- Prophecy and Fulfillment
- Autobiography
- State of Writing

```
FROM Bible..Scripture
)
select cnt = count(*)
from cte
The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philimon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
```

is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SoC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Master](#) who noted that the first occurrence of the word, [love](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The Exact result for the author's initials, KAA, is Karkaa, meaning [floor \(Joshua 15:3\)](#).
2026-03-30T11:30:00 I will assist if life doesn't share us apart... turned up exact.' [Genesis 1:16](#)? [Helel](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

```
SELECT COUNT(BibleWord) FROM Bible..Exact
```

is for determining the word count. The SQL statement

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
```

is 789631; this is the count of the words in the KJV Bible.

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember APass](#), [ActToGod](#)

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English [which is being interpreted](#) ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 4:36](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedence mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [http://translate.ooole.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And the meros is the money convert.](#)
2. 2015-11-03T02:17:00 [The specifics, a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column [and loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3-5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2-4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the ([UTC-08:00](#)) [Pacific Time \(US & Canada\) time zone](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The HisWord_view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Misgar](#), [Hebhrachi method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Konia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ([Luke 4:19](#)).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

Scales & Measurements		
Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	- Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us. - Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	- This may be the physical count of word occurrences in the Bible. - The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. - The SQL COUNT() function returns the number of rows that matches a specified criterion. - The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	- In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. - An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. - The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. - The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	- Military ranks - Mohs scale for hardness (geology) of minerals - Scofield scale for the strength of peppers - Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response Turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	- HTML input range - CSS percentage

(Joe Celko, 2025-03-07)

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VersionID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()

Determination is achieved through computed columns.

(Allen G. Taylor, 2024)

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)</pre>
Extremal query	It returns either the minimum or maximum extreme.	Statistics	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)</pre>
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	<pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	<pre>SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts
Principle 2: Check Assumptions

- This whole thing started with keeping [a work reference](#).
- Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
- The author depends on a typing assistant.

Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:

- Data loss or corruption because of issuing the database modification command and lack of timely archiving
- Hardware, software, or network failure
- [Vendor withdrawal of support](#)

Microsoft:

- Introduced .NET core and Model-view-controller (MVC).
- Inability to restore deprecated Microsoft SQL Server backup versions.
- Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
Principle 6: Define Time Horizon
[What period has God used?](#)

- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ([Numbers 1:3](#) [Luke 2:42](#)).
- On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ([Numbers 4:30](#) [Matthew 2:16](#)).
- In the year 2007 — generation time span: this masticurbation will bring water. My 40th year ([Numbers 14:33-34](#) [Numbers 32:13](#)).

Principle 7: Generate Multiple Solution Options
[How versatile am I...at attending others? I have to relay my perception to technology providers.](#)
Principle 8: Design Around Constraints
[Relational databases offer the ability to set constraints.](#)

- Data type
- Nullable
- Primary key and unique index
- Foreign key

Principle 9: Weigh the Pros and Cons

- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BitMapWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 - 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 - 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author; the WordEngineering database size, is currently 33351360 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1050.2
sp_spaceused	The WordEngineering database currently uses 32569.69 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 121880.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. Most select equates to Bible ..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <=, <, <=>, !=, <,>, >=, !=	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. In most cases, rarely is this in use ..!< or/and !=>. This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Outcrops for a date or number will search for particular types.
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later link to capped rows .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction "%%"
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, >=, <>
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.

- State of Writing

- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository

Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects. Each web page mainly contains 2025-11-29T08:56:00 the minimalist page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <https://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <https://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nonTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DatedFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <https://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordCoast/DonFeedAtBible.html> 2023-02-17...2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. <https://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432.js>

```
fetchJender: async function
(
    fetchJuri,
    fetchRequest,
    callback,
    uIdisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        datatype: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchJuri,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uIdisplay, rowColumn);
        })
        .catch (e) {
            uIdisplay.innerHTML += e;
        }
    }
};
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages

Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordUnion/GetAPage.html> calls the [https://github.com/KenAdenji/WordEngineering/WordUnion/9432.js](https://github.com/KenAdenji/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432.js) sAjax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Thsuv](#)
- [Results and Discussion](#)

- [State of Writing](#)

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultSetTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers. What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.

1. The author extracts knowledge from data; by finding meaning to the word.
2. The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
3. The actionable insights take, so far, is to computerize the work.
4. The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
5. The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

1. Empirical, find implication from the Bible?
2. Theoretical, to determine a better way to doing work?
3. Computational, is human labor replaceable?
4. Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

1. The Bible is our primary source of data.
2. The author records information sources. This is either a person or media?

What you can do with Data

1. Data Acquisition: The Bible is available on the Microsoft Access database.
2. Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
3. Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
4. Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service, .asmx file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The .html presents the result in a human readable format.

Defining Data

1. Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
2. Qualitative Data: These are rarely measurable and are personal interpretation.

A brief introduction to Statistics and Probability

At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses.

(Microsoft)

Data

Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

Standard

The author imports complete, not NULL nor empty data, such as the Bible and the dictionaries. The author achieves data validity by constraining and restricting inputs. Since this is not a commercial work, Key Performance Indicators (KPIs) are not vital. The author references and is not tampering with authoritative Bible work; this helps to make sure correctness - accuracy, consistency, integrity. Timeliness is effectual in the single user data entry table, HisWord.

Unified Modeling Language (UML)

Class

The information which the author documents in this section of the paper; is the Data Declaration Language (DDL) and Data Dictionary, which is available at [Github.com:SQLServerDataDefinitionLanguageDDL_Repository](#). The Data Manipulation Language (DML) is too large to fit into the Github.com repository, and it is intellectual property. For the people that have access to the database, this private information is available by generating the database script.

Contact is a primary entity, and it identifies the people and organizations that the author has a relationship with. These affiliations are family, friends, business, or public service links. Also recordable are their street, e-mail, web addresses, and telephone numbers. The author stores the various information exchanges with these people. A known date of birth, is for notification of the subject's birthday and relative age. To keep up with the privacy and sensitivity of this personal information, the author is not sharing this highly confidential data.

The relationship between a contact and its related information is one-to-many; that is a contact may have multiple addresses. The other 2 types of relationships are one-to-one, and many-to-many.

A URL is a link to a web resource that will add to the audience's knowledge. The author notes the address and the date, when the author became aware of this information. The content at an address is either textual, audio, video, or image? For URIs, the author rarely explicitly specifies the entire http protocol and directory post-fix, /. An incomplete address will not validate as an input url type. The author only records the [Wikipedia](#) address' at the place of reference since it is easy to associate the title with the Wikipedia address.

Exists or does not exist? The transect-sql exists clause is useful for checking the existence of an object and if so, drop the object. This is applicable prior to re-creating the object. Please note that the metadata information is lost and the create or alter statement supercedes this approach. The exists clause is also useful in queries for determining the existence of a resultSet.

These classes are important asset for the anniversary triggers; in the Remember entries.

Database and Application Server Source Files

The author chose a multi-tier architecture for building the application. The database layer is made-up of tables, views, stored procedures, functions. The database tables are easily storable and movable to other storage media. The SQL Server's data definition language (DDL), now supports DateTime2, and its date range extend between January 1, 1 CE through December 31, 9999 CE. Some dates in [Wikipedia](#) mention these dates. The HisWord_view contains computed columns, which depend on entries in the HisWord table. The author extracts database information by building query statements.

The application layer is the bridge between the user interface layer and the database layer. The application layer compiles into a single [Dynamic-link library](#) (DLL), called InformationInTransit.dll. The application layer consists of four namespaces, namely, InformationInTransit.DataAccess, InformationInTransit.Processing, InformationInTransit.ProcessLogic, InformationInTransit.UserInterface. What the author builds on the server; is accessible to all the clients. What is the lifetime of this code, and what neutrality does it condone? The author started out with [vbASE II](#). The lines of code for the application layer are in the C# and embedded SQL.

