WordEngineering

Ken Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.

Abstract

**Thesis Statement:** This dissertation introduces [AlphabetSequence](#) ( [2 Corinthians 10:9-18](#) ). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.cs](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- Follow God as a character.
- To track dates and words? And find meaning correlation.

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Missler of [Koinonia House](#) (Khouse) is worthy of note, faith ([Hebrews 11](#)).

The author is indebted to [Iry Schevov](#), his Master's degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object-Oriented Technology instructor, both also at UTS. The author makes mention of his colleagues at UTS; Decier Mendez, Cesar Orlando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

| It defaults to the homepage.                                          |                |                                                             |

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

[There are individual chapters for each book.](#)

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInBasicEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
AccordingToManyDiavse spokenID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord.html](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Design-by contract](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture View's ScriptureReference Column

The SQL statement

```
dbo.udf_scriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
    cast(BookID as varchar(6))
    + ' '
    + cast(ChapterID as varchar(6))
)
FROM Bible..Scripture
```

Another SQL statement

```
; with cte
```

```
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
    FROM Bible..Scripture
```

- Title
- Abstract
- Acknowledgments
- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospects and Fulfillment
- Autobiography
- State of Writing

```
)
select cnt = count(*)
from   cte

The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK\_Scripture\_ChapterIDSequence\_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philomen, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identify functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
```

is supplementary.

The Scripture\_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

| ScriptureReference | BibleReference |
|--------------------|----------------|
| John 1:1           | 43001001       |

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SoC\)](#).

#### The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Master](#) who noted that the first occurrence of the word, [love](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning [floor](#) ([Joshua 15:3](#)).

2026-03-30T11:30:00 I will assist if life doesn't share us apart... spread us apart. ( [Genesis 1:16](#) )? [Helkai](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

```
SELECT COUNT(BibleWord) FROM Bible..Exact
```

