SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID  
will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
  cast(BookID as varchar(6))
  + ' '
  + cast(ChapterID as varchar(6))
)
FROM   Bible..Scripture
Another SQL statement
```

```
; with cte
(
  BookID
, ChapterID
)
as
(
  select distinct BookID, ChapterID
  FROM   Bible..Scripture
)
select cnt = count(*)
from   cte
The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_ChapterIDSequence\_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)  
will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID  
is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from [Genesis 1:1](#), and ending at [Revelation 22:21](#). The SQL statement

SELECT COUNT(\*) FROM Bible..Scripture  
will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_VerseIDSequence\_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)  
will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

ALTER TABLE Bible..Scripture  
ADD CONSTRAINT AK\_Scripture\_VerseIDSequence UNIQUE (VerseIDSequence)  
is supplementary.

The Scripture\_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

| ScriptureReference | BibleReference |
|--------------------|----------------|
| John 1:1           | 43001001       |

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

  }
}
```

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns / SoC](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hull](#), who will talk of each word's specifics, and [Chuck Hader](#), who noted that the first occurrence of the word, [law](#) is in ([Leviticus 22:2](#)). The exact table, is a holding area, for staying information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning floor ([Joshua 15:3](#)).  
20:56-63> 20711:30:00 I will assist if life doesn't share us apart... spread us apart ([Genesis 1:16](#))? Heikai or Helek translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
is for determining the highest value. The SQL statement
```

```
SELECT COUNT(BibleWord) FROM Bible..Exact
is for determining the word count. The SQL statement
```

- Autobiography

ALTER TABLE Bible..Exact ADD CONSTRAINT CK\_Exact\_exactID\_Range CHECK (ExactID BETWEEN 1 AND 12891)

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

is 789631; this is the count of the words in the KJV Bible

### The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the primary key, the constraint, by issuing the SQL statement:

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (Bibleword ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

### The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

### The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared

### The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

## The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - HisWord, Remember, APass, ActToGo

### The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format (Numbers 12:6-8). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is being interpreted, (Matthew 1:23, Mark 5:41, Mark 15:22, Mark 15:34, John 1:38, John 1:41, Acts 4:36); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the <http://translate.google.com> web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings (1 Corinthians 12:30, 1 Corinthians 14). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 And the merge is the money convert.
2. 2015-11-03T02:17:00 The specifics, a language.

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an insert trigger, will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and loss of data.

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3](#), [Genesis 1:5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2](#), [Genesis 1:4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID identity column. The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the primary and/or foreign key, the backbone of the Referential Integrity Constraint.

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the (UTC-08:00) Pacific Time (US & Canada) time zone. There is a preference for the Coordinated Universal Time (UTC) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare

## HisWord view

The HiWord word composer of the computed columns deduces analyzing the Word. The two most significant components are the `AlphaBetsSequenceIndex`, and the related `AlphaBetsSequenceIndexScripture` references, respectively. The author derives the `AlphaBetsSequenceIndex` from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The `AlphaBetsSequenceIndexScripture` references is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the `AlphaBetsSequenceIndex` to calculate the computed values identified above. The `AlphaBetsSequence` is like `GenMatia_Musor_Hechnachi.method: Titles of God`.

### The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. \* The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. \* (Kooinia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs (Luke 4:19)

## APass

First, inside and last dates

## ActToGod

This is subjective work: the author applies intelligence to find patterns and resemblances in the Bible

I found out about this keyword through Google Suggest.</p> <p>• King James Version (KJV). I found out about this keyword through Google Suggest.</p> <p>• 2006-06-15 Drawing code as house. Sergey Brin and I were inside a classroom. Sergey Brin sat to the right, east, at the back, and I sat to the left, west. Sergey Brin was writing code, drawing a house. I asked Sergey Brin what a billionaire was doing writing code to draw a house? I went to the north-east, prostrated, and talked to an African descent male. There were children in the middle center of the room extending eastward. <a href="#">Backstage station</a> 5660 Coliseum Avenue, Oakland, California (CA) 94618.</p> <p>• 2026-02-01T09:48:00 At the intersection of Sward Drive and Creekswood Drive, south-east house. 4820 Sward Drive, Fremont, (California) (CA) 94555. It is not God works... it is does He work with your circumstances?</p> <p>Scene 1: On Sward Drive I was walking eastward, and at the intersection of Sward Drive and Creekswood Drive, south-east house. 4820 Sward Drive, Fremont, (California) (CA) 94555. I saw 2 males who were standing beside cars. I approached them believing they were Germans, but they turned out to be Hindi. Scene 2: My twin sibling and I went out to eat fish at an Asian restaurant. When we were about to depart, the restaurant's male workers to the north mixed up our take-away food order, 10:30 label identifiers (<a href="#">Glossary 3725-141</a>). Scene 3: I thought of Sergei Brin when I was with some Asian males, to the east, inside a Sport Utility Vehicle (SUV) with a vehicle license plate with a label like Trust or Tarut. The Jews could kill me as their preservation or solution. Interpret: Hindi make-up 1/5th of the world population... attrition due to unbelief.</p> <p>2026-02-01T12:00:00 At the intersection of Sward Drive and Creekswood Drive, south-east house. 4820 Sward Drive, Fremont, (California) (CA) 94555. <a href="#">Who is relevant... as a occasion?</a></p> <p>2026-02-01T13:34:00 At Charter Square, Albertsons Lucky, and Dulhan Grocery. 2026-02-01T13:37:00 <a href="#">The focus has been... | Type of Scale   | Commentary                                                                                                                                                                                                                                                                 | Example of Scale                                                                        |
|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|
| Interval Scales | An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.                                                                                                                                       | Date difference, UNIX epoch?                                                            |
| Ratio Scales    | These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit. | <ul style="list-style-type: none"><li>HTML input range</li><li>CSS percentage</li></ul> |

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

- Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
- Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
- Table: Is 2-dimensional with horizontal rows and vertical columns.
- Column: It is a physical actualized attribute.

| Functional Dependencies                                                    |                                         |                                                                                                                                                             |

Index Query Type

| Query Type         | Commentary                                                                                                                                                                                                              | Example                                                                                                                                                                                                                     | Structured Query Language (SQL)                                                                                                                                                                                         |
|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Point query        | It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.                                                                                                         | Useful for searching for a particular verse.                                                                                                                                                                                | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>                                                                                                                                                |
| Multipoint query   | It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.                                                                     | Useful for searching for a particular chapter or book.                                                                                                                                                                      | <pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>                                                                                                                                              |
| Range query        | It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound. | Useful for searching for consecutive verses, chapters or books.                                                                                                                                                             | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ) SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence &lt;= 5</pre>                                                               |
| Prefix match query | The set is the match of an attribute.                                                                                                                                                                                   | The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries. | <pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (     SELECT TOP 1 KingJamesVersion     FROM Bible..Scripture_View     GROUP BY KingJamesVersion     ORDER BY COUNT(KingJamesVersion) DESC )</pre> |
| Extremal query     | It returns either the minimum or maximum extreme.                                                                                                                                                                       | Statistics                                                                                                                                                                                                                  | <pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (     SELECT MAX( VerseIDSequence )     FROM Bible..Scripture_View )</pre>                                                                             |
| Ordering query     | The records returned are sorted.                                                                                                                                                                                        | The results of the author are normally in ascending order.                                                                                                                                                                  | <pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>                                                                                                                                     |
| Grouping query     | The records returned are grouped.                                                                                                                                                                                       | Rarely does the author group rows by issuing the group by clause.                                                                                                                                                           | <pre>SELECT BookGroup, COUNT(BookGroup ) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>                                                                                    |
| Equi-join query    | The records are retrieved from multiple sources.                                                                                                                                                                        | The author uses views for table joins.                                                                                                                                                                                      |                                                                                                                                                                                                                         |

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping [a work reference](#).
  - Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
  - The author depends on a typing assistant.
- Principle 3: Explore Contexts
- Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
- The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
  - Hardware, software, or network failure
  - ~~Vendor withdrawal of support~~
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
  - Inability to restore deprecated Microsoft SQL Server backup versions.
  - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
- The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
- [What period has God used?](#)
- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ([Numbers 1:3](#), [Luke 2:42](#)).
  - On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ([Numbers 4:30](#), [Matthew 7:16](#)).
  - In the year 2007 — generation time span: this masturbation will bring water. My 40th year ([Numbers 14:33-34](#), [Numbers 32:13](#)).
- Principle 7: Generate Multiple Solution Options
- [How versatile am I... at amending others? I have to relay my negation to technology providers.](#)
- Principle 8: Design Around Constraints
- [Relational databases offer the ability to set constraints.](#)
- Data type
  - Nullable
  - Primary key and unique index
  - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
  - The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
  - First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most

- Autobiography

prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.

2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

- There are 2 types of DBMS. These are:
- Shared file-based: For example, Microsoft Access
  - Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

| Statement             | Commentary                                                                                   |
|-----------------------|----------------------------------------------------------------------------------------------|
| sp_databases          | The sole work of the author, the WordEngineering database size, is currently 33390528 bytes. |
| sp_server_info        | The database version is Microsoft SQL Server 2025 - 17.0.1115.1                              |
| sp_spaceused          | The WordEngineering database currently uses 32607.94 MB.                                     |
| sp_statistics HisWord | The cardinality of the HisWord table is 122966.                                              |
| xp_fixeddrives        | Returns a list of physical hard drives and the amount of free space on each one.             |
| xp_msver              | Returns version information about SQL Server.                                                |

SQL Statement

| Statement              | Commentary                                                                                                                                                                                                                                                   |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Select                 | The select statement for data retrieval is the most popular statement. <u>Most select applies</u> to Bible..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries. |
| Insert, Update, Delete | The insert, update and delete statements are for data maintenance.                                                                                                                                                                                           |

Where Clause Operators

| Operator                              | Commentary                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| =, <>, !=, <=, <, <=, !=, <,>, >=, != | The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use.</u> != or/and !=>. <u>This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Overruling for a date or number will search for particular types.</u> |
| BETWEEN                               | This is a range check that accepts a beginning and ending value. It is not highly used.                                                                                                                                                                                                                                                                                                          |
| NULL                                  | No value                                                                                                                                                                                                                                                                                                                                                                                         |
| IN                                    | A comma-delimited list of valid options within parenthesis.                                                                                                                                                                                                                                                                                                                                      |
| LIKE                                  | Wildcard filtering                                                                                                                                                                                                                                                                                                                                                                               |

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

| Title        | Commentary                                                                                                            |
|--------------|-----------------------------------------------------------------------------------------------------------------------|
| TOP          | Set a limit of the number of rows returned or a percentage of the rows from the source.                               |
| SET ROWCOUNT | The database will retrieve all the rows, but if there are excessive rows it will later <u>link to required rows</u> . |

Where Clause

| Title                                                  | Commentary                              |
|--------------------------------------------------------|-----------------------------------------|
| Like wildcard                                          | Preceding or following restriction "%%" |
| Check for NULL                                         | IS NULL versus (VS) IS NOT NULL         |

| Table join supersedes the previous column key equal to | FROM table join primary and foreign key |

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
  - Data type and size: String, number, date, logic boolean?
  - Not nullable? Can not be empty?
  - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
  - Check constraints, for schedule, dated from must precede dated until.
  - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
  - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
  - URIChrist
  - URIEntertainment
  - URIGoogleNews
  - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose 2 datatype limits.