Client Browser Source Files

- [HTMLS](#) (.html)
- [JavaScript](#) (.js)
- [Cascading Style Sheets](#) (.css)

The .HTML files will work in all browsers; that support AJAX. Most of the interactive web pages are reliant on JavaScript to work, mainly because they use Ajax to interact with the server. Each .HTML file, performs specific task, and may have a corresponding back-end associate, web service. The unobtrusive JavaScript file [\\$432.js](#) contains re-usable code that is not .HTML files specific. The .HTML files originally contained the .CSS specifications; however, the author now places styling information in a single external file, [\\$432.css](#). This will reduce the sizes of the .HTML files, and it helps to achieve a consistent user interface.

The work of the author is interactive, and there are links to questions and answers pages. Most of the input entries are textual, but some are numeric, datetime, select options. The answers are mostly in tabular format.

(Vaibhav Verdhnan).

A HTML document contains:

- Text content: The author informs the reader by describing His word.
- References to other files: The author refers to external files, such as UML images.
- Markup:
 - Elements: The anchor tag is the most specific.
 - Attributes and Values: The author benefits from the introduction of the customizable data- prefix attribute.

(Elizabeth Castro).

Cascading Style Sheets (CSS)

- Base Rules: A base rule is an element and not a class nor ID selector. The author does not use CSS Resets. The author issues element selectors for the html, body, table and row.
- Layout Rules: There are no layout rules, such as header nor footer.
- Module Rules: The table of content (TOC) is for page navigation that the author offers using class names.
- State Rules: A state rule is for toggling, such as using Javascript to set the visibility.

(Jonathan Snook).

Web Services

There is standardization on the first .NET web services architecture, ASMX.

(FrederikBulthoff, 2019) In most cases, there is a one-to-one mapping between the .HTML, ASMX, .CS files, and the database relational table, Bible.Scripture. For simplicity and clearance of use, the .HTML and ASMX files, support one operation. GetAPage.html is the workhorse for word utterances. GetAPage.html will send AJAX requests to multiple ASMX files and operations. GetAPage.html is a cumulation of separate .HTML files. All the web services files support the SOAP request format and return JSON. JQuery accepts the POST, HTTP verb. The author straggled the data he passes to the web service in the body of the message. Errors are unforeseen, in the rare case, the author logs errors on the back-end, and display quantitative message. Security is lacking; this is permissible; since the author only queries information.

The web service code, asmx, file is not necessary, does not have a place, when there is no server database access ([Numbers 19:2-2](#) [Chronicles 15:3](#) [John 15:25](#) [Romans 2:12](#) [Romans 3:21](#) [Romans 3:28](#) [Romans 7:8](#) [Romans 7:9](#) [1 Corinthians 9:24](#) [Hebrews 9:22](#)).

The Web Service Description Language (WSDL) is available, for example, by specifying the URI, [AlphabetSequenceWebService.asmx?WSDL](#). To generate a proxy code, issue the following command; wsd.exe /language:C# /namespace:InformationInTransit.ProcessLogic /out:"AlphabetSequenceWebServiceProxy.cs" http://localhost/NordEngineering/NordUnion/AlphabetSequenceWebService.asmx?WSDL. The Web Services Discovery Utility (disco) command: disco.exe "http://e-comfort.e-phrasiatech.com/NordEngineering/NordUnion/AlphabetSequenceWebService.disco" will generate the companion files; AlphabetSequenceWebService.disco, AlphabetSequenceWebService.wsdl, and results.discomap

A lecture of our beginning. (Hafida Ha' 2016) The business rule is storable and processable in C#, C++, source files. The dynamic link library, (.dll), is callable from everywhere. GetAPage.html computes AlphabetSequence from a simple logic, which is easily representable everywhere. The AlphabetSequenceIndexScriptureReference is retrievable from the Bible, using non-complex SQL query. The BibleWord and HisWord reference, requires substantive query. The Bible dictionary returns dataset from the local database. The author can not make a business decision, to go to a web service, to retrieve what is locally resideable.

Database Size

The usp_DatabaseLogSize stored procedure is for determining the size of the databases data files; and it is available at [T-SQL to find Data Log Size and Other Useful information -SQL 2000/2005/2008/82](#).

Database Size					
Name	Data Files	Data MB	Log Files	Log MB	Total Size MB
Bible	5	304	1	82	386
BibleDictionary	5	38	1	17	55
WordEngineering	5	138	1	1816	1954

Database Standard

Database Design

1. The relational model is for storing information in tables.
2. The author normalizes data using Object-relational mapping.
3. All the databases are OLTP (Online Transactional Processing), not OLAP (Online analytical processing).
4. Avoid deadlock occurrences by not permitting user database updates.
5. All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
6. Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

1. The secretive web.config file contains the database access information.

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prospecty and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

2. The web.config file does not explicitly mention the user login name nor password.
3. Give access rights to roles, not to specific login identities nor user names.

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asea Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use ~~CSS sprites~~ since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification, because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)

