Hayward, California (CA) 94544, 510-690-2700.
3. Next of kin, Beneficiary, Adepoju Adeniji Adeniji
 - 1999-05-07 The husband is dead. It is a person's house, you are going to. Christening of Adeniloues.
 - 1999-05-07 Her husband is no longer alive. A separate area is. Her husband does not speak to her at bedtime. Will separate self.
4. Tribes in Nigeria
 - 2024-04-13 Santa Clara, Ibo female, Tammy. Etinne translated sweet mother. Barnes & Noble (BN.com). El Cerrito Plaza. You are acknowledging that you are different...but you want to die for the people of God.
 - 2024-05-04 Nur Ahlihusawi. Light, 6' 1" basketball high school forward. Both sides of my family are Hausa not Fulani. Nordstrom, Emeryville.

2024-12-21T06:02:00 We don't have to be surrounded.

From my bedroom, I walked into the light of the upstairs lobby to wear my Spyder Active trousers that I purchased from Costco on 2024-03-21. Where does God reveal Himself? There are 47 occurrences of the word light in the King James Version (KJV) of the Bible Gospel books. Google.com may have a statistics first for providing additional/specify information. Alternatively, what type of information... am I searching for? Image, audio, video, news, statistics... 2024-12-21 05:25:50.117 lcr.org/books/defenders/629 Pharaoh's magicians were somehow able to duplicate the first two plagues. 2024-12-21T07:18:00 May rank statistics?

1. 2024-12-21T06:18:00 Locality... between people (Exodus 1:10).

2024-12-21T07:45:00 What accurate proceeding?

1. 2024-12-21T07:52:00 In the event... of time... there I Am! (Genesis 1:1; Genesis 1:14-19, Revelation 21:23).

2024-12-16T08:00:00 Metric Scalability: In the order of their mentioning

1. 2024-12-16T08:00:00 Time: beginning, evening, morning, day, season, year, generation, month, die
2. 2024-12-16T09:27:00 Place: earth, city, house, kingdom, country, tribe

2024-12-10T15:23:25 The Journey to WordEngineering

1. 2024-12-14T12:14:00 Availability (Daniel 2:23-35, Daniel 3:1-41) Wake-up orientation: My right foot is in the center and on the top of my left foot.
 - After the author completed his Associates degree, the president of Central Piedmont Community College (CPC), doctor Richard Hagemeyer, asked the author if he would like to go to Africa?
 - After the author completed his Bachelor's degree, the author did technical work in separate telephone call areas, and the upgrade of Borland Turbo C language software that prints labels for the offsite storage of reel tapes.
 - After the author completed his Master's degree, the author did database replication between the central database and remote databases.
 - The author's doctoral study was based on intelligent appliance security and storage.
2. 2024-12-14T15:48:00 Security (Daniel 4:1-34-36, Genesis 41:47-49, Genesis 41:53-57)
 - After completion of the subject was completed where he first did database replication, the author commenced a lead software engineer role in a client/server trainee and apprenticeship project.
 - The author initially used a Sybase PowerSoft Watson Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE).
 - The Polish heart attack survivor project manager restricted workers to 40 hours a week.
3. 2024-12-14T17:23:00 Security: What do we have as sufficiently giving? (Daniel 6:22)?
4. 2024-12-14T18:25:00 Agility: The idea of the author is not... Comprehensive of people.
5. 2024-12-14T18:33:00 What have we of the past?
6. 2024-12-14T22:15:00 How can we prove you wrong... we are right. (1 Samuel 22:2) ?

(Haishi Bai, 2019).

2021-01-04 14:22:14.250 Relational database Will target Tuesday December thirty first (Daniel 12:13, Matthew 22:41-46, Matthew 4-7, Deuteronomy 6:16) ? 2024-12-31

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering (Daniel 9:2). Is there a date? Not null.
- Calculate the date difference between the beginning of the prophecy and the ending of the prophecy (Daniel 5:24-27)
- 2021-01-04... 2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)
- Is the date before or after?

2024-12-13T14:00:01 What I have that is partial to me (John 16:7, 2 Samuel 7:15, Luke 18:13) ? Holy Spirit

- You are still partial to self

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest (Matthew 22:36-40, Matthew 18:14-15, Matthew 23:11)
- New (John 13:34, Hebrews 8:13 ; 1 Corinthians 8:12)
- ... (Genesis 2:24, Genesis 41:25)

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit (Luke 24:49, 2 Thessalonians 2:7)
- Time representation (Matthew 24:14)
- Trade of man (Revelation 13:16-18)
- No changes to the Word (Deuteronomy 4:2, Revelation 22:18-19)
- End-times (1 Peter 4:7, Genesis 6:13)
- End-times (Job 42:10-17, Job 1:2)

Entity-Relationship Model

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does? I have not? 2024-11-05T03:22:00 The datatype column type is perfect for backdating. 2024-11-05T04:18:00 To delegate the use? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

- 1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, punctually... SQL Server is a service.
- 2. 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part... to follow the truth? 2024-10-28T05:06:00 What input has He contributed... that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no.

The 3 private sector jobs I held in Charlotte, North Carolina (NC) were:

1. At SunHealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At McKinley Real Estate, I worked on a R-base 3000 application.

These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 What is suitable... for replacement?