(Itzik Ben-Gan, 2023-07-03).

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

1. Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalistic page\_load() and query\_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
2. 2025-12-01T20:01:00 Unnecessary date manipulation: [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js) does 2 types of date calculations. These are the:
  - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
  - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DateFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js)
3. 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js)

```
fetcher: async function
(
    fetchUrl,
    fetchRequest,
    callback,
    uidisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uidisplay, rowColumn);
        })
    }
    catch (e) {
        uidisplay.innerHTML = e;
    }
};
```

(Robert C. Etheredge, 2017)

Programming

|----------------------------------------------------------|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tier                                                     | Language                                                                  | Commentary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Front-End Browser                                        | HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS) | The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes. |
| Middle-Tier Application                                  | C#, Embedded-SQL                                                          | For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.                                                                                                                                                                                                                                                                                                                              |
| Server-Side Backend                                      | Standard Query Language (SQL)                                             | The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.                                                                                                                                                                                                                                                                                                         |

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/GetAPage.html> calls the [http://github.com/KenAdenij/WordEngineering/WordUnion/2432.js](http://github.com/KenAdenij/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/2432.js) ajax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prosechey and Fulfillment
- Autobiography

- The relational model is for storing information in tables.
- The author normalizes data using Object-relational mapping.
- All the databases are OLTP (Online Transactional Processing), not OLAP (Online analytical processing).
- Avoid deadlock occurrences by not permitting user database updates.
- All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
- Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

- The secretive web.config file contains the database access information.
- The web.config file does not explicitly mention the user login name nor password.
- Give access rights to roles, not to specific login identities nor user names.

Database Data Types

- Choose matching data types between the database and application layers.
- Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
- Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

- Consider defaulting textual data to empty string; instead of NULL.

Indexes

- Database changes lags with indexes.
- The field sequence in indexes should follow the frequency of usage.
- When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

- Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
- Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
- Use Camel casing for naming parameters and local variables.

(ABB Asa Brown Boveri)

Performance

The web page components practice of the author, include:

- Keep the count of web page components to a minimum
- Specialize input entries by using the most simple and basic component
- Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

- The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
- Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
- The author standardized on the .png image format because there are few colors.
- In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

- Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
- All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

- Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

- Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
- Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
- Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
- Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

- The current web page, such as, 2015-10-23DoctoralDissertation.html file
- The general Cascading Style Sheet, 9432.css file
- The general JavaScript file, 9432.js file
- The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
- The dynamic link library file, InformationInTransit.dll file
- The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

- The author does not use background-image nor list-style-image
- The thesis only contains images for database and object modeling
- The author does not use [CSS sprites](#) since it requires additional storage space
- The author does not use Data URIs
- The author does not support nor take advantage of Expires Headers
- This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

- The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
- DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
- The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
- Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

- Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

- The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
- The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, Google, Microsoft drives, after changes. The author uses GitHub.com version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. Restore
2. Attach
3. Detach
4. SQL Server Data Definition Language (DDL)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common uri scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.echaimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4195610/designing-rest-api-endpoints-with-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML outweighs the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
  - Migration to computed columns
  - Normalization
  - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.

The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.

An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.

The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.

This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.

The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

| Module                          | Unit                                                                |
|---------------------------------|---------------------------------------------------------------------|
| GetAPage.html                   | retrieveAlphabetSequence()                                          |
| AlphabetSequenceWebService.asmx | Query(word)                                                         |
| AlphabetSequence.cs             | ID(word)                                                            |
|                                 | ScriptureReference(int alphabetSequenceIndex).                      |
| DataCommand.cs                  | DatabaseCommand()                                                   |
| WordEngineerionSchema.sql       | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) |

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

#### Random variable

The AlphabetSequenceIndex may range between 1 and (8000 \* 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

#### Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

### Statistics Terms

#### Key Terms for Data Types

##### Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

##### Discrete

The identify columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

##### Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

##### Binary

The Testament column is either Old or New.

##### Ordinal

The identify columns are all ordinal, following an ascending order.

#### Key Terms for Rectangular Data

##### Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

##### Feature

The most important predictor columns are the Word, Dated, and ContactID.

##### Outcome

The records include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

##### Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

### Software Engineering

#### Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.

The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

### Web Design Fundamental

#### Business Model

The Bible fits man's perception. The author adapts to what he learns.

#### Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

#### Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

#### Page Design

What He brings to us, is a form of Him.

#### Content Authoring

How query means more ([Isaiah 43:22](#))?

#### Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and [eBios.com](#).

(Jakob Nielsen, 2000)

### Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

#### Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

### Characteristic

#### Resilient

[GoldAPage](#) The Bible is separable into parts; these are books, chapters, verses. Dividing a life, according to purpose ([Matthew 1:12](#)). 14 Biblical Generations = 14 \* 40 \* 360 = 201600.

[DateDifference.aspx](#) The .NET Framework, C# and SQL Server support the Common Era; the date ranges between 0001-01-01 and 9999-12-31. The date difference will display correctly for the time interval - days, Biblical Calendar, and all the dates after the introduction of the Gregorian Calendar.

#### Declarative

SQL, Linq, CSS are declarative languages, but JavaScript is a functional language.

#### Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.

The C# class container model and the optional namespace alias content the author.

Cascading Style Sheets (CSS) is modular, and its rules trickle down.

### Continuous

Placing the [App\\_Offline.htm](#) file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.

A single batch file, with a single command line, builds the only .dll, InformationInTransit.dll

```
csc /out:InformationInTransit.dll /target:library /recurse:"*.*" /
reference:System.DirectoryServices.AccountManagement.dll,"bin\Debug\WtaAgilityPack.dll","bin\Debug\lTextsharp.dll","bin\Debug\MongoDB.Bson.dll","bin\Debug\MongoDB.Driver.dll","bin\Debug\MongoDB.Driver.Core.dll","bin\Debug\Newtonsoft.Json.dll","C:\Windows\Microsoft.NET\Framework\v4.0.30319\WPF\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.ConnectionInfo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.Adapters.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.SqlClnWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Sdw.Sfc.dll","Microsoft.VisualBasic.dll /nowarn:162,168,219,618,649 /unsafe
After testing, InformationInTransit.dll is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the xcopy command or the Microsoft Windows Explorer user interface (UI).
```

When the content of a server-side file with an .aspx or .asmx extension changes, the ASP.NET framework automatically re-compiles for serving future requests.

[jQuery](#) by John Resig is for making Ajax calls to the server. The more recent fetch command is also useful in later cases. jQuery helps to load the latest copy of the author's JavaScript repository [9432.js](#); since browser caching occurs for JavaScript files for a length of time.

The single .css file [9432.css](#) is callable at the bottom of each .html file's head node; JavaScript statements are in the last lines of the .html files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will not reference a HTML node before the declaration of its definition.

[Set a Database to Single-user Mode](#)

```
ALTER DATABASE WordEngineering
SET SINGLE_USER
WITH ROLLBACK IMMEDIATE;
GO
ALTER DATABASE WordEngineering
SET READ_ONLY;
GO
ALTER DATABASE WordEngineering
SET MULTI_USER;
```

The research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases. The author will place non-Microsoft DLLs in the virtual directory bin sub-directory, and the author will refer to Microsoft DLLs in the web.config file.

The web.config file contains content across the application, and the only variable is the database server name, and when the application database server exists on the same machine, the connectionString may use Data Source=(local);Initial Catalog=master;Integrated Security=SSPI. This means that the author will explicitly specify the database, object owner, and system object name. The Application pool will take care of the security. There are no environment variables, in use, at this time. The HTML files, when calling web services, will specify the full virtual directory path, but when appending cs and JavaScript files, relative directories will suffice, full path directory and filename is unnecessary and an overkill.

The author standardized on Microsoft SQL Server as the relational database of choice. There are several alternatives in the market. All of the database interaction goes through one access point, DataCommand, so this single file does re-work if there is a database variety.

When running a unit of code, for the first time, I will initialize the static variables. The ScriptureReference will issue a unique quote-of-the-day every day; and a random quote, every time. The author program uses the release version of jQuery, which is the most to-date. The web services, such as, Sefaria.org, should not need code-revise. The code in the third-party libraries, such as, Newtonsoft.Json.dll, is consistent, and should rarely need re-deployment.

The application is mostly stateless except for the database need.

Internet Information Server (IIS) HyperText Transfer Protocol (HTTP) by default runs on port 80, like other web servers, but this is modifiable.

Using the current architecture, the author takes care of concurrency and deadlocks; because database writes rarely occur and are short, reads are tolerant.

The threads are simple and conclusive; therefore, there are small start-up and short-down periods.

There is unity between the development and production team, environment, and time frame. The same knowledge worker can write, deploy, and run code.

The author has experience in reporting web server logs, using WebLogParser. The author relies on LogParser for logging and monitoring exceptions, and the SQL Server Management Studio offers the Error Log, for viewing the database activities.

The SQL Server Maintenance Plan is for scheduling full database and transaction log backup, periodically.

To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal \*, for all columns. Rarely does the author join tables, minimizing the work and resultset, in a set-level language.

(DB2 Developer's Guide).

## HTML5

## Semantic Elements

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept

### Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

## Communication of God

- Audio: God first communicated with me by His Word.
- mit-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

### Biblically

What did the Jews use numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babel: One language and of one speech ([Genesis 11:1](#), [Genesis 11:9](#))
- Witness: Two or three ([Deuteronomy 17:6](#), [Deuteronomy 19:15](#), [Matthew 18:16](#), [2 Corinthians 13:1](#), [1 Timothy 5:19](#), [Hebrews 10:28](#), [Revelation 11:3](#))
- No man could number ([Revelation 7:9](#), [Matthew 10:30](#), [Luke 12:7](#))

### How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus ([Genesis 5:2](#), [Genesis 16:11](#), [Genesis 17:19](#), [Luke 1:13](#), [Isaiah 7:14](#), [Matthew 1:23](#))
- God name changes such as, Abram to Abraham, Sarai to Sarah, Jacob to Israel ([Genesis 17:5](#), [Genesis 17:15](#), [Genesis 32:28](#), [Genesis 35:10](#))
- Family names, such as, Eve, Cain, Seth ([Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25](#))

The word is the author's file naming convention

| What did He decide to join in?                                                                                                                                                                                           |                          |

For the 2nd day consecutively I am wearing a green Fruit of the Loom t-shirt. Best trademark. 50% cotton. 50% polyester. Exclusive of decoration. Made in Honduras. XL/EG/TG. Black Adidas track trouser with 3 white stripes on each side.

