WordEngineering

Kehinde (Ken) Adewumi Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.
[Translate English...](#) [Yoruba](#)

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence \(2 Corinthians 10:9-18\)](#). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.ca](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequencesIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- 2021-05-20T17:26:00 [Follow God as a character.](#)
- 2022-11-29T12:53:00 [To track dates and words? And find meaning correlation.](#)

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Missler of [Koinonia House \(KHouse\)](#) is worthy of note, faith.
The author is indebted to [Joy Schlessky](#), his Master's degree supervisor, at the [University of Technology, Sydney \(UTS\)](#), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object-Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS: Decier Mendez, Cesar Orcando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong \(UOW\)](#), NSW 2522, Australia.

Theory

2004-11-10 www.JesusInTheLamb.com		
Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename		The default, for example, is index.html
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

2026-06-24T18:01:00 [What use is the word... according to you?](#)

1. Synonymous ([Genesis 22:8](#), [Genesis 22:13](#))
2. Domain name valid
3. Grammar correct

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.
There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=1) AND [ChapterID]<=(150)))
```

will set the range restriction.
[There are individual chapters for each book.](#)

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=1) AND [VerseID]<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInBasicEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
    AccordingToManyHaveSpokenID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWordHistograms](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Design by contract](#) assertions, and particularly pre-conditions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture View's ScriptureReference Column

The SQL statement

```
dbo.udf_scriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

- Title
- Abstract
- Acknowledgments
- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prophecy and Fulfillment
- Autobiography

SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
  cast(BookID as varchar(6))
  + '.'
  + cast(ChapterID as varchar(6))
)
FROM   Bible..Scripture
Another SQL statement
```

```
; with cte
(
  BookID
  , ChapterID
)
as
(
  select distinct BookID, ChapterID
  FROM   Bible..Scripture
)
select cnt = count(*)
from   cte
The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from [Genesis 1:1](#), and ending at [Revelation 22:21](#). The SQL statement

SELECT COUNT(*) FROM Bible..Scripture
will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

    public const int VerseIDMaximum = 176;
  }
}
```

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns / SoC](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hull](#), who will talk of each word's specifics, and [Chuck Hader](#), who noted that the first occurrence of the word, [law](#) is in ([Genesis 22:2](#)). The exact table, is a holding area, for staying information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning floor ([Joshua 15:3](#)).
2026-03-20T11:30:00 I will assist if life doesn't share us apart... [Jerad](#) is a giant ([Genesis 1:16](#))? [Heikael](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

SELECT MAX(ExactID) FROM Bible..Exact
is for determining the highest value. The SQL statement

SELECT COUNT(BibleWord) FROM Bible..Exact
is for determining the word count. The SQL statement

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prophecy and Fulfillment
- Autobiography

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
is 789631; this is the count of the words in the KJV Bible

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the primary key, the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - HisWord, Remember, APass, ActToGod

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format (Numbers 12:6-8). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is being interpreted, (Matthew 1:23, Mark 5:41, Mark 15:22, Mark 15:34, John 1:38, John 1:41, Acts 4:36); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and *not* dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the <http://translate.google.com> web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings (1 Corinthians 12:30, 1 Corinthians 14). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 And the merge is the money convert.
2. 2015-11-03T02:17:00 The specifics, a language.

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an insert trigger, will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and loss of data.

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3](#), [Genesis 1:5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2](#), [Genesis 1:4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID identity column. The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the primary and/or foreign key, the backbone of the Referential Integrity Constraint.

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the (UTC-08:00) Pacific Time (US & Canada) time zone. There is a preference for the Coordinated Universal Time (UTC) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare:

HisWord view

The HiWord word composer of the computed clauses deduces the analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the related AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the AlphabetSequenceIndex to calculate the computed values identified above. The AlphabetSequence is like Gematria. Masar. Hechtrach method. Titles of God.

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. * The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. * (Kooinoa House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs (Luke 4:19)

APass

First, inside and last dates.

ActToGod

This is subjective work: the author applies intelligence to find patterns and resemblances in the Bible.

Scales & Measurements		
Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	- Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains 94. - Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	- This may be the physical count of word occurrences in the Bible. - The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. - The SQL COUNT() function returns the number of rows that matches a specified criterion. - The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	- In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. - An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. - The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. - The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	- Military ranks - Mohs scale for hardness (geology) of minerals - Scifield scale for the strength of peppers - Completely Automated Public Turing test to let Computers and Humans Apart (CAPTCHA) is a type of challenge-response testing used in computing to determine whether the user is human in order to deter bot attacks and spam. The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?

Type of Scale	Commentary	Example of Scale
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	• HTML input range • CSS percentage

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()
Determination is achieved through computed columns.		

(Allen G. Taylor, 2024).

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)
Extremal query	It returns either the minimum or maximum extreme.	Statistics	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping a work reference.
 - Even though Yoruba is the native language of the author, he still and invariably relies on translate.google.com.
 - The author depends on a typing assistant.
- Principle 3: Explore Contexts
- Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
- The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
 - Hardware, software, or network failure
 - Vendor withdrawal of support
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
 - Inability to restore deprecated Microsoft SQL Server backup versions.
 - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
- The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
- What period has God used?
- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium (Numbers 1:3, Luke 2:42).
 - On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium (Numbers 4:30, Matthew 2:16).
 - In the year 2007 — generation time span: this masturbation will bring water. My 40th year (Numbers 14:33-34, Numbers 32:13).
- Principle 7: Generate Multiple Solution Options
- How versatile am I...at amending others? I have to rely my perception to technology providers.
- Principle 8: Design Around Constraints
- Relational databases offer the ability to set constraints.
- Data type
 - Nullable
 - Primary key and unique index
 - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author; the WordEngineering database size, is currently 33390528 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1115.1
sp_spaceused	The WordEngineering database currently uses 32607.94 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 122966.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies to Bible..Scripture_View</u> . Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <, <=, >, >=, <>, >, >=, !=	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <u>In most cases, rarely is this in use, != or/and !=. This is the first time..he is becoming aware...of these expressions. This is the first time..he is becoming aware...of these operators. Overviews for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forte, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows.</u>

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction "%%"
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, >=, <=, >=, <=
Table join supersedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChris
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose7 datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalstic page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js>, which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nowImzoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DateFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordCross/DonFeetLeftHome.html> 2023-02-17..2025-12-01 = 1018 days (2 bibical years, 9 bibical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests: <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js>

```
fetchHandler: async function
(
    fetchUrl,
    fetchRequest,
    callback,
    uidisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uidisplay, rowColumn);
        })
    }
    catch (e) {
        uidisplay.innerHTML += e;
    }
};
}
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/GetPage.html> calls the <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> ajax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospect and Fulfillment
- Autobiography

- The relational model is for storing information in tables.
- The author normalizes data using Object-relational mapping.
- All the databases are OLTP (Online Transactional Processing), not OLAP (Online analytical processing).
- Avoid deadlock occurrences by not permitting user database updates.
- All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
- Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

- The secretive web.config file contains the database access information.
- The web.config file does not explicitly mention the user login name nor password.
- Give access rights to roles, not to specific login identities nor user names.

Database Data Types

- Choose matching data types between the database and application layers.
- Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
- Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

- Consider defaulting textual data to empty string; instead of NULL.

Indexes

- Database changes lags with indexes.
- The field sequence in indexes should follow the frequency of usage.
- When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

- Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
- Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
- Use Camel casing for naming parameters and local variables.

(ABB Asa Brown Boveri)

Performance

The web page components practice of the author, include:

- Keep the count of web page components to a minimum
- Specialize input entries by using the most simple and basic component
- Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

- The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
- Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
- The author standardized on the .png image format because there are few colors.
- In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

- Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
- All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

- Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

- Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
- Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
- Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
- Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

- The current web page, such as, 2015-10-23DoctoralDissertation.html file
- The general Cascading Style Sheet, 9432.css file
- The general JavaScript file, 9432.js file
- The specific Web Service file, such as, ScriptureReferenceWebService.aspx file
- The dynamic link library file, InformationInTransit.dll file
- The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

- The author does not use background-image nor list-style-image
- The thesis only contains images for database and object modeling
- The author does not use [CSS sprites](#) since it requires additional storage space
- The author does not use Data URIs
- The author does not support nor take advantage of Expires Headers
- This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

- The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
- DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
- The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
- Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

- Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

- The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
- The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Detach](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common uri scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.echaimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4195610/designing-rest-api-endpoints-nath-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML outweighs the newness of the JSON transport medium.
- HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

- The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.
- The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.
- An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.
- The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.
- When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

- The alphabets and words make-up the author's work. The composition of the words is indefinite.
- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

- The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.
- This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

- One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.
- The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.asmx	Query(word)
AlphabetSequence.cs	ID(word)
ScriptureReference.cs	ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineerionSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

[GetAPage.html](#) Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query_string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

- [Autobiography](#)

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and (8000 * 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

Discrete

The identify columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary

The Testament column is either Old or New.

Ordinal

The identify columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature

The most important predictor columns are the Word, Dated, and ContactID.

Outcome

The records include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.

The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

Web Design Fundamental

Business Model

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him.

Content Authoring

How query means more ([Isaiah 43:22](#))?

Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and [gibbs.com](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

Characteristic

Resilient

[GoldPage](#) The Bible is separable into parts; these are books, chapters, verses. Dividing a life, according to purpose ([Matthew 1:12](#)). 14 Biblical Generations = 14 * 40 * 360 = 201600.

[DateDifference.aspx](#) The .NET Framework, C# and SQL Server support the Common Era; the date ranges between 0001-01-01 and 9999-12-31. The date difference will display correctly for the time interval - days, Biblical Calendar, and all the dates after the introduction of the Gregorian Calendar.

Declarative

SQL, Linq, CSS are declarative languages, but JavaScript is a functional language.

Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.

The C# class container model and the optional namespace alias content the author.

Cascading Style Sheets (CSS) is modular, and its rules trickle down.

Continuous

Placing the [App_Offline.htm](#) file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.

A single batch file, with a single command line, builds the only .dll, InformationInTransit.dll

```
csc /out:InformationInTransit.dll /target:library /recurse:"*.*" /reference:System.DirectoryServices.AccountManagement.dll,"bin\Debug\WtaAgilityPack.dll","bin\Debug\lTextsharp.dll","bin\Debug\MongoDB.Bson.dll","bin\Debug\MongoDB.Driver.dll","bin\Debug\MongoDB.Driver.Core.dll","bin\Debug\MongoDB.Driver.Core.dll","bin\Debug\Newtonsoft.Json.dll","C:\Windows\Microsoft.NET\Framework\v4.0.30319\WPF\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.ConnectionInfo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.Adapters.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Def.SqlClnWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Sdw.Sfc.dll","Microsoft.VisualBasic.dll /nowarn:162,168,219,618,649 /unsafe
```

After testing, InformationInTransit.dll is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the copy command or the Microsoft Windows Explorer user interface (UI).

When the content of a server-side file with an .aspx or .asmx extension changes, the ASP.NET framework automatically re-compiles for serving future requests.

[jQuery](#) by John Resig is for making Ajax calls to the server. The more recent fetch command is also useful in later cases. jQuery helps to load the latest copy of the author's JavaScript repository [9432.js](#); since browser caching occurs for JavaScript files for a length of time.