Initially, I registered the trademark, WordEngineering. After offering me a book, Ocean Senior, I afterwards, was issued the domain name, www.JesusInTheLaw.com. (Revelation 21:23, Revelation 21:2, Revelation 21:12). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honkyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walther. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Hint? With HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I hear the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference. 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham (Ezekiel 33:24).
- Consistency with the Bible (Genesis 25:23)?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/pubs/mediaresource/MuJ#fbts.aspx>
- 2019-12-07 https://www.google.com/books/edition/Design_for_how_People_Think/UFSQDwAAQBAJ?hl=en&gbv=1&printsec=frontcover

Separating realizable

- Baptism of John... Baptism of the spirit ([Acts 2:1](#))
 - Dead... resurrection ([Hebrews 11:12](#))
 - Ish, husband ([Isaiah 2:16](#))
 - Antichrist ([2 John 1:7](#))
- No separation... in bonding, What did He ask for unity in? Land, man, Man, brother.
- God: Garden of Eden - Adam and Eve, Cain and Abel ([Genesis 2:8, Genesis 2:15, Genesis 3:23-24, Genesis 4:10-17](#))
 - Jesus Christ: Church - Peter ([Matthew 16:18](#))

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in (Numbers 3:8, Numbers 24, Romans 1, Acts 13:38)?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ([Genesis 15:13, Acts 7:6](#))
- Maternal: Rebekah, Laban of Padua/paran for 20 years, Esau ([Genesis 25:28, Genesis 27:5, Genesis 28:22, Genesis 31:38, Genesis 31:41](#))
- Children and grandchildren: Benjamin, Joseph, Judith ([Genesis 42:36, Genesis 43:14](#))

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27, Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1, Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?
- Ratio percentage versus (V5) quantity? At 3 for 97 GroupPrice.com
- In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses passed westward. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness ([Daniel 5:5, Daniel 5:11, Daniel 5:26, Daniel 5:30-31, Genesis 4:3, Genesis 4:8, Genesis 4:12-14](#))
- Quantification ([Daniel 4:5](#))
- Original ([Daniel 5:7](#))
- Those let him know ([1 Corinthians 5:7, Acts 23:5](#))?
- I went not a...
- I went not a... user meaning there are...

A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming ([Genesis 2:19-20, Genesis 2:23, Genesis 3:20, Genesis 4:1, Genesis 4:25-26](#))
- Reverence ([Genesis 4:26, Exodus 20:7, Deuteronomy 5:11](#))
- Interpret ([Genesis 37:9, Hebrews 11:23-30, Daniel 5](#)) to each entirely its own.

2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.

- 1. 2024-07-12T06:25:00 how much period... we have the same?
 - Telis integrates programmable script and audio recording, MP3 is an industry standard.
 - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give description?

- An instruction including a keyword and object(s). Let there be... An instruction accompanied by action(s) per day
- Observation of result: God
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side... the decision

1. IBM PC compatible:

- At Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ilajeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How-to verify the work of the spirit?

- Is it compatible with the Bible ([John 10:30, John 17:22, 1 John 5:8](#))?

Is this a link ([Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 5:3](#))?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a... result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible ([Daniel 5:31](#))?

- 1. When is the Bible specific about time ([Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54](#))?

How admissible is the word ([Genesis 41, Daniel 2](#))?

WhatAPage.html depends on the word.

What did I fit into a place?

- 1. Ark of the Covenant
- 2. Temple
- 3. Jerusalem
- 4. Judah
- 5. Israel

What did He see [Himself as](#)?

- 1. Joseph ([Genesis 37:29](#))
- 2. Moses ([Acts 7:25](#))

Robert Law Joss

- 2024-06-05T04:49:00 Technically... reliable? Merit... saturation? Information Age... personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), legacy code, support manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we deserve as our own... what do we reserve as others?
- 2024-06-05T04:49:00 What are we doing... the part of God? 2024-06-05T04:49:00 What was I working for? 2024-09-16 Bob Joss said North Atlantic Treaty Organization (NATO), 2024-06-05T05:07-00 Hmms. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can. Try again later. Check your network connection. Check that Firefox has permission to access the web (you might be connected but behind a firewall) 2024-06-05T05:25:00 2015-10-23DoctoralDissertation.pdf 27 pages. Is America a godly nation? Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering\git push fatal: unable to access '<https://github.com/KenAdenji/WordEngineering/>'. Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The_Network_is_the_Computer 2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 faeces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55:053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What offering I have for people?

Speak face-to-face	Dream or vision	Commentary	Scripture Reference
Moses	Other prophet	Leader	Numbers 12:6-8
Jesus Christ	Other teacher	Authority	Matthew 7:29

What does He involve?

Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress. (Luke 1:1-4, Daniel 9:22-23)?

- Title

- Autobiography
- Style of Writing

When did Israel seek no region...as its own (Acts 1:6)?

1. The prophets
2. New Testament
 1. The Gospels: King of the Jews, the disciples
 2. Pauline Epistles, General Epistles
 3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have stopped using people as Myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, the IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task...duplicate?

2024-11-20T05:38:00 Ordering

- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13)
- Levitical priesthood (Hebrews 7:14, 1 Samuel 3, Numbers 3)
- Sitting on a high place: Humble... exalt (Luke 14:7-11)
- Baptism: Washing of feet (John 13)
- Marriage: Younger before the firstborn? (Genesis 29:26)

What will count forever?

Word	Scripture Reference
Believer in Jesus Christ	<u>John 11:26</u>
Kingdom of God	<u>Daniel 2:44-45</u>
Charity	<u>1 Corinthians 8:1</u> , <u>1 Corinthians 13:1</u> , <u>1 Corinthians 13:2</u> , <u>1 Corinthians 13:3</u> , <u>1 Corinthians 13:4</u> , <u>1 Corinthians 13:8</u> , <u>1 Corinthians 13:13</u> , <u>1 Corinthians 14:1</u> , <u>1 Corinthians 16:14</u> , <u>Colossians 3:14</u> , <u>1 Thessalonians 3:6</u> , <u>2 Thessalonians 1:3</u> , <u>1 Corinthians 13:1</u> , <u>1 Timothy 1:5</u> , <u>1 Timothy 2:15</u> , <u>1 Timothy 2:22</u> , <u>2 Timothy 3:10</u> , <u>Titus 2:2</u> , <u>1 Peter 4:8</u> , <u>1 Peter 5:14</u> , <u>2 Peter 1:7</u> , <u>3 John 1:6</u> , <u>Jude 1:12</u> , <u>Revelation 2:19</u>
First resurrection	<u>Revelation 20:5-6</u>
Promised Land	<u>Revelation 3:12</u> , <u>Revelation 21:2</u>
Messianic Covenant	<u>Jeremiah 31:31-33</u>
Divided according to the children of Israel	<u>Deuteronomy 32:8</u>

What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said: What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1), When one finds good? That is the meaning (Genesis 1:16, Genesis 2:10-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the direction (Revelation 12:10). Appreciate us (Matthew 16:12)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	<u>Matthew 22:36-40</u> , <u>Deuteronomy 6:4-9</u> , <u>Mark 12:28-31</u>
Forerunner	The law and the prophets were until John	<u>Luke 16:16</u>

Is this generation the same?