At the intersection of Mallard Common 4740 and Woodduck Common 4740, South East. The garage door of Mahduki opened. Probably Hindi male in dark blue shirt drives southward. You have said, everything you need to say. On Decoy Terrace between Mallard Common and Seward Drive, South Center. I thought of Vivian Siu and her demand for me to wear better clothing. At the intersection of Decoy Terrace and Seward Drive, South East. God asked Why? Do you like Me? To create one for who?

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

| Procedure, function or method call |                                                               | Commentary                                                                                                                                                                        |

| Wake-up orientation database table | This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.                                                                                                                                                                                                                                  |
| Non-Alphabetic                     | AlphabetSequence may not be appropriate for people that use glyphs or sign languages.                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Structured query language (SQL)    | <p>The proposed changes will offer query customization?</p> <ul style="list-style-type: none"> <li>The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.</li> <li>With search-engine queries, the author proposes a query-language. This potentially affords better resource granularity restriction, arrangement option, and maturity of use compensation.</li> </ul> |

This research largely deals with structured data that is put in a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

| Term                                           | Meaning                                                       |
|------------------------------------------------|---------------------------------------------------------------|
| Training dataset or training set               | The recording of the word in the database.                    |
| Example (or data point, data instance, sample) | Each database row or record.                                  |
| Predict Label (or target)                      | The corresponding Bible text.                                 |
| Linearity assumption                           | The features alphabet places.                                 |
| Weight                                         | Since the word is the only feature, it is the only influence. |
| Bias                                           | A starting value.                                             |

(Dive into Deep Learning)

A type of us: is a kind of us? GetAPage.html is Bible specific.

## Parent Scripts and Objects

GetPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, and JavaScript.

CSS is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

## Naming Conventions

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is

(Andrew Kelleher)

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

### Search engine optimization (SEO)

### Elements

It is only recently that the author has become aware of HTML composition

| Element                      | Commentary                                                                                                                                                                                                                                                                                             |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Title tag                    | The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.                                                                                                                                                                                         |
| Meta Description tag         | This may be upto 155 characters and it indicates the page's content.                                                                                                                                                                                                                                   |
| Meta tags                    | The other meta names include keywords, robots and author.                                                                                                                                                                                                                                              |
| Heading tags                 | H1...H6 with H1 being the most important.                                                                                                                                                                                                                                                              |
| Textual content              | Search engines predominantly optimize for text. Other media are larger in size and duration. <a href="#">When did He promise operational growth (Psalms 22:30; Genesis 3:15; Genesis 12:7; Genesis 13:15; Genesis 15:13; Genesis 15:18; Genesis 17:8; Genesis 24:7; Genesis 26:3-4; Isaiah 53:10)?</a> |
| Alt attribute on the img tag | Visually impaired people have difficulty comprehending images.                                                                                                                                                                                                                                         |
| Fully qualified links        | Relative links meet the author's requirement, since is hostable on external sites.                                                                                                                                                                                                                     |
| Sitemaps (both XML and HTML) | A sitemap documents the files and their relationships.                                                                                                                                                                                                                                                 |

(Bruce Clay, 2022)

## Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

## Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. 2022-05-08T11:42:00 It was Me. I was telling you

This research does not limit itself to a particular bible subject or word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce, in compliance with the word of God? Is the training of the author beneficial or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 What does God choose as subject (John 15:15)?  
The author is working on variations of AlphabetSequence: These are not suitable for general use. These are

- 3-Words: Who is your manager? Crazy mister Martin, Mister Martin as a good, The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID

Biblical generation - 40 Biblical years

1. 2007–2008 Common Era - the author is 40 years old: the author mentions time.
2. 2021–2024 Common Era - the biological mother of the author is 80 years old: the word recorded by the author is time relevance specific.
3. Actor...role commencement date?
- 2026-01-1704:49:00 You look at life...and you feel down A politician who is probably Bola Tinubu, said how he became a politician.
- 2026-01-16707:51:00 A person was making fun of Dikembe Mutombo on his draft day. Dikembe Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread
- Biblical numbers for calculation.
  - Biblical separation into Testaments, books, chapters and verses for referencing.

| 2017-10-18T10:00:00 | Olohun ni mo fi be... wa si biyi. | God I beg you with... come here. | Kenneth Chenuit announces his resignation from American Express (AmEx) |       |        |                     |

Work... business  
Data from until (Numbers 26:6, Numbers 4:30, Luke 3:22)  
The Exhaustive Concordance of the Bible, generally known as Strong's Concordance, is a Bible concordance, an index of every word in the King James Version, constructed under the direction of American theologian James Strong. Bible dictionaries and commentaries. Terminology.... characterization. How do you tweet? Frequency, grammar, composition, ranking?  
AlphabetSequence builds on Bible verse separation.  
How representative am I of my people (Philippians 3:5)?  
2026-03-10 16:36:54.680 You have to do your work... like you are.  
2026-08-04T13:42:00 Profession characteristic ( Revelation 13:18 )  
2026-08-04T13:42:00 - 666 days = 2024-10-07

| Work                                | Holiness                                                                                                     | Scripture reference          |

(Itzik Ben-Gan, 2023-07-03).  
Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

2026-08-11T16:00:00 What...together...meant for you and me?

2026-08-10 Creating Your Own Library Posted on July 25, 2026  
1. In 2002, while I was taking computer courses at Ohio College 2026-08-11T22:29:00 to renew my skills... I started copying sample C# programming language source files.  
2. On about 2005-10-06, I started to model relational databases to record the words spoken by the Holy Spirit to me, contact address book, and bookmarks.  
I also stored to reference 2026-08-11T22:38:00 religious work... Bible, dictionaries, and commentaries. 2026-08-11T22:56:00 These were initial Microsoft Access, .mxd file stands for Master Database File, that I exported and imported into Microsoft SQL Server relational database tables.  
3. 2026-08-11T23:02:00 My expectation... was to build work samples and demonstration deliverables for 2026-08-11T23:04:00 eventual employment.  
2026-08-11T23:05:00 I understood my limitations in the past... was not having a supportive framework, 2026-08-11T23:07:00 and recent work experience, and in-demand market skills.  
2026-08-12T00:03:00 How the ease of using... helps me.  
4. 2026-08-11T23:16:00 A readiness to listen... learn.  
2026-08-11T23:20:00 What uses my skill?  
2026-08-11T23:33:00 What does the world require for me... that I need?

| Keyword  | Find what         | Replace with          | Scripture Reference             |
|----------|-------------------|-----------------------|---------------------------------|
| Religion | Isolatory         | Monotheism            | Acts 7:40-43                    |
| Learning | Egyptian          | Hebrew                | Acts 7:42                       |
| Location | Egypt             | Promised Land         | Acts 7:3-7                      |
| Vocation | Ruler and a judge | Ruler and a deliverer | Acts 7:10, Acts 7:27, Acts 7:35 |

What is remembrance...associated?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

| Date                | Type           | Word                     | Commentary                                                                                                                  |
|---------------------|----------------|--------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| 2024-01-17T13:36:00 | Alphanumeric   |                          |                                                                                                                             |
| 2004-07-11          | Money currency | English pound 45 percent | The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%. |
| 2008-03-11          | Calendar       | September 22             |                                                                                                                             |

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

1. How essential are we: to the personification of God?
2. The spirit man holds
3. When did He exchange... His view as ours ( Genesis 18:18 )?
4. How are we acceptable; to what is new? How does God, build up, to His word ( 1 Samuel 9:15-12 )?
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ( Matthew 23:14, Acts 8:37, Acts 15:34, 1 John 1:15 )
14. Naming of words ( Genesis 32:28, Genesis 35:10, Genesis 47:27 )
15. We have been doing unconvincing power
16. I said, I heard. 2021-04-11T08:37:00 In a location to the North, probably 99 Ranch Market or Marina Food, or Delco. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight, I said, 6 9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does He volunteer as time? AlphabetSequence is resource minimal:
  1. Doable by hand
  2. Compute. Not technologically demanding
  3. Maturity: Since 2002
18. Separation into Segment.
19. Is this a finished work and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... and not sawed... by the grammatical correctness.  
To co-operate as we are. Robert Estienne English Alphabet

2017-03-06T00:00:00 A Comparison of Age

Divided as separated. Go this way, that way.  
I want to program, but I don't want to match two programs together, except for deep thought.  
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ( Genesis 12:5-14, Genesis 30:24, Genesis 40-41 ).  
[12] is separable into four layers; these are the link, Internet, transport and application layers. No breaking ( Matthew 19:8 ).

Marriage

2025-03-11T08:20:00 DataType software

2025-03-21T21:08:00 I am standing among the north-west seats. I was told that out of the 3 promoted people, 2 were made mayors. There is a path to the north-east. 2025-03-21T22:47:00 It is not the only thing. 2025-03-21T22:58:00 Was this  
all that was said?

### A continuous realization

1. Passover (Genesis 15:8-21, Exodus 12:1-51)
2. Priesthood
3. Prophet Daniel - 70 weeks prophecy (Daniel 9:1-2, Daniel 9:24-27)

2026-07-25T14:41:00 What was I able to do before? What Am I saying I can do now?  
I saw, and I greeted Chano Daca and Maria Ross at Taqueria El Mex-Cal. I walked towards the south-east of Charter Square, and I greeted mummy, Taruben Patel at Dulhan Grocery, and shortly after the word came, I received the word.

2026-07-04T08:11:00 Who knew how to use the computer with plug-in (Acts 1:4-5)

2026-07-05T17:35:00 What did he... occur... as the same... as

2026-07-05T20:18:00 How we are... our type (Galatians 3:28, Hebrews 11:1-3)

2026-07-06T00:12:00 The continuation... of all... things (Genesis 1:1, Genesis 4:26, Daniel 2:34-35, Daniel 2:44-45, Revelation 20

2026-07-06T13:16:22 What part... of design... are you? (Judges 18:13-27)

2026-07-06T15:08:00 Displacement...disorderly\_(1 Chronicles 10:14)

2026-07-06T19:40:00 Technology... where are you? (Daniel 11:32)

2026-07-06T19:58:00 It's all... he... places.

1. Kowe included the additional Yoruba alphabet with diacritical marks, a dot below, and high and low tones; and a dictionary and a translator

2. A relational database includes related tables with primary keys, foreign keys, constraints, defaults, clustered and non-clustered indexes, views. A client/server composed of 2 computers interacting together, with possibly an application-tier extension. During my Master's degree at the University of Technology, Sydney (UTS), I first wrote a paper on distributed databases, and finally a thesis on Client/Server.
3. During my Doctorate degree at the University of Wollongong (UOW), I researched intelligent appliances which are composed of smart cards and flash memory.