is for determining the word count. The SQL statement

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
```

is 789631; this is the count of the words in the KJV Bible.

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT FK_Exact_PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

#### The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember](#), [APass](#), [ActToGod](#).

##### The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-9](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English [which is better understood](#) ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 6:16](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [https://translate.google.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And the merge is the money convert.](#)
2. 2015-11-03T02:17:00 [The specifics, a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column [and loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ( [Genesis 1:3-5](#) ). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2-4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the ([UTC-08:00](#)) [Pacific Time \(US & Canada\)](#) time zone. There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord\_view

The HisWord\_view view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Niguar](#), [Hebrew method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. " The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Koinonia House) [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ( [Luke 4:19](#) ).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

I saw 2 males who were standing beside cars. I approached them believing they were Germans, but they turned out to be Hindi. Scene 2: My twin sibling and I went out to eat fish at an Asian restaurant. When we were about to depart, the restaurant's male workers to the north mixed up our take-away food order: 10:30 label identifiers (Genesis 37:9-11). Scene 3: I thought of Sergey Brin when I was with some Asian males, to the east, inside a Sport Utility Vehicle (SUV) with a vehicle license plate with a label like Tanu or Tanut. The Jews could kill me as their preservation or solution. Interpret: Hindi make up 1/5th of the world population... attrition due to unbelief.</p> <p>2026-02-01T12:00:00 At the intersection of Sward Drive and Creekwood Drive, south-east house. 4820 Sward Drive, Fremont, (California CA) 94555.</p> <p><u>Who is relevant... as a occasion?</u></p> <p>2026-02-01T13:34:00 At Charter Square, Albertsons Lucky, and Dulhan Grocery. 2026-02-01T13:37:00 <u>The focus has been... HR children.</u></p> |

(Joe Celko, 2025-03-07)

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts  
Principle 2: Check Assumptions

- This whole thing started with keeping [a work reference](#).
- Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
- The author depends on a typing assistant.

Principle 3: Explore Contexts  
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.  
Principle 4: Anticipate Risks  
The undesirable outcome and their probability of re-occurrence will include:

- Data loss or corruption because of issuing the database modification command and lack of timely archiving
- Hardware, software, or network failure
- [Vendor withdrawal of support](#)

Microsoft:

- Introduced .NET core and Model-view-controller (MVC).
- Inability to restore deprecated Microsoft SQL Server backup versions.
- Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities  
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.  
Principle 6: Define Time Horizon  
[What period has God used?](#)

- In the year 1988 – military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ( [Numbers 1:3](#) [Luke 2:42](#) ).
- On 1997-12-31 – priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ( [Numbers 4:30](#) [Matthew 2:16](#) ).
- In the year 2007 – generation time span: this masturbation will bring water. My 40th year ( [Numbers 14:33-34](#) [Numbers 32:13](#) ).

Principle 7: Generate Multiple Solution Options  
[How versatile am I...at attending others? I have to relay my perception to technology providers.](#)  
Principle 8: Design Around Constraints  
[Relational databases offer the ability to set constraints.](#)

- Data type
- Nullable
- Primary key and unique index
- Foreign key

Principle 9: Weigh the Pros and Cons

- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BitMapWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
  - First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
  - Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

| Statement             | Commentary                                                                                   |
|-----------------------|----------------------------------------------------------------------------------------------|
| sp_databases          | The sole work of the author; the WordEngineering database size, is currently 33351360 bytes. |
| sp_server_info        | The database version is Microsoft SQL Server 2025 - 17.0.1050.2                              |
| sp_spaceused          | The WordEngineering database currently uses 32569.69 MB.                                     |
| sp_statistics HisWord | The cardinality of the HisWord table is 121880.                                              |
| xp_fixeddrives        | Returns a list of physical hard drives and the amount of free space on each one.             |
| xp_msver              | Returns version information about SQL Server.                                                |

SQL Statement