Word	Scripture Reference
Seed	<u>Isaiah 53:11</u> , <u>Genesis 3:15</u>
Lead	<u>Matthew 23:3</u> , <u>John 15:15</u>
Interval	<u>Hebrews 11:39-40</u>

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present (Deuteronomy 32:8)?
- It is one man doing...it is many doing.

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	<u>Genesis 1:26-22</u>
Adam	Helper	<u>Genesis 2:18-25</u>
Eve	Seed of the woman	<u>Genesis 3:15</u>
Leader	Successor	<u>Acts 26:29</u>

What is according to time?

Word	Scripture Reference	Commentary
Beginning	<u>Genesis 1:1</u>	
Forever	<u>Matthew 18:22</u>	
Sig...rainbow, festival, event, cumulative	<u>Genesis 1:14</u>	

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Datas are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.
Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.

Event	Feature	Scripture Reference
Creation	Image of our ancestors	<u>Genesis 1:26-27</u> , <u>Genesis 2:7</u> , <u>Genesis 6:3</u> , <u>Luke 3:38</u>
Redemption	Image of the Son	<u>1 John 3:2</u>

Do you know mine? (Deuteronomy 18:15)

God	Actor
Moses	Jesus
Name	Jehovah (<u>Exodus 6:3</u>) Father (<u>Matthew 23:9</u>)
Place of Origin	Egypt (<u>Exodus 2:19</u>) Bethlehem (<u>Matthew 2:1-18</u> , <u>Luke 2:1-20</u> , <u>John 7:42</u>)

2022-08-08T19:00:00 Country

2022-08-08T19:00:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 man timestamp: 17400000

2025-04-1705:22:00 Place grouping...man grouping 2025-04-1804:06:00 (Genesis 48:4)?

2025-04-1770:16:00 Do we choose... a reziliation of Him?

- 2024-07-09T18:30:00 he has always put it in... context of time.
- 2024-09-15T13:39:00 how our part... is never... design as lasting?
- 2022-08-08T19:00:00 Disposes the Devil?

• 2024-07-23T09:22:00 To be an African's... Nation,
 2024-07-23T11:08:00 Do we accommodate the usual? Country of privilege?
 I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
 • 2022-10-08T11:08:29 To work as a part of Me?
 • 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege?
 I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5)

What I am rendering? To what particular use...is me? (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53)...

1. Salvation (Exodus 14:13)

2. Commit (Luke 23:46, Psalms 31:5)

What personifies the time?

1. First and Last Adam (1 Corinthians 15:45)

2. Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)

What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

• Human sacrifice.

• Including love habita ti won. Including love their own father.

• What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.

• According to worthiness (1 Timothy 6:17).

How do you reference the Bible?

Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:9
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2, Hebrews 11:25

What is the Bible divisible to?

Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1, John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1, Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?

Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?

Word	Scripture Reference
Holy Spirit	Genesis 1:2, John 4:24, Genesis 6:3, Genesis 41:38
Evil spirit	Judges 9:23, 1 Samuel 16:14, 1 Samuel 16:15, 1 Samuel 16:16, 1 Samuel 16:23, 1 Samuel 18:10, 1 Samuel 19:9, Luke 7:21, Luke 8:2, Acts 19:12, Acts 19:13, Acts 19:15, Acts 19:16
Lying spirit	1 Kings 22:22-23, 2 Chronicles 18:21-22
State of spirit	Genesis 45:27, Exodus 6:9, 1 Kings 10:5, 2 Chronicles 9:4

Word opposites

Word	Reference
Anti	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, Revelation 2:13
Un	Ungod, unholv, unrighteous

Beyond association of time, where am I?

Word	Scripture Reference
Role	Genesis 32:28
Place	Matthew 23:32
Times	Luke 21:24
Language	Genesis 11:9

Bala's Kang telephone interview. What uterate a place?

Word	Scripture Reference
Alter	Acts 6:13-14
Iterate	Jeremiah 25:11-12, Jeremiah 29:10
Utilize	Numbers 35:25, Numbers 35:26-28, Numbers 35:32, Joshua 21:13, Joshua 21:21, Joshua 21:27, Joshua 21:32, Joshua 21:38, 1 Chronicles 6:57
Utter	Judges 12:6

Why numbers are preferred?

Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association...with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16...)
- Sabbath (Genesis 2:2-3...)
- Autonomy (Genesis 4:2...)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know as necessary of me? How numerous we are made.
- You remember based on the data, do you need to collect the data if you don't do remember?
- What else he want as a set? Open. In Yoruba?
 - Complete
 - Late
 - Call
 - Thanksgiving
 Where am I, as a human being?
- The life of appointing something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

Familiarize with keyword Noun.

Letters in the English language?

The work? Is to associate the reference.

How could I collaborate fact with what I know?

On behalf, of someone, I seen		
Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?

Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4:4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age.

Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:17
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?

From...Until AlphabetSequence

- God expressed His wish for me
 - God spoke intermittently
 - God explicitly mentioned about some of the specific people that were in my life
 - To acknowledge, where I am present, I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
 - God did not initially identify Himself, with a particular name
- The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?

Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author uses Microsoft Access database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: ISHunt, ECog
- Questionnaire: RatingScale, InDefine

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@grom.com will telephone me about the role with Google's co-founder Larry Page jobs.lever.co/kittyhawk.aero/701cf5d9a-2d8a-4727-a345-d4a93d6dc27?encycid=3b8e0b44-7127-4709-ad21-f6be8af5f7403 Andre Nguyen asked how I spend my day?