2026-07-03T14:31:00 Accepted of manage (Luke 1:20, Luke 1:38)

1. I started with word processing, and I advanced into Extensible Mark-up Language (XML) and Extensible
2. In Righting Software, Juval Löwy of IDesign, prescribes grouping use-cases and their extensions

(Juval Löwy, 2019-11-27)

2026-05-29T10:26:00 Database writing

1. 2026-05-29T03:21:00 There is a difference between writing an event, and associating personal testimony. There is only so much information an author can write on paper. 2026-05-29T03:17:00 and later use a computer to further his thinking. Complement, re-cap. 2026-05-29T03:19:00 DOs could be seen from study books. 2026-05-29T03:31:00 Anthony Navok, my colleague at Information Dairling Services (IDS), a subsidiary of World Internet, once pointed out that I do a lot of clipboard work.
2. 2026-05-31T17:45:00 What is he searching for? He's searching a Norda shabai! Implication from the central database, informs to the remote database, Watson SQL Anywhere. Knowing your data.
3. 2026-05-30T16:04:00 What is aside from the fact?

2026-05-30T13:46:00 How he will know the distribution?

(Alberto Cairo, 2026).

2026-05-17T15:36:00 What did he collect as a future?

1. 2026-05-16T07:26:00 Scripture references uttered to you.

What is best believable (Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours (Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13)?

- In the HisWord table, the order of belief is:
  1. Scenery
  2. Commentary
  3. Word
  4. System generated: DateTime and identity columns
  5. Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

2026-05-14 Inconsistency —

2026-05-14T21:42:00 The author has used different source from composing his work.

2026-05-14T21:46:00 How we are... in the midst... of each other.

- AlphabetSequenceIndex language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026).

2026-05-10T14:05:00 What exact... has He notice... about you?

1. 2026-05-10T14:05:00 Re-locate:
  1. Prior to 1988-10-15 First dream:
    - I Am taking you on a journey.
  2. 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).
    - Face to face: Out of Egypt, have I called My Son ([Hosea 11:1](#)).
  3. 1999-05-07 First word, after re-locating to the United States of America (USA).
    - Face to face, in the wardrobe, closet, of the master bedroom. Ile eyan mi lon lo yi. It is my person you are going to.

2026-05-07T17:49:00 Word rank

1. They were taught by the spirit... to talk as the spirit.

2026-05-06T11:52:00 HTML tags Unordered List Versus (VS) Ordered List

The difference between the ordered list tag, ol, and the unordered list tag, ul, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

2026-05-07T12:22:00 How can he... be... like us?

1. I have always drifted toward the academic.

2026-05-02T21:30:00 Could I re-write this... biblical?

1. Power of the Holy Spirit ([2 Peter 1:21](#))

2026-04-27T16:01:00 WordEngineering query

1. WordEngineering query - database
  - Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
  - 1. Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
  - 2. Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
  - 3. Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
2. WordEngineering query - client
  - Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
  - 1. Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
  - 2. Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
  - 3. 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 To know at the start... what I Am?

1. When I started Kowe, I was a deported Yoruba man.
  - 2026-04-27T19:59:00 This I will find useful... for my people.
  - 2026-04-27T20:13:00 I could use the computer... for my weakness.
2. When I started AlphabetSequence... 2026-04-27T20:22:00 I must find... for what... He accumulated in the past ([Genesis 15:5](#), [Revelation 16:12](#)).

2026-04-28T08:53:00 How you are known... by them?

1. The titles of God, and their translations ([Genesis 16:13](#)).
2. The identification of His creation. For signs, after death, substitute, beginning and end ([Hebrews 9:17](#)).

2026-04-15T05:43:00 Feature highlight its strength and weakness?

- Passover: 2026-04-02. 2027-04-22.  
Feast of Unleavened Bread: 2026-04-03. 2027-04-23.  
2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.  
Implementation options include parsing a data definition language script file (.SQL), or interrogating the database schema.
- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
  - For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
  - 1. 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
    - 2026-04-15T07:44:00 Natural primary key columns.
  - 2. 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

2026-04-09T18:48:00

How we repeat life? (Matthew 24:34)

1. Old Testament: Knew, birth, sacrifice, death, worship ([Genesis 4](#))
2. New Testament: Worship, circumcision, baptism ([Matthew 11:11](#))

2026-04-08T20:13:00

How elaborate... is the view... of my participation (Daniel 2:45)?

1. 2026-04-08T20:13:00
  - How reliable is the machine... in interpretation the word of God?
2. 2026-04-08T20:34:00
  - What did he find... as useful as the crescent?

2026-04-07T08:21:00 I gave testimony to my biological mother about dreaming her, and Pastor Bert Bain chastised Brian, a Caucasian churchman elder who was married to Fatu, an Islander nurse. I remembered the circumcision of Abraham's only son, Isaac, as an explanation for Akedah.

2026-04-07T14:50:00 Mary's Bakery. 34370 Fremont Boulevard. Fremont, California (CA) 94555.

A confider who is in need.

1. Abraham ([Genesis 18:12](#))

My Father versus (V5) My God.  
5 Paschal Lamb ([John 13:1](#), [John 1:29](#), 1 Corinthians 5:7)
- 2020-04-05T10:02:00 Scene 1: We were inside a room, and either in the center-west or north-center, we discovered some missiles belonging to a party were stolen by a third party. I was distressed by this theft. Scene 2: Uncle Demola, who was standing in the north-center of the room, said that he had taken some agricultural farming produce, which were probably leaves, flowers or seeds prior to their having been stolen for their safety ([Genesis 2:20-26](#), [Genesis 4:1-6](#)).  
2014-08-18 Stay the course dream of Chuck Missler: 2014-08-18...2026-04-05=4248 days (11 biblical years, 9 biblical months, 18 days) (11 years, 7 months, 2 weeks, 4 days) 2025-10-02 ([James 3:4](#)).

- 2026-03-27T19:30:00 What did I relate to as the usage?
- 2026-03-27T19:49:00 As long, as you are with us... we have... each of us.

1. My love poem, inspired by Lisa Munoz, my speech communications classmate, was probably written within a few minutes at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC), in the personal computer (PC) laboratory with an editor.
2. Kovee was programmed within a few days at Gestco, 34 Association Avenue, Ilupeju, Lagos State, Nigeria. I require a C language compiler, Tagged Image File Format (TIFF), English and Yoruba alphabets, dictionary and translator, graphics monitor mode, 2 lines per editing.
3. AlphabetSequence is a divine-inspired algorithm, and it requires a relational database with support for Structured Query Language (SQL) input and query, C# application layer, and HTML, CSS, and JavaScript for the user-interface (UI).
  - 2026-03-28T11:45:00 daily-sage-2020.
  - \* 2026-03-27T23:34:00 to connect... a part of myself... as the other.
  - \* 2026-03-28T11:45:00 When did he personally relate who he is... to who he has been?
  - \* 2026-03-29T11:30:00 Look at what He want to say through you... prove what He has to say through you.

## Perceive our world

1. A relational database stores data in rows and columns. The columns supports storing specialized datatypes. A primary key is for uniquely identifying a particular row. A foreign key offers the opportunity to associate rows of the same values.
2. Object-orientation is for combining data and programming logic. A collection or list of objects.
3. The Bible is a history of the Jewish people.

## Time Series Analysis

1. 2026-04-03T14:22:00 This is a sampling of the word of God.
2. 2026-04-19T10:52:00 The author would like to place more emphasis... during nighttime dreaming at the Pacific Standard Time (PST).
3. 2026-04-19T20:20:00 It must be... [apocalypseverse / Joshua 14:2 - Joshua 14:2](#).)
- 1967-10-15 + 85 Biblical years=1967-10-15 + 30600 = 2051-07-26
- 2026-04-18... 2051-07-26=9229 days (25 biblical years, 7 biblical months, 19 days) (25 years, 3 months, 1 week)
2. 2026-04-03T14:24:24 The data occur at random intervals.
3. 2026-04-03T14:26:00 [Glossing Interval?](#)
1. Saturday, 2021-07-17 60th birthday celebration of Uncle Jimi Aidenji.
2. Sunday, 2021-07-18 Uncle Jimi Aidenji re-located to Atlanta, Georgia.
3. Monday, 2021-07-19 Uncle Jimi Aidenji commenced medical work in Atlanta, Georgia.
- [Spirit Airlines looking for flight attendants](#) time duration Las Vegas, Nevada Sunday, 2021-07-18T11:17:00 01 h 31 min Oakland Sunday, 2021-07-18T12:48:00 Flight terminal 1711. I sat beside a Hispanic male, a manager at Tesla and his female partner, on my way back journey between Las Vegas and Oakland.
- 2026-04-05 Easter Sunday 1272 days=10 biblical months, 12 days) (4 years, 8 months, 2 weeks, 4 days)

## 2026-05-03T15:49:00 Handling Missing Data

The author started receiving word from God shortly prior to his 21st birthday, which was coming up on 1988-10-15. But, the author did not start writing a blog until at about 2000-10-05. The author started using a database for data entry, and the author commenced AlphabetSequence at about 2002-12-03.

2026-05-03T15:49:00 The greatest length

1. The author was incarcerated at the Alameda County Santa Rita Jail, 5325 Broder Boulevard, Dublin, California (CA), (925) 551-6500. 2nd occasion between 2028-03-07T00:00:00...2028-03-14T00:00:00  
 1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 2060 Fairmont Dr, San Leandro, California (CA) 94578. (510) 346-1300.  
 2. 2004-12-06T00:00:00 And, subsequently at Villa Fairmont Mental Health Rehabilitation Center (MHRC), 15200 Foothill Boulevard, San Leandro, California (CA) 94578. (510) 352-9690.  
 3. 2026-05-03T17:42:00 Information record is intermittent during trips.  
 4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

Group by Testament

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books

## Group by HisWordID

2026-05-04T18:05:00 The HisWorld.com version is for group simultaneous views... most likely, that were spoken on the same dates.  
2026-05-04T07:23:00 The Nigerian government versus (VS) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and mediocre Nigerian male partners. I saw 2 Microsoft affiliated females beside a car in the north-center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Hibernus 11:7](#)).  
2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, 16th, and third-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Luce 16:16](#)).

(Aileen A. Nielsen, 2020)

2025-03-17T11:47:00 Side with church... or side with the children. (John 7:51, Genesis 21:9, Genesis 27:41):

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

## Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- **data-webservice:** An invocable web service to provide supporting information. Via a web address, url and query string.
- **data-code:** With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example

```

SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
      (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE "[0-9]%"
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
      (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word LIKE "[0-9]%"
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
      (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
      (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentInfoTotal
FROM WordEngineering..Hisword

```

| InfoType | CountInfo | PercentageOfTotal |
|----------|-----------|-------------------|
| Alpha    | 111590    | 93.740811989146   |
| Numeric  | 851       | 0.714879747313    |
| NULL     | 6600      | 5.544308263539    |
| Total    | 119041    | 100               |

- data-ssn: For example, Representation State Transfer (REST).