| Statement              | Commentary                                                                                                                                                                                                                                                             |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Select                 | The select statement for data retrieval is the most popular statement. <a href="#">Most select equates to Bible</a> ..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries. |
| Insert, Update, Delete | The insert, update and delete statements are for data maintenance.                                                                                                                                                                                                     |

Where Clause Operators

| Operator                               | Commentary                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| =, <>, !=, <=, <, <=>, !=, <,>, >= !=> | The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. <a href="#">In most cases, rarely is this in use</a> ..!= or/and !=>. <a href="#">This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Outcrops for a date or number will search for particular types.</a> |
| BETWEEN                                | This is a range check that accepts a beginning and ending value. It is not highly used.                                                                                                                                                                                                                                                                                                                           |
| NULL                                   | No value                                                                                                                                                                                                                                                                                                                                                                                                          |
| IN                                     | A comma-delimited list of valid options within parenthesis.                                                                                                                                                                                                                                                                                                                                                       |
| LIKE                                   | Wildcard filtering                                                                                                                                                                                                                                                                                                                                                                                                |

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

| Title        | Commentary                                                                                                                      |
|--------------|---------------------------------------------------------------------------------------------------------------------------------|
| TOP          | Set a limit of the number of rows returned or a percentage of the rows from the source.                                         |
| SET ROWCOUNT | The database will retrieve all the rows, but if there are excessive rows it will later <a href="#">limit to required rows</a> . |

Where Clause

| Title                                                  | Commentary                              |
|--------------------------------------------------------|-----------------------------------------|
| Like wildcard                                          | Preceding or following restriction "%%" |
| Check for NULL                                         | IS NULL versus (VS) IS NOT NULL         |
| Between range check                                    | Lower and upper limits                  |
| Logical comparison                                     | <, >, =, <=, >=, <>                     |
| Table join supercedes the previous column key equal to | FROM table join primary and foreign key |

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.

- Prosechy and Fulfillment
- Autobiography
- State of Writing

- Does the vendor have data definition language (DDL) to pre-empt data corruption?
  - Data type and size: String, number, date, logic boolean?
  - Not nullable? Can not be empty?
  - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
  - Check constraints, for schedule, dated from must precede dated until.
  - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
  - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
  - URIChrist
  - URIEntertainment
  - URIGoogleNews
  - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose datatype limits.

(Itzik Ben-Gan, 2013-07-03).

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects. Each web page mainly contains 2025-11-29T00:56:00 the minimalist page\_load() and query\_submit() methods. Some web pages which use web services to retrieve information from the database also include <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432>, which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432>, is does 2 types of date calculations. These are the:
  - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
  - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DatedFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordCoast/DonFeedAtBible.html> 2023-02-17...2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests- <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432> is