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads. When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our opinion? This projection may result in entries of new records in the Remember and APass tables. Where are people, his relation?

- Title

- Autobiography
- Style of Writing

However, he is present; that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

How do we develop... our past time? / Genesis 37:19-20, Daniel 6:5,?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Scripture guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

What do we minimally, is how we do enormously.

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine Requires Internet access.
- ScriptureReference.html Requires Bible knowledge and place in the Bible.
- BibleWord.html Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatical correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance (Matthew 10:19-20).
- Where am I, resemblance of how I made (1 Corinthians 14)?

What does He choose as example?

- God rested on the Sabbath day (Luke 23:56).
- Jesus Christ (Daniel 9:24-27), 1 Corinthians 15:45, 1 Corinthians 15:47).
- Man such as King David (2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5).
- Place such as Sodom (Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8).
- Other living things (Numbers 22:21-33).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy (2 Samuel 12:14). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence (Isaiah 23:15, Isaiah 23:17, Jeremiah 25:11, Jeremiah 25:12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5). Listed below are some of the repeated reinforcements.

Samson's Birth (Judges 13)

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazarene son (Judges 13:2-5).

The same angel appears to Manoah and his wife (Judges 13:6-25). The angel reinforces their responsibility and defers reverence to God.

The Birth of the Messiah (Luke 1)

Foretelling the birth of John the Baptist (Luke 1:5-25, Malachi 4:5), transitioning the present to the after (Luke 1:17).

Foretelling the birth of Jesus Christ (Luke 1:26-38), Continuing the Davidic line (Luke 1:32-33, 2 Samuel 7:12-13, 2 Samuel 7:16).

The Baptism of Cornelius (Acts 10)

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band (Acts 10:1).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining (Luke 5:4-11, John 21:3-6, Matthew 17:24-27, Acts 10:9-16). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in (Genesis 14:10), and is in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died full of years, and the son of promise, Isaac, died, full of days (Genesis 25:8, Genesis 35:29); The last occurrence of the word, full, in the Bible, occurs in (Revelation 21:9). Living a presence (Jeremiah 28:11). To creating a future full of all. To creating a future free of all.

One Chance; Seem the Rest.

Our LORD's prayer is a communal prayer; directed to the one God (Matthew 6:9-13, Luke 11:2-4). Please note that it is Jesus; teaching this prayer; so He doesn't refer to Himself or the Holy Spirit explicitly; as in another passage, when He mentions Himself as the bread (John 6:21-35). He explains the truth; that we may fall short of it, by explicitly referring to the Father. He is alluding to the events in the apocalyptic books, Daniel and Revelation. We are on earth, and we have an earthly father; where we are, is not where, we wish and will to reside (Matthew 6:9, Luke 11:2, Daniel 2, Revelation 5). When no matter, where I go; this is how, I Am found (John 20:17).

To set everything true

The word, true, occurs in seventy-seven verses in the Scripture Bible, and there are eighty-one occurrences. True, first occurs in Joseph's interaction with his brothers (Genesis 42:11, Genesis 42:19, Genesis 42:31, Genesis 42:33, Genesis 42:34); Jacob had colluded with Rebecca, his mother, to get Isaac, his father's, blessing; God shows that Joseph will have elevation over his parents and siblings. There are ten occurrences of the word, true, in the book of (Revelation); in response, to God.

To Whom Masculine?

How the Bible compares the gender?

Man, after his Fall

During Creation, God asked all living things, be fruitful and multiply; God asked Adam to name the living creatures, and God required Adam to take care of the Garden of Eden, but this taking care is to dress and keep the garden; there is a role for man, the tree of the knowledge of good and evil, and the tree of life. God did not specify the welfare of animals. Out of Adam, God made a helper for Adam, Eve.

Adam's labor will be thorough; and there is enmity between the serpent and Eve, and each other's seed; and Eve will have pain, during child-birth.

God made coats of skins, and clothed them; it is our presumption, that the clothing is from living things, generally perceived as sin sacrificial animal(s); but since this clothing is not specified, an alternative, is that it is a plant, or another creature entirely.

God created an adult male, Adam; and his female counterpart, Eve (Deuteronomy 2:14, John 5:3). There is no mention of Adam's activity, after the fall of man; as Eve bares and name their children; Adam's earlier effort, which was to cater for the Garden of Eden and name the animals.

Man at Birth

We can only suggest, that the struggle between good and evil, continues upon the birth of Cain, Abel, and Seth. Eve named Cain, as her possession; and Seth, as the appointed seed.

God instituted male circumcision, which should take place on the eighth day, as man's responsibility in keeping the Abrahamic covenant.

At times, there is proclimation of a mantle, before adulthood; as in the case of Ishmael, Isaac, Jacob, Samson, John the Baptist, and Jesus Christ. In each example, there is a relationship between God and a parent; and God is directing, the offspring's onus. The want similar to Christ; is to see yourself, among God.

Man's Task

Historical man's profession are keeper of sheep, a tiller of the ground, handle the harp and organ, an instructor of every artificer in brass and iron. Unlike the first men, in the Bible, Seth's service was not identified, we only know that after the birth of Seth's son, Enos, men began to call, on the name of the LORD.

The 10 Commandments details the relationship we aspire to have with God, and our fellow-men.

God may consign men to oversee, as in the case of Melchizedek king of Salem, the priest of the most high God, and collector of tithes; Joseph, dreamer and interpreter, and he will save much life, in Egypt; as in incorporating the end. We share among us; as no foundation separates us.

Our choice is where we want to be? What we want to be?

A choice between what you have, and what you will want? (Revelation 5:5, Matthew 1:25, Luke 2:7, Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 11:28, Hebrews 12:23). Where I take you; is where you belong (Genesis 13:14-18, Deuteronomy 24:1).

What points arrive at succession?