The single .css file [9432.css](#) is callable at the bottom of each .html file's head node; JavaScript statements are in the last lines of the .html files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will not reference a HTML node before the declaration of its definition.

[Set a Database to Single-user Mode](#)

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Bibliography](#)
- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)

```
ALTER DATABASE WordEngineering
SET SINGLE_USER
WITH ROLLBACK IMMEDIATE;
GO
ALTER DATABASE WordEngineering
SET READ_ONLY;
GO
ALTER DATABASE WordEngineering
SET MULTI_USER;
```

If the research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases.

The author will place non-Microsoft DLLs in the virtual directory bin sub-directory, and the author will refer to Microsoft DLLs in the web.config file.

The web.config is generally consistent across deployment, the only variable is the database server name, and when the application and database server exists on the same machine, the connectionStrings may use Data Source={local};initial Catalog=master;Integrated Security=SSPI. This means that the author will explicitly specify the database, object owner, and system object name. The Application pool will take care of the security. There are no environment variables, in use, at this time. The HTML files, when calling web services, will specify the full virtual directory path, but when appending css and JavaScript files, relative directories will suffice, full path directory and filename is unnecessary and an overkill.

The author standardized on Microsoft SQL Server as the relational database of choice. There are several alternatives in the market. All database interaction goes through one access point, [DataCommand.cs](#), only this single file needs re-work if there is a database variety change.

When running a unit of code, for the first time, it will initialize the static variables. The [ScriptureReference.html](#) will issue a unique quote-of-the-day, every day; and a random quote, every time. The author program uses the release version of jQuery, which is the most up-to-date. The web services, such as, [Sefaria.org](#), should not need code-revisit. The code in the third-party libraries, such as, [Newtonsoft.Json.dll](#), is consistent, and should rarely need re-deployment.

The application is mostly stateless except for the database read.

Internet Information Server (IIS) HyperText Transfer Protocol (HTTP) by default runs on port 80, like other web servers, but this is modifiable.

Using the current architecture, the author takes care of concurrency and deadlocks; because database writes rarely occur and are short, reads are tolerant.

The threads are simple and conclusive; therefore, there are small start-up and short-down periods.

There is unity between the development and production team, environment, and time frame. The same knowledge worker can write, deploy, and run code.

The author has experience, reporting web server logs, using [WebTrends](#). The author relies on [Event Viewer](#) for logging and monitoring exceptions. The SQL Server Management Studio offers the Error Log, for viewing the database activities.

The SQL Server Maintenance Plan is for scheduling full database and transaction log backup, periodically.

To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal *, for all columns. Rarely does the author join tables, minimizing the work and resultset, in a set-level language.

(DB2 Developer's Guide).

HTML5

Semantic Elements

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept.

Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

Communication of God

- Audio: God first communicated with me by His Word.
- mit-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

Biblically

What did the Jews used numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babar: One language and of one speech ([Genesis 11:1](#), [Genesis 11:3](#))
- Witnesses: Two or three ([Deuteronomy 17:6](#), [Deuteronomy 19:15](#), [Matthew 18:16](#), [2 Corinthians 13:1](#), [1 Timothy 5:19](#), [Hebrews 10:28](#), [Revelation 11:3](#))
- No man could number ([Revelation 7:9](#), [Matthew 10:30](#), [Luke 12:7](#))

How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus ([Genesis 5:2](#), [Genesis 16:11](#), [Genesis 17:19](#), [Luke 1:13](#), [Isaiah 7:14](#), [Matthew 1:23](#))
- God name changes such as, Abram to Abraham, Sarai to Sarah, Jacob to Israel ([Genesis 17:5](#), [Genesis 17:15](#), [Genesis 32:28](#), [Genesis 35:10](#))
- Family naming, such as, Eve, Cain, Seth ([Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25](#))

The word is the author's file naming convention.

Event	Frequency	Scripture Reference
Creation	Daily, Sabbathal rest	Genesis 1, Genesis 2:1-3
Times of the Jews versus (VS) times of the Gentiles	4900 years	Luke 21:24 , Jeremiah 25:11-12 , Jeremiah 29:10 , Daniel 9:2 , Zechariah 7:5
First resurrection	1000 years	Revelation 20:5-6

How will you wait on time as the period itself? Callable unit. At Arthur Andersen/Warner Music, Electronic Data Systems (EDS)/Westpac Bank and Macquarie Bank, he did not know when to go. When we look at the Bible, when does it start a new use-case by explicitly mentioning the beginning period of the occasion?

Procedure, function or method call		Commentary
Pascal language	A procedure does not return a value, whereas a function does.	
C# language	Method call	Commentary
	Instance method call	Calling a method of a class instance
	Static method call	Calling a static method of a class
	Extension method call	Calling 2026-05-25T20:31:00 an instance a static method that was added to a class
	Asynchronous method call	Calling a method and not waiting for the completion of the task
	Base method call	Calling an inherited method which may have an override clause
	Method overloading	Calling a method that exhibits the signature
	Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.
	Constructor method	To create and initialize a class instance.
	Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.

Steer

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization? - The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. - With search-engine queries, the author proposes a query-language. This potentially affords better resource granularity restriction, arrangement option, and maturity of use compensation.

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence	
Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

A type of us: is a kind of us? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.

HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript are on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The `data-` attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is

(Andrew Kelleher)

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition

(Bruce Clay, 2022)

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.

This research does not limit itself to a particular Bible subject nor Word, but, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 **What does God choose as subject (John 15:15)?**

The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional

- 2-Words: My Condemn The first word is the BookID; the second word is the VerseID.
- 3-Words: Who is your manager? Crazy mister Martin. Mister Martin as a good. The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID

Biblical generation - 40 Biblical years

1. 2007–2008 Common Era - the author is 40 years old; the author mentions time.
2. 2021–2024 Common Era - the biological mother of the author is 80 years old; the word recorded by the author is time relevance specific.
3. Actor... role (on-screen name) date?
- 2026-01-15T04:49:00 You look at life... and you feel down. A politician who is probably Bala Timbu, said how he became a politician.
- 2026-01-16T07:15:00 A person was making fun of Dikembe Mutombo on his draft day. Dikembe Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.
- Biblical numbers for calculation.
 - Biblical separation into Testaments, books, chapters and verses for referencing.

2026-03-14T02:28:00 WordEngineering in Islam, Moslem

1. Alphabet-finance is the title of the algorithm which calculates chaos and verses placed forward and backward in the Bible. 2026-03-14T02:28:00 An Alfa is an Islam Moleman teacher.
2. 2026-07-16 Self, I am 1000, African descent United States of America (USA) abstan as mercenaries to Germany, Leviticus. And at that time, you rejoice, that the LORD, did have a heart. Father's land, Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000 1200-03-13 2026-03-10 2026-03-09 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, his financial redeemer. He would come out after a side event. He risked financial loss, travel distance. A person died. I heard, air drop. I later heard chaos.
3. 2026-03-14T02:28:00 In a form, 1 of the query options was the writing direction, and another data entry term was robotics.

2025-12-07T20:58:00 Is AlphabetSequence prophetic?

1. Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
2. Will the date match historical events?
3. 2026-01-06T13:56:00 You are using... the Bible... is it supportive?
4. 2026-01-20T04:00:00 Words prepare for activity.

Scripture Reference Tracking

Terminology	Word	Relational database
Naming	God's first commandment to the first man, Adam, was for him to name the animals.	For a relational database, the various objects are named.
Counting	God counted the days during creation.	Count() keyword.

Word	Scripture Reference
Most recurrent activity	
Highest measurable	
Humane	
Understandable	
Teachable	
Repeatable	
Translatable	
Transcribable	
Generable	
Referenceable	
Securable	
Suppressable	

Software Engineer versus (VS) Database Administrator

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk, paging, Github.com version control. E-mail body, attachment. Internet front-end files (.html, .js, .cs).	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

2026-08-11T16:00:00 What... together... meant for you and me?

2026-08-10 [Creating Your Own Library](#) Posted on July 25, 2026

1. In 2002, while I was taking computer courses at Ohio College 2026-08-11T22:29:00 to review my skills... I started copying sample C# programming language source files.
 - On about 2003-10-06, I started to model relational databases to record the words spoken by the Holy Spirit to me, contact address book, and bookmarks.
 - I also stored in reference 2026-08-11T22:38:00 religious work... Bible, dictionaries, and commentaries. 2026-08-11T22:56:00 These were initial Microsoft Access, .mdf file stands for Master Database File, that I exported and imported into Microsoft SQL Server relational database tables.
2.
 - 2026-08-11T23:02:00 My expectation... was to build work samples and demonstration deliverables for 2026-08-11T23:04:00 eventual employment.
 - 2026-08-11T23:05:00 I understood my limitations in the past... was not having a supportive framework, 2026-08-11T23:07:00 and recent work experience, and in-demand market skills.
3.
 - 2026-08-12T00:03:00 How the ease of using... helps me.
 - 2026-08-11T23:16:00 A readiness to listen... learn.
 - 2026-08-11T23:20:00 What uses my aid?
 - 2026-08-11T23:33:00 What does the world require for me... that I need?

A conversion page

Customize the content of an url? This is how the web page implements this technology. This is how-to implement it in your preferred technology.

Keyword	Find what	Replace with	Scripture Reference
Religion	Idolatry	Monotheism	<u>Acts 7:40-43</u>
Learning	Egyptian	Hebrew	<u>Acts 7:22</u>
Location	Egypt	Promised Land	<u>Acts 7:3-7</u>
Vocation	Ruler and a judge	Ruler and a deliverer	<u>Acts 7:10</u> , <u>Acts 7:27</u> , <u>Acts 7:35</u>

What is remembrance...associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

2024-01-17T13:36:00 Alphanumeric

Date	Type	Word	Commentary
2004-07-11	Money currency	English pound 45 percent	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%
2008-03-11	Calendar	September 22	

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

1. How essential are we: to the personification of God?
2. The spirit man holds
3. When did the archangel... His view as ours? ([Genesis 18:10](#))
4. How are we acceptable; to what is new? How does God, build up, to His word ([1 Samuel 9:15-17](#))
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Sounder, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ([Matthew 23:14](#), [Acts 8:37](#), [Acts 15:34](#), [3 John 1:15](#))
14. Naming of words ([Genesis 27:28](#), [Genesis 35:10](#), [Genesis 47:72](#))
15. We have been doing unconsecrating power
16. I said, I heard: 2021-04-11T08:37:00 In a location to the North, probably 99 Ranch Market or Marina Food, or DaiSo. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight, I said, 6 9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does the **silhouette** as **time**? AlphabetSequence is resource minimal:
 1. Doable by hand
 2. Compute: Not technologically demanding
 3. Maturity: Since 2002
18. Generation into Sequence.
19. Is this a finalized work... and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... and not ~~seem~~... by the grammatical correctness.
23. To co-operate as we are. Robert Estienne English Alphabet

2017-03-06T00:00:00 A Comparance of Age

Divided as separated. Go this way, that way.
I want to program, but I don't want to match two programs together, except for deep thought.
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, all the plagues of Egypt ([Genesis 37:5-11](#), [Genesis 30-24](#), [Genesis 40-41](#)).
[TCP/IP](#) is separable into four layers; they are the link, Internet, transport and application layers. No breaking ([Matthew 19:8](#)).

