Instructions for Week 5:

Dear Java EE Students,

 On Saturday (10/08/2011) we had our on campus face to face class. Instructor discussed Chapter 5 from the textbook using power point slides and examples. The slides are posted in the 'Contents' (Blackboard) folder. Most of the students have completed the JSP exercise and ran the example on Glashfish. Our lab exercise for week 5 is creating a Stateless Session Bean. Typical steps given in the screen shots file. The screen shots may not 100% match on your pc, just use it for reference, but use help for current information or search online.

The lab work for week 5 week is (Deadline 10/23/2011, 5 pm)

1. Read Chapter 5 from the book.
2. Follow the screen shots from the file complete the Stateless Session Bean project.
3. If you have already done the above class exercise, please do 'Advice Guy' as a Sateless EJB project
4. Post / Respond at least once on the "Running a Java EE program on the server. Every student should participate in each discussion board at least once.

5. **Midterm 1 test is on 10/15/2011**. It covers Chapter 1 – 6 . There will be 25 multi choice questions and one software task (JSP/Servlet). The questions are already announced. The choices will be visible on the question paper. You will randomly pick one of the software task from the list. Please refer to Information /Midterm 1 Details file on Blackboard.. If you have questions please email mps25us@yahoo.com

Thank you and Have a good week