```
fetchRender: async function
(
    fetchUri,
    fetchRequest,
    callback,
    uIdDisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUri,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uIdDisplay, rowColumn);
        })
        .catch (e) {
            uIdDisplay.innerHTML += e;
        }
    }
}
```

Programming

The Author Programs in the Following Tiers and Languages

| Tier                    | Language                                                                  | Commentary                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-------------------------|---------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Front-End Browser       | HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS) | The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes. |
| Middle-Tier Application | C#, Embedded-SQL                                                          | For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.                                                                                                                                                                                                                                                                                                                              |
| Server-Side Backend     | Standard Query Language (SQL)                                             | The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.                                                                                                                                                                                                                                                                                                         |

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asea Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.aspx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use [CSS sprites](#); since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Detach](#)

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Bibliography](#)
- [Background](#)
- [Prospects and Fulfillment](#)
- [Autobiography](#)
- [Series of Writings](#)

4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.  
(Joseph Seck, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eclairmech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4106610/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML outweighs the newness of the JSON transport medium.
- HTTP Status Codes: jQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
  - Migration to computed columns
  - Normalization
  - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputfirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var asciiA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index < lengthSize;
    ++index
)
{
    if (IsAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - asciiA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete. The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

| Module                                          | Unit                                                                |
|-------------------------------------------------|---------------------------------------------------------------------|
| <a href="#">GetAPage.html</a>                   | retrieveAlphabetSequence()                                          |
| <a href="#">AlphabetSequenceWebService.aspx</a> | Query(word)                                                         |
| <a href="#">AlphabetSequence.cs</a>             | ID(word)                                                            |
|                                                 | ScriptureReference(int alphabetSequenceIndex).                      |
| <a href="#">DataCommand.cs</a>                  | DatabaseCommand()                                                   |
| <a href="#">WordEngineinSchema.sql</a>          | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) |

(Joost Visser)

[GetAPage.html](#) Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Preventive Maintenance

The author now considers partial and lookahead scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

| Module                                          | Unit                                                                | Lines of Code |
|-------------------------------------------------|---------------------------------------------------------------------|---------------|
| <a href="#">GetAPage.html</a>                   | retrieveAlphabetSequence()                                          | 40            |

| <a href="#">AlphabetSequence.cs</a>             | ID(word)                                                            | 50            |
|                                                 | ScriptureReference(int alphabetSequenceIndex).                      | 10            |
| <a href="#">DataCommand.cs</a>                  | DatabaseCommand()                                                   | 90            |
| <a href="#">SQL Server</a>                      | WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID) | 105           |
| Sum                                             |                                                                     | 325           |

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

1. Codebase: The WordEngineering application is storable in the [Github.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in Github.com are:
  1. git status
  2. git add
  3. git commit

2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
3. Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for their specific use.
4. Billing services: These are external independent resources, such as the database, SMTP.
5. Build, release, run: These are the stages that a code goes through. Web compilation is deferrable for scripting, as opposed to compileable languages. Even since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables.
7. SQL Server encompasses services such as are supposed to be data file backups.
8. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
8. Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
9. Disposability: The author's take on expendable work includes the following:
  - Pure functions
  - On-demand computation of web pages and services
  - Adjustable time-out setting for the database and web request threads
  - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
10. Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.
  - The time gap: These include playing the code in work in a central environment. Superstoring the waterfall methodology with the more recent process, Agile and Scrum.
  - The personnel gap: Dev/ops experts
  - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Tending on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
11. Logs: The author logs every event that is, viewable in the Event Viewer. The author displays error messages to the user; the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and [xhtml:cam](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

Characteristic

Resilient

[GetAPage](#) The Bible is separable into parts; these are books, chapters, verses. Dividing a life, according to purpose ([Matthew 1:17](#)). 14 Biblical Generations = 14 \* 40 \* 360 = 201600.  
[DateDifference.aspx](#) The .NET Framework, C# and SQL Server support the Common Era; the date ranges between 0001-01-01 and 9999-12-31. The date difference will display correctly for the time interval - days, Biblical Calendar, and all the dates after the introduction of the Gregorian Calendar.

Declarative

SQL, Linq, CSS are declarative languages, but JavaScript is a functional language.

Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.  
The C# class container model and the optional namespace alias content the author.  
Cascading Style Sheets (CSS) is modular, and its rules trickle down.

Continuous

Placing the [App\\_Offline.htm](#) file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.  
A single batch file, with a single command line, builds the only `.dll`, `InformationInTransit.dll`  
`csc /out:InformationInTransit.dll /target:library /recurse:"." /`  
`reference:system.directoryservices.accountmanagement.dll,"bin\Debug\VirtualAgilityPack.dll","bin\Debug\lTextsharp.dll","bin\Debug\MongoBson.dll","bin\Debug\MongoBson.dll","bin\Debug\MongoBson.Driver.dll","bin\Debug\MongoBson.Driver.Core.dll","bin\Debug\Newtonsoft.Json.dll","C:\Windows\Microsoft.NET\Framework\v4.0.30319\WP\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.DefSqlClrWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.DefSqlClrWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Smo.Sfc.dll","Microsoft.VisualBasic.dll /nowarn:162,168,219,618,649 /unsafe`  
After testing, `InformationInTransit.dll` is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the copy command or the Microsoft Windows Explorer user interface (UI).  
When the content of a server-side file with an `.aspx` or `.aspx` extension changes, the ASP.NET framework automatically re-compiles for serving future requests.  
[jQuery](#) by John Resig is for making Ajax calls to the server. The more recent fetch command is also useful in later cases. [jQuery](#) helps to load the latest copy of the author's JavaScript repository [9432.js](#); since browser caching occurs for JavaScript files for a length of time.  
The single `.css` file [9432.css](#) is callable at the bottom of each .html file's head node; JavaScript statements are in the last lines of the .html files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will not reference a HTML node before the declaration of its definition.  
[Set a Database to Single-user Mode](#)  