- State of Writing

- 2. Attach
- 3. Snapshot
- 4. SQL Server Data Definition Language (DDL)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.
(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eohraimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4190610/designing-rest-api-endpoints-nath-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweighs the reverse of the JSON transport medium.
- HTTP Status Codes: jQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.
When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += ((int)word[index] - ascIIA + 1);
    }
}
```

The cost of executing the for loop is O(word.lengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.
The author is comfortable and familiar with using datasets and databfiles for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.asmx	Query(word)
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.asmx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.asmx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the GitHub.com version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 - git status

Steer

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization? The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.

This research largely deals with structured data that is put in a relational database. The word is easily associative with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date tables. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

The Terminology of Machine Learning in Relation to AlphabetSequence

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

A type of us: is a kind of us? GetAPage.html is Bible specific.

GeaPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.

HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The `data-` attribute is user customizable

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self

Bias? Being the other?

Search engine o

Elements

It is only recently that the author has become aware of HTML composition

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1...H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. <u>When did He promise operational growth?</u> Psalms 22:30 , Genesis 3:15 , Genesis 12:7 , Genesis 13:15 , Genesis 15:13 , Genesis 15:18 , Genesis 17:8 , Genesis 24:7 , Genesis 26:3-4 , Isaiah 53:10 ."?
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

Literature Review

Reading improvement

Results and Discussion

The information in the Bible, writer

This research does not limit itself to a particular Bible subject nor topic. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or limiting? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

14-01-06T05:43:00 What does God choose as subject? (John 15:15)?

author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: My Condemn. The first word is the BookID; the second word is the VerseID.
- 3-Words: Who is your manager? Crazy mister Martin. Mister Martin as a good. The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

Biblical generation - 40 Biblical years

- 2007...2008 Common Era - the author is 40 years old: the author mentions time.
2021...2024 Common Era - the biological mother of the author is 80 years old: the word recorded by the author is time relevance specific.
Actor...role commencement date?
2026-01-15T10:45:00.000 you look at life...and you feel down. A politician who is probably Boba Tmubu, said how he became a politician.
2026-01-16T07:51:00 A person was making fun of Dikembe Mutombo on his draft day. Dikembe Mutombo was sitting on the court-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.
Biblical numbers for calculation.
Biblical separation into Testaments, books, chapters and verses for referencing.

2026-03-14T02:28:00 WordEngineering in Islam, Moslem

- Analysis: These verses are the title of the algorithm which calculates chaos and verses placed forward and backward in the Bible. 2026-03-14T02:28:00 An Alfa is an Islam Moslem teacher.
2026-07-16 Self, I = 1000, African descent United States of America (USA) abstain as mercenaries to Germany. Leviticus. And at that time, you rejoice, that the LORD did, have a heart. Father's land. Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000.
2026-03-11 20:20:55.690 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, kinsman redeemer. He would come out after a side event. He risked financial loss, travel distance. A person died. I heard, air drop. I later heard Cain.
2026-03-14T02:28:00 in a form, 1 of the query options was the writing direction, and another data entry term was robotics.

2025-12-07T20:58:00 Is AlphabetSequence prophetic?

1. Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
2. Will the date match historical events?
3. 2026-01-06T13:56:00 You are using...the Bible...is it supportive?
4. 2026-01-20T04:00:00 Words prepare for activity.

- Autobiography
- Style of Writing

The author is an authority on the HisWord table.

- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

2026-05-14 Inconsistency —

2026-05-14T21:42:00 The author has used different source from composing his work.

2026-05-14T21:46:00 How we are... in the midst... of each other.

- AlphabetSequenceIndex language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026).

2026-05-10T14:05:00 What exact... has He notice... about you?

- 2026-05-10T14:05:00 Re-locate:
 - Prior to 1988-10-15 First dream:

I Am taking you on a journey.
 - 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).

Face to face: Out of Egypt, have I called My Son ([Isaiah 11:1](#)).
 - 1999-05-07 First word, after re-locating to the United States of America (USA).

Face to face, in the wardrobe, closet, of the master bedroom. Ile eyan mi lon lo yi. It is my person you are going to.

2026-05-07T17:49:00 Word rank

- They were taught by the spirit... to talk as the spirit.

2026-05-06T11:52:00 HTML tags Unordered List Versus (VS) Ordered List

The difference between the ordered list tag, ol, and the unordered list tag, ul, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

2026-05-07T12:22:00 How can he... be... like us?

- I have always drifted toward the academic.

2026-05-02T21:30:00 Could I re-write this... biblical?

- Power of the Holy Spirit ([2 Peter 1:21](#)).

2026-04-27T16:01:00 WordEngineering query

- WordEngineering query - database
 - Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
 - Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
 - Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
 - Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
 - WordEngineering query - client
 - Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
 - Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
 - Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
 - 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 To know at the start... what I Am?

- When I started Kowe, I was a deported Yoruba man.
 - 2026-04-27T19:59:00 This I will find useful... for my people.
 - 2026-04-27T20:13:00 I could use the computer... for my weakness.
- When I started AlphabetSequence... 2026-04-27T20:22:00 I must find... for what... He accumulated in the past ([Genesis 15:5](#), [Revelation 16:12](#)).

2026-04-28T08:53:00 How you are known... by them?

- The titles of God, and their translations ([Genesis 16:13](#)).
- The identification of His creation. For signs, after death, substitute, beginning and end ([Hebrews 9:17](#)).

2026-04-15T05:43:00 Feature highlight its strength and weakness?

- Passover: 2026-04-02, 2027-04-22.
- Feast of Unleavened Bread: 2026-04-03, 2027-04-23.
- 2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.
- Implementation options include parsing a data definition language script file (.SQL), or interrogating the database schema.
- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
 - For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
 - 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
 - 2026-04-15T07:44:00 Natural primary key columns.
 - 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

2026-04-09T18:48:00

How we repeat life? ([Matthew 24:34](#))

- Old Testament: Knew, birth, sacrifice, death, worship ([Genesis 4](#)).
- New Testament: Worship, circumcision, baptism ([Matthew 11:11](#)).

2026-04-08T20:13:00

How elaborate... is the view... of my participation ([Daniel 2:45](#))?

- 2026-04-08T20:13:00

How reliable is the machine... in interpreting the word of God?
- 2026-04-08T20:34:00

What did he find... as useful as the present?

2026-04-07T08:21:00 I gave testimony to my biological mother about dreaming her, and Pastor Bert Bain chastised Brian, a Caucasian churchman elder who was married to Fatu, an Islander nurse. I remembered the circumcision of Abraham's only son, Isaac, as an explanation for Akedah.

2026-04-07T14:50:00 Mary's Bakery. 34370 Fremont Boulevard. Fremont, California (CA) 94555.

A confider who is in need.

- Abraham ([Genesis 18:17](#)).

2026-04-05T04:04:00 Be

- 2026-04-05T04:04:00 The 7 "I Am" of Jesus
 - The bread of life ([John 6:35](#)).
 - The light of the world ([John 8:12](#)).
 - The door ([John 10:7](#)).
 - The good shepherd ([John 10:11](#), [John 10:14](#)).
 - The resurrection and the life ([John 11:25](#)).
 - The way the truth and the life ([John 14:6](#)).
 - 2012-01-01 Pastor Andrew Huang. John 15. The "I Am" of Jesus. I Am the true vine, and My Father is the husbandman. Remain in Me. Abide in Me. If you remain in Jesus, you can not help, but bear fruit. Scripture reading: If My words, remain in you. Prayer: Ask what ever you wish. Obey: Obey what the bible says, as the Holy Spirit leads you. Epitaphy ([John 15:1](#)).
- 2026-04-05T23:06:00

My twin sibling cooked, and he served me pounded yam translated to iyan in the Yoruba language, okra translated to ila in the Yoruba language, and stew.

My twin sibling also offered me a 99 Ranch Market food voucher, light green worth \$2, redeemable for purchases in the hot stove, and the in-house bakery.

The word came as I brushed and I gagged my teeth in the upstairs, north-center, bathroom.

Begin as Me, and you will end as Me ([Matthew 2:1-2](#), [Micah 5:2](#), [John 3:3](#), [John 3:5](#)).

2004-07-18 Andrew Leon Meeko of Family Life, Campus Crusade for Christ preached at Christian Layman Church.

2004-07-18, 2026-04-05-7931 days (22 biblical years, 11 days) (21 years, 8 months, 2 weeks, 3 days)

- 2026-04-05T04:23:00 The instigator of a new covenant versus (VS) The mediator of a new covenant ([Hebrews 9:15](#)).
- And about the ninth hour Jesus cried with a loud voice, saying, Eli, Eli, lama sabachthani? that is to say, My God, my God, why hast thou forsaken me ([Matthew 27:46](#), [Psalms 22:1](#)).?
- My Father versus (VS) My God.
- 5. Paschal Lamb ([John 13:1](#), [John 1:29](#), [1 Corinthians 5:7](#)).
- 2026-04-05T11:02:00 Scene 1: We were inside a room, and either in the center-west or north-center, we discovered some missiles belonging to a party were stolen by a third party. I was distrusted by this theft. Scene 2: Uncle Demola, who was standing in the south-center, confessed that he had taken some agricultural farming produce, which were probably leaves, flowers or seeds prior to their harvest for their safety ([Genesis 3:20-24](#), [Genesis 4:16](#)).

5. 1. 293051159516 Numbers 14-35, Deuteronomy 5, Acts 12, Acts 2-17

The author started receiving word from God shortly prior to his 21st birthday, which was coming up on 1988-10-15. But, the author did not start writing a blog until at about 2000-10-05. The author started using a database for data entry, and the author commenced AlphabetSequence at about 2002-12-03.

1. The author was incarcerated at the Alameda County Santa Rita Jail, 5325 Broder Boulevard, Dublin, California (CA), (925) 551-6500. 2nd occasion between 2028-03-07T00:00:00...2028-03-14T00:00:00
2. 1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 2060 Fairmont Dr, San Leandro, California (CA) 94578. (510) 346-1300.
2. 2004-12-06T00:00:00 And, subsequently at Villa Marital Mental Health Rehabilitation Center (MHRC), 15200 Foothill Boulevard, San Leandro, California (CA) 94578. (510) 352-9690.
3. 2026-05-03T17:42:00 Information record is intermittent during trips.
4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books

2026-05-04T18:05:00 The HisWorld column is for group simultaneous words... most likely, that were spoken on the same dates.
2026-05-04T22:33:00 The Nigerian government versus (VS) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and mediocre Nigerian male partners. I saw 2 Microsoft affiliated females beside a car in the north center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Leaves 11:2](#)).
2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, 16th, and thirty-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Leaves 16:16](#)).

2025-03-17T11:47:00 Side with church... or side with the children (John 7:51, Genesis 21:9, Genesis 27:41)

The is distinct, supplements null, is not null, variables and comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webservice: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code's XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example