What points arrive at succession?

Title	Scripture Reference
Begotten Son	John 1:18, John 3:16, John 3:18, 1 John 4:9
Subject	1 Corinthians 15:28
Holy Spirit	Luke 1:35, Acts 2, 2 Thessalonians 2:7

Future Work

• 2024-11-12T01:57:00

- The National Basketball Association (NBA) released the profile of an NBA player.

- My twin sibling said he received a religious video, and he doesn't want to go to work. There were arrests, but he was excluded.

2024-11-12T02:08:00 You are release... Once you fail a test.

2024-11-12T02:11:00 How am I transparent?

I no longer... take further input.

• 2024-11-12T08:07:00 How do I accommodate... the future... as Myself?

The 2 upgrades to-date of the primary keys or/and unique indexes have been:

1. IHaveDecidedToWorkOnAGradualImprovingSystem database Contact table: Add the organization name to the unique composite index.

```
CREATE UNIQUE NONCLUSTERED INDEX [IX_Contract_Name] ON [dbo].[Contact]
(
    [FirstName] ASC,
    [MiddleName] ASC,
    [LastName] ASC,
    [NickName] ASC,
    [OrganizationName] ASC
)
```

2. WordEngineering database HisWord table: Make the HisWordID column the primary key, and add the content of the dream table to make a foreign key.

• 2024-11-12T08:51:00 We are not where we want to be... where we are set to be.

• 2024-09-06T23:57:00 Unrelated... column.

The general format of the Bible is to place the book titles on the top, repeat the book titles and chapter numbers at the beginning of each chapter, and place the verse number beside its text. In so doing, there are alphanumeric book titles, and numeric chapters and verses. For the work of the author there are tables with rows and columns.

• 2024-10-29T04:05:00 Web Services 2024-10-29T16:31:00 I want to do a reporting service that give me this ability... or do I want to continue to do Client/Server?

• 2024-12-11T14:03:00 East Bay Vision Center Optometry 34420 Fremont Boulevard E. Fremont, California (CA) 94555. A person to my south walked westward. What is adaptable to the extra (Genesis 41:36)?

• 2024-04-12T12:12:00 The Passion of Christ was the culmination of the 69 weeks of Daniel, and the 70 weeks of Daniel were interrupted. 2025-01-04T12:12:00 I agreed to attend a concert with Jasmine, a Malaysian Chinese person, but I did not go bush dancing with Ross, nor did I go on night walks with Tess Perrohov. After Jasmine started living with a woman, I did not have sexual intercourse with her. Advanced age? I held the hands of Noriko Yoshida, but I did not pet Carolyn Clancy. Hadj_ (Daniel 0:24-27).

• 2024-11-13T11:50:00 What has to be the same (Daniel 4:1-36)?

• 2024-10-27T08:36:00 Interact table. Associative entity 2024-10-27T08:47:00 Yesterday, he said he didn't finish his work, so he couldn't write a summary in the middle of the process. 2020-04-18 19:45:02 183 Merging HisWord table to the Dream table. Merging HisWord with Dream. Identity, column, Dated, DateUTC, word, commentary, location physical, scenario, language English Yoruba, ContactID, 2024-10-27T08:46:00 HisWordID a reference column. 2024-10-27T10:23:00 Implementation detail? Modeling.

• 2024-11-07T11:30:00 only update columns with values 2024-11-07T11:39:00 XML and JSON may have placeholders. As with the SQL Update statement.

Dynamic SQL may lead to SQL injection. Parameterized query which is attainable by first reading the column values, and setting the values of the columns to refresh is a viable alternative. What is the current row content, what columns need updating?

2024-11-07T12:26:00 Why are we not the same?

2024-11-07T12:26:00 What do we build? And, how do we build it? The questions people ask? Search-engine, HTML5, stackoverflow.com, GitHub.

- 2024-09-30T04:43:00 What I found many of Him... is how I obtain a realization? Adoption (Genesis 40:16 , Daniel 5:22-23 , Daniel 4:33-37).
- 2024-09-23T10:47:00 upon the word of God. I saw the word of God in the Bible. I saw the word of God in the Bible. I saw the word of God in the Bible.
- 2024-09-23T10:47:00 When you started AlphabetSequence, you recorded the word of God. 2024-10-18T04:03:00 The superiority of the scripture... Is it its truth (1 John 3:2).
- 2024-09-23T18:35:00 When did He feel... a response... of our supervision (John 16:7)? This is what I want to do... with my life... how will you help me (Genesis 4: Daniel 1:8-21)?
- 2024-09-22T17:47:00 In Australia, I started Client/Serve Sybase/Powersoft consulting, I realized my limitations and I sought corrections. The same way, I had sought grammar punctuation learning from a Liberian male colleague of Central Piedmont Community College (CPC) at Freedom Mall, Charlotte, North Carolina (NC) (Jeremiah 30:11), 2024-09-12T18:08:00 Piece together?
- 2024-09-09T06:27:00 The scenery resembles ACCO - Brazil. Bridgette Hendricks, my twin sibling, and I. My twin sibling brought out a box of chicken or hamburger. My twin sibling said some young females invite him to go the nightclub, he is too old. I thought she could drive me home, but she was gone, disappeared. 2024-09-10T08:07:00 In the last few days, God has asked me to focus on the people in my life. And, their prophetic role. 2024-09-10T08:09:00 What might he say?
- 2024-09-09T06:27:00 To who the scenery resembles ACCO - Brazil. Bridgette Hendricks, my twin sibling, and I. My twin sibling brought out a box of chicken or hamburger. My twin sibling said some young females invite him to go the nightclub, he is too old. I thought she could drive me home, but she was gone, disappeared. 2024-09-10T08:07:00 In the last few days, God has asked me to focus on the people in my life. And, their prophetic role. 2024-09-10T08:09:00 What might he say?
- 2024-09-22T05:21:00 1st scene: Aunt Taiwo was sleeping on a bed with her head in the east. There were at least 2 acquaintances that were standing by the north-east door. I started orally stimulating the vagina of aunt Taiwo. I locked the north-east and south-east doors. I took off my clothes. I checked if I was still wearing my socks. On the bed, aunt Taiwo lied down with her face, body, and buttocks pointing downwards. She intended for me to come in from the back. Scene 2: Benitoluwa or Buki was driving me on a road like Mission Boulevard. He said he takes classes between Thursdays and Fridays with Google in Nigeria.
- What days of the week are between Thursday and Friday in the different calendar? How actually... balance the world?
- 2024-09-22T17:47:00 Contradiction and consistency? Soundex (Matthew 2:1 , Matthew 2:6 , Matthew 2:18 , Jeremiah 31:15).
- Exemption exception?
- The choice I lay ahead.
- What label I have? It be a Yoruba phrase which translates to an English phrase house like: Do I start at who? The Bible books about kings and poems. Is this a beginning or a continuation?
- Work... you will do, later, null is useful... when information is not presently known (Revelation 17:10 , Hebrews 5:6 , Revelation 2:17).