Marriage

Marriage is not a practice, in the life after, resurrection ([Matthew 23:30](#) [Mark 12:25](#) [Luke 20:35](#) [Revelation 21:2](#) [2 Corinthians 11:2](#)). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. [It is more of a father that wants you, Jesus resurrected, after three days \(\[Matthew 12:40\]\(#\) \[Matthew 26:61\]\(#\) \[Matthew 27:40\]\(#\) \[Matthew 27:63\]\(#\) \[Mark 14:58\]\(#\) \[Mark 15:29\]\(#\) \[Luke 24:46\]\(#\) \[John 2:19\]\(#\) \[John 2:20\]\(#\) \[2 Corinthians 11:17\]\(#\) \[Revelation 21:1\]\(#\) \[Revelation 21:7\]\(#\) \)](#). The breaking of bread ([Psalms 34:20](#) [John 13:36](#)).

On the client, HTML5, CSS3 presentation, and JavaScript is behavior. Both ASP.NET and ASP.NET are server-side logic.

The application is a dynamic link list library (DLL), and it is separable into client, database, and application layers. But with the advent of language integrated query (LINQ), this delineation is slowly diminishing. LINQ rivals previous division of labor.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL CLR critics claim that while the rest of software development have progressed, we still use an archaic language; SQL is a challenge.

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript.

The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?

The client started as HTML, but now has JavaScript and CSS.

CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas

JSON and XML have made in-roads.

To each resemblance

1. Where His word expected mine? When I get a word from God I could do the following?
 1. Write the word in my notepad, and never refer to it again.
 2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 3. Produce an artifact based on the word.

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is capacity full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQL CLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

What did He find... as useful

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: • Client/Server autonomy. Client embedded-SQL. • 1. The datetime column defaults. 2. The identity column is auto-generable. 3. Computed column: What can the computer do for us?
Microsoft sqcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenidenij, kenidenij.wordpress.com
Refer to dates.	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

A Causal to Hearing Words

He said and He did. Word (Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include:

- 2026-07-25T16:15:00 Learning and modeling the Bible and building a framework and a set of reusable components with class objects instantiated collections. This initial application, process logic, includes scripture reference, the 66 King James Version (KJV) Bible books and query-able Bible Word, and personal initiatives. For example, AlphabetSequence.
- During my education, I learned how to write a thesis, do practical project building, select electives, and focus on specialization for specialty.
- 2026-07-25T19:17:00 What will have the most impact on your life?
- At Newark, California (CA) 94560, I owned and lived in my 1st American house.
- 2026-07-25T18:11:00 What he was saying he wants to be (Genesis 4:1-26, Genesis 24:50)?
- At the intersection of Paseo Padre Parkway and Hall Way, north-east. I was walking southward. When I first received word, it was pertaining to my personal life and experience, vocation, and relationship.
- 2026-07-25T18:11:00 We must occasion to use? Phoo Chan first changed his south-west tire, and secondly, Phoo Chan changed his north-west tire, and his son, Aiden Chan, watched and aided.
- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at Delano College, in the Fremont and Newark campuses.
- Read books and magazines at Barnes & Noble Borders, Walden Pond Books Wal-Mart and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Solitary living at Newark City LA California, Peterson.
- Fast, everyday, only ate, once a day, in the evening. I ate Nomura Holdings Kokuho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revelation.
- I was living on a meager income (Exodus 2:15-25).
- Only familiar with Case-based Reasoning and Use-Case.
- AlphabetSequence is abecedary.
- Set-based: Effort to record everything Bible code.
- This is a man, he wanted to know about his favorite (Daniel 1:3-21, Daniel 9:23, Daniel 10:11, Daniel 10:19)?
- Discernance (John 5:19)
- Personalization of Realization (Proverbs 25:2)?
- I will make the difference (Deuteronomy 26:5, Ezekiel 16:3)?
- What we all ought to be?
- 1997-12-31 I will not entertain Nada. Prophets make New Year predictions.

There are duplicates in the Bible.

Type	Commentary
Name	Why the differing name? Man's name change? God name variance: Son of David versus (VS) Son of Man (2 Samuel 12:24, 2 Samuel 12:25, 1 Samuel 25:5, 1 Samuel 25:25). • Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes names • Name changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul • Name misspelling, Rahel for Rachel. A rewording of your view. • Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges • Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	• Deuteronomy - Remembrance • Monarchy - Kings versus Chronicles • Gospels - Our LORD's, life story • Apocalyptic - Daniel versus Revelation
Quotation	• Retelling previous events • Prophecy fulfillment • Answers based on scripture
Discrepancy between question and answer	<u>Joshua 5:13-15</u>
Canaan words repetition?	<u>Genesis 12:5</u>

These duplicates may introduce statistical error and require clarification.

Chuck Missler versus (VS) the author

Chuck Missler of Kolonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2018-06-02 <u>Candlelight Celebration of Life Service - Chuck Missler</u> , Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2025-12-22T08:48:00 <u>Teaching...navigator</u> . 2014-08-18, 2025-12-22T08:48:00+1444 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 Stay the course. 2026-05-16T18:40:00 <u>What is in dispute?</u> 2026-05-28T17:17:00 The author associates Chuck Missler with teaching each story in the Bible. • Strategic trend. • Introducing other Bible scholars and mentioning their particular contributions. • Making laypeople teachers of the Bible. • Referring to terminology, Jewish history and practice, world events.	
2026-08-11T16:00:00 <u>I did not need any more teacher. I did not need any more preaching.</u>	
2024-11-03 21:33:37.887 <u>Pattern of assembling.</u>	
	2024-11-03T11:58:00 <u>What we brings...as amount...to what?</u>
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him.	
Chuck Missler was preaching from his understanding of the Bible.	The author is relating the word spoken to him to the Bible.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	The author is relating to people. Coming from experience with people.

2026-07-05T17:35:00 What did he... occur... as the same... as

2026-07-05T20:18:00 How we are... our type (Galatians 3:28, Hebrews 11:1-3)

2026-07-06T00:12:00 The continuation... of all... things (Genesis 1:1, Genesis 4:26, Daniel 2:34-35, Daniel 2:44-45, Revelation 20)

2026-07-06T13:16:22 What part... of design... are you? (Judges 18:13-27)

2026-07-06T15:08:00 Displacement... disorderly (1 Chronicles 10:14)

2026-07-06T19:40:00 Technology... where are you? (Daniel 11:32)

2026-07-06T19:58:00 It's all... he... places

1. Kowe included the additional Yoruba alphabet with diacritical marks, a dot below, and high and low tones; and a dictionary and a translator.
2. A relational database includes related tables with primary keys, foreign keys, constraints, defaults, clustered and non-clustered indexes, views. A client/server composed of 2 computers interacting together, with possibly an application-tier extension. During my Master's degree at the University of Technology, Sydney (UTS), I first wrote a paper on distributed databases, and finally a thesis on Client/Server.
3. During my Doctorate degree at the University of Wollongong (UOW), I researched intelligent appliances which are composed of smart cards and flash memory.

2026-07-03T14:31:00 Accepted of manage (Luke 1:20, Luke 1:38)

2026-06-14T16:26:00 What vary?

1. I started with word processing, and I advanced into Extensible Mark-up Language (XML) and Extensible Stylesheet Language Transformations (XSLT), and later relational database schema.
2. In Righting Software, Juval Löwy of IDesign, prescribes grouping use-cases and their extensions.
(Juval Löwy, 2019-11-27).

2026-05-29T10:26:00 Database writing

1. 2026-05-29T02:31:00 There is a difference between writing an event, and associating personal testimony. There is only so much information an author can write on paper. 2026-05-29T03:17:00 and later use a computer to further his thinking. Complement, re-cap. 2026-05-29T03:19:00 As could be seen from study Bibles. 2026-05-29T03:21:00 Anthony Novak, my colleague at Information Daiting Services (IDS), a subsidiary of White International, once pointed out that I do a lot of clipboard copy and paste. Anthony Novak may be referring to Kowe, where I re-draw a Yoruba alphabet image, whenever a user presses their corresponding Function Key.
2. 2026-05-31T13:45:00 He is not searching the Internet... he is searching... a local database. Replication from the central database, Informix to the remote database, Watcom SQL Anywhere. Knowing your data.
3. 2026-05-30T16:04:00 What is aside from the fact?

2026-05-30T13:46:00 How he will know the distribution?

1. Moses: What did he intend to use (Hebrews 11:23-29)?

2025-01-31T08:51:00 What title...we are befriending?

1. My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Mufoz of Central Piedmont Community College (CPC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowe.c for the Yonuba language.
4. My first domain name was commonpeople.org
5. The first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.

2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Bible arrangement: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible.

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.

2024-07-12T21:22:00 Making a correction...making a correction.

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
Author's experience	The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.	The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. ConversionTableTemperatureMachineLearning.py	The traditional architecture is client/ server.
Software requirement	1. Microsoft SQL Server 2. SQL Server Management Studio 3. Author's HisWord database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include: • Views • User defined functions (UDF) • Stored procedures 4. Application code layer: • .asmx • Business and database access code 5. User-interface (UI) layer: 1. Browsers 2. .html, .js, and .css files	1. Python 2. Machine learning library for example Scikit-learn 3. Generate training data ConversionTableTemperatureCommaSeparatedValueCSV.cs 4. Training data which is storable in a .csv file. ConversionTableTemperature.csv 5. Predictive data analysis ConversionTableTemperatureMachineLearning.py	• How proprietary is the architecture? • What is the portability of the code? • Shift away... from server to client. • <u>The world has moved away from packaged software to distributed software.</u> • Offer only one functionality.

2026-03-21T08:17:00 What word did it lead me, and how did I direct it?

Progress	Commentary
Data entry	Word processing awards grades based on grammatical correctness. There must be uniformity in the language, spelling, and punctuation. 1. At Information Dialling Services (IDS) we commenced capturing telephone numbers, and movie text-to-audio. 2. At Wilson Market Research, we used consumer statistics and the viewing audience to target advertisements. • 2026-03-21T10:48:00 <u>What do I capture...in hope of realizing?</u> • 2026-03-21T11:59:00 <u>What did he want to know as you...and how did you represent it?</u> • 2026-03-21T14:40:00 <u>What you do query?</u> Chronology... relativity. Data type? Number, date, time, string, boolean, image, voice, video. 34300 Seward Drive, Fremont CA 94555. I was at the intersection of Paseo Padre Parkway and Seward Drive, north-east, and I was turning eastward. Between 34316 Seward Drive, the house of the Santos family... 34320 Seward Drive, the house of the Sahani family, was an orange pumpkin, and my right palm and fingers, stretched eastward between a black painting and a blond vertical stalk.

2026-03-20T13:32:00 What alternate team...did He built...and why?