### Pros and Cons

- English is our colonial language; Yoruba is my native language (Ade 2022).
1. Accessible from a webpage, the author has had coded translations from the Bible by using a New Testament phrase.
  2. In the WordEngineering database, TheComingAgeOfTime table, contains kernered spoken language translations.
  3. In the WordEngineering database, theWord table, there is my English/Translation column which is null when the word column contains non-english words.
  4. In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
  5. In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession.
- When?
1. 2025-03-01T07:13:00 Microsoft Word and past-tense, Book Booleans of Electronic Data Systems (EDS) and the verb, will, future reference.
  2. 2025-03-01T07:11:00 Online translation processing (OLTP)... Online analysis processing (OLAP).
- How? How does the computer user use? 2025-03-01T07:06:00 Improve on paper, the old writing medium.
- There is a detail of the literature which is only verifiable by the following URL: <https://doi.org/10.21203/rs.3.rs-0724-000> Microsoft made the assumption, to automate mark-up

A continuous... following

- Bible groups is the arrangement: Pentateuch, major and minor prophets, Gospel, Pauline Epistles, General Epistles...

2025-01-31T08:51:00 **What title... we are befriending?**

1. My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowe.c for the Yoruba language.
4. My first domain name was commonpeople.org
5. The first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.

- 2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?
- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
  - Bible arrangement: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
  - Genealogy: The birth order. Our ancestors and offspring.
  - Prophecy and fulfillment
  - Bible word, synonym and opposite
  - Traditional versus (VS) modern
  - Speaker and audience
  - Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
  - Author and book group
  - Citation
  - Geo-Location
  - Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible.

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.

2024-07-12T21:22:00 **Making a protection... making a projection.**

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

| Word                 | Microsoft SQL Server                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Scikit-learn by David Cournapeau                                                                                                                                                                                                                                                                                                                                                                                                                                         | Commentary                                                                                                                                                                                                                                                                                                                                 |

Two babies were baptized, a boy and a girl. This Sunday celebrate the Baptism of Jesus Christ.                                                                                                                                                                                                                                                                                                                                                                                                                        |
|               |                                                                                                      |                                                                                                                                                                                                                                                                                                                                             | 2004-03-02    | 2024-06-24 | 2504 days (6 biblical years, 11 biblical month, 14 days) (6 years, 10 months, 6 days)           | Run against Italy. We are inside a house and Buki closes the doors eastward. Outside on a beach, an acquaintance, Buki or Stacy Brothers drinks coffee, a recent habit of his. There are 4 sachet bags of coffee. Someone speedily drives a car to our north. I worried about children pedestrians. A male speaker said that Australia will attract a large population of migrants in the end, as a half residence. He quoted Daniel 12 fictitiously, saying the longest length between the top of a building and a mountain top exists in Australia. |

Subject: Your SQL Server background caught our EE -- 10-20 hrs/week, you set the pace

Hi Ken,

🔗 SherlockTalent is hiring on behalf of an esteemed client:  
SQL Server DBA & User Support Specialist – 100% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CTO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

- When I am doing this?**
- Pre-condition (Genesis 3:15)
  - Assertion (Hebrews 5:8, John 20:17)
  - Post-condition (Genesis 49:9, Revelation 5:5)

2024-11-13T19:12:00 Translation

1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (V5) Functional dynamic equivalence (thought-for-thought): **BibleWord.html** is the former.
3. 2024-11-15T14:06:00 Translator: **The author's first program is translation of English to Yoruba.**

(Tim Wildsmith, 2024).

2026-01-28T19:01:00 Analytics

1. 2026-01-28T19:01:00 At Albertsons Lucky, Charter Square at the Bank of America (BoFA) customer service desk, the German Store Manager, John Holtz, was attending to an Asian father, older son, and younger daughter, who did acrobatics. The word came on Paseo Padre Parkway between Blackstone Way and Seward Drive, on an overhead bridge, Highway 880 south, at the south of the 1st of 4, driving lanes.  
**When is it all he asked for... He persuaded in doing?**  
New Testament

2026-01-10T10:37:00 Interpret

- 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bullywood. Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic, they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

2026-01-13T08:18:00 Biblical Interpreters

1. Reverence to God (Genesis 41:16, Daniel 2:23, Daniel 4:26, Daniel 5:23)
2. Witness (Genesis 41:13, Genesis 41:54, Daniel 5:31)

2025-12-26T15:49:00 **To... the event of the day? Remain.**(Genesis 22:14)

At Milk & Honey Cafe, I was attended to by Amy Hsueh Tm, who previously said, I work here, and Audrey Russell. I saw a young Hindi couple sitting in the north-center. I saw some males, and a single woman at Yifang Taiwanese Fruit Tea, and at Albertsons Lucky, Charter Square. Their nationalities are Chile and Peru.

2025-12-25T12:26:00 Trend Analysis

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
- 1. WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.
- 2. SacredText table: 2025-12-25T12:41:00 **is nearer to the whole set.**

2025-12-24T15:46:00 Word Re-use

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order: tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location — HisWord table, Word column. The surrounding related information is inferred and subjective (Matthew 16:23).

2025-12-25T21:46:00 Time to first frame

When did He define His rule (Genesis 18:19)?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

2025-12-26T21:59:00 Timeline inspector

GetAPage.html Includes performance.now() for AJAX calls 2025-12-26T22:35:00 Initiation and completion. 2025-12-26T22:28:00 We must... schedule one another... as purposeful.

2025-12-28T19:25:00 User Interface API Documentation

2025-12-28T19:30:00 Content

2025-12-28T19:32:00 Why would I ever use this API?

The web pages and their associated web services calls provide examples 2025-12-28T19:37:00 on how a client can access the database.

2025-12-29T21:15:00 How should I use this API?

| Layman                                                                                                                   | Know their God                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases. | Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.                                                                         |
| I used to rely on my education and experience.                                                                           | Now I draw on expert opinion? 2025-12-04T22:00:00 Expert facts. 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. What prepares for the other? |

2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and theorems.

2025-12-05T12:09:00 What did He turn to... as a sage. (2 Chronicles 16:9)? San Jose Market Center: 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.

2025-12-06T15:26:00 What does He associate... with me... and how do I be the guide?

2025-11-23T00:28:00 What have you... used... the Bible for ( John 20:31. Acts 17:11. John 5:39. Joshua 1:8. Daniel 9:2 )?

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text — reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion (Acts 17:11).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?
8. Compare times? For example, during the time the Bible was written, Jews worshiped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 Absent... of the same.

- A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 Can we determine... to be usage?
- Nullable
- Outer join
- Union
- Default
- Like

urlPerformance

1. [webpagetest.org](http://webpagetest.org) In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

Microsoft SQL Server limitations include:

- Microsoft SQL Server database connection string ApplicationIntent=ReadOnly
- On the referencing side, it can only relate to a single referenced entity.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero Zero five eight four one... versus (VS) 5841

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
2. The SQL Server Management Studio table design menu option provides the most flexibility.
3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. [URLMaintenancePage.aspx.cs](http://urlMaintenancePage.aspx.cs) For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 Can I be impartial as others?
  - 2007-08-04 FxCop is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 To what extent do I know the culture of adhered?
  - JSLint: The JavaScript Code Quality and Coverage Tool
  - 2018-01-05 W3C Markup Validation Service
2. Information hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00
  - 1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
  - 2. 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload. 2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customer? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 know is a writing tool... where is the speaker?
  - 3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.

4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.  
5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.  
1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .axms file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.  
2. Application: A dynamic link library [InformationInTransit.dll](#) queries the database.  
3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 [and retrieve the compared God's word.](#)

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).  
The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

[Software Engineering: A Modern Approach](#) by Marco Tullio Valente. Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

- The user enters the word to interpret
- The system determines by using regular expressions the data type of the word
- The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
- The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing  
3b- If the word is a negative integer, the system should inform the user to enter a valid word  
3c- 2025-06-28T22:10:00 If non-English alphabets flag?  
4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

- The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
- The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
- The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
- The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
- The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 [To replicate God's Word?](#)

- WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
- Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 [he relies on his pursuance of the truth](#)

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

| Interest of the users               |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                    |      |   |                                                                                                    |   |                                                       |   |                                                            |

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LNO.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and HaveDecidedToWorkOnAGradualImprovingSystem Databases [are not his input.](#) The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? [Is the monitor... automatable?](#)

lang attribute  
As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 [Who speaks... on... authority?](#)

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
- 1. In 2002, when I started recording the word of God, I modeled the [WordEngineering](#) database, HisWord table.
- 2. In 2007, when I was looking for work, I modeled the [HaveDecidedToWorkOnAGradualImprovingSystem](#) database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 [Conversion Translate](#) (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
  - Spelling corrections.
  - Verb grammar tense.
  - Synonym versus (vs) opposite.
  - Singular versus (vs) plural.
  - Deprecated.
  - Currency.
  - Locality, regional, custom, preference.
  - Anglicized.
  - Religion.
  - Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
  - Personal extension. Longevity. Insertion. Customization. Adaptation.
- [When did he next wave... and when did he section wave?](#)

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

- A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord\_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Codd's 12 rules

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord Table's Word column. This information is later processed logically in the HisWord\_View.

2024-06-15T21:28:00 *What is restriction to the data?*

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 *To what... I exchange... my regard?*

Rule 3: Systematic treatment of null values:

2024-06-18T21:49:00 *Unknown or inappropriate.*

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION\_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

2024-06-20T18:39:00 *It looks at the data as a whole.*

| Structured Query Language (SQL) sublanguage |                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Sublanguage                                 | Command                                | Usage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Data query language (DQL)                   | Select                                 | Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Data definition language (DDL)              | Create or alter or drop schema objects | The create statement is used once for each new object. The alter statement is mainly for an existing object.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Data manipulation language (DML)            | Insert, Update, Delete, Truncate       | Manipulation may fall in the following cases: <ul style="list-style-type: none"><li>• Primary key or unique index duplication. A primary key column may not be null.</li><li>• Invalid datatype or extra large data size or out-of-range</li><li>• Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datatize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.</li></ul> |
| Data control language (DCL)                 | Grant, Deny, Revoke                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Transaction control language (TCL)          | Begin, Commit, Rollback transaction    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00... 2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 *What part of yourself... do I desire as My future?*

Rule 9: Logical data independence:

2024-06-22T17:02:00 *The opinion of someone else... is beside me.*

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposive: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

*What did He dispose of in making man (Genesis 2-7; Genesis 6-3)?*

(Matt Chandoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

Volume, Velocity, Variety

| Keyword  | Commentary                                                                                                                                                                                                                                                        |          |       |      |        |          |          |      |          |            |         |        |         |

| Continuous (measurable) | Date        |

(Jack Hyman, March 2024).

Time for?

- Birth ( Acts 7:20 )
- Family ( Acts 2:31 )
- People ( Matthew 1:9 )

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meet client-side work.
- *What I am good at doing... is what He is good at making.* ( Genesis 41:32-57; Genesis 1:1-1:2; Genesis 4:26 ).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
  1. GetAPage.html serves as a gateway to specialized links.
  2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: *Do you write it as a manual? Do you write it as describing the functionality.* ( Daniel 9:24 )?