2024-09-04T29:35:00 The appropriateness of scripture reference? 2024-09-04T29:52:00 Given the scripture reference... the scriptural text... is largely available... 2024-09-05T00:03:00 The work of the author may be considered numerology, if it had stopped at determining only the AlphabetSequenceIndex but it had progressed into giving more weight to the AlphabetSequenceIndexScriptureReference. 2024-09-05T00:00:00 What did He get when He divided? Adam's rib? Eve.

2024-09-05T10:31:00 Getting right as himself? One, versus (vs) Getting one right as Himself. 2024-09-05T14:59:00 I have preferred... the order of the word.

2024-08-24T12:15:00 What did find... he needed perfection? 2024-08-27T21:29:00 Expand beyond your own (Acts 5:4).

2024-08-24T20:05:00 It's just an address... you are communicating with?

2024-08-27T12:27:00 How favorable... time have been... Some features that were available in SQL set-based are not available in C#, prior to the introduction of Language Integrated Query (Linq). These include Full-Text Search Thesaurus, soundex, regular expression, etc.

2024-08-27T17:45:00 To who determine the same?

2024-08-09T11:49:00 11:47 Should the timing be relevant and specific to the author's location, scenery, or event?

2024-08-05T14:30:00 Four six nine or 469? Word or number? The Hebrew language is alphanumeric. The digits were pronounced, not the combined number.

2024-08-18T21:05:00 To associate the same (Genesis 4 , Genesis 21:25 , Genesis 1:14-19)?

As of 2024-05-27T14:48:00 Microsoft SQL Server does not support sql:2003 Assertion. Microsoft SQL Server does not yet implement CREATE ASSERTION assertion-name CHECK (constraint) <http://stackoverflow.com/questions/4130039/does-sql-server-2008-support-the-create-assertion-syntax> 2024-05-22T15:28:00 potential fallback? CHECK CONSTRAINT or trigger.

The technical limitations of the current implementation include:

1. Unknown, prior to building?

2. Multi-user support?

3. Security login?

4. Content management system (CMS)

5. Single entry-point

6. Update rollback

What is the repository? If the user only needs to store the Word from God, a text file is sufficient? A comma-separated value (CSV) may suffice for multiple columns.

AlphabetSequence considers the whole word. Separate words into?

1. Buzz word

2. Keyword

3. Parts of speech

4. Simple versus (VS) complex

This part is my existence, which I will never recover.

Can I reason as a god will listen?

1. Adam named the animals (Genesis 2:19-20)

2. Pronounce Sibboleth (Judges 12:6)

3. Pray continually (Luke 18:1-8)

How to use the word? My earlier work has been to refer to the word. To look for one I deem as 17 Mo fe wa productive in the word? I want to be productive in the word? Where My word... has developed His need? (2 Kings 8:5)?

The select inputs do not have default values.

The Scripture table is a one-to-one mapping between the Bible version and column. These arrangements are futile when there are inconsistencies in the Bibles versions separations. An alternative is to have a table for each version. Publishers issue Bible version. What does the Bible teach us about twins? Full-Text search? We have given preference to the word, not the commentary, which is subjective.

Word to Today

The remember table correlates the events and the calendar. Currently, the author is manually deriving the entries for the Remember table. When there is an association, then the author considers the first, last, relevant mentions.

1. To forget time is responsible (Revelation 21:23 , Matthew 17:5 , Mark 9:7 , Luke 9:35).

2. What replaces time (Ruth 1:13)?

The gain from automating this process will include:

1. Limiting human labor

2. Speeding up the task

3. Reducing storage need

[Don'tFeelLeftAlone.html](#)

He Handicaped Time; as His Usage

Title	Scripture Reference
Servitude	Jeremiah 25:11-12 , Jeremiah 29:10 , Daniel 9:2
Fulfillment	Luke 9:31
Incentive	Daniel 12:13 , Isaiah 53:12

We may need, human help, to determine, the theme-of-the-day?

The author's work is record specific, GetApache.html. Further work may consider the entries for a particular date, datetime range, or HisWordID set basket? What this information have in common?

On 2022-01-10, I will recall that the birthday of biological mother is coming up, on 2022-01-12. I should pray about this and reinforce effort. What is He, starting to say?

Is there going to be a safe development to this design? There is key to reason... This work is not defamatory nor inflammatory.

Reuse:

1. Issue a SQL database query statement [SQLtoHTMLTable.html](#). This is the most raw form of querying the database, but it offers the most flexibility, and it does not restrict, to pre-built application.

2. Navigate the web pages from a client browser [2019-10-05AnArtifactDescription.html](#) WhenTheBosterIsPreachingYouDontWithTheScriptureToComeInSubsequent.html

3. Build a web service requestor, without the limitations of Cross-origin resource sharing (CORS).

4. Download the DLLs, or the source files, and customize, if necessary [WordEngineering](#)

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship?