1. Unity ([1 Samuel 25:2](#))
2. Sequential ([Psalm 110:4](#), [Matthew 22:41-46](#), [Mark 12:35-37](#), [Luke 20:41-44](#), [Acts 2:34](#))
3. Exemption ([Psalm 16:10](#))

To:
Subject: Your SQL Server background caught our RR -- 10-20 hrs/week, you set the pace

Hi Ken,

SherlockTalent is hiring on behalf of an esteemed client:
SQL Server DBA & User Support Specialist - 180% Remote - Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance - provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution - no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

- What sort of the distance... as he know?
1. Daniel M. Russell. The Joy of Search: A Google Insider's Guide to Going Beyond the Basics. Originally published: September 6, 2019
As part of the Doctoral studies of the author, he developed his expertise on the Unified Modeling Language (UML) use-cases, and sequence and collaboration diagrams.
What do you use? As many of His representation.
 2. In Abeldin, The Binding of Isaac.
There were some assumptions which were tested out (Hebrews 11:1-3).
 3. How I relate as a simple example of uses (Daniel 2, Genesis 41, Genesis 4, Genesis 2:5-6, Genesis 2:18-25).

Old	New	Actor	Commentary
Work	House	Joseph	At Guaranty Trust Bank (GTB), I taught Hajara Adeola, the wife of Fola Adeola, a university French teacher at Gescro, 34 Association Avenue, Ilupeju, Lagos State, Nigeria. The Manager of Consumer Banking invited me to his house to install Lotus 1-2-3 spreadsheet for his wife and him. The Manager of Corporate Banking, George, asked me to develop a community banking software application. Fola Adeola asked me to develop a bank draft application in dBASE and Nantucket Clipper. 2026-02-10T22:12:00 What are we bring together... what are we setting apart? 2026-02-10T22:14:00 What does he want to do... as apart from you? As certain from you? 2026-02-10T22:26:00 What utterance... remain the same? 2026-02-10T22:41:00 What has God decided... for our future apart (Genesis 11:9, Exodus 12)?

2026-01-31T17:44:00 Remi Adeniji said she submitted her research thesis titled, Open-Source persistency. In the center-east, a male was taunting the Russians.
2026-02-02T20:10:00
1. Genealogy (John 3:16, Matthew 1:17)
2. Role (Genesis 3:15, Matthew 2:2, Matthew 27:37)
When I am doing this?
• Pre-condition (Genesis 3:15)
• Assertion (Hebrews 5:8, John 20:17)
• Post-condition (Genesis 49:9, Revelation 5:5)

- 2024-11-13T19:12:00 Translation
1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
 2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (V5) Functional dynamic equivalence (thought-for-thought): BibleWord.html is the former.
 3. 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

(Tim Wildsmith, 2024).

2026-01-28T19:01:00 Analytics

1. 2026-01-28T19:01:00 At Albertsons Lucky, Charter Square at the Bank of America (BoFA) customer service desk, the German Store Manager, John Holtz, was attending to an Asian father, older son, and younger daughter, who did acrobatics. The word came on Paseo Padre Parkway between Blackstone Way and Siward Drive, on an overhead bridge, Highway 880 south, at the south of the 1st of 4, driving lanes.
When is it all he asked for... He persuaded in doing?
New Testament

2026-01-10T10:37:00 Interpret

- 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bullywood. Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic; they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

2026-01-13T08:18:00 Biblical Interpreters

1. Reverence to God (Genesis 41:16, Daniel 2:23, Daniel 4:26, Daniel 5:23)
2. Witness (Genesis 41:13, Genesis 41:54, Daniel 5:31)

2025-12-26T15:49:00 To... the event of the day? Remain (Genesis 22:14)

At Milk & Honey Cafe, I was attended to by Amy Hsueh Tm, who previously said, I work here, and Audrey Russell. I saw a young Hindi couple sitting in the north-center. I saw some males, and a single woman at Yifang Taiwanese Fruit Tea, and at Albertsons Lucky, Charter Square. Their nationalities are Chile and Peru.

2025-12-25T12:26:00 Trend Analysis

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
 1. WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.
 2. SacredText table: 2025-12-25T12:41:00 is nearer to the whole set.

2025-12-24T15:46:00 Word Re-use

Word	Commentary
<u>What word are oart of His? Is what word He use as His.</u>	Composite primary key, foreign key, and index; rollback or commit transaction; primary-child table, orphan record
	Outer join
	like % ?
	!< or/and !>

2025-12-15T12:52:00 When was it leading? When was it lagging? When was it exact?

Title	Actor	Scripture Reference	Leading, lagging, exact
Romance of Redemption	Ruth	<u>Ruth 1:6, Ruth 1:22, Ruth 2:7-8, Ruth 2:14, Ruth 2:17, Ruth 2:19, Ruth 2:21, Ruth 2:23, Ruth 3:1-2, Ruth 3:8, Ruth 3:10, Ruth 3:13, Ruth 3:18, Ruth 4:7, Ruth 4:9-10, Ruth 4:13-15</u>	Exact

2025-12-20T10:43:00 Relationship between... number and the Bible?

Percentage	Commentary	Scripture Reference	Sacred Text
75%	Wo 75%	<u>Matthew 7:10, Jonah 3, 1 Kings 7, 1 Samuel 21:3</u>	Greek Kingdom (<u>Daniel 2:39</u>)

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, .js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order, tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location — HisWord table, Word column. The surrounding related information is inferred and subjective (Matthew 16:23).

2025-12-25T21:46:00 Time to first frame

When did He define His rule (Genesis 18:19)?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

2025-12-26T21:59:00 Timeline inspector

GetAPage.html Includes performance.now() for AJAX calls 2025-12-26T22:35:00 initiation and completion. 2025-12-26T22:28:00 We must... schedule one another... as purposely.

2025-12-28T19:25:00 User Interface API Documentation

2025-12-28T19:30:00 Content

2025-12-28T19:32:00 Why would I ever use this API?

The web pages and their associated web services calls provide examples 2025-12-28T19:37:00 on how a client can access the database.

2025-12-29T21:15:00 How should I use this API?

- 0%...100%: BiblePercentage.html
- 2-Words: MyCorndema.html
- 3-Words: What'sYourAnswerCrazyWaterMartinMisterMartinAsAGood.html

2026-01-03T19:03:00 How does the API work?

ScriptureReference.html 2026-01-03T19:10:00 [inquires wrong, ineligible (Matthew 4:2)]

2025-10-23 19:51 UTC Building a UI Framework...2026-01-03T19:10:00=72 days (2 biblical months, 12 days) (2 months, 1 week, 4 days)

2026-01-03T20:39:00 Operational Strategy

2026-01-03T20:46:00 Mission

2026-01-03T20:54:00 We are bringing you... to account our known (2 Samuel 12:24).

Ian Hickson (2025-10-23T19:51:00).

2025-12-21T06:47:00 A block of records.

GetAPage.html Sub-divisions

1. AlphabetSequence
 - AlphabetSequence.html is the sum of alphabet places, and the separation of the Bible into chapters and verses.
 - AlphabetAndTraining.html AlphabetSequence languages.
 - AlphabetSequenceGroup.html is for AlphabetSequence, and specifying the Bible sections.
2. BibleWord.html supports specifying the combination logic (and, or, phrase). 2025-12-21T11:03:00 Also, restrictions can be placed... on the various divisions of the Bible. Parts of speech are ignorable.
3. BibleDictionary.html 2025-12-21T11:16:00 will retrieve meaning of the words.

2025-12-03T22:38:00 To be reciprocal... of the value?

1. http://crbc.com/2025/12/03/stock-market-crash-risk-black-monday-october-1987.html?utm_source=firefox-newtab-en-us
2. http://crbc.com/video/2025/12/03/former-treasury-sec-robert-rubin-on-markets-october-1987-99e-risk.html

Layman	Know their God
When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases.	Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.
I used to rely on my education and experience.	Now I draw on expert opinion? 2025-12-04T22:00:00 <u>Expert facts</u> , 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. <u>What sequence for the when?</u>

2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch were drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and theorems.

2025-12-05T12:09:00 What did He turn to... as usage (2 Chronicles 16:9)? San Jose Market Center: 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.
2025-12-06T15:26:00 What does He associate... with me... and how do I be the guide?

2025-11-23T00:28:00 What have you... used... the Bible for (John 20:31, Acts 17:11, John 5:39, Joshua 1:8, Daniel 9:2)?

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text — reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion (Acts 17:11).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?
8. Compare times? For example, during the time the Bible was written, Jews worshiped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 Absent... of the same.

A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 Can we determine... to be usage?

- Nullable

- Background
- Prospects and Fulfilment
- Autobiography

- Microsoft SQL Server database connection string ApplicationIntent=ReadOnly
- On the referencing side, it can only relate to a single referenced entry.
- Varchar columns have maximum sizes.
- Varbinary columns can be large.
- Leading zero Zero five eight four one versus (V5) S841

2025-07-30T10:22:00 Schema changes

2025-07-30T10:22:00 Schema changes a table

1. The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
2. The SQL Server Management Studio table design menu option provides the most flexibility.
3. SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. URIMaintenancePage.aspx.cs For example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 Can I be impartial as others?
 - 2007-08-04 ExCop is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines, 2025-07-14T16:50:00 To what extent do I know the culture of others?
 - JSint: The JavaScript Code Quality and Coverage Tool
 - 2018-01-05 W3C: The W3C Validation Service
2. Information Hiding: 2025-07-17T20:46:00 Addressing, 2025-07-18T19:33:00
 1. During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
 2. 2025-07-18T19:45:00 While working on a project for Information Dialling Services (IDS)... 2025-07-18T19:47:00 under the auspices of Ralph Silverman, 2025-07-18T19:49:00 The application client suffered from information overload.
 - 2025-07-18T19:51:00 ROSS telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/ server with PowerSoft PowerBuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 How is a writing tool... where is the speaker?
 3. During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.
 4. 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.
 5. 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.
 1. Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service, .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
 2. Application: A dynamic link library InformationInTransit.dll queries the database.
 3. Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 and retrieve the composed God's word.