```
ALTER DATABASE WordEngineering
SET SINGLE_USER
WITH ROLLBACK IMMEDIATE;
GO
ALTER DATABASE WordEngineering
SET READ_ONLY;
GO
ALTER DATABASE WordEngineering
SET MULTI_USER;
```

If the research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases.  
The author will place non-Microsoft DLLs in the virtual directory bin sub-directory, and the author will refer to Microsoft DLLs in the web.config file.  
The web.config is generally consistent across deployment, the only variable is the database server name, and when the application and database server exists on the same machine, the connectionStrings may use Data Source=(local);Initial Catalog=master;Integrated Security=SSPI. This means that the author will explicitly specify the database, object owner, and system object name. The Application pool will take care of the security. There are no environment variables, in use, at this time. The HTML files, when calling web services, will specify the full virtual directory path, but when appending `.css` and `JavaScript` files, relative directories will suffice, full path directory and filename is unnecessary and an overkill.  
The author standardized on Microsoft SQL Server as the relational database of choice. There are several alternatives in the market. All database interaction goes through one access point, [DataCommand.cs](#), only this single file needs re-work if there is a database variety change.  
When running a unit of code, for the first time, it will initialize the static variables. The [ScriptureReference.html](#) will issue a unique quote-of-the-day, every day; and a random quote, every time. The author program uses the release version of [jQuery](#), which is the most up-to-date. The web services, such as, [Sefaria.org](#), should not need code-revisit. The code in the third-party libraries, such as, [Newtonsoft.Json.dll](#), is consistent, and should rarely need re-deployment.  
The application is mostly stateless except for the database read.  
Internet Information Server (IIS) HyperText Transfer Protocol (HTTP) by default runs on port 80, like other web servers, but this is modifiable.  
Using the current architecture, the author takes care of concurrency and deadlocks; because database writes rarely occur and are short, reads are tolerant.  
The threads are simple and conclusive; therefore, there are small start-up and short-down periods.  
There is unity between the development and production team, environment, and time frame. The same knowledge worker can write, deploy, and run code.  
The author has experience, reporting web server logs, using [WebTrends](#). The author relies on [Event Viewer](#) for logging and monitoring exceptions. The SQL Server Management Studio offers the Error Log, for viewing the database activities.  
The SQL Server Maintenance Plan is for scheduling full database and transaction log backup, periodically.  
To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal \*, for all columns. Rarely does the author join tables, minimizing the work and resultset, in a set-level language.

(DB2 Developer's Guide).

HTML5

Semantic Elements

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept.

Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

Communication of God

- Audio: God first communicated with me by His Word.
- mit-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

Biblically

What did the Jews used numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babel: One language and of one speech ( [Genesis 11:1-9](#) )
- Witness: Two or three ( [Deuteronomy 17:6](#), [Deuteronomy 19:15](#), [Matthew 18:16](#), [2 Corinthians 13:1](#), [1 Timothy 5:19](#), [Hebrews 10:28](#), [Revelation 11:3](#) )
- No man could number ( [Revelation 7:9](#), [Matthew 10:30](#), [Luke 12:2](#) )

How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus ( [Genesis 5:2](#), [Genesis 16:11](#), [Genesis 17:19](#), [Luke 1:3](#), [Isaiah 7:14](#), [Matthew 1:23](#) )
- God name changes such as, Abram to Abraham ( [Genesis 17:5](#), [Genesis 17:15](#), [Genesis 32:28](#), [Genesis 35:10](#) )
- Family naming, such as, Eve, Cain, Seth ( [Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25](#) )

The word is the author's file naming convention.

| What did He decide to join in ?                                                                                                                                                                                          |                                                           |

|      | • With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation. |

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence

| Term                                           | Meaning                                                       |
|------------------------------------------------|---------------------------------------------------------------|
| Training dataset or training set               | The recording of the word in the database.                    |
| Example (or data point, data instance, sample) | Each database row or record.                                  |
| Predict Label (or target)                      | The corresponding Bible text.                                 |
| Linearity assumption                           | The features alphabet places.                                 |
| Weight                                         | Since the word is the only feature, it is the only influence. |
| Bias                                           | A starting value.                                             |

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

[A voice of us: is a kind of us?](#) GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript. HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML. There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

| Element                      | Commentary                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Meta tags                    | The other meta names include keywords, robots and author.                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Heading tags                 | H1...H6 with H1 being the most important.                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Textual content              | Search engines predominantly optimize for text. Other media are larger in size and duration. <a href="#">When did He promise operational growth</a> ( <a href="#">Psalms 22:30</a> , <a href="#">Genesis 3:15</a> , <a href="#">Genesis 12:7</a> , <a href="#">Genesis 13:15</a> , <a href="#">Genesis 15:13</a> , <a href="#">Genesis 15:18</a> , <a href="#">Genesis 17:8</a> , <a href="#">Genesis 24:7</a> , <a href="#">Genesis 26:3-4</a> , <a href="#">Isaiah 53:10</a> )? |