[know_wife](#) SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE '%knew%' and KingJamesVersion LIKE '%wife%'

[wife_child](#) SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE '%wife%' and KingJamesVersion LIKE '%child%'

[WordToNumberHelper.cs](#)

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language [AlphabetSequence.cs](#) Later work, saw translation to:

• [AlphabetSequence.c](#)

• [AlphabetSequence.cgi](#)

• [AlphabetSequence.js](#)

• [AlphabetSequence.java](#)

• [AlphabetSequence.js](#)

• [AlphabetSequence.php](#)

• [AlphabetSequence.py](#)

• [AlphabetSequence.rs](#)

• [AlphabetSequence.shtml](#)

• [ufd_AlphabetSequenceIndex.sql](#)

• [AlphabetSequence.vb](#)

Others, other programming languages should have their own sample code. The author is only conversant in English and Yoruba, additional work will be to see the use in other lingua franca. And, the priest said, Are one only for me?

Data Residence

Where should the data reside? Database, JSON or XML files?

Which side, the love felt?

SQL returns records in rows; there is a result set. Would we, be able, to amalgate the result set? For example, how can we, find themes in the Bible? When you enter a topic, can we return a trend? Clustering, can we return a number; as its present (1 Kings 19:11-13)?

Where I arrive, is where He as conclusively use

Initially, when I got a word, I made efforts to expand, on this word; but now, I share the word, and wait on God to reinforce the word, or share a new theme.

2019-05-30 My ancestral home is Ile-Ife, the site of the Orammian staff, My search for the word, Staff, inspired relating the Bible to my life. Staff, first occurs in, (Genesis 32:10). In my ninth year, my twin sibling and I, relocated from Ile-Ife Staff School to Lagos. In our tenth year, we visited London. In my 32nd year, I re-located to the United States of America (USA).

I Am letting myself, be many as a people.

God often makes a personized. The work of the author is an individual effort, and it targets a singular person. The author separates his work into web pages, but the user may click on a hyperlink, to get more information, and sometime do additional work. The work of the author, based on the efforts of other persons, like the Bible, dictionary and commentary. The Bradford table and associated queries, only currently refers to the contribution of the author. How could we, specialize our work? Who uses, and for what? The setting, is it normal? What are the influence of God, as a person? What are His contribution, solely to man? What part of Him, as He analyzed, as a person? What role, as man, placed on Me? What stimulate you, as a human being; is where My opinion placed? The author read the Bible and listened to His word, prior to the introduction of AlphabetSequence. Where do we follow, His partnership? He has said the word; I have collaborated with Him.

Outstanding Work

The source code and schema are available at [Github.com](#). This means that the public can review and make updates to the original work of the author. This aged work is not up-to-date with the industry trend, such as cloud computing, mobile applications, decentralized ledger, nosql. Part of the justification for this immaturity; is the need to maintain a low entry point and capture a wide audience for its adoption.

Who's for social networking sites like WordPress, Github, Twitter, LinkedIn, Facebook, etc. When nothing without Me is sufficient without Me, Where I retain.

I use [grammarcheck.net](#). I am preparing a specialization to correct scripture reference. For example, there are many questions and answers, but a further development is to automate the task of correction (Luke 3:23 , Matthew 22:41-46 , Matthew 22:28 , Mark 12:13-17). There is a lot of automation.

When does He say a word, when does He put a thought (Daniel 5:25-28) Ability to say.

When does He talk in the past, present or future?

Which is the information container? The ActToGod table, Major column value, Comparative verse; supersedes the WordsInTheBible table; which is the exact word for the King James Version (KJV) and not all versions of the Bible; and doesn't take into consideration the English language British versus American spelling, such as favor versus favor, nor the generic word, such as, man versus men. When is this, anointing of the Spirit (1 Samuel 2:26 , Luke 2:52)?

Can you create a fictitious record in the Contact table, that meet later fulfillment. This record in the contact table will contain a word that is placeable in the title or company field/column. This information is substantiable in the commentary column of the CaseBasedReasoning table. This is compatible to Ghost city. A bit column is settable, for this contact. It allows to keep the contact ID as a foreign key. A record to be someone else.

The effort of the author is to share and comprehend the word of God. What can the author provide to the world to substantiate the work of the author? God made man as similar to Him to see how life can be? If I spoke the same, how am I the same? I know, I am. The love of being the same supersedes feeling the same. Being in the spirit; is alluding to the sufficiency of man.

When did He immediately get what He wanted?

Who	What	When	Where	Why	Scripture Reference
Abraham	Sacrifice	3 days	Mount	Tempt	Genesis 22

Who	What	When	Where	Why	Scripture Reference
Jesus Christ	Sacrifice and resurrection	3 days	Jerusalem at Golgotha	Tempt	Matthew 27:33, Mark 15:22, John 19:17, Matthew 16:21, Matthew 17:23, Matthew 20:19, Matthew 27:64, Mark 9:31, Mark 10:34, Luke 9:22, Luke 13:32, Luke 18:33, Luke 24:7, Luke 24:21, Luke 24:46

Terminology - Words and Meaning

When you write a thesis, it is a paradigm work, shift in thinking, and it should contain a terminology section. The practice of the author will be to list existing words, and include their meanings. For technical jargons, the author will rely on the Internet, as a definition resource. If the author is introducing a new word, the author will explain its meaning, but this is rare.

WordEngineering Created of an intellect.

Client-Side Programs

The norm of today is to build with HTML, JavaScript, CSS.

Database

The database of choice is Microsoft SQL Server. Prior to specializing on SQL Server, the author experienced fifth generation scripting languages such as dBase, R:BASE, Clipper, Access, FoxPro; other relational databases, like Oracle, SQL Anywhere from Watcom, Sybase, and Informix. When the author applies the Microsoft implementation of SQL, Transact-SQL and SQL CLR or SQLCLR (SQL Common Language Runtime) the author risks not being vendor-agnostic.

HyperText Markup Language (HTML)

The document that the reader is currently reading, uses rudimentary formating and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously.