```

SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
      (Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE '[0-9]*'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
      (Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word LIKE '[0-9]*'
UNION
SELECT 'Null' AS InfoType, COUNT(*) CountInfo,
      (Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
      (Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
      ) PercentageOfTotal
FROM WordEngineering..Hisword

```

InfoType	CountInfo	PercentageOfTotal
Alpha	111590	93.740811989146
Numeric	851	0.714879747313
NULL	6600	5.544308263539
Total	119041	100

- A continuous... following

Subject: Your SQL Server background caught our  -- 10-20 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:
 SQL Server DBA & User Support Specialist – 100% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

What part of the distance... as He knows?

1. Daniel M. Russell. The Joy of Search: A Google Insider's Guide to Going Beyond the Basics. Originally published: September 6, 2019
As part of the Doctoral studies of the author, he developed his expertise on the Unified Modeling Language (UML) use-cases, and sequence and collaboration diagrams.
What do you use? As many of His representation.
2. In Akedah, The Binding of Isaac.
There were some assumptions which were tested out ([Hebrews 11:1-3](#)).
3. How I relate as a simple example of uses ([Daniel 2](#), [Genesis 41](#), [Genesis 2:5-6](#), [Genesis 2:18-25](#)).

Old	New	Actor	Commentary
Work	House	Joseph	At Guaranty Trust Bank (GTB), I taught Hajara Adeola, the wife of Fola Adeola, a university French teacher at Gestco, 34 Association Avenue, Ilupeju, Lagos State, Nigeria. The Manager of Consumer Banking invited me to his house to install Lotus 1-2-3 spreadsheet for his wife and him. The Manager of Corporate Banking, George, asked me to develop a community banking software application. Fola Adeola asked me to develop a bank draft application in dBASE and Nantucket Clipper. 2026-02-10T22:12:00 What are we bring together... what are we setting apart? 2026-02-10T22:14:00 What does he want to do... as apart from you? As certain from you? 2026-02-10T22:26:00 <u>What utterance... remain the same?</u> 2026-02-10T22:41:00 <u>What has God decided... for our future apart (Genesis 11:9, Exodus 12:1)?</u>

2026-02-02T15:00:00 Naming, counting, timing, ordering, sampling		
Terminology	Word	Relational database
Naming	God's first commandment to the first man, Adam, was for him to name the animals.	For a relational database, the various objects are named.
Counting	God counted the days during creation.	Count() keyword.
Timing	The greater light, the sun, and the lesser light, the moon, are signs.	GetDate() returns the date and time.
Ordering	Greatest commandment, greatest among us, honor thy father and thy mother	ORDER BY ASC, ORDER BY DESC. Lag or lead.
Sampling	Wandering years	ORDER BY newid()

2026-01-31T17:44:00 Remi Adeniji said she submitted her research thesis titled, Open-Source persistency. In the center-east, a male was taunting the Russians.

- 2026-02-02T20:10:00

2025-12-20T10:43:00 Relationship between... number and the Bible?

Percentage	Commentary	Scripture Reference	Sacred Text
75%	Wo 75%	Matthew 7:10 , Jonah 3 , 1 KINGS 7 , 1 Samuel 21:3	Greek Kingdom Daniel 2:39

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order: tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location – His Word table, Word column. The surrounding related information is inferred and subjective ([Matthew 16:23](#)).

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 he relies on his ousurance of the truth

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

Interest of the users	
ASP.Net Web Forms - control version	HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version
	Minimum Viable Product (MVP) build-measure-learn
	StepTask
Prototype	1 Build: The author conceived of a product idea to interpret his dream by building AlphabetSequence.
	2 Measure: Public testing to collect data on its usage.
	3 Learn: Validated learning by analyzing the collected data.
Proprietary	Open source, 2025-06-27T20:55:00 and availability of learning materials

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming.. Computed Columns

1. 2025-05-17T20:16:00 Pure Function, referentially transparent:
 - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Singularity of the Composition.
2. 2025-05-22T18:10:00 Immutability:
 1. 2025-05-22T18:16:00 Object-oriented technology serves change states.
 2. 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 3. 2025-05-22T18:17:00 As is of the need for database storage.
 4. 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
3. 2025-05-22T18:31:00 Practical need for recursion?
4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;

RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LIND.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and IHaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
- 1. In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
- 2. In 2007, when I was looking for work, I modeled the IHaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 1. Spelling corrections.
 2. Verb grammar tense.
 3. Synonym versus (vs) opposite.
 4. Singular versus (vs) plural.
 5. Deprecated.
 6. Currency.
 7. Locality, regional, custom, preference.
 8. Anglicized.
 9. Religion.
 10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 11. Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways... and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

```
SELECT HiswordID, Dated, Word
FROM WordEngineering..Hisword HiswordLead
WHERE Dated >
(
    SELECT TOP 1 Dated

2025-02-24T00:52:00 In the center-east is a wheel

- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00...2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar

2025-02-10T06:22:00 In Isaac shall your seed be called: I am on a narrow road in the north-center. This is either Bing's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing tight-fitting white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running from the center-west, upper, and turning towards the south-west. There were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

Work... holiness:

The Exhaustive Concordance of the Bible, generally known as Strong's Concordance, is a Bible concordance, an index of every word in the King James Version, constructed under the direction of American theologian James Strong. Bible dictionaries and commentaries. Terminology.... characterization. How do you tweet? Frequency, grammar, composition, ranking! AlphabetSequence builds on Bible verse separation.

How representative am I of my people (Philippians 3:5)?

1036 1433432

- * At University of Ife, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Olayinde started driving us to school.
- * In Lagos, Bentolulwa graduating from Abali Nursery and Primary School to Ikeja Grammar School, prior to my twin sibling and I attending Abali Nursery and Primary School.
- * I lived with Romulo Luis prior to Romulo Luis graduating from Central Piedmont Community College (CPC), Charlotte, North Carolina (NC) and Romulo Luis returning to his home country, Venezuela.
- * I was deported to Nigeria, shortly after the passing away of my adopted mother, and shortly before the separation of Major Laurel from Austi Tawo.
- * Bentolulwa and Ademolaoluwa, Uncle Demola and Adela. You must involve... for someone to use you. 2025-03-28T18:30:00 I consider father and son relationships. What we are... is how we are
- * Hajara Adela, a French lecturer, and wife of Fola Adela, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritic

(Mustafa Suleyman, Michael Bhaskar, 2023-09-05)

- Creation ([Genesis 1:1-6](#), [Genesis 1:26-Genesis 2:4](#), [Genesis 2:16-25](#), [Genesis 3:15-16](#), [Hebrews 11:4](#))
- Born King of the Jews ([Matthew 2:2](#), [Luke 1:19](#), [Luke 1:43-44](#))

- When: Called — In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)
- Who: Naming — God, man (Genesis 1:1, Genesis 1:26, Genesis 5:2)

What true identity lies apart?

- The Messiah
- The king

How my organization is the best?

1. Alphabet places, word spelling, and sentence composition
 2. Arabic numbers systems
- What measures forever?

The author is linking words spoken to related verses and dictionaries.

- BibleReference uses whole numbers for representation.
- Who, what, when, where, why?
- Prophecy and Fulfillment: Keyword Variation

Relational Model

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

User

The general operating system and compact database are the 2 types of authentication

(Allen G. Taylor, 2019)

Software Engineer versus (VS) Database Administrator

(Itzik Ben-Gan, 2023-07-03)

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Codd's 12 rules

Focusing on the Word:

...Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

- Rule 1: The information rule: The physical store is the HisWord table's Word document. This information is later processed logically in the HisWord_View.
2024-06-15721:28:00 What is pertaining to the data?
Prior to this word coming, I uploaded the 3 file formats of the disortement files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.
Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.
2024-06-1616:30:00 To who, I exchange my viewpoint?
Rule 3: Systematic treatment of null values:
2024-06-18721:49:00 Unknown is inappropriate.
• Identity columns cannot be null

- Autobiography
- State of Writing

- DateTime type columns will default to the system's datetime
 - The columns that are part of a primary key cannot be null
- Rule 4: Dynamic online catalog based on the relational model:
INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.
- Rule 5: The comprehensive data sublanguage rule:
2024-06-20T18:39:00 It looks at the data as a whole.