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Bibliographies](#)
- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengths between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

- You could say, this is what I do... [Why I do it?](#)
- I have had to balance migrating to an internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
  - [Where are the differences... companion?](#)
  - [Exercise entry... as the same?](#)

Influence

- Data:
  - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
  - For over 2 decades, the author has continuously received word that he constantly records and queries: [Sinuplates?](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
  - Language translation
  - Familiarity with the subject and tradition. Apply domain knowledge.
  - Maturity and relevance to our time.
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our following.](#)
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reorganization may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

[Our companion our trade \( 1 Samuel 25 \)](#). [To be conformable of age.](#)

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ( [Joshua 1:8](#) )

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
  1. HisWord table Word Column: As much as God spoke it
  2. Period of Time tables: With respect to time
  3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
  4. GetAPage.html HisWord section: Time variant
- [For a period of time...we are as we seem we are? What needs a success \( Genesis 4:7; Matthew 14:8; Mark 6:25 \)?](#)

(John Calvin Maxwell, 2023).

[What do I desire...as part of significance?](#)

1. Moses? Prophet ( [Exodus 4:10-16](#); [Numbers 12:6-8](#); [Deuteronomy 18:15](#) ).
2. Abraham? Seed ( [Genesis 17:5](#); [Genesis 15:2](#); [Genesis 22:2](#); [Genesis 22:12-18](#); [Hebrews 11:17-19](#) ).

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was *Itu eyin mi loo to yi*. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozienko).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to \*, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order; Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-grity.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable ( [1 Samuel 3:18](#) )

| For                         | Against        |
|-----------------------------|----------------|
| Prudent                     | Disposable     |
| Hyperlink                   | Diversion      |

What prize at the target?

SQL uses set theory, whereas most programming language clients, including LING, use row processing or procedural programming. Relational operations:

- 1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
- 2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
- 3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is available in:

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause

(Kevin Kline, Regina O. Obe, Leo S. Hsu)

## logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3
sc-status sc-substatus COUNT(ALL *)
200      0      185115
304      0      9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC " -i:w3
```

| url-stem                                                                       | Total | MaxTime  | AvgTime |

## Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is ~176 work hours. A work year is ~2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Reverse.
5. Metric:
  - Executable Size Metric: is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
  - Machine Instructions Metric: This is the size or count of the machine instructions.
  - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, `wc`, command will suffice.
  - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
  - Function Point Analysis (FPA): It takes about 10% of the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
  - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

### Design Specifications

| Strategy                  | Description                                                                                                  |
|---------------------------|--------------------------------------------------------------------------------------------------------------|
| Combine and improve ideas | The author solicits input from others.                                                                       |
| Keep focus on the problem | Database recording resulted from the effort to determine when? The author has concentrated on this timeline. |
| Set a time limit          | Elaborious work is avoided.                                                                                  |

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(DeLean Tolbert Smith).

- To know my part as His?
- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
  - [I have decided to work on a gradual improving system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
  - What are you able to do now that you weren't able to do before? [To recognize the following as I \( 2 Samuel 3:32 \) ?](#)
  - [Who it comes to \( Hebrews 11:24 \) ?](#)
  - [What is the following? List of C-family programming languages](#)
  - [The mechanism of selection people?](#)
  - [What portion of the same do I have?](#)
  - [What I keep member of \( John 17:12 \) ?](#)

Fixing your website's JavaScript performance

- Long tasks:
  1. Yield to the main thread: the [PageLoad](#) event handler performs an [IsPostBack](#) check, and if it is not a [PostBack](#), parses the querystring. 2025-07-12703:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
  2. Optimize your rendering patterns:
    - Eliminating layout thrashing: 2025-07-11718:17:00 [AJAX...only refresh updates](#).
    - Using efficient CSS selectors: The simple 2025-07-11718:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
  1. The author does not use inline JavaScript.
  2. The author minimally uses internal JavaScript for page-specific event handlers.
  3. The author always uses an external JavaScript file. 2432.8, for rendering dynamic data-driven HTML tables and selects. 2025-07-12714:54:00 [What contribution I have... as someone else \( Mark 7 \) ?](#) 2025-07-12716:44:00 [What did He do?](#) [How did I do \( Luke 1:41 Luke 1:46 Matthew 3, John 3 \) ?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abimelech's Law](#) comes into recognition in [GetPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

| Relational Database               | After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.                                                                                                                         |
| Server-side Programming, Back-end | The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable. |
| Programming Style                 | This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.                                                                                                                                                                   |

In Australia, I got involved with the prison ministry at the Villawood Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contract consulting was at the Department of Training Education Committee (DTEC), so I had an understanding of integrating and skilling re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. This influenced my desire to practice authoring Christian literature and improve my communication. How could I relate to less fortunate people? How may I be the one giving? How can I let the Holy Spirit partake on my side? What are these roles for, and how will I be a mediator? What do I share as a bargain? All these are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable, humans are useful. Where does a side take the rest? What I am finding out, is how necessary I am as a person? How do I do my part in participating? What can you take from me, and make as your own? My words may not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you say. When the times, programming lines, lines of code, play out a scenario. So words make meaning as sufficiency. Whose life have I lived to complexity? To the full of His deed ( [John.15:24](#) )? What can His prove relate to me?

2. The result of the bible, is how we use it. The emphasises Jesus Christ and apostle Paul is the word for today! As the author sees from the bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Etemun wrote: Leading up to 2008-03-07, I was fully relying reading the word of the LORD ([Job 23:12](#)) .

- I used to ask God for a word? To realize where my opinion lies?

**Familiarization with data.**

I previously stored your work in a database. You worked on a text in .html files. 2002-10-23 You chose to transfer to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Joshua 22:11](#) )? One of Myself offering as many as I use?

Words heard between waking and walking outside are written in the author's backspace's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for others? Is how I needed Him.

Putting Him into words.

- My time away from the family, United States of America (USA), may have helped me gain independence.
- In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life, secret ours?
- Do I decide the truth? Do I decide the truth?
- The importance of the Word is how it is made.
- Past-clad: God convicted me, I do not take the place of the people to hear. MacArthur BART Station, Bay Street Emeryville BN cable of Fire Alarm Panel 8. FDC Building A 5604-5634. To mean, I decide the story?
- How did they handle the Messiah / Luke 1:38 ? Crossing the divide? To need someone as I? (Genesis 15:2) ? You know Me as capable of you? (1 Samuel 17:36 Romans 4:19)
- The Yordis sentence. Ma fobgon di, ill will use wisdom to book it.
- No difference in comparison.
- How useful you have been in determining wisely? How diversification the changes? (Genesis 4)?

The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar; the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.

When you work with words, you work with words. Words are the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do so how He types me. As I wrote this paragraph, I entered in my own words and sought assistance from Him. A step to do is never forgotten of the LORD. Whose observance has He solved?

- What can we be in the midst of a people, destined to God? (Matthew 19:12)
- What do you know how to use, as you desire vision?
- Rich of God, Reach of God.
- How many are others? (Daniel 11:41) ?
- Have to present God, as I am allowed to be.
- How I want it to be: how He wants it to be? When does the word cannot the answer? (Acts 10:11).

The authors have asked me how I do my work? My twin sibling calls my work, a diary. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether it should personally store my information, or look for a cloud provider? Build or buy? Another thing of mine is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost if power is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we secure our work ([1 Samuel 28:28](#)) ?

? Needs to be met?

The author will record the publishing and receipt.

- An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
- I didn't shift until the movement? (Acts 1:8)
- Did he ask you to do it? (John 8:4)
- To him about Him (Genesis 1:1 Genesis 4:26)
- Timon urgency? (Matthew 26:45-46 Mark 14:54)
- Could you meet one part of Me and not destroy another? Biblical Calendar., Gregorian Calendar.

When can we do without AlphaBetses? A place in the Bible justifies the word.

- O mu Bunmi, Clari re. You know Bunmi, Clari is this. We are inside a building and we heard that food is being given away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center-27 Drizzy sleepy. 20:13 Beni or Buki, I forgot who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
- What past the time ([Isaiah 61:2 Luke 4:18](#)) ?
- What is in use?
- That chooses L. When I read the Bible, I adapt to the role I take.
- Relative to the world ([Proverbs 2:5](#)) :
- If the words do not join? Consider separating or putting the lesser word in the commentary column.
- Do I determine I know?

Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.

- If the font and scenery do not fit exactly, it may be a larger scenario.
- When C++ converts to an integer, it always rounds down, unlike CF. There may be a day discrepancy. To dual own?
- What I have learnt from Bill Gates, through using the software from Microsoft.
- Normalizes the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
- The HisWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
- What value can we attain to this work?

(Howard Gardner, 1983)

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

| Title                    | Description                                                                                                                                     | Commentary                                                                                                                                                             | Universal Resource Index (URI)             |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| Accessor Pattern         | Get and set an attribute by using a property.                                                                                                   | The boundary to a property value. Readonly is achievable by disabling the set method.                                                                                  |                                            |
| Delegation Pattern       | Composition substitutes for inheritance.                                                                                                        | The author does not inherit any class. But the author delegates by using composition to include existing services.                                                     | <a href="#">BibleBook.cs</a>               |
| Factory Pattern          | Create subclasses from one or more methods.                                                                                                     | At runtime, instantiate a variable object.                                                                                                                             | <a href="#">BallFactory.java</a>           |
| Immutable Pattern        | An immutable object is unchangeable after creation.                                                                                             | A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable. |                                            |
| Marker Interface Pattern | The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable. | A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.                                        | <a href="#">BibleBook.java</a>             |
| Singleton Pattern        | Only a single instance is creatable.                                                                                                            | At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.                                                          | <a href="#">SingletonPatternBible.java</a> |

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travin).

personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham ( [Ezekiel 33:24](#) ).
- Consistency with the Bible ( [Genesis 25:23](#) )?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/en-us/mediareference/MdFedBk.aspx>
- 2019-12-07 [http://google.com/books?id=5u0wDesign\\_for\\_How\\_People\\_Think/USFQDwAA0BA7N?emq=oboyv1&printsec=frontcover](http://google.com/books?id=5u0wDesign_for_How_People_Think/USFQDwAA0BA7N?emq=oboyv1&printsec=frontcover)

Separating realizable

- Baptism of John... Baptism of the spirit ( [Acts 2:1](#) )
- Dead... resurrection ( [Hebrews 11:12](#) )
- Ishi, husband ( [Hosea 2:16](#) )
- Antichrist ( [2 John 1:7](#) )

No separation... in London. What did He ask for unity in? land, man, Man, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel ( [Genesis 2:8](#), [Genesis 2:15](#), [Genesis 3:23-24](#), [Genesis 4:10-12](#) )
- Jesus Christ: Church - Peter ( [Matthew 16:18](#) )
- You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in.( Numbers 3:8, Numbers 24, Romans 1, Acts 13:38 )

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ( [Genesis 15:13](#), [Acts 7:6](#) )
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau ( [Genesis 25:26](#), [Genesis 27:5](#), [Genesis 28:22](#), [Genesis 31:38](#), [Genesis 31:41](#) )
- Children and grandchildren: Benjamin, Joseph, Judah ( [Genesis 42:36](#), [Genesis 43:14](#) )

This word must make remainder necessary. Does He use people as Him?

| Word              | Actor        | Scripture Reference                                                                                                                               | Probability |

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?  
Ratio percentage versus (VS) quantity? At 3 for 97 GroupPrice.com  
In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness ( [Daniel 5:5](#), [Daniel 5:11](#), [Daniel 5:26](#), [Daniel 5:30-31](#), [Genesis 4:3](#), [Genesis 4:8](#), [Genesis 4:12-14](#) )
- Quantification ( [Daniel 6:5](#) )
- Original self ( [Daniel 5:12](#) )
- How we let Him know ( [1 Corinthians 5:7](#), [Acts 23:5](#) )?
- Isn't not a...  
I want not a... user meaning there are...  
A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming ( [Genesis 2:19-20](#), [Genesis 2:23](#), [Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25-26](#) )
- Reverence ( [Genesis 4:26](#), [Exodus 20:7](#), [Deuteronomy 5:11](#) )
- Interpret ( [Genesis 37:9](#), [Hebrews 11:23-30](#), [Daniel 5](#) ) to each entirely its own.

2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.

1. 2024-07-12T06:25:00 How much period... we have the same?
  - Telis integrates programmable script and audio recording. MP3 is an industry standard.
  - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give descriptions?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM).

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side... the decider.

1. IBM PC compatible:

- At Central Piedmont Community College (CPEC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How to verify the work of the spirit?

- Is it compatible with the Bible ( [John 10:30](#), [John 17:22](#), [1 John 5:8](#) )?
- Is this a link ( [Genesis 41:32](#), [1 Corinthians 15:45](#), [Acts 9:3](#), [Genesis 5:3](#) )?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a... result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible ( [Daniel 5:31](#) )?

1. When is the Bible specific about time ( [Genesis 41:32](#), [Genesis 41:4](#), [Genesis 41:5](#), [Genesis 41:9](#), [Genesis 41:11](#), [Genesis 41:26-32](#), [Genesis 41:34-36](#), [Genesis 41:43](#), [Genesis 41:46-48](#), [Genesis 41:50-54](#) )?

How admissible is the word ( [Genesis 41](#), [Daniel 2](#) )?

GoldPaye.html depends on the word.

What did I fit into a place?

1. Ark of the Covenant
2. Temple
3. Jerusalem
4. Judah
5. Israel

What did He see Himself as?

1. Joseph ( [Genesis 37:9](#) )
2. Moses ( [Acts 7:25](#) )

Robert Law Joss

- 2024-06-05T04:49:00 Technically... reliable? Maturity... saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.

Effect of the Progress ( Luke 1:1-4, Daniel 9:22-23 )?

- 1...many ( Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2 )
- Here at the same ( John 15 )

When did Israel seek no region as its own ( Acts 1:6 )?

1. The prophets
2. New Testament
  1. The Gospels: King of the Jews, the disciples
  2. Pauline Epistles, General Epistles
  3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have stored using people as myself.

- The database is not currently multi-user. The WordUnion table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnGradualImprovingSystem database offers multi-user support.

- The bulk of the work is query.
- There are input, processing, output. How is your task...duplicable?

2024-11-20T05:38:00 Ordering

2024-11-20T07:59:00 Do I make a separation between physical and spiritual?

- Forerunner: Jesus and John the Baptist ( Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13 )
- Levitical priesthood ( Hebrews 7:14, 1 Samuel 3, Numbers 3 )
- Sitting on a high place: Humble... exalt ( Luke 14:7-11 )
- Baptism: Washing of feet ( John 13 )
- Marriage: Younger before the firstborn? ( Genesis 29:26 )

What will count, forever?

| Word                                        | Scripture Reference                                                                                                                                                                                                                                                                                                                                                                                                      |

What I use people for ( Job 35:6-8 )?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful ( Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2 )

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said. What are the other activities of God? The spirit of God moved. He saw it was good ( Genesis 1 ). When one finds good? That is the meaning ( Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26 ). We demonstrate...how we are. It is not misleading...That is the deception ( Revelation 12:18 ). Appreciate as ( Matthew 16:18 )?

What is the supplement?

| Word                 | Commentary                                            | Scripture Reference                                |
|----------------------|-------------------------------------------------------|----------------------------------------------------|
| Greatest Commandment | Love the LORD thy God. Love thy neighbor as thy self. | Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31 |
| Forerunner           | The law and the prophets were until John              | Luke 16:16                                         |

Is this generation the same?

| Word     | Scripture Reference        |
|----------|----------------------------|
| Seed     | Isaiah 53:11, Genesis 3:15 |
| Lead     | Matthew 23:9, John 15:15   |
| Interval | Hebrews 11:39-40           |

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present ( Deuteronomy 32:8 )?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way ( Genesis 1:26 ).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

| Actor  | Commentary        | Scripture Reference |
|--------|-------------------|---------------------|
| God    | Man               | Genesis 1:26-27     |
| Adam   | Helper            | Genesis 2:18-25     |