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

Software Engineering: A Modern Approach by Marco Tulio Valente, Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 he relies on his ousurance of the truth

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

Interest of the users									
ASP.Net Web Forms - control version	HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming.. Computed Columns

1. 2025-05-17T20:16:00 Pure function, referentially transparent:
 - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Singularity of the Composition.
2. 2025-05-22T18:10:00 Immutability:
 1. 2025-05-22T18:16:00 Object-oriented technology serves change states.
 2. 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 3. 2025-05-22T18:17:00 As is of the need for database storage.
 4. 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
3. 2025-05-22T18:31:00 Practical need for recursion?
4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO
```

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINQ.

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and IHaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

- A data modeler uses data definition language (DDL) to design the information container.
- In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
- In 2007, when I was looking for work, I modeled the IHaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given

- **Alphabeticum:** Monetary values vary according to inflation and foreign exchange rates.
- **Unit of Measurement:** Age stays constant for a year?
- **Indicators (VS) general:** The temperature of Christ... The 10 Commandments. What will expand? 7 choices.
- **The writing assistant** may suggest word changes:
 1. Spelling corrections.
 2. Verb grammar tense.
 3. Synonym versus (vs) opposite.
 4. Singular versus (vs) plural.
 5. Depreciated.
 6. Currency.
 7. Locality, regional, custom, preference.
 8. Anglicized.
 9. Religion.
 10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
- **Personal attention.** Longevity. Insertion. Customization. Adaptation.
- **When did he part ways... and when did he section ways?**

- When: Called — In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)

Word	Bible Versions	Dictionaries	Commentaries
Primary Key	Scripture reference	The Bible word has a place in the author's terminology, usage, retention.	Disparate scripture references which are inconsistent and non-standardized in commentaries. Not aligned with AlphabetSequence. 2024-07-13T17:01:00 Where does he see growth?
Proliferate	Bible publishers, versioning and language translation	Hebrew translation	Commentators

Relational Model

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Codd's 12 rules

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View.

2024-06-15T21:28:00 [What is certain to the data?](#)

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 [To who... I exchange... my good?](#)

Rule 3: Systematic treatment of null values:

2024-06-18T21:49:00 [Unknown or inappropriate.](#)

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

2024-06-20T18:39:00 [It looks at the data as a whole.](#)

Structured Query Language (SQL) sublanguage

Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fail in the following cases: • Primary key or unique index duplication. A primary key column may not be null. • Invalid datatype or extra large data size or out-of-range • Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in Datedfrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 [What part of yourself... do I desire as my future?](#)

Rule 9: Logical data independence:

2024-06-22T17:03:00 [The opinion of someone else... is beside me.](#)

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposeful: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man (Genesis 2:7, Genesis 6:3)?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

Volume, Velocity, Variety

Data	17104 KB												
Index_Size	9648 KB												
Unused	1544 KB												
Velocity	The author does manual data entry.												
Variety	At the beginning, the author parsed XML files into textual relational tables.												

(Jack Hyman, March 2024).

Data Types

HisWord table

Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly)

or

Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
URI	Nominal (non-ordered)

- Title
- Abstract
- Acknowledgments
- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prophecy and Fulfillment
- Autobiography

Column name	Column type
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth (Acts 7:20)
- Family (Acts 5:31)
- People (Hebrews 1:8)

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarity with JavaScript meant client-side work.
- What I am good at doing...is what He is good at making. (Genesis 41:32-57, Genesis 1:1-1:7, Genesis 4:26).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
 - 1. GetAPage.html serves as a gateway to specialized links.
 - 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality. (Daniel 9:24)?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... Why I do it?

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences, companion?
- Experimenting...as the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. Simulates?
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. We all make our following.
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.
How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reorganization may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

Our continuing our trade. (1 Samuel 25) To be conformable of age.

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependent
 4. GetAPage.html HisWord section: Time variant
- For a period of time, we are as we seem we are? What needs a success (Genesis 4:7, Matthew 14:8, Mark 6:25)?

(John Calvin Maxwell, 2023).

What do I desire...as part of significance?

1. Moses? Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).
2. Abraham? Seed (Genesis 17:9, Genesis 15:2, Genesis 22:2, Genesis 22:12-18, Hebrews 11:17-19).

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Ite eyan ni Ion lo yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

2023-12-15T08:40:00

What substitution...we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 22:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13
Birth place	Matthew 2:6
Matriline's origin	Genesis 25:20, Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozienko).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order; Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCR/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

- Autobiography

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dates) or nullable ([1 Samuel 3:14](#)).

For	Against
Prudent	Disposable
Hyperlink	Diversion
Quality Assurance (QA)	Prone to error
God	Man
Word	Commentary
Location	Scenery
Transaction commit rollback	Data cleansing

Typing Assistant

What are we modeling version with? [1 Samuel 31:15](#))? This is a long trend of disruption... word resonances with AlphabetSequence (Index, Scripture Reference), [Thema](#) [86c.ada](#). A record is insertable only once. There may be multiple updates.

For	Against
Man	Machine

Numbers in Themes

- He expressed good as how He felt ([Genesis 1:4](#), [Genesis 1:10](#), [Genesis 1:12](#), [Genesis 1:18](#), [Genesis 1:21](#), [Genesis 1:25](#), [Genesis 1:31](#), [Genesis 2:9](#), [Genesis 2:12](#), [Genesis 2:17-18](#), [Genesis 3:5-6](#), [Genesis 3:22](#)).
- He expressed start and end of time ([Genesis 1:1](#), [Genesis 1:5](#), [Genesis 1:8](#), [Genesis 1:13](#), [Genesis 1:19](#), [Genesis 1:23](#), [Genesis 1:24](#), [Genesis 2:1-4](#)).
- King of the Jews ([Matthew 2:2](#), [Matthew 27:11](#), [Matthew 27:37](#), [Mark 15:2](#), [Mark 15:9](#), [Mark 15:12](#), [Mark 15:18](#), [Mark 15:26](#), [Luke 23:3](#), [Luke 23:37](#), [Luke 23:38](#), [John 18:39](#), [John 18:39](#), [John 19:3](#), [John 19:19](#), [John 19:21](#)).

To be actual things

- Pronunciation ([Luke 1:13](#), [Luke 1:60](#))
- Application ([Luke 1](#))
- Spelling ([Luke 1:61](#))
- Reference ([Matthew 11:14](#))

In telling the future, there are two parts: prophecy and fulfillment ([Revelation 19:10](#)). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

What prize at the target?		
Prize	Target	Scripture Reference
Kore.exe	Diversified language	Genesis 11:9 , Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/ISO/Gradual	I have decided to work on a gradual improving system.	Psalms 132

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:
1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.
This is visible in:

.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs
http://github.com/KenAdenji/WordEngineering/blob/main/ISO/Gradual/Contacts/ContactList.aspx	http://github.com/KenAdenji/WordEngineering/blob/main/ISO/Gradual/Contacts/ContactList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w\c
sc-status sc-substatus COUNT(*)
200 0 185115
304 0 9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w\c
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -i:w\c

Task completed with parse errors.

Parse errors:
1356596 parse errors occurred during processing (To see details about the parse error(s), execute the command again with a non-zero value for the "-e" argument)

Statistics:

Elements processed: 266572
Elements output: 20
Execution time: 84.46 seconds (00:01:24.46)

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is =176 work hours. A work year is =2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Re-use.
5. Metric:
 - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications			
	Sample Specification and Categories	Constraints	User Specification (Demand)
Function	The current work meets the design of an Intranet. The test environment.		User Specification (Want)

- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Experiences](#)
- [Background](#)
- [Prospecty and Fulfilment](#)
- [Autobiography](#)

	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
How it works	1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.aspx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(De)Lean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (V5) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

- To know my part as His?
- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- [I have decided to work on a gradual improvment system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX... only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [2432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \(Mark 7 \)](#)? 2025-07-12T16:44:00 [What did he do? How did I do \(Luke 1:43, Luke 1:44, Matthew 3, John 3 \)](#) ?

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abimael's Law](#) comes into recognition in [GetAPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ephraimtech.com/WordEngineering/WordUnion/BecauseWeAreToldThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreToldThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

- ## Development History

In Australia, I got involved with the prison ministry at the Villaret Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contact consulting was at the Department of Training Education Council (OTEC), so I had an understanding of integrating and placing re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. This influenced my desire to practice authentic Christian literature and improve my communication. How could I relate to less fortunate people? How may I be the one giving? How can I let the Holy Spirit partake on my side? What are these roles for, and how will I be able to mediate? What do I share as a bargainer? All these are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable, humans are useful. Where does a side take the rest? What I am finding out, is how necessary I am as a person? How do I do my part in participating? What can I take from me, and make as your own? My words will not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you say. When times, programming lines, lines of code, play out a scenario. So words make meaning as sufficiency. Whose life have I lived to complexity? To the full of His deed ([John 15:24](#))? What can His prove relate to me? What did He know as one's first, pre-eminence,

Written about us how many?			
Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Enforce a covenant with the many	Genesis 9:24-27

It is firstly, a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is useful in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node in the web.config. When the user decides to stabilize and amend no further changes; then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of word, meets today's expectations. The addition of the ActToGod table, demonstrates the maturity of the author; since it advances from data to information.

The author, first wrote his history, in multiple stand-alone files (HTML, XML, [Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a `ContactMaintenance.aspx` server-side page as a user-interface (UI) to record contact information. This page remains active, till today. The author uses Microsoft SQL Server Management Studio to document general information. When the author is offsite, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please

understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

Adoptability:

1. What is the minimum requirement? The author believes it is the holy Spirit spreading the word, and it is not him, making up the word. As long as you have the Spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.

- What are the literacy level requirements? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex in table. To determine the AlphabetSequenceIndexStartDate, you need to know, the count of chapters and verses. This manual work is not easy to do common, which is not error prone.
3. The Biblical account wrote dreams and visions throughout, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar, years, months, days, may benefit from the stipulation and generality of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this work as a reference. The widely acceptance of a work, comprises preference and prevalence.