| Alt attribute on the img tag | Visually impaired people have difficulty comprehending images.                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Fully qualified links        | Relative links meet the author's requirement, since is hostable on external sites.                                                                                                                                                                                                                                                                                                                                                                                                |
| Sitemaps (both XML and HTML) | A sitemap documents the files and their relationships.                                                                                                                                                                                                                                                                                                                                                                                                                            |

(Bruce Clay).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.

This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 [What does God choose as subject](#) ( [Job 15:15](#) )?

The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: [My Condemn](#) The first word is the BookID; the second word is the VerseID.
- 3-Words: [Who is your manager?](#) [Crazy mister Martin](#), [Mister Martin as a good](#). The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

Biblical generation - 40 Biblical years

- 2007...2008 Common Era - the author is 40 years old; the author mentions time.
- 2021...2024 Common Era - the biological mother of the author is 80 years old; the word recorded by the author is time relevance specific.
- Actor... role commencement date?
  - 2026-01-15T04:49:00 [You look at life...and you feel doom](#). A politician who is probably Bola Tinubu, said how he became a politician.
  - 2026-01-16T02:51:00 A person was making fun of [Dikembe Mutombo](#) on his draft day. [Dikembe Mutombo](#) was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.
- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

2026-03-14T02:28:00 WordEngineering in Islam, Moslem

- AlphabetSequence is the title of the algorithm which calculates chapters and verses placed forward and backward in the Bible. 2026-03-14T02:28:00 An Alfa is an Islam Moslem teacher.
- 2004-07-16 Self, 1 in 1000, African descent United States of America (USA) abstain as mercenaries to Germany. Leviticus. And at that time, you rejoice, that the LORD, did have a heart. Father's land. Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000.
- 2020-03-13 20:20:55.690 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, kinsman redeemer. He would come out after a side event. He risked financial loss, travel distance. A person died. I heard, air drop. I later heard Cain.
- 2026-03-14T02:28:00 In a form, 1 of the query options was the writing direction, and another data entry term was robotics.

2025-12-07T20:58:00 Is AlphabetSequence prophetic?

- Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
- Will the date match historical events?
- 2026-01-06T13:56:00 [You are vain... the Bible... is it supportive?](#)
- 2026-01-20T04:00:00 [Words create for activity](#).

2026-05-07T17:49:00 Word rank

- [They were taught by the spirit... to talk as the spirit](#).

2026-05-06T11:52:00 HTML tags Unordered List Versus (VS) Ordered List

The difference between the ordered list tag, ol, and the unordered list tag, ul, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

2026-05-07T12:22:00 How can he... be... like us?

- [I have always drifted toward the academic](#).

2026-05-02T21:30:00 Could I re-write this... biblical?

- Power of the Holy Spirit ( [2 Peter 1:21](#) )

2026-04-27T16:01:00 WordEngineering query

- WordEngineering query - database
  - Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
  - Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
  - Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names – first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
  - Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
- WordEngineering query - client
  - Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
  - Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
  - Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
  - 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 To know at the start... what I Am?

- When I started Kowe, I was a deported Yoruba man.
  - 2026-04-27T19:59:00 This I will find useful... for my people.
  - 2026-04-27T20:13:00 I could use the computer... for my weakness.
- When I started AlphabetSequence... 2026-04-27T20:22:00 [I must find... for what... He accumulated in the past](#) ( [Genesis 15:5](#), [Revelation 16:12](#) ).

2026-04-28T08:53:00 How you are known... by them?

1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 6000 Fairmont Dr, San Leandro, California (CA) 94578. (S10) 346-1300.
2. 2004-12-06T00:00:00 On and, subsequently at Villa Fairmont Mental Health Rehabilitation Center (MHRC), 15200 Foothill Boulevard, San Leandro, California (CA) 94578. (S10) 352-9690
3. 2026-05-03T17:42:00 Information record is intermittent during trips.
4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books

2026-05-04T18:05:00 The HsWorld.com is for group(s) simultaneous words... most likely, that were spoken on the same dates.  
2026-05-04T17:23:00 The Nigerian government versus (VS) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and MEDICINE Nigerian male partners. I saw 2 Microsoft affiliated females beside a car in the north-center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Hedges 11:7-2](#)).  
2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, thirty-first, and thirty-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Luce 16:16](#)).

2025-03-17T11:47:00 Side with church... or side with the children ( John 7:51, Genesis 21:9, Genesis 27:41 )

The `distinct`, `supplements` list, is not null, `variables` parameter. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- **data-webservice:** An invocable web service to provide supporting information. Via a web address, url and query string.
- **data-code:** With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example