Structured Query Language (SQL) sublanguage

Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fail in the following cases: • Primary key or unique index duplication. A primary key column may not be null. • Invalid datatype or extra large data size or out-of-range • Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

- Rule 6: The view updating rule:
Only computed columns cannot be updated.
- Rule 7: A single operation must support select, insert, update, and delete:
A base or derived relationship should comply with an operation to select, insert, update, and delete.
- Rule 8: Physical data independence:
Batch and end-user operations are not impaired when changes are made to physical storage or access method.
2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.
2024-06-22T15:36:00 What part of yourself... do I desire as My future?
- Rule 9: Logical data independence:
2024-06-22T17:02:00 The opinion of someone else... is beside me.
- Rule 10: Integrity independence:
The author is not implementing constraints.
- Rule 11: Distribution independence:
The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.
- Rule 12: The nonsubversion rule:
Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purpose: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author: A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man? (Genesis 7:7, Genesis 6:3.)?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

(Jack Hyman, March 2024).

- Time[set]
- Birth ([Acts 7:20](#))
 - Family ([Acts 5:31](#))
 - People ([Hebrews 3:9](#))

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- What I am good at doing...is what He is good at making. ([Genesis 41:32-57](#), [Genesis 1:1-1:2](#), [Genesis 4:26](#)).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
 1. GetAPage.html serves as a gateway to specialized links.
 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality. ([Daniel 9:24](#))?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

- You could say, this is what I do... Why I do it?
- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences... companion?
- Experimenting...as the same?

- **Data:**
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received what he calls **redundant records and queries**. [\[Screenshot\]](#)
- **Is there a creative need for new data?** The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze it?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time
- Choosing a closer relationship with God.
- **Software: Algorithms are patentable?** The author has not sought to patent AlphabetSequence—it could be open to ideas. [We all make our own relationships.](#)
- **Hardware:** Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

This data...where does it exist?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

Our comparing our trade. (1 Samuel 25). To be conformable of age,

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
 4. GetAPage.html HisWord section: Time variant

For a period of time, we are as we seem we are? What needs a success (Genesis 4:7, Matthew 14:8, Mark 6:25)

Chuck Missler versus (VS) the author

Chuck Missler of Koimonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2018-06-02 <u>Candlelight Celebration of Life Service – Chuck Missler</u>, Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 <u>Stay the course</u>. 2025-12-22T08:48:00 <u>Teaching...navigator</u>. 2014-08-18...2025-12-22T08:48:00=+144 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 <u>Stay the course</u>. 2026-05-16T18:40:00 <u>What is in dispute?</u> 2026-05-28T17:17:00 The author associates Chuck Missler with teaching each story in the Bible. • Strategic trend. • Introducing other Bible scholars and mentioning their particular contributions. • Making laypeople teachers of the Bible. • Referring to terminology, Jewish history and practice, world events.	
2024-11-03 21:33:37.887 <u>Pattern of assemblies</u> .	
	2024-11-03T11:58:00 <u>What we bring...as amount...to what?</u>
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him.	
Chuck Missler was preaching from his understanding of the Bible.	The author is relating the Word spoken to him to the Bible.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	The author is relating to people. Coming from experience with people.
	<u>You were trying to reach the Bible...through your word.</u>
	<u>Interaction with Him</u> , I start writing words received when I sleep. I introduced words when I shower.
	<u>What I used</u> , Chuck Missler used the Bible... I used myself?
2025-04-09T15:30:00 <u>What did you set out to achieve as a personal notice?</u> Hal Lindsey suggested to Chuck Missler that he convert a Christian mission hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Missler from pursuing a doctorate degree in Physics.	2025-04-10T04:17:00 Scene 1: Lauretta is driving me, and I mentioned the first name of Nada Madjar, but I did not disclose her last name; therefore, I am not gossiping. Lauretta asked if I was talking of Nada that I now infer to be Nada Comaneci. Scene 2: A man counseled that he lived in Fremont, since he moved from further away.
2025-04-10T14:14:00 <u>How the Bible can be...worthwhile</u> .	2025-04-10T14:46:00 <u>Unlabeled person's person</u> [canceled 3-17-24].
2025-04-10T14:14:00 Jennifer Melow gave 2 breast bumps to Danielle Hall to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. <u>Cancer decision?</u>	AlphaBeeSequence takes specific places... out of the Bible.
	2025-04-10T06:47:00 <u>When did he desire...a people as?</u> [Genesis 2:20-25, Genesis 4:3-12?]

2022-05-26T14:05:01

What events in Abraham's life are additions?

2025-03-29T16:15:00

I am reminded of the presence of others. (Ezekiel 33:17).

Word	Commentary	Scripture Reference
Partner	Sarah, Hagar, Keturah	Genesis 11:29
Pilgrimage	Canaan	Genesis 12:1-5
Guidian	Lot	Genesis 12:6-5
Possessional Blessing		Genesis 14:19
Faith	Belief in God, counted for righteousness	Genesis 15:6
Covenant	Abrahamic	Genesis 15:18
Seed	Ishmael and Isaac	Genesis 16:11
Name change	From Abram to Abraham	Genesis 17:5
Making mention at ages	75 years old when he departed out of the land of Haran, had lived in Canaan for 10 years, 86 years old when Hagar bore Ishmael to Abram, 99 years old God's request to walk before Him and be perfect, 100 years old gave birth to Isaac, 175 years lived	Genesis 12:4 , Genesis 16:3 , Genesis 16:16 , Genesis 17:1 , Genesis 21:5 , Genesis 25:2
To do without someone	Separation from his wives and sons, from the physical to the spiritual	Genesis 15:13 , Genesis 21:12 , Genesis 22:2 , Genesis 23 , Genesis 25:6 , Acts 7:5-6 , Hebrews 11:17-19
Sarah - the first matriarch	What seems natural as hebrew ?	Genesis 18:12 - 1 Peter 3:6

2024-01-17T13:36:00 Alphanumeric

Date	Type	Word	Commentary
2004-07-11	Money currency	English pound 45 percent	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%
2008-03-11	Calendar	September 22	

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

3. How essential are we: to the personification of God?
4. The spirit man holds
5. When did it exchange... His view as ours? (*Genesis 18:10*)?
6. How are we acceptable; to what is new? How does God, build up, to His word (*1 Samuel 9:15-12*)?
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses' (*Matthew 23:14 Acts 8:37 Acts 15:34 3 John 1:15*)
14. Naming of words (*Genesis 32:28 Genesis 35:10, Genesis 47:27*)
15. We have been doing unconvincing work
16. I heard I heard (*John 11:17-17:00*) in a location to the North, probably 9 Ranch Market or Marine Food, or Osaka. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight, I said, 6 9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does the volunteer as time? AlphabetSequence is resource minimal:
 1. Double by hand
 2. Compute: Not technologically demanding

3. Maturity: Since 2002

18. Separation into Segment.

19. Is this a finished work, and how is it accessible? It is a transient database.

20. Scripture reference in context.

21. To complete the life of pleasing God, as I chose men.

22. Hearing and spelling the word... and not saved...... by the grammatical correctness.

To co-operate as we are. Robert Estienne Enchiridion, Alabastr

2017-03-06T00:00:00 A Comprance of Age

Divided as separated. Go this way, that way.

I want to program, but I don't want to match two programs together, except for deep thought.

See when God grants increase: such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary, Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt (Genesis 37:5-11, Genesis 30:24, Genesis 40-41).

IC2 (IC is separable into four layers; these are the link, Internet, transport and application layers. No breaking (Matthew 19:8).