| Eve    | Seed of the woman | Genesis 3:15        |
| Leader | Successor         | Acts 26:28          |

What is according to time?

| Word                                      | Scripture Reference                                        | Commentary                                                                                                                                                                                                                                                                                                                                             |      |                     |            |              |                                                            |                          |        |               |  |      |                                   |  |

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer)

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

- Autobiography

| Do you know mine? ( Deuteronomy 18:15 ) |                        |                                                      |
|-----------------------------------------|------------------------|------------------------------------------------------|
| God                                     | Actor                  |                                                      |
|                                         | Moses                  | Jesus                                                |
| Name                                    | Jehovah ( Exodus 6:3 ) | Father ( Matthew 23:9 )                              |
| Place of Origin                         | Egypt ( Exodus 2:19 )  | Bethlehem ( Matthew 2:1-18, Luke 2:1-20, John 7:42 ) |

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?  
2025-04-1700:00:00 Epoch timestamp: 1744848000  
2025-04-1705:22:00 Place grouping...man grouping 2025-04-1804:06:00 ( Genesis 48:4 )?  
2025-04-1706:16:00 Do we choose...a realization of him?  
2024-07-09T18:30:00 He has always and it is... context of time.  
2024-09-15T13:39:00 How our part...is never...design as lasting?  
2022-08-08T19:00:00 Dispossess the Devil?  
2024-07-23T09:22:00 To be as Abraham...Nation.  
2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.  
2022-10-08T11:08:00 To work as a part of Me?  
2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture ( Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5 )

What I am rendering? To what particular use...is me ( Matthew 16:18 )?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony ( Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45 )?

What is the reward of the past?

From that day ( 1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 77:46, John 11:53 )...

1. Salvation ( Exodus 14:13 )
  2. Commit ( Luke 23:46, Psalms 31:5 )
- What personifies the time?
1. First and Last Adam ( 1 Corinthians 15:45 )
  2. Firstborn ( Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23 )
- What does authoring the word do? To shed as much light as our opening ( Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11 ).
- Why computer cannot be our part2 AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love. I have won. Including love their own father.
- What I do see able to leave the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. ( 1 Timothy 6:17 )

Where do I call on change?

| Word  | Commentary                                                                    | Scripture Reference |
|-------|-------------------------------------------------------------------------------|---------------------|
| Actor | The law and the prophets: Can I prepare man for an event of time?             |                     |
| Event | When does man decide His future is as reminded? Connecting the past as I use. | Genesis 1, John 1   |

To Reckon as Size

- Light ( Genesis 1:16 )
- Sabbath ( Genesis 2:2-3 )
- Autonomy ( Genesis 4:9 )

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does the want as a set? O pe. In Yoruuba?
  - Complete
  - Late
  - Call
  - Thanksgiving

Where am I, as a human being?

- The life of appointing something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword Noun.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I collaborate fact with what I know?

On behalf of someone, I seem

What did He see Himself as?

What did He see Himself as?

| Alias        | Scripture Reference |
|--------------|---------------------|
| Son of God   | Matthew 16:13-20    |
| Son of David | Matthew 22:42       |
| Son of Man   | 1 Corinthians 15:45 |
| Word         | John 1              |

There is more to you, than you are. ( Ephesians 3:18 )

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

| Type  | Commentary                            |
|-------|---------------------------------------|
| Man   | Election - Did He share His hope?     |
| Place | Promised Land - Where I will inhabit? |

As the Open?

| Actor        | Commentary                          | Scripture Reference             |
|--------------|-------------------------------------|---------------------------------|
| Adam         | The first man will need a companion | Genesis 1:26-31, Genesis 2:6-25 |
| Jesus Christ | Transformation of the spirit        | John 3                          |

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: ISNull, Edgop
- Questionnaire: BatingBank InDefine

Prepared for Time

- 
- The diagram illustrates the relationship between a base class (**Woman**) and its subclasses (**Woman0** and **Woman1**) in a class hierarchy. The base class **Woman** is shown at the top, with its prototype and attributes. Below it, the subclasses **Woman0** and **Woman1** are shown, each with their own prototypes and attributes. Arrows indicate the inheritance of attributes and methods from the base class to the subclasses.
- Woman prototype:**
- constructor: **Woman()**
  - length: 5
  - name: "Woman"
- Woman0 prototype:**
- name: "Woman0"
  - father: "God"
  - mother: null
  - title: "First son"
  - profession: "Gardener"
- Woman1 prototype:**
- name: "Son"
  - father: null
  - mother: null
  - title: "Mother of all the living"
  - profession: "Helper"
- Arrows indicate the inheritance of attributes and methods from the base class to the subclasses.

SQL Server Execution Plan  
(Grant Fritchey).

[SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis 22, Daniel 9:24-27, John 1:1, Jude](#)

ScriptureReference.spl ScriptureReference.splplan ScriptureReference.png

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK\_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the `IDX_Scripture_VerseIDSequence`, since the where clause is on the `VerseIDSequence` column. The `IDX_Scripture_VerseIDSequence` indexes on the `VerseIDSequence` column; it is not a covering index, since the `Select` column-list includes the `BookID`, `ChapterID`, `VerseID`; therefore, the PK `Scripture` is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

### Artifact Description

[2019-10-05ArtifactDescription.htm](#)

## Background

The author's country of birth, Nigeria, gained independence on 1960-10-01, a **Biblical generation** before the end of the second **millennium / rural millennia**. There are 2570 days between 1960-10-01 and the author's date of birth, 1967-10-15. Nigeria became a republic on 1963-10-01; The difference in days between when Nigeria became a republic, 1963-10-01, and 1967-10-15; is 1475 days; 4 Biblical years, 1 month, 5 days; 4 Gregorian years, 2 weeks. The difference in days, between the creation of Lagos State, 1967-05-22 and the author's date of birth is 141 days (4 biblical months, 21 days) (4 months, 2 weeks, 4 days).

1984-10-17 is 75 Biblical years in the author's 17th Biblical birthday ([Genesis 12:4](#)).  
1984-07-15 is the date of the author's 17th Biblical birthday ([Genesis 37:2](#)). The date of recording this information was 2010-10-23, Epoch timestamp: 1603454400

Jesus Christ began his ministry at the age of thirty, and the estimate is that He served for three years ([Luke 3:22](#)). The author was born on 1967-10-15 thirty-three years before the end of the second millennium. 1967-10-15 = 117665 days (32 biblical months, 15 days). 117665 days = 1960-04-15. 1960-04-15 + 33 biblical years = 1993-04-15. 1993-04-15 is the date of the author's 33rd biblical birthday which will occur on 1993-05-15.

1967-10-15 is the date of the author's 33rd biblical birthday which will occur on 2000-04-14. Between 1967-10-15 and 1968-04-04 are 172 days (3 biblical months, 22 days) (5 months, 2 weeks, 6 days). Between 1967-10-15 and 1968-10-15 are 366 days (1 biblical year, 6 days) (1 year, 1 day).

1967-10-15 is the date of the author's 33rd biblical birthday which will occur on 2000-04-14. Between 1967-10-15 and 1968-04-04 are 172 days (3 biblical months, 22 days) (5 months, 2 weeks, 5 days). Between 0032-04-06 and 1967-10-15, is 706933 days (1963 biblical years, 8 biblical months, 15 days) (1935 years, 6 months, 1 week, 1 day) (49,092,708,333 Biblical operations, 204,529,761 weeks of biblical years).

**Marc 5:26.** The age of **twelve**. Jesus Christ, His father and mother, worshipped at the temple, in Jerusalem. The author worshipped at Saint Edward's Catholic Church from 2007-07-01, 3.5 Biblical years, after coming to the U.S. ([Luke 2:42](#); [Matthew 9:20](#); [Mark 5:25](#); [Mark 5:42](#)). The author devoted to Nigeria, occurred in 1988, twelve-years, before the beginning of the third millennium; and forty-years after [Israel's](#) independence. The author first visited the United States of America, as a twelve-year-old; he was relocated to Australia before the age of twenty-four. Deported at the age of twenty; and returned before turning thirty-two; a twelve-year period ([Nehemiah 1:54](#)). 2021-02-12 What should I, later do? ([Psalms 64:12](#)). Decoy Territory, South Center. Past the house of James. What are beyond out party? Merit the word. The birthday of biological month is 1948-01-12. The birthday of paternal aunt is 1948-01-30. The average day of the month is  $(30 + 12) / 2 = 21$ . I was deported as a 20 year old, just prior to my 21st birthday. When you become a man, can you form a man's life with 40 years. 1961 - 916 = 759. Between 1999-01-22 and 2006-06-12, there were 7812 days (21 biblical years, 8 Biblical months, 12 days) (21 years, 4 months, 3 weeks). 360 - 12 = 4320. The author's age is 228. 4320 divided by 228 equals 19. 4320 divided by 19 equals 227.368. 12PM, the elapsed time is forty three thousand, two hundred, four hundred, 4320 seconds. The author's ancestral home is Ife-Ife, a place of his sages. When the author's paternal parents re-located to the United States of America (USA), the author re-located to Ife-Ife. Lagos is the economic capital of Nigeria, and Ife-Ife is the center of the Yoruba land. The author re-located from Saint Paul's School, University of Ife, as a nine-year-old; to Lagos, a two-hour journey. Abati Nursery and Primary School: 1967-10-15 + 9 Biblical years = 1967-10-15 + 3240 = 1976-08-28. In February 1992, the author started work at [Information Dialling Systems \(IDS\)](#) White International London.

The singular word, centurion, occurs twenty-one times in the Bible; its plural word, centurions, occurs three times in the Bible; therefore, centurion(s), occurs twenty-four times in the Bible.

In Australia, the author first worked at:  
Australian Army Headquarters Training Command

Suakin Drive  
Georges Heights NSW 2088  
Telephone 61 2 9960 9452  
Fax 61 2 9960 9452

The word, covenant, occurs twenty-four times in the New Testament. The word, marriage, occurs sixteen times in the New Testament.

The United Nations began on 1945-10-24, between the 7th and 1988-10-15, are 15697 days (43 biblical years, 7 biblical months, 7 days) (42 years, 11 months, 3 weeks).  $(24 - 20) / (70 - 20) = 8\%$  (Numbers 1:3, Psalms 90:10).

Biafra commenced on 1967-05-30, and 1967-10-15 is 138 days, after

Between when Summer traditionally begin, June 21, and October 15, is a span of (3 months, 3 weeks, 3 days)

Between September 22 and October 15 is 23 days (23 days) (3 weeks, 2 days)

Between October 15 and when Winter starts, December 21, is a span of 67 days (2 biblical months, 7 days) (2 months, 6 days)

Between October 15 and when Winter ends, March 20, is a span of 157 days (5 biblical months, 7 days) (5 months, 5 days). During leap years, between the preceding October 15 and May 7, are 205 days (6 biblical months, 25 days).

Military Occupation Six-Day War was fought between 1967-06-05 and 1967-06-10. I was born on 1967-10-15, and 9 Biblical months, before that, then, was, 1967-01-18. Between 1967-01-18 and 1967-06-10 is 143 days (4 biblical months, 23 days) (4 months, 3 weeks, 2 days).

2. Bilingual years, after I was born, is 1969-10-04, Israel was accepted to the United Nations on 1948-05-11, between then and 1969-10-04, is 7541 days (20 biblical years, 8 biblical months, 11 days) (20 years, 4 months, 3 weeks, 2 days). The adoption of the United Nations Partition Plan for Palestine occurred on 1947-11-29, between then, and 1969-10-04, is 7980 days (22 biblical years, 2 biblical months) (21 years, 10 months, 6 days). The 1948 Arab-Israeli War commenced on 1948-05-15, between then, and 1969-10-04, is 7812 days (21 biblical years, 8 biblical months, 12 days) (21 years, 4 months, 2 weeks, 4 days). The 1948 Arab-Israeli War ended on 1949-03-10, between then, and 1969-10-04, is 7513 days (20 biblical years, 10 biblical months, 13 days) (20 years, 6 months, 3 weeks, 3 days).

Approximately, the author became a few, eight, eight days after election, on 1967-03-15. Between when Israel became a nation, 1948-05-14, and 1967-03-15 is 6879 days (19 biblical years, 1 biblical month, 9 days) (18 years, 10 months). Between when United Nations Partition Plan for Palestine 1947-11-29, and 1967-03-15, is 7046 days (19 biblical years, 1 biblical month, 26 days) (19 years, 3 months, 2 weeks). Between when the American Revolutionary War began, 1775-04-19, and 1967-03-15, is 70591 days (194 biblical years, 8 biblical months, 11 days) (191 years, 10 months, 3 weeks, 3 days). Between when the American Revolution ended, 1783-09-03, and 1967-03-15, is 67032 days (186 biblical years, 2 biblical months, 12 days) (183 years, 6 months, 1 week, 5 days). Between when the American Revolutionary War ratification was effective, 1784-05-12, and 1967-03-15, is 66870 days (185 biblical years, 6 biblical months) (182 years, 10 months, 2 days).

Between the beginning of the 400 Silent Years and 1967-10-15, are 864,455 days.  
Between the end of the 69th week, 0032-04-06, and 1967-10-15, are 706935 days (1963 biblical years, 8 biblical months, 15 days).  
Between the end of the 70th week, if there had been no interruption, 0039-03-01, and 1967-10-15, are 704415 days (1956 biblical years, 8 biblical months, 15 days).  
Between 1967-10-15 and 2020-06-03 are 19235 days (53 biblical years, 4 biblical months, 25 days) (52 years, 2 months, 2 weeks, 5 days).

The Yoruba tribe speak the Yoruba language and the Yorubas are in the South West of Nigeria. The Yorubas practice the Christians and Moslems religions. The East of Nigeria include the Ibos who speak the Igbo language and are mainly Catholics. The Hausas and Fulanis are in the North of Nigeria. At the Highway 880 South-Eastern Exit, the road connects into Abuja, the Alameda Boulevard, West direction, and Esplanade Boulevard, East direction.

The author's primary languages are English, a Gaelic language, and Yoruba, a language spoken by western Nigerians. Between the age of twenty and twenty-four, the author developed Kowe, a word and graphic processor. Kowe is an editor, for typing; Kowe's innovation, is that the typical can type Gaelic alphabets by using the function keys combined with the alternate, control, and shift keys. Line drawing is also possible with Kowe. Kowe will translate languages. Between 1979 - 1998, the author pursued his Doctorate at the University of Wollongong, New South Wales (NSW), Australia, and he visited Willavood Detention Centre, a place for illegal migrants and asylum seekers, every Friday, as a Christian missionary. In Ghana, he had a similar experience, and he met and befriended a number of African and Asian migrants, to share their experiences with the rest of the world. However, the Internet, was still in its infancy, and the author's knowledge was lacking. Also there were only dial-up access, at that time; and the inmates at Willavood, did not have computer access.

Like Jacob, the author's biological father is the second born, and the author is the second twin. **Debra B. Facing Adversity, Building Resilience, and Finding Joy**. I lived in Australia, Down Under, which is in the Asia-Pacific geographical region, for seven years; we can see a demarcation, West and East Germany, North and South Italy. Tukono is the author's biological father's fourth child, and she gave birth to twins.

**Message of the Innocents**. 1967-10-15..1967-12-28, 74 days (2 biblical months, 14 days) (2 months, 1 week, 6 days). 1966-12-28..1967-12-28, 291 days (9 biblical months, 21 days) (9 months, 2 weeks, 3 days). 2003-12-28..2004-07-11, 196 days (6 biblical months, 16 days) (6 months, 1 week, 6 days). 2004-07-11..2004-12-28, 170 days (5 biblical months, 20 days) (5 months, 2 weeks, 3 days).

| Time Span   | 731 days (2 biblical years, 11 days) (2 years, 1 day)                                                                                                    |
| Prophecy    | We need to replace the cook top as the current is too old and not worth fixing. Cost will be \$659 supply and install of cooktop and dispose of old one. |
| Fulfillment | Joshua 6:26 Shimon Peres.                                                                                                                                |

Autobiography

2024-12-25T19:12:00 Bimpe Bakarar Lawal returned my telephone call. Bimpe Bakarar Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
    1. An African American female senior, Gayle.
    2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
    3. Michael Foke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
  - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 What estranges... of the people?
    - I planned to build a traffic light for my project.
  - In a multicultural church where I was part of the congregation, Bernie Alsaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
  2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

- They had varying mother... but one father ( Genesis 32:28 ).
- 2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
- 2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?
1. Post 6-year-old re-location from Ile-Ife to Lagos
  2. Captain of the Nigerian national hockey team
  3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
  4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
- Where did he serve... a people?
  - Where did I... remove myself from the past ( Genesis 31:41 )?
  - What apart... are new?
  - Summation time... to reality?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
  1. In the year 2024, the author will turn 57 years old.
  2. In the year 2024, Faith An Yao will turn 18 years old.
  3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same... as me? I was setting trainings on how to... place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism... we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
  - I contracted at SunHealth Corporation. I added report columns. Legal (8.5 x 14 inches)
  - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
  - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has he made ( Genesis 32:28 Genesis 5:3 Genesis 4:12 )? What word reminds ( Mark 11:23 )?