```

SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) / 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE '[0-9]%'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) / 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word LIKE '[0-9]%'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) / 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageOfTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
      ( Count(*) / 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
    ) PercentageOfTotal
FROM WordEngineering..Hisword

```

| InfoType | CountInfo | PercentageOfTotal |
|----------|-----------|-------------------|
| Alpha    | 111590    | 93.740811989146   |
| Numeric  | 851       | 0.714879747313    |
| NULL     | 6600      | 5.544308263539    |
| Total    | 119041    | 100               |

- **data-ssn:** For example, Representation State Transfer (REST).

- English is our colonial language; Yoruba is my native language (*Acts 22:2*).
- 1. Accessible from a webpage, the other hard-coded translators from the Bible by using a New Testament phrase.
- 2. In the WordEngineering database, TheCommingAdventureOfTales, contains learned spoken language translations.
- 3. In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- 4. In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
- 5. In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession.
- where?
- 1. 2025-03-01T07:13:00 Microsoft Word and past-tense, Mark Boelen's of Electronic Data Systems (EDS) and the verb, wilt, future reference.
- 2. 2025-03-01T07:11:00 Online transaction processing (OLTP) - Online analysis processing (OLAP).
- 3. The computer ages ago: 2025-03-01T07:16:00 Improve on paper, the oldest computer age.
- 4. There is a database attribute which is only viewable inside the (OLTP) - 2025-03-01T07:24:00 Microsoft made the assumption, to automate markets.

• Bible groups is the arrangement: Pentateuch, major and minor prophets, Gospel, Pauline Epistles, General Epistles.

- Tradition and custom

1. My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPCC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowc.c for the Yonuba language.
4. My first domain name was commonpeople.org
5. The first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is [www.JesusInTheSmith.com](http://www.JesusInTheSmith.com)

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.

2024-07-12 09:12:00 Sort order? 2024-07-12 10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Text management: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Timeline

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible.

2024-07-12T19:03:00 How is it supporting

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions

2024-07-12T21:22:00 Making a protection... making a projectio

I am not asking You to take my word as Yours. I am asking You to change my word as ours ( Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13 )?

- In the HisWord table, the order of belief is

1. Scenery
2. Commentary
3. Word
4. System generated: DateTime and identity columns
5. Association columns: ScriptureReference, ContactID, URI

The author is an authority on the HisWord table.

- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

## Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Read the newspaper. Uncle Demola cautioned me not to talk or write any dispirited material concerning the Italians or Europeans. Visited Poland, Warsaw, down a pit. That's where Ralph Silverman is from. There are joint talks on Rome phase II. |               |            |                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Marriage      | 2014-03-14 Ko ni ri iyawo, today. He won't see his wife, today. ( Ezekiel 24:18.)                       |                                                                                                                                                                                                                                                                                                                                             | 2004-03-23    | 2008-09-23 | 3643 days (10 biblical years, 1 biblical month, 13 days) (9 years, 11 months, 2 weeks, 4 days)  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Two babies were baptized, a boy and a girl. This Sunday celebrate the Baptism of Jesus Christ.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|               |                                                                                                         |                                                                                                                                                                                                                                                                                                                                             | 2004-03-02    | 2024-06-24 | 2504 days (6 biblical years, 11 biblical months, 14 days) (6 years, 10 months, 6 days)          | Run against Italy. We are inside a house and Buki closes the doors eastward. Outside on a beach, an acquaintance, Buki or Stacy Brothers drinks coffee, a recent habit of his. There are 4 satchel bags of coffee. Someone speedily drives a car to our north. I worried about children pedestrians. A male speaker said that Australia will attract a large population of migrants in the end, as a half residence. He quoted Daniel 12 fictitiously, saying the longest length between the top of a building and a mountain top exists in Australia. Australia concedes that when it makes economic reports, it is always before Italy, so it does not have to match Italy. He said Greece does not run, either. 7420 days / 7 = 1060 weeks. |

To:  
Subject: Your SQL Server background caught our HR -- 18-28 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:  
 SQL Server DBA & User Support Specialist – 18% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 18-28 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you! Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

- What part of the distance... as he know?
1. Daniel M. Russell. The Joy of Search: A Google Insider's Guide to Going Beyond the Basics. Originally published: September 6, 2019  
As part of the Doctoral studies of the author, he developed his expertise on the Unified Modeling Language (UML) use-cases, and sequence and collaboration diagrams  
What do you use? As many of His representation.
  2. In Akedah, The Binding of Isaac.  
There were some assumptions which were tested out ([Genesis 11:1-2](#)).
  3. How I relate as a simple example of uses ([Daniel 2](#), [Hebrews 4:1](#), [Genesis 4](#), [Genesis 2:5-6](#), [Genesis 2:18-25](#)).

| 2026-02-02T15:00:00 Naming, counting, timing, ordering, sampling |                                                                                  |                                                             |
|------------------------------------------------------------------|----------------------------------------------------------------------------------|-------------------------------------------------------------|
| Terminology                                                      | Word                                                                             | Relational database                                         |
| Naming                                                           | God's first commandment to the first man, Adam, was for him to name the animals. | For the relational database, the various objects are named. |
| Counting                                                         | God counted the days during creation.                                            | Count() keyword.                                            |