HTTP Client (or Web Browser)

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and its gives us the opportunity to test our Microsoft implemented software in a non-proprietary, vendor neutral environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, mobile telephones emulators and simulation.

HTTP Server

The author use Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

Latency

This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page.

Linking

This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

Machine Learning

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P, if its performance at tasks in T, as measured by P, improves with experience E (Goodfellow et al. 2016). Machine Learning takes as input: data and answers and derives rules (Bileschi et al. 2020).

Page Size

The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files.

Page Title

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

Semantic HTML

This is the choice of a particular HTML tag, to reinforce its meaning and content.

Server-Side Programs

Ever circulating?

Style Sheet

The author prefers linked to embedded style sheet.

Web Application

The everyday web pages of the author include:

1. [GetAPage.html](#)

2. [BibleWord.html](#)

3. [ScriptureReference.html](#)

4. [DateDifference.aspx](#)

WordEngineering

To study the Bible by using an engineering approach.

Occurrence on the word

SQL Server Execution Plan

(Grant Fritchey)

[SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis+22,_Daniel+9+24-27,_John+1+1,Jude](#)

[ScriptureReference.sql](#) [ScriptureReference.udl](#) [ScriptureReference.org](#)

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the IX_Scripture_VerseIDSequence, since the where clause is on the VerseIDSequence column. The IX_Scripture_VerseIDSequence indexes on the VerseIDSequence column; it is not a covering index, since the Select column list includes the BookID, ChapterID, VerseID; therefore, the PK_Scripture is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

[The Definitive Guide to SQL Server Performance](#)

(Don Jones).

Performance Monitor - SQL Server Objects

SQL Server Objects	Commentary
SQLServer:Access Methods	Logical data access.
SQLServer:Buffer Manager Object	Physical data access. Such as, Buffer cache hit ratio, is how often, data is accessible from memory, rather than the hard disk.

Artifact Description

[2019-10-05ArtifactDescription.html](#)

Background

The author's country of birth, Nigeria, gained independence on, 1960-10-01, a Biblical generation before the end of the second millennium (plural millennia). There are 2570 days between 1960-10-01 and the author's date of birth, 1967-10-15. Nigeria became a republic on 1963-10-01. The difference in days between when Nigeria became a republic, 1963-10-01, and 1967-10-15, is 1475 days; 4 Biblical years, 1 month, 5 days; 4 Gregorian years, 2 weeks. The difference in days, between the creation of Lagos State, 1967-05-22 and the author's date of birth is 141 days (4 Biblical months, 21 days) (4 months, 2 weeks, 4 days).

1967-10-15 + 75 Biblical birthday ([Genesis 3:22](#)). The date of recording this information is 2020-10-23. Epoch timestamp: 1603454400

Jesus Christ began His ministry at the age of thirty, and the estimate is that He served for three years ([Luke 3:23](#)). The author was born on 1967-10-15 thirty-three years before the end of the second millennium. 1967-10-15...2000-01-01 = 1766 days (32 Biblical years, 8 Biblical months, 6 days) (32 years, 2 months, 3 days). 1967-10-15 B.C....1967-10-15 A.D. = 1436515 days = 47196 months = 3933 years. My thirteth, 30th, Biblical years birthday will occur on 1997-05-10. My thirty-third, 33rd, Biblical years birthday will occur on 2000-04-24. Between 1967-10-15 and 1968-04-04 are 172 days (5 Biblical months, 22 days) (5 months, 2 weeks, 6 days); Between 1967-10-15 and 1968-10-15 are 366 days (1 Biblical year, 6 days) (1 year, 1 day). Between 1967 Easter Day, 1967-03-26, and 1967-10-15, is 203 days (6 Biblical months, 23 days) (6 months, 2 weeks, 5 days). Between 0032-04-06 and 1967-10-15, is 706935 days (1963 Biblical years, 8 Biblical months, 15 days) (1935 years, 6 months, 1 week, 1 day)

Fulfillment	Dear America, your loom angle of contract is dead.
From	2011-05-29
To	2011-09-09
Time Span	103 days (3 biblical months, 13 days) (3 months, 1 week, 4 days)
Prophecy	I spoke to Disraeli today, he said Israel must prepare for war, within twenty nine days. Played lawn tennis with some Hindi people.
Fulfillment	2011 attack on the Israeli Embassy in Egypt, Islamic State of Iraq and the Levant (ISIS).
From	2014-09-30
To	2016-09-30
Time Span	731 days (2 biblical years, 11 days) (2 years, 1 day)
Prophecy	We need to replace the cook top as the current is too old and not worth fixing. Cost will be \$659 supply and install of cooktop and dispose of old one.
Fulfillment	Joshua 5:26 Shimon Peres

Autobiography

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
 1. An African American female senior, Gayle.
 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
 3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 What enrage... of the people?
 - I planned to build a traffic light for my project.
 - In a multicultural church where I was part of the congregation, Bernie Alspaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
- 1. 2024-12-25T19:12:00 When I had the option... I have acclimated.
- 2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

They had varying mother... but one father ([Genesis 32:28](#)).
2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?

1. Post 9-year-old re-location from Ile-Ife to Lagos
 1. Patriarch, brother Yemo
 2. Captain of the Nigerian national soccer team
 3. Teacher for the 1st year in the Baptist Academy secondary school, evening schedule
 4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
2. Post-1968 deportation: You called him Daddy, that is what everybody else called him
 - Where did he serve... a people?
 - Where did I... remove myself from the past. (Genesis 31:41)?
 - What apart... are new?
 - Scolding time... to reality?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-03-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

- 1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honkyou Center (DHC). Reminded of success? Kowei? Yoruba speaking. Muñoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how-to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees.
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influencers. I am a better tutor than a learner
 5. I contracted at Sunhealth Corporation. I added report column: Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made. (Genesis 32:28, Genesis 5:3, Genesis 4:12)? What word reminds. (Mark 11:23)?

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.

(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent, where is it needed?