Marriage

Marriage is not a practice, in the life after, resurrection (Matthew 22:30, Mark 12:25, Luke 20:35, Revelation 21:2, 2 Corinthians 11:2). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. It is more of a father that wants you, Jesus resurrected, after three days (Matthew 12:40, Matthew 26:61, Matthew 27:40, Matthew 27:63, Mark 8:31, Mark 14:58, Mark 15:29, Luke 2:46, John 2:19, John 2:20, 2 Corinthians 11:2, Revelation 21:2, Revelation 21:3, Revelation 22:12). The breaking of device (Psalm 34:20, John 19:36).

On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.

The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logics, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language: NoSQL is a challenger.

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The file versions are selectable options in HTML or JavaScript.

The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3 John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?

The client started as HTML, but now has JavaScript and CSS.

CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.

JSON and XML have made in-roads.

To each resemblance

1. When His word, suggested mine? When I get a word from God I could do the following?
1. Write the word in my notepad, and never refer to it again.
2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
3. Produce an artifact based on the word.

What do I desire... as part of providence?

1. Moses? Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).
2. Abraham? Seed (Genesis 17:9, Genesis 15:2, Genesis 22:7, Genesis 22:12-18, Hebrews 11:17-19).

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is capacity... full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00

What substitution... we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	<u>Revelation 2:7</u> , <u>Revelation 22:2</u> , <u>Revelation 22:14</u> , <u>John 6:35</u> , <u>John 6:48</u>
Book of life	The word of God	<u>Philippians 4:3</u> , <u>Revelation 3:5</u> , <u>Revelation 13:8</u> , <u>Revelation 17:8</u> , <u>Revelation 20:12</u> , <u>Revelation 20:15</u> , <u>Revelation 21:27</u> , <u>Revelation 22:19</u>

Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Ite eyan mi lon to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	<u>Ecclesiastes 7:2</u> , <u>Genesis 23:20</u> , <u>Genesis 49:30</u> , <u>Genesis 50:13</u>
Birth place	<u>Matthew 2:6</u>
Matnach's origin	<u>Genesis 25:20</u> , <u>Genesis 28</u>

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its tighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order. Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitky-grity.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (1 Samuel 3:19).

Numbers in themes

- Has excessed good as how He felt (Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:17, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22).
 - He excessed start and end of time (Genesis 1:1, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:19, Genesis 1:23, Genesis 1:31, Genesis 2:1-4).
 - Kings of the Jews (Matthew 2:2, Matthew 27:11, Matthew 27:37, Mark 15:2, Mark 15:9, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:33, John 18:39, John 19:3, John 19:21).
- To be actual things
- Pronunciation (Luke 1:13, Luke 1:60)
 - Application (Luke 1)
 - Spelling (Luke 1:63)
 - Reference (Matthew 11:14)
- In telling the future, there are two parts: prophecy and fulfillment (Revelation 19:10). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

Prize	Target	Scripture Reference
Know else	Diversified language	Genesis 11:9, Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/115/Gradual	I have decided to work on a gradual improving system.	Psalm 133

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row version selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:

.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGodBlob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGodBlob/master/ContactMaintenancePage.aspx.cs
http://github.com/KenAdenji/WordEngineeringBlob/main/115/Gradual/Contacts/ContactList.aspx	http://github.com/KenAdenji/WordEngineeringBlob/main/115/Gradual/Contacts/ContactList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -iwc
sc-status sc-substatus COUNT(ALL *)
200 0 395115
304 0 9457
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -iwc
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -iwc
```

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is ≈176 work hours. A work year is ≈2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Re-use.
5. Metric:
 - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The declarative work consisted of a proof-of-concept that is easily replicable.			

(De)Lean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
 - Engineering skill needed to build
 - Robust design
 - Primary function independence
- The competing solution will include:
- Server-side JavaScript, for example, Node
 - Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

To know my part as His?

- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- [I have decided to work on a gradual impedance system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? [To recognize the following as 1 \(2 Samuel 3:32 \) ?](#)
- [Who it comes to \(Hebrews 11:24 \) ?](#)
- [What is the following? List of C-family programming languages](#)
- [The mechanism of selective control?](#)
- [What notion of the same do I have?](#)
- [What I keen member of \(John 17:12 \) ?](#)
- [What did he find as suitable for him? \(Genesis 39:9 Daniel 1:12 Daniel 1:16 Genesis 1:26-27 \) ?](#)
- [What did he find re-occurring as him? Seed of Jesse, king like David, son of David](#)

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX... only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-coordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [2432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \(Mark 2 \) ?](#) 2025-07-12T16:44:00 [What did he do? How did I do \(Luke 1:41 Luke 1:44 Matthew 3 John 3 \) ?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Almida's Law](#) comes into recognition in [Gad8Page.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ehpraimtech.com/WordEngineering/WordUnion/BecauseWeRetellThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeRetellThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Development History

God doesn't use inform (Psalms 81:5 John 16:30). He mandates.	
Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.
Programming Style	This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.

A Causal to Hearing Words

- [Title](#)
- [Abstract](#)

He said and He did. [Word work](#) ([Genesis 11:1-9](#)). [The authority to know...and discern...between things](#). At the beginning of WordEngineering, my practice will include:

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at [Oklahoma College](#), in the Fremont and Newark campuses.
- Read books and magazines at [Barnes & Noble](#), [Borders](#), [Walden Pond Books](#) [Wal-Mart](#) and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Solitary living at [Newark City in California](#). [Palms](#).
- Fast, everyday, only ate, once a day, in the evening. I ate [Honnora Holdings](#) Koluho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revelation.
- I was living on a meager income ([Exodus 2:15-25](#)).
- Only familiar with [Case-based Reasoning and Use-Case](#).
- AlphabetSequence is [Alphabetical](#).
- Set-based: Effort to record everything [Bible code](#).
- [This is a man; he wanted to know about his favorite](#) ([Daniel 1:3-21](#), [Daniel 9:23](#), [Daniel 10:11](#), [Daniel 10:19](#))?
- [Observance](#) ([John 5:19](#)).
- [Personification of Spiritualization](#) ([Proverbs 25:2](#))?
- [I will make the difference](#) ([Deuteronomy 26:5](#), [Ezekiel 16:3](#))?
- [What we all ought to be?](#)
- 1997-12-31 I will not entertain Nada. Prophets make New Year predictions.

In Australia, I got involved with the prison ministry at the Villawood Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contract consulting was at the Department of Training Education Committee (DTEC), so I had an understanding of integrating and skilling re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. This influenced my desire to practice authoring Christian literature and improve my communication. How could I relate to less fortunate people? How may I be the one giving? How can I let the Holy Spirit partake on my side? What are these roles for, and how will I be a mediator? What do I share as a bargen? All these are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable; humans are useful. Where does a side take the rest? What I am finding out, is how necessary I am as a person? How do I do my part in participating? What can you take from me, and make as your own? My words may not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you say. When the times, programming lines, lines of code, play out a scenario. So words make meaning as sufficiency. Whose life have I lived to complexity? To the full of His deed ([John 9:2015:24](#))? What can His prove relate to me?

What did He know as one? First, pre-eminence,

Word	Member	Scripture Reference
God	Trinity	Genesis 1:1-2 , John 1
Day	Time	Genesis 1 , Genesis 2:1-3
Babel	Language	Genesis 11:9

Written about us how many?

Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 2
Trigger	Re-build Jerusalem	Sign a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly, a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is usable in tabular format. There is a copy of the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.

The author, first wrote his history, in multiple stand-alone files .HTML, .XML. ([Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a ContactMaintenance.aspx server-side page as a user-interface (UI) to record contact information. This page remains active, till today.

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

I have a product; where is the method?

Adaptability:

1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
2. What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
3. The Biblical account wrote dreams and visions textually, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the state and early beginnings of dictionaries, concordance and commentaries; but the author gains from this works as a reference. The widely acceptance of a work, accompanies preference and prevalence.
5. The result of the Bible, is how we use it. The emphases of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

[How to go about it?](#)

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication.

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry.

Guidelines and tools

A relational database is a substitute for text processing.

Stakeholders

[I am the primary contributor and beneficiary.](#)

Outputs

Outputs are created, transformed, or changed in state? [The constancy of the word is what we have shown.](#)

(Alison Cox).

Lessons Learned

- Esteem word: Leading up-to 2008-03-07, I was not fully recording the word of the LORD ([Job 23:12](#)).
- I used to ask God for a word? To realize where my opinion lies?
- [Familiarization with data](#).
- You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Isaiah 22:11](#))? One of Myself offering as many as I use?
- Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him. Putting Him into words.
- My time away from the family, United States of America (USA), may have helped me gain independence.
- In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. [How can we bring a life, except ours?](#)
- [Do I decide the truth? Do I choose the truth?](#)
- [The importance of the Word is how it is made.](#)
- Post-dated: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station. Bay Street Emeryville BN.com Fire Alarm Panel 8. FDC Building A 5604-5634. [To mean, I decide the story?](#)
- [How did they handle the Messiah?](#) ([Luke 1:28](#))? [Conspire the deed?](#) To need someone as I? ([Genesis 15:2](#))? You know Me as capable of you? ([1 Samuel 17:36](#), [Romans 4:19](#))?
- The Yoruba sentence. [Ifa fofanba di...](#) I will use wisdom to block it.
- [No difference in companion.](#)
- [How useful you have been in determining wish? How diversification the changes?](#) ([Genesis 4](#))?
- The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
- Difficulty level? Our work is divisible into writing the word, commentary, and deducing meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. [I also to do is never forgotten of the LORD. Whose obscenity has he solved?](#)
- [What can we be in the midst of a people, certainly to God.](#) ([Matthew 19:12](#))?
- [What do you know how to use, as you desire yours?](#)
- [Bath of God. Reach of God.](#)
- [How many are others?](#) ([Daniel 11:41](#))?
- [I have to present God; as I am allowed to be.](#)
- How I want it to be; how He wants it to be? [When does the word prompt the answer?](#) ([Acts 10:11](#)).
- People have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Build or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work ([1 Samuel 25:28](#))? Needs to be met?
- The author will record the publishing and receipt.
- An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
- [I didn't shift...until the movement.](#) ([Acts 1:8](#)).
- [Did he ask you to do it?](#) ([John 8:44](#)).
- [Be him, about him.](#) ([Genesis 1:1](#), [Genesis 4:24](#)).
- [Timothy urgency.](#) ([Matthew 26:45-46](#), [Mark 14:42](#)).
- [Could you need one part of Me and not deserve another?](#) Biblical Calendar..Gregorian Calendar.
- When can we do without AlphabetSequence? A place in the Bible justifies the word.
- O mo Bunni, Clari re. You know Bunni, Clari this. We are inside a building and we heard that food is being giving away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center. 04:27 Dizzy sleepy. 20:13 Beni or Buki, I forgot who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
- What past the time ([Isaiah 61:2](#), [Luke 4:18](#))?
- What is in use?
- [That chooses I.](#) When I read the Bible, I adapt to the role I take.
- Relative to the world ([Proverbs 3:5](#)).
- If the words do not join? Consider separating or putting the lesser word in the commentary column.
- Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
- If the word and scenery do not fit exactly, it may be a larger scenario.
- When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
- What I have learnt from Bill Gates, through using the software from Microsoft.
 - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
 - The BibleWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 - What value can we attain to this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26, I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Mik & Honey Cafe, Pegasus Center. Haueh Amy Tm took their order, and she was the waitress.

1. I chose to remain and I continued living in Charlotte, North Carolina (NC), and I did not re-locate to Fort Lauderdale, Florida.
2. 2025-11-27T16:53:00 [She made her arrangement known](#) ... let us observe the revelation from God ([Genesis 24:58](#)).

What did He see as He? A remodeling of the last? [\[Daniel 9:24-27: Revelation 1:1-2: Revelation 21:2: Revelation 22:14\]](#)?

The author will want a conciliation with time!

Alpha&Omega=Sequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we tell tomorrow?

But what is we are trying to say, how can we make ample use of word? Word of God. Word from God? The community is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words?

Bible dictionary and commentary. As a result of who we? When does the scenario introduce God? [\[Genesis 3:8\]](#)?

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

The software is available at <http://github.com/KenAdekenji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The BibTeX versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Seeing the Bible as enlightening to man.

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself? The author suggests that Baptism of the Holy Spirit (Acts 1-2), is achievable in individual locations as a prestage to the 3rd temple in Jerusalem.

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO)

RACI matrix. RACI is an abbreviation for Responsible, Accountable, Consulted, and Informed

Task	Responsible	Accountable	Consulted	Informed
Obtain funding for project		Executive Sponsor		Business Analyst

Design Solution	Business Analyst, Technical Personnel	Project Manager	Business Subject Matter Expert (SME), Quality Assurance (QA), Usability Engineer, Regulator (Legal), Database Administrator	
Create implementation material	Technical Writer	Project Manager	Business Subject Matter Expert (SME), Technical Personnel	

(Alison Cox).

Entity-Relationship (ER) Model

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

There may be no contact details for a contact.

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

The weak contact details, primary keys include their ContactID