5. The result of the Bible, is how we use it. The emphasises of Jesus Christ and apostle Paul is the work for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Tasks

How to go about it?

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication.

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge

Elements

Word processing flows more naturally than data entry

Guidelines and tools

A relational database is a substitute for text processing.

Stakeholders

I am the primary contributor and beneficiary

Outputs

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown.

(Alison Cox).

Lessons Learned

- Words heard: Leading up to 2008-07, I was not fully recording the word of the LORD (Job 23:12).
- I used to ask God for a word? To realize where my opinion lies?
- Familiarization with data.**
- You previously stored your word in a database. You worked on a text in .html files. 2002-10-23 You chose to transfer to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work (Job 22:11)? One of Myself offering as much as I use?
- Words heard between waking up and waking outside are written in the author's backspace's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for others? Is how I needed Him.
- Putting Him into words.
- My time away from the family, United States of America (USA), may have helped me gain independence.
 - In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life, extend ours?
 - Did I decide the truth? Do I take the truth?
 - The importance of the Word is how it is made.
 - Post-dated: God convicted me, I do not take the plight of the people to heart. Someone ART Station, Bay Street Emeryville (CA) Fire Alarm Panel 8. FDC Building A 5604-5634. To mean, I decide the story?
 - How did they handle the Messiah? (Luke 1:38)? Crossing the divide? To need someone as I? (Genesis 15:2)? You know Me as capable of work? (1 Samuel 17:36). Romans 4:19?
 - The Yordub sentence. Ma fobon di, I will use wisdom to block it.
 - Is difference in connection?
 - How useful you have been in determining what? How diversification the changes? (Genesis 4)?
- The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
- It is desirable to have words that are used in the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in Yordub, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. A step to do is never forgotten of the LORD. Whose obscurity has he solved?
- What can we be in the midst of a people, certain to God? (Matthew 19:12)?
 - What do you know how to use, as you desire victory?
 - Rich of God. Reach of God.
 - How many are others? (Daniel 11:41)?
 - I have to present God, as I am allowed to be.
- How I want it to be, how He wants it to be? When does the word control the answer? (Acts 10:11).
- People have asked me how I do my work? My twin siblings call my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Built or buy? Another thing of mine is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost. If memory is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we secure our work? (1 Samuel 25:28)? Needs to be met?
- The author will record the publishing and receipt.
- An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
 - I didn't add, until the movement? (Acts 1:8)
 - Did he ask you to do it? (John 8:44)
 - Do Him, about Him? (Genesis 1:1, Genesis 4:26)
 - Family response? (Matthew 26:45-46, Mark 14:42)
 - Could you read one part of Me and not destroy another? Biblical Calendar, Gregorian Calendar.
- When can we do without Alphabet/Sequence? A place in the Bible justifies the word.
- 0 to 9000, Buzi, Clar, re. You know Buzzi, Clar? This is. We are inside a building and we heard that food is being giving away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center. 04:27 Dizzy sleepy. 20:13 Beni or Buki, I forgot who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
 - What past the time? (Isaiah 61:2, Luke 4:18)?
 - What is in use?
 - That chooses I. When I read the Bible, I adopt to the role I take.
 - Relative to the word? (Proverbs 3:5)
 - If the words do not join? Consider separating or putting the lesser word in the commentary column.
 - Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
- If the words and scenery do not fit exactly, it may be a larger scenario.
 - When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
 - What I have learnt from Bill Gates, through using the software from Microsoft.
 - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.
 - The HisWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 - What value can we attain to this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26, I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Milk & Honey Cafe, Pegasus Center. Hsueh Amy Tm took their order, and she was the waitress.

2. 2025-11-27T16:53:00 She made her arrangement known ... let us observe the revelation from God (Genesis 24:58).

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it (Genesis 4:26)

1. Where?
- Vocation ([Matthew 4:19](#), [Mark 1:17](#))
 - Place of origin ([Matthew 2:1-13](#), [John 7:53](#), [John 18:5](#), [John 18:7](#), [Micah 5:2](#), [Isaiah 9:1-2](#))
 - Resting place ([Genesis 23](#), [Genesis 48:21-22](#), [Genesis 49:29-33](#), [Genesis 50](#), [John 14:13](#))
 - Inheritance ([Exodus 44:28](#), [Isaiah 53:10](#))
 - City of Refuge ([Joshua 20:2-9](#), [Numbers 35:15](#))
- The author started his tertiary education at Central Piedmont Community College (CPCC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
 3. Using the JavaScript fetch keyword, the author places webservice requests.
- All the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...
- 1. 2025-10-09T20:35:00 places enormous responsibility on the author.
 - 2. 2025-10-09T20:42:00 While it is not improve their way data entry, or word processing... as long as they use their God-giving talent... it is okay.
 - 3. 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
 - 4. 2025-10-09T20:52:00
 - When the author attended University of North Carolina, Charlotte (UNCC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
 - 2025-10-09T20:57:00 This is how the task is done... which I will do mine.

2025-10-09T01:35:00 How can the Bible... reverse itself (Numbers 11:16, Acts 6)?

- 2025-10-09T02:19:00 During my first half, 3.5 years in Austria, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.
- 2025-10-09T02:01:00 *This is where I want to be... if I am with you.*
 - 2025-10-09T02:10:00 *Do you place a life... apart from you?*

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls:

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions

Considering processing and storing

How can I pass knowledge....as sharing.(Genesis 2:7, 2 Peter 1:21)?

- Computers consist of microprocessors and memory. A memory is either:
 1. Read only memory (ROM)
 2. Random access memory (RAM)
 3. Hard disk
 - Object-orientation combines code with data.
 1. Code - method
 2. Data - field or property
 - A relational databases offers the opportunity... to program and store data.
 - The ID attribute in HTML files for unit hashing is case-sensitive, and it serves for spot reference, and while it is a fragment address, it is the entire unit. A relational database may support the like and between keywords for the partial and range restrictions respectively. It is not as range checking. It cannot do range checking. There are no abnormalities in certainty.
- What mentions the name?
- Variable and relative? Time, number (Genesis 1:11, Genesis 1:16, Genesis 2:2-3, Genesis 7:16-17)
 - Constant? Name (Genesis 2:18-21, Exodus 3:1-4)

Progress

The author conceived the notion for AlphaSequence, and stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author thought and felt that the readers will prefer to read the recent information, and they do not have to regenerate the entire database. The author was living in New York, and working from Fremont.

The author recorded, the FromTimeTo Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days of the difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

The author has heard from his/her students that the application is not designed to be used as a calendar. The audience is to choose their acceptable text, and ignore or standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partially, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an empiricist's words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence. How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness. Examine the course of history? You will find that, that most truths, are actually resting legends. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have the most resonance, and close affinity; so also, graphic applications, have standard occurrence. Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro (Daniel 12:4)

Why we Accumulate the Same (Matthew 26:53, Revelation 9:16, Revelation 7:4-8)

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#)). Knew versus lay

Wanting a Member of..

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last place for good on earth. To seek a development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water. When time is maximal used, time is ideal allowed. When our association to follow; is association to the end.

What takes place, as one another? Observe of a particular use:

Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8 , Genesis 2:10 , Genesis 2:15 , Genesis 3:23 -24
Field	Cain and Abel	Genesis 4:8 -4:15
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?	
Word	Scripture Reference
Work word	John 14:10
Charity	
Timeliness	Deuteronomy 18:22

The business of telling us apart?		
Word	Scripture Reference	Commentary
Naming	Genesis 2, Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?	
Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelling of the last? (Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14)?

The author will want a conciliation with time?

AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God (Genesis 3:8)?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/KenAdenji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself. The author suggests that Baptism of the Holy Spirit (Acts 1:2), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

Keyword	Scripture Reference
Place of Residence	Acts 1:4, Acts 1:8
Sign	Acts 1:3, Acts 1:5
Place of Worship	Acts 2:1
Speak with other tongues	Acts 2:2-2:11
Worshippers	Acts 2:5
Leader	Acts 2:14-2:47

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

(Allison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	Bullfactory.java

- [Autobiography](#)

Title	Description	Commentary	Universal Resource Index (URI)
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travin).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams. A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children. Comments do not impact pragmatically, they only serve as guides for readers. A directed relationship may exist between a collection of source and target. A namespace is a container separator. An import facilitates the admittance of an external namespace. Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66. A constraint represents the range of valid values that a member may have. A dependency replicates changes between the supplier/client.

Value

Lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime. A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators. An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse. A Boolean is either true or false and it is normally used for validation. A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHierarchy.cs Exact](#). The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable UtilitySQLServerManagementObjectsSHO.cs](#). A child may override a parent's virtual member. In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods. Signals and receptions are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally. Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-behind. For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule. In C# version 9, a method may offer a covariant return type.

2025-09-03T21:12:00 What is the immediacy of God's future?

2025-09-03T21:27:00 What does God bring to pass as Him alone? Begotten Son, creation, covenant, passover, commandment.

What exactly can we expect... out of the Bible (Daniel 5:31)?

- 1. When is the Bible specific about time (Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54)?

How admissible is the word (Genesis 41, Daniel 2)?

GoldRose.html depends on the word.

What did I fit into a place?

- 1. Ark of the Covenant
- 2. Temple
- 3. Jerusalem
- 4. Judah
- 5. Israel

What did He see Himself as?

- 1. Joseph (Genesis 37:8)
- 2. Moses (Acts 7:25)

Robert Law Joss

Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering>git push fatal: unable to access 'https://github.com/KenAdeniji/WordEngineering/': Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The_Network_is_the_Computer_2024-06-05T06:23:00 Is Microsoft on the network?_2024-06-05T06:24:00 faeces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55.053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What offering I have for people?			
Speak face-to-face	Dream or vision	Commentary	Scripture Reference
Moses	Other prophets	Leader	Numbers 12:6-8
Jesus Christ	Other teachers	Authority	Matthew 7:29

What does He involve?		
Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many (Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2)
- More at the same (John 15).

When did Israel...seek no region...as its own (Acts 1:6)?

- 1. The prophets
- 2. New Testament
 - 1. The Gospels: King of the Jews, the disciples
 - 2. Pauline Epistles, General Epistles
 - 3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb, How can computer use itself? What ability of using? I have stored using people as myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The HaveDecidedToWorkOnGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task...duplicable?

2024-11-20T05:38:00 Ordering:

- 2024-11-20T07:59:00 Do I make a separation between physical and spiritual?
- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13)
- Levitical priesthood (Hebrews 2:14, 1 Samuel 3, Numbers 3)
- Sitting on a high place: Humble... exalt (Luke 14:7-11)
- Baptism: Washing of feet (John 13)
- Marriage: Younger before the firstborn? (Genesis 29:26)

What will count...forever?

Word	Scripture Reference
Believer in Jesus Christ	John 11:26
Kingdom of God	Daniel 2:44-45
Charity	1 Corinthians 8:1, 1 Corinthians 13:1, 1 Corinthians 13:2, 1 Corinthians 13:3, 1 Corinthians 13:4, 1 Corinthians 13:8, 1 Corinthians 13:13, 1 Corinthians 14:1, 1 Corinthians 16:14, Colossians 3:14, 1 Thessalonians 3:6, 2 Thessalonians 1:3, 1 Timothy 2:15, 1 Timothy 4:12, 2 Timothy 2:22, 2 Timothy 3:10, Titus 2:2, 1 Peter 4:8, 1 Peter 5:14, 2 Peter 1:7, 2 John 1:6, Jude 1:10, Revelation 2:19
First resurrection	Revelation 20:5-6
Promised Land	Revelation 3:12, Revelation 21:2
Messianic Covenant	Jeremiah 31:31-33
Divided according to the children of Israel	Deuteronomy 32:8

What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

- 1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
 - 2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.
- God said. What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the deception (Revelation 12:10). Appreciate as (Matthew 16:18)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15
Lead	Matthew 23:9, John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present (Deuteronomy 32:8)?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way (Genesis 1:26).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:29

What is according to time?

Word	Scripture Reference	Commentary
Sign:rainbow, festival, event, cumulative	Genesis 1:14	

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer)

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.

Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27; Genesis 2:7; Genesis 6:3; Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? (Deuteronomy 18:16)

God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:19)	Bethlehem (Matthew 2:1-16; Luke 2:1-20; John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping... man grouping... 2025-04-1804:06:00 (Genesis 48:4)?

2025-04-17T06:16:00 Do we choose... a realization of him?

• 2024-07-09T18:30:00 He has always out it in... context of time.

• 2024-09-15T13:39:00 How our self... is never... design as lasting?

• 2022-08-08T19:00:00 Dispossess the Devil?

• 2024-07-23T09:22:00 To be an African's... Nation.

• 2024-09-24T11:01:00 When I saw the people, The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.

• 2022-10-08T11:08:00 To work as a part of Me?

• 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestinians?

Associated culture

1. Associated culture (Acts 7:22; Matthew 15:2; Mark 7:3; Mark 7:5; Daniel 1:3-5)

What I am rendering? To what particular use...is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25; Genesis 3:15; Genesis 41:45; Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13; 1 Samuel 18:9; 1 Samuel 30:25; Ezekiel 30:22; Ezekiel 48:35; Matthew 22:46; John 11:53)...

1. Salvation (Exodus 16:13)
2. Comm (Luke 23:46; Psalms 31:5)

What personifies the time?

1. First and Last Adam (1 Corinthians 15:45)

2. Firstborn (Romans 8:29; Colossians 1:15; Colossians 1:18; Hebrews 12:23)

What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5; Luke 4:16-4:32; John 2:1-2:11)

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love babe ti won... Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness (1 Timothy 6:12).

How do you reference the Bible?

Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2; Luke 4:19; Daniel 9:24-27; Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17; Genesis 3:3-4; John 12:34
Babel	Genesis 11:9
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2; Hebrews 11:24

What is the Bible divisible to?

Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1; John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1; Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?

Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?

Word	Scripture Reference
Holy Spirit	Genesis 1:2; John 4:24; Genesis 6:3; Genesis 41:38
Evil spirit	Judges 9:23; 1 Samuel 16:14; 1 Samuel 16:15; 1 Samuel 16:16; 1 Samuel 16:23; 1 Samuel 18:10; 1 Samuel 19:9; Luke 7:21; Luke 8:2; Acts 19:17; Acts 19:13; Acts 19:15; Acts 19:16
Lying spirit	1 Kings 22:22-23; 2 Chronicles 18:21-22
State of spirit	Genesis 45:27; Exodus 6:9; 1 Kings 10:5; 2 Chronicles 9:4

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How-to have association...with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data...do you need to collect the data...if you don't do remember?
- What does he want as a self? O pe. In Yoruba?
 - Complete
 - Late
 - Call
 - Thanksgiving
- Where am I, as a human being?
- The life of appointing something as myself.

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword noun.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I collaborate fact with what I know?

On behalf, of someone, I seem

Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?

Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age

Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 2:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:17
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you...than you are. (Ephesians 3:18).

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?

Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:16-21 , Genesis 2:4-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- [Quality Assurance](#)
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [JSlim](#), [FxCop](#)
- Questionnaire: [RatingBank](#), [InDefine](#)

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@gacm.com will telephone me about the role with Google's co-founder Larry Page [jobs.lever.co/011thhawn_sers/201c6d9e-2d8e-4727-a345-d4a93d6dce27?openvid=3b8e0e44-7127-4709-ad21-6eb8e5f7403](https://www.lever.co/011thhawn_sers/201c6d9e-2d8e-4727-a345-d4a93d6dce27?openvid=3b8e0e44-7127-4709-ad21-6eb8e5f7403) Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 [You have tried to supplement... what God has given you.](#)

2026-03-07T11:24:00 [He came into me... our past...](#) I was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. [How relevant is Your word to our opinion?](#) This projection may result in entries of new records in the Remember and Apass tables. [Where are people, his relation?](#)

[However, he is present, that is how I use.](#)

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

[How do we devotion... our past time \(Genesis 37:19-20, Daniel 6:5 \)?](#)

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

[What we do minimally, is how we do enormously.](#)

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- [ScriptureReference.html](#) Requires Bible knowledge and place in the Bible.
- [BibleWord.html](#) Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ([Matthew 10:19-20](#)).
- Where am I, resemblance of how I am made (1 Corinthians 14)?

What does He choose as example?

- God rested on the Sabbath day ([Luke 23:56](#))
- Jesus Christ ([Daniel 9:24-27](#), 1 Corinthians 15:45, 1 [Corinthians 15:47](#))
- Man such as King David ([2 Kings 14:3](#), 2 Kings 16:2, 2 [Chronicles 28:1](#), [Amos 6:5](#))
- Place such as Sodom ([Matthew 10:15](#), [Matthew 11:23-24](#), [Mark 6:11](#), [Luke 10:12](#), [Luke 17:29](#), [Romans 9:29](#), 2 Peter 2:6, [Jude 1:7](#), [Revelation 11:8](#)).
- Other living things ([Numbers 22:21-33](#)).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy ([2 Samuel 12:14](#)). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ([Isaiah 23:15](#), [Isaiah 23:17](#), [Jeremiah 25:11](#), [Jeremiah 25:12](#), [Jeremiah 29:10](#), [Daniel 9:2](#), [Zechariah 7:5](#)). Listed below are some of the repeated reinforcements.

Samson's Birth (Judges 13)

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazirite son ([Judges 13:2-5](#)).

The same angel appears to Manoah and his wife ([Judges 13:6-25](#)). The angel reinforces the their responsibility and defers reverence to God.

The Birth of the Messiah (Luke 1)

Foretelling the birth of John the Baptist ([Luke 1:5-25](#), [Malachi 4:5](#)). Transitioning the present to the after ([Luke 1:12](#)).

Foretelling the birth of Jesus Christ ([Luke 1:26-38](#)). Continuing the Davidic line ([Luke 1:32-33](#), 2 Samuel 7:12-13, [2 Samuel 7:16](#)).

The Baptism of Cornelius (Acts 10)

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band ([Acts 10:1](#)).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining ([Luke 5:4-11](#), [John 21:3-6](#), [Matthew 17:24-27](#), [Acts 10:9-16](#)). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in ([Genesis 14:10](#)); and is in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days ([Genesis 25:8](#), [Genesis 35:29](#)); The last occurrence of the word, full, in the Bible, occurs in ([Revelation 21:3](#)). Living a presence ([Jeremiah 28:11](#)). To creating a future full of all. To creating a future free of all.

One Chance; Seem the Rest.

Our LORD's prayer is a communal prayer; directed to the one God ([Matthew 6:9-13](#), [Luke 11:2-4](#)). Please note that it is Jesus; teaching this prayer; so He doesn't refer to Himself or the Holy Spirit explicitly; as in another passage, when He mentions Himself as the bread ([John 6:31-35](#)). He explains the truth; that we may fall short of it, by explicitly referring to the Father. He is alluding to the events in the apocalyptic books, Daniel and Revelation. We are on earth, and we have an earthly father; where we are, is not where, we wish and will to reside ([Matthew 6:9](#), [Luke 11:2](#), Daniel 2, Revelation 5). When no matter, where I go; this is how, I Am found ([John 20:17](#)).

To set everything true

The word, [true](#), occurs in seventy-seven verses in the Scripture Bible, and there are eighty-one occurrences. True, first occurs in Joseph's interaction with his brothers ([Genesis 42:11](#), [Genesis 42:19](#), [Genesis 42:31](#), [Genesis 42:33](#), [Genesis 42:34](#)); Jacob had colluded with Rebecca, his mother, to get Isaac, his father's, blessing; God shows that Joseph will have elevation over his parents and siblings. There are ten occurrences of the word, true, in the book of ([Revelation](#)); in response, to God.

To Whom Masculine?

How the Bible compares the gender?

Man, after his Fall

During Creation, God asked all living things, be fruitful and multiply; God asked Adam to name the living creatures, and God required Adam to take care of the Garden of Eden, but this taking care is to dress and keep the garden; there is a role for man, the tree of the knowledge of good and evil, and the tree of life. God did not specify the welfare of animals. Out of Adam, God made a helper for Adam, Eve.

After the Fall of Man, Adam's labor will be thorough; and there is enmity between the serpent and Eve, and each other's seed; and Eve will have pain, during child-birth.

God made coats of skins, and clothed them; it is our presumption, that the clothing is from living things, generally perceived as sin sacrificial animal(s), but since this clothing is not specified, an alternative, is that it is a plant, or another creature entirely. God created an adult male, Adam; and his female counterpart, Eve ([Deuteronomy 2:14](#), [John 5:2](#)). There is no mention of Adam's activity, after the fall of man; as Eve bares and name their children; Adam's earlier effort, which was to cater for the Garden of Eden and name the animals.

Man at Birth

We can only suggest, that the struggle between good and evil, continues upon the birth of Cain, Abel, and Seth. Eve named Cain, as her possession; and Seth, as the appointed seed.

God instituted male circumcision, which should take place on the eighth day, as man's responsibility in keeping the Abrahamic covenant.

At times, there is predominance of a male, before a word; as in the case of Ishmael, Isaac, Jacob, Samson, John the Baptist, and Jesus Christ. In each example, there is a relationship between God and a parent; and God is directing, the offspring's onus. The want similar to Christ; is to see yourself, among fold.

Man's Task

Historical man's profession are keeper of sheep, a tiller of the ground, handle the harp and organ, an instructor of every artificer in brass and iron. Unlike the first men, in the Bible, Seth's service was not identified, we only know that after the birth of Seth's son, Enos, men began to call, on the name of the LORD.

The 10 Commandments details the relationship we aspire to have with God, and our fellow-men.

God may consign men to oversee, as in the case of Melchizedek king of Salem, the priest of the most high God, and collector of tithes; Joseph, dreamer and interpreter, and he will save much life, in Egypt; as in incorporating the end. We share among us; as no foundation separates us.

Our choice is where we want to be? What we want to be?

A choice between what you have, and what you will want? (Revelation 5:5, Matthew 1:25, Luke 2:7, Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 11:28, Hebrews 12:23). Where I take you; is where you belong (Genesis 13:14-18, Deuteronomy 34).

What points arrive at succession?

What points arrive at succession?	
Title	Scripture Reference
Begotten Son	John 1:18, John 3:16, John 3:18, 1 John 4:9
Subject	1 Corinthians 15:28
Holy Spirit	Luke 1:35, Acts 2, 2 Thessalonians 2:7

Future Work

- 2024-11-12T01:57:00
 - The National Basketball Association (NBA) released the profile of an NBA player.
 - My twin sibling said he received a religious video, and he doesn't want to go to work. There were arrests, but he was excluded.
- 2024-11-12T02:08:00 You are release. Once you fail a test.
- 2024-11-12T02:11:00 How am I transparent?
- I no longer... take further input.
- 2024-11-12T08:07:00 How do I accommodate... the future... as Myself?
- The 2 upgrades to-date of the primary keys and/or unique indexes have been:
 - 1. HaveDecidedToWorkOnAGradualImprovingSystem database Contact table: Add the organization name to the unique composite index.

```
CREATE UNIQUE NONCLUSTERED INDEX [IX_Contact_Names] ON [dbo].[Contact]
(
    ([FirstName] ASC,
    [MiddleName] ASC,
    [LastName] ASC,
    [Nickname] ASC,
    [OrganizationName] ASC
)
```
 - 2. WordEngineering database HisWord table: Make the HisWordID column the primary key, and add the content of the dream table to make a foreign key.

```
2024-11-12T08:51:00 We are not where we want to be... where we are set to be.
```
- 2024-09-06T23:57:00 Unfiled... column.
- The general format of the Bible is to place the book titles on the top, repeat the book titles and chapter numbers at the beginning of each chapter, and place the verse number beside its text. In so doing, there are alphanumeric book titles, and numeric chapters and verses. For the work of the author there are tables with rows and columns.
- 2024-10-29T04:05:00 Web Services.2024-10-29T16:31:00 I want to do a reception service that give me this ability... or do I want to continue to do Client/Server?
- 2024-12-11T14:03:00 East Bay Vision Center Optometry, 34420 Fremont Boulevard Suite E, Fremont, California (CA) 94555. A person to my south walked westward. What is adaptable to the extra (Genesis 41:36)?
- 2025-01-04T12:12:00 The Passion of Christ was the culmination of the 69 weeks of Daniel, and the 70 weeks of Daniel were interrupted. 2025-01-04T12:12:00 I agreed to attend a concert with Jasmine, a Malaysian Chinese person, but I did not go bush dancing with Ross, nor did I go on night walks with Tess Pierchovich. After Jasmine started living with a woman, I did not have sexual intercourse with her. Advanced age? I held the hands of Noriko Yoshida, but I did not pet Carolyn Clancy. Hadly (Daniel 9:24-27).
- 2024-11-13T11:50:00 What has to be the same. (Daniel 2:37, Genesis 41:34-36)?
- 2024-10-27T08:36:00 Interest table. Associative entity.2024-10-27T08:47:00 Yesterday, he said he didn't finish his work, so he couldn't write a summary in the middle of the process.2020-04-18 19:45:02.183 Merging HisWord table to the Dream table. Merging HisWord with Dream. Identity column, Dated, DateUTC, word, commentary, location physical, scenario, language English Yoruba, ContactID. 2024-10-27T08:46:00 HisWordID a reference column. 2024-10-27T10:23:00 Implementation detail? Modeling.
- 2024-11-07T11:30:00 Only update columns with values.2024-11-07T11:39:00 XML and JSON may have placeholders. As with the SQL Update statement.
- Dynamic SQL may lead to SQL injection. Parameterized query which is attainable by first reading the column values, and setting the values of the columns to refresh is a viable alternative. What is the current row content, what columns need updating?
- 2024-11-07T12:26:00 Why are we not the same?
- 2024-11-07T19:55:00 What do we build? And... how do we build it? The questions people ask? Search-engine, HTML5, stackoverflow.com, GitHub.
- 2024-09-30T04:43:00 What I found many of them... is how I obtain a realization? Adoption (Genesis 40:16, Daniel 5:22-23, Daniel 4:33-37).
- 2024-09-23T20:47:00 What I have necessary as participation (Revelation 22:2)? 2024-09-23T20:30:00 At Albertsons Lucky, Charter Square, I saw Connie Johnson, Mary Kolmeyer, Marlene, Monica, Katie, Kyler, enter, faeces. As I walked out of the Milk & Honey Cafe, Pegasus Center, I understood a word was coming. Bing's Dumping, Disputable... to use. David Cai said I have friends. Miriam Shoham LTD. shoham premium mango. www.mshoham.com www.ima.co.il Empty boxes were placed at the door of Mary's Bakery. 21:18 dizzy, sleepy. 21:30 left neck. 21:46 faeces smell odour. 21:53 dizzy, sleepy. 22:15 urine.
- 2024-10-18T03:37:00 When you started AlphabetSequence, you recorded the word of God. 2024-10-18T04:03:00 The superiority of the scripture... is in its truth. (1 John 3:2).
- 2024-09-23T18:35:00 When did he feel... a response... of our supervision (John 16:7)? This is what I want to do... with my life... how will you help me (Genesis 4, Daniel 1:8-21)?
- 2024-09-12T17:47:00 In Australia, after I started Client/Server Sybase/Powersoft contract consulting, I realized my limitations and I sought corrections. The same way, I had sought grammar punctuation learning from a Liberian male colleague of Central Piedmont Community College (CPC) at Freedom Hall, Charlotte, North Carolina (NC) (Jeremiah 30:11). 2024-09-12T18:08:00 Place together?
- 2024-09-13 What do you know... as your own?2024-09-13T17:55:00 As particular.
- 2024-09-09T06:27:00 The scenery resembles ARCO - Brookvale. There are Bridgette Hendricks, my twin sibling, and I. My twin sibling brought out a box of chicken or hamburger. My twin sibling said some young females invite him to go the nightclub, but he is too old. I thought that she could drive me home, but she was gone, disappeared. 2024-09-10T08:07:00 In the last few days, God has asked me to focus on the people in my life. And, their prophetic role. 2024-09-10T08:08:00 What might be the same?2024-09-10T08:47:00 When did he change... and how did he change? (Genesis 15:14)?
- 2024-09-22T05:21:00 1st scene: Aunt Taiwo was sleeping on a bed with her head in the east. There were at least 2 acquaintances that were standing by the north-east door. I started orally stimulating the vagina of aunt Taiwo. I locked the north-east and south-east doors. I took off my clothes. I checked if I was still wearing my socks. On the bed, aunt Taiwo lied down with her face, body, and buttocks pointing downwards. She intended for me to come in from the back. Scene 2: Benitoluwa or Buki was driving me on a road like Mission Boulevard. He said he takes classes between Thursdays and Fridays with Google in Nigeria.
- What days of the week are between Thursday and Friday in the different calendars? How actualities... balance the world?
- 2024-09-16T17:59:00 Contradiction and consistency? Soundex (Matthew 2:1, Matthew 2:6, Matthew 2:18, Jeremiah 31:15).
- Exemption... exception.
- The choice I lay ahead... is the choice I finish ahead.
- What label I have?He is a Yoruba phrase which translates to an English phrase house like that. Do I start at who?The Bible books about kings and poems. Is this a beginning or a continuation?
- Work... you will do... later... null is useful... when information is not presently known (Revelation 17:10, Hebrews 5:8, Revelation 2:12).
- 2024-09-04T29:35:00 The appropriateness of scripture reference?2024-09-04T29:52:00 Given the scripture reference... the scriptural text... is largely available.2024-09-05T00:03:00 The work of the author may be considered numerology, if it had stopped at determining only the AlphabetSequenceIndex but it had progressed into giving more weight to the AlphabetSequenceIndexScriptureReference. 2024-09-06T20:00:00 What did he get when he divided? Adam's rib? Eve.
- 2024-09-05T10:31:00 Getting right as himself? One... versus (vs) Getting one split as himself.2024-09-05T14:59:00 I have preferred... the order of the word.
- 2024-08-24T12:15:00 What did he find... he needed perfection in?2024-08-27T21:29:00 Expand beyond your own (Acts 5:4).
- 2024-08-24T20:05:00 It is just an address... you are communicative with?
- 2024-08-27T12:27:00 How favorable... time has been. Some features that were available in SQL set-based are not available in C#, prior to the introduction of Language Integrated Query (Linq). These include Full-Text Search Thesaurus, soundex, regular expression (Regex).
- 2024-08-27T17:45:00 To who determine the same?
- 2024-08-09T11:49:00 Leviticus 11:47, 1 Chronicles 11:47, Luke 11:47, John 11:47. Should the timing be relevant and specific to the author's location, scenery, or event?
- 2024-08-05T14:30:00 [participating or] 669 (word or number)? The Hebrew language is alphanumeric. The digits were pronounced, not the combined number.
- 2024-08-18T21:05:00 To associate the same? Genesis 4, Genesis 2:18-25, Genesis 1:14-19)?
- As of 2024-05-22T14:48:00 Microsoft SQL Server does not support sql:2003 Assertion. Microsoft SQL Server does not yet implement CREATE ASSERTION assertion-name CHECK (constraint) <http://stackoverflow.com/questions/4130037/does-sql-server-2008-support-the-create-assertion-statement>2024-05-22T15:28:00 Potential fallback? CHECK CONSTRAINT or trigger.
- The technical limitations of the current implementation include:
 1. Unknown, prior to building?
 2. Multi-user support
 3. Security login
 4. Content management system (CMS)
 5. Single entry-point
 6. Update rollback
- What is the repository? If the user only needs to store the Word from God, a text file is sufficient? A comma-separated value (CSV) may suffice for multiple columns.
- AlphabetSequence considers the whole word. Separate words into?
 1. Buzz word
 2. Keyword
 3. Parts of speech
 4. Simple versus (VS) complex
- This part is my existence... which I will never recover.
- Can I reason as a god will listen?
- 1. Adam named the animals (Genesis 2:19-20)
- 2. Pronounce Sibboleth (Judges 12:6)
- 3. Pray continually (Luke 18:13)
- How to... use the word? My earlier work has been to refer to the word... To look for one I deem as? It Me fe was productive in the word? I want to be productive in the word?
- Where My word... has developed his need (2 Kings 8:5)?
- The select inputs do not have default values.
- The Scripture table is a one-to-one mapping between the Bible version and column. These arrangements are futile when there are inconsistencies in the Bibles versions separations. An alternative is to have a table for each version. Publishers issue Bible version.
- What does the Bible teach us about twins? Full-Text search? We have given preference to the word, not the commentary, which is subjective.

Word to Today

The remember table correlates the events and the calendar. Currently, the author is manually deriving the entries for the Remember table. When there is an association, then the author considers the first, last, relevant mentions.

1. To forget time is responsible (Revelation 21:21, Matthew 17:5, Mark 9:7, Luke 9:35).

2. What replaces time (Ruth 1:13)?

The gain from automating this process will include:

1. Limiting human labor
2. Speeding up the task
3. Reducing storage need

Don'tFeedAlone.html

He Handicapped Time; as His Usage	
Title	Scripture Reference
Servitude	Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2
Fulfillment	Luke 9:31
Incentive	Daniel 12:13, Isaiah 53:12

We may need, human help, to determine, the theme-of-the-day?

The author's work is record specific, GetAPage.html. Further work may consider the entries for a particular date, datetime range, or HisWordID set basket? What this information have in common? On 2022-01-10, I will recall that the birthday of biological mother is coming up, on 2022-01-12. I should pray about this and reinforce effort. What is He, starting to say? Is there some to be a safe development to this design? There is less to reason. This work is not defamatory nor inflammatory.

Reuse

1. Issue a SQL database query statement [SQLToTMTTable.html](#). This is the most raw form of querying the database, but it offers the most flexibility, and it does not restrict, to pre-built application.
2. Navigate the web pages from a client browser [2019-10-05AffidDescription.html](#) WhenThePastorIsPreachingYouDontWithTheScriptureToComeInSubsequent.html
3. Build a web service requestor, without the limitations of Cross-origin resource sharing (CORS).
4. Download the DLLs, or the source files, and customize, if necessary [WordEngineering](#)

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship?
[KingJames](#) SELECT ScriptureReference, KingJamesVersion From Bible...Scripture WHERE KingJamesVersion LIKE 'Bknowd' and KingJamesVersion LIKE 'Btwifex'
[KingJames](#) SELECT ScriptureReference, KingJamesVersion From Bible...Scripture WHERE KingJamesVersion LIKE 'Btwifex' and KingJamesVersion LIKE 'Bchildt'

WordToNumberHelper.cs

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language [AlphabetSequence.cs](#). Later work, saw translation to:

- [AlphabetSequence.c](#)
- [AlphabetSequence.cpp](#)

Prophecy	We need to replace the cook top as the current is too old and not worth fixing. Cost will be \$659 supply and install of cooktop and dispose of old one.
Fulfillment	Joshua 6:26 Shimon Peres.

Autobiography

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
 1. An African American female senior, Gayle.
 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
 3. Michael Pole, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 What estrange... of the people?
 - I planned to build a traffic light for my project.
 - In a multicultural church where I was part of the congregation, Bernie Alspaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

- They had varying mother... but one father (Genesis 32:28).
- 2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 2 motorcyclists rode northward.
- 2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?
1. Post 9-year-old re-location from Ile-Ife to Lagos
1. Patriach, brother Yemo
2. Captain of the Nigerian national hockey team
3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
- Where did he serve... a people?
 - Where did I... remove myself from the east (Genesis 31:41)?
 - What aspect... are new?
 - Specimen time... in reality?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
1. In the year 2024, the author will turn 57 years old.
2. In the year 2024, Faith An Yao will turn 18 years old.
3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In-spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
 - I contracted at SunHealth Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made (Genesis 32:28, Genesis 5:3, Genesis 4:12)? What word reminds (Mark 11:23)?