(Allen G. Taylor, 2019)

Design Pattern

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates

(Petr Travkin)

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

- UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.
- A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.
- Comments do not impact programatically, they only serve as guides for readers.
- A directed relationship may exist between a collection of source and target.

- ### Separating realizable

- No separation... in bonding. What did He ask for unity in? Land, man, Man, brother.
- God: Garden of Eden - Adam and Eve, Cain and Abel (Genesis 2:8, Genesis 2:15, Genesis 3:23-24, Genesis 4:10-17)
 - Jesus Christ: Church - Peter (Matthew 16:18)
- You are not asking that you may become Him... you are asking that you become His subject?

- Strange land: Egypt for 400 years (Genesis 15:13, Acts 7:6)
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau (Genesis 25:28, Genesis 27:5, Genesis 28:22, Genesis 31:38, Genesis 31:41)
- Children and grandchildren: Benjamin, Joseph, Judah (Genesis 42:36, Genesis 43:14)

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27 , Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2 , John 3:16 , John 3:18 , Hebrews 11:17 , 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1 , Acts 13:22	1

What the society produce? What the society produce... what can happen?

Ratio percentage versus (VS) quantity? At 3 for 59 Group/Company.

In the 1st scene, at Albertsons Lucky, Charter-Supermarket, in the north-west, I saw a set of transparent/opaque plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for \$1. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Timmy. It was the celebration of the birthday of aunt Tawno. My twin sibling did not drive aunt Tawno to the house, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.

Timmy (Daniel 5:26, Daniel 5:26, Daniel 5:30-31, Genesis 4:1, Genesis 4:8, Genesis 4:12-14)

- Quantification (Daniel 6:5)
- Original self (Daniel 5:12)
- How are we then know? (1 Corinthians 5:7, Acts 23:5)?
- I want not a... user meaning there are...

a person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

- Naming ([Genesis 2:19-20](#), [Genesis 2:7](#), [Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25-26](#));
- Reversion ([Genesis 4:26](#), [Exodus 20:7](#), [Deuteronomy 5:11](#));
- Interpret ([Genesis 37:9](#), [Hebrews 11:23-30](#), [Daniel 5](#)) to each [entirely its own](#).

02-04-07-12:05:50 What do you do you do you do you do you produce? (It specifies a beginning, and it specifies a period.)

1. 02:04-07-12:06:25-09 How much more...
 - Telus integrates programmable script and audio recording, MP3 is an industry standard.
 - The author made a transition from one-time manufacturing hardware to maintainable software.

that if we could give description?

- If an instruction included a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- *An association of being alike... is the assurance of the same.*
- *The continuation of myself... is all I am allowed.*
- *One side... the decider.*

1. IBM PC compatible:

At Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC), The author tutored in the personal computer (PC) laboratory.

- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheets, dBASE

2. IBM employees:

- In Ijupeji, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simoen Onasanya, an employee of IBM
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM events:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

How-to verify the work of the spirit?

- Is it compatible with the Bible ([John 10:30](#), [John 17:22](#), [1 John 5:8](#))?

Is this a link ([Genesis 41:32](#), [1 Corinthians 15:45](#), [Acts 9:3](#), [Genesis 5:3](#))?

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

- Domain knowledge and expertise? Personal testimony

- Technical requirement? Data entry versus (VS) HTML performance penalty?

What exactly can we expect out of the Bible (Daniel 5:31)?

1. When is the Bible specific about time (Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54)?

How admissible is the word (Genesis 41, Daniel 2)?

GetAPage.html depends on the word.

1. Ark of the Covenant
2. Temple
3. Jerusalem
4. Judah
5. Israel

What did He see Himself as?

1. Joseph (Genesis 37)
2. Moses (Acts 7:25)

Robert Law Joss

- 2004-06-05 22:30:55 I found search on the land?

The word came as i moved the shopping carts from Albertsons Lucky, Charter Square, north west shopping cart location. Initially, as i moved the shopping carts away from this location, God told me to remember the words He said to me at this location,

I walked there because he wanted me to go there and i went back. And returned to this location on my route to the south west shopping cart way.

What does He involve?		
Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many ([Genesis 1:16](#), [Genesis 1:26-2:4](#), [Daniel 9:2](#))
- More at the same ([John 15](#)).

When did Israel...seek no region...as its own (Acts 1:6)?

1. The prophets
2. New Testament
 1. The Gospels: King of the Jews, the disciples
 2. Pauline Epistles, General Epistles
 3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have stopped using people as myself

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.

- The bulk of the work is query.

2024-11-20T05:38:00 Ordering

Intellectual presuppositions to enable the rise of science

- Intelligibility of nature: Words were part of his life.
- Order in nature: To digest what has been and reckon what will be.
- Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

- Observe: Read the Bible and record words spoken.
- Test: Compare the words in the Bible with the words heard.
- Measure: Apply metrics to gain closeness.

(Stephen C. Meyer)

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I aspire to task.		
Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27 - Genesis 2:7 - Genesis 6:3 - Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? ([Deuteronomy 18:15](#))

God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)

- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to wordiness. (1 Timothy 6:17)

How do you reference the Bible?

Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:26-27, Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:9
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 4, Hebrews 11:25

What is the Bible divisible to?

Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1, John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1, Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?

Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?

Word	Scripture Reference
Holy Spirit	Genesis 1:2, John 4:24, Genesis 6:3, Genesis 41:38
Evil spirit	Judges 9:23, 1 Samuel 16:14, 1 Samuel 16:15, 1 Samuel 16:16, 1 Samuel 16:23, 1 Samuel 18:10, 1 Samuel 19:9, Luke 7:21, Luke 8:2, Acts 19:12, Acts 19:13, Acts 19:15, Acts 19:16
Lying spirit	1 Kings 22:22-23, 2 Chronicles 18:21-22
State of spirit	Genesis 45:27, Exodus 6:9, 1 Kings 10:5, 2 Chronicles 9:4

Word opposites

Word	Reference
Anti	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, Revelation 2:13
Un	Ungod, unholy, unrighteous

Beyond association of time, where am I?

Word	Scripture Reference
Role	Genesis 32:28
Place	Matthew 23:37
Times	Luke 21:24
Language	Genesis 11:9

Bakas Kane telephone interview. What utterate a place?

Word	Scripture Reference
Alter	Acts 6:13-14
Iterate	Jeremiah 25:11-12, Jeremiah 29:10
Utilize	Numbers 35:25, Numbers 35:26-28, Numbers 35:32, Joshua 21:13, Joshua 21:21, Joshua 21:27, Joshua 21:32, Joshua 21:38, 1 Chronicles 6:57
Utter	Judges 12:6

Why numbers are preferred?

Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association...with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Brightlight	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give, it is who you give. Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?

- What does he want as a set? O pe. In Yoruba?
- Complete
- Late
- Call
- Thanksgiving
- Where am I, as a human being?
- The life of equipping something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword `Ngun`.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I collaborate fact with what I know?

On behalf, of someone, I seem		
Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?		
Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 28:14

The Accumulation of Age.		
Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 2:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:12
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you, than you are (Ephesians 3:18).

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?	
Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?		
Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: `JSplit`, `EXCpt`
- Questionnaire: `RatinoRank` `JSDefine`

Prepared for Time

On 2019-04-04T09:00:00 and on 2020-03-03T09:00:00, the author will telephone me about the role with Google's co-founder Larry Page jobs.lever.co@lthbank.aero/701c6d9e-2d88-4727-a345-d4a93d6dc277?encyid=3b8c0b44-7127-4709-ad21-56b8ea57403 Andre Nguyen asked how I spend my day? 2025-01-19T11:32:00 You have tried to supplement... what God has given you.

2026-03-03T11:24:00 He commends... our way, I was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our opinion? This projection may result in entries of new records in the Remember and APass tables. Where are people, his relation?

- However, he is present, that is how I use.
 - If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
 - When I have access to the database, I enter and store the record electronically.
 - Computer access means the resultset is retrievable via GetAPage.html.
 - Text editor is useful for writing SQL.
- 2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

How do we develop... our past time? (Genesis 37:19-20, Daniel 6:5)?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

What we do minimally, is how we do enormously.

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- ScriptureReference.html Requires Bible knowledge and place in the Bible.
- BibleWord.html Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance (Matthew 10:19-20).
- Where am I, resemblance of how I am made (1 Corinthians 14)?

What does He choose as example?

- God rested on the Sabbath day (Luke 23:56)
- Jesus Christ (Daniel 9:24-27, 1 Corinthians 15:45, 1 Corinthians 15:47)
- Man such as King David (2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5)
- Place such as Sodom (Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8).
- Other living things (Numbers 22:21-31).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy (2 Samuel 12:14). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence (Isaiah 23:15, Isaiah 23:17, Jeremiah 25:11, Jeremiah 25:12, Jeremiah 29:10, Daniel 9:2, Zechariah 7:5). Listed below are some of the repeated reinforcements.

Samson's Birth (Judges 13)

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazirite son (Judges 13:2-5).

The same angel appears to Manoah and his wife (Judges 13:6-25). The angel reinforces the their responsibility and defers reverence to God.

Autobiography

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- At Central Piedmont Community College (CPC), the major course, students and colleagues include:
- 1. An African American female senior, Gayle.
 - 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
 - 3. Michael Pote, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - 4. My ongoing and my relationship to America
 - 5. My ongoing and my relationship to America, every Saturday morning. 2024-12-25T272:00:00 *What strange... of the people?*
 - 6. I planned to build a traffic light for my project.
 - 7. In a multicultural church where I was part of the congregation, Bernie Alsop mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option... I have accommodated.
2. 2024-12-25T19:23:00 *Australia had brought me in... to fit into the crowd.*

2024-09-29T01:41:00 Adeyemo Adewuyi Adenij

They had varying mother... but one father (*Genesis 37:28*).

2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.

2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?

1. Post 9-year-old re-location from Ile-Ife to Lagos
 1. Patriarch, brother Yemo
 2. Captain of the Nigerian national Hockey team
 3. Teacher for the 1st year of the Baptist primary secondary school, evening schedule
 4. The managing director of Gesto provided lunch money to eat at the Baptist Academy secondary school during Jan 2011
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
 - Where did he serve – a people?
 - Where did he remove himself from the east (Genesis 31:41)?
 - What point – are new?
 - Spending time – to reality?

Faith An Yac

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the

same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
 - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made? (Genesis 32:28 -Genesis 5:3 -Genesis 4:12.)? What word reminds? (Mark 11:22.)?

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
 - The author was receptive and felt most at home during worship.
- (Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent, where is it needed?