| Timing                                                           | The greater light, the sun, and the lesser light, the moon, are signs.           | GetDate() returns the date and time.                        |
| Ordering                                                         | Greatest commandment, greatest among us, honor thy father and thy mother         | ORDER BY ASC, ORDER BY DESC. Lag or lead.                   |
| Sampling                                                         | Wandering years                                                                  | ORDER BY newid()                                            |

- Pre-condition ( Genesis 3:15 )
- Assertion ( Hebrews 5:8, John 20:17 )
- Post-condition ( Genesis 49:9, Revelation 5:5 )

- 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
- 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (VS) Functional dynamic equivalence (thought-for-thought): [BibleWord.html](#) is the former
- 2024-11-15T14:06:00 Translator: The author's first program is translation of English to Yoruba.

\* 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bollywood Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic, they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

1. Reverence to God ( Genesis 41:16, Daniel 2:23, Daniel 4:26, Daniel 5:23. )
2. Witness ( Genesis 41:13, Genesis 41:54, Daniel 5:31. )

At Milk & Honey Cafe, I was attended to by Amy Hsueh Tm, who previously said, I work here, and Audrey Russell. I saw a young Hindi couple sitting in the north-center. I saw some males, and a single woman at Yifang Taiwanese Fruit Tea, and at Albertsons Lucky. Charter Square. Their nationalities are Chile and Peru.

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
  - WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.
  - SacredText table: 2025-12-25T12:41:00 is nearer to the whole set.

| Word                                                   | Commentary                                                                                                        |
|--------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------|
| What word are cart of his? Is what word He use as his. | Composite primary key, foreign key, and index; rollback or commit transaction; primary-child table, orphan record |
|                                                        | Outer join                                                                                                        |

| When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases. | Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.                                                                                        |
| I used to rely on my education and experience.                                                                           | Now I draw on expert opinion? 2025-12-04T22:00:00 <b>Expert facts</b> , 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. <b>What requires for the other?</b> |

2025-07-31T13:25:00 **What does the link provide?**

- 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
- 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
- 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) availability? Static versus (VS) dynamic?
- 2025-07-31T16:05:00 The iframe tag embeds one HTML document within another.
- 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
- 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
- 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.
- 2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclub. The scenery changes to Bondi Beach. Scene 3: I was trying to find the relationship between the availability of theorists and theorems.
- 2025-12-05T12:09:00 **What did He turn to... as usage?** ( 2 Chronicles 16:2 )? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.
- 2025-12-06T15:26:00 **What does He associate... with me... and how do I be the guide?**

2025-11-23T00:28:00 **What have you... used... the Bible for?** ( John 20:31 Acts 17:11 John 5:39 Joshua 1:8 Daniel 9:2 )?

- Survey ranking for uses of the Bible.
- Recommended scripture reading. Quote of the day? Keep a historical record.
- Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
- Learn language by using sacred text — reading, writing, hearing, speaking, translating.
- Check religion 2025-11-23T01:52:00 for conversion ( Acts 17:31 ).
- Bible calendar for events and anniversaries.
- Which authority for which event?
- Compare times? For example, during the time the Bible was written, Jews worshiped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 **Absent... of the same.**

A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 **Can we determine... to be usage?**

- Nullable
- Outer join
- Default
- Like

urlPerformance

- webpagetest.org** In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10).

Microsoft SQL Server limitations include:

- **Microsoft SQL Server database connection string ApplicationIntent=ReadOnly**
- On the referencing side, it can only relate to a single referenced entity.
- Varchar columns have maximum sizes.
- Varybinary columns can be large.
- Leading zero **Zero five eight four one**, versus (VS) **5841**.

2025-07-30T10:22:00 **Schema changes**

2025-07-30T10:22:00 Schema changes a table

- The alter table sql command is for changing the schema of a table. The author rarely uses them, because of syntax rules.
- The SQL Server Management Studio table design menu option provides the most flexibility.
- SELECT...INTO creates a new table in the default filegroup and inserts the resulting rows from the query into it. **URLMaintenancePage.aspx.cs** for example, 2024-11-06T02:04:00 URI database table schema columns re-arrangement, and column additions.

2025-07-14T15:13:00 **10 Best Influences on Software Engineering**

- Reviews and Inspections: 2025-07-14T15:34:00 **Can I be impartial as others?**
  - 2007-08-04 **ExCoCo is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines**, 2025-07-14T16:50:00 **To what extent do I know the culture of others?**
  - **ISLint: The JavaScript Code Quality and Coverage Tool**
  - 2018-01-05 **VS12: Markus Validation Service**
- Information Hiding: 2025-07-17T20:46:00 Addressing. 2025-07-18T19:33:00
  - During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
  - 2025-07-18T19:45:00 while working on a project for Information Dialling Services (IDS). 2025-07-18T19:47:00 under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.
  - 2025-07-18T19:51:00 0055 telephony callers were being recorded... in a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/server with PowerSoft Powerbuilder as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 Did we need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listener that speaks? 2025-07-18T20:12:00 **Kywe** is a writing tool... where is the speaker?
  - During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.
  - 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture partitioning.
  - 2025-07-18T21:03:00 Multitier: Separation into client presentation, application, and server data management.
    - Client presentation: A web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service... .asmx file, and posts a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
    - Application: A dynamic link library **InformationInTransit.dll** queries the database.
    - Server data management

(Steve McConnell, January/February 2000).

2025-07-13T18:23:00 Software documentation

2025-07-13T18:31:00 Why behind the code

GetAPage.html offers the user the opportunity to enter the word, 2025-07-13T18:42:00 **and retrieve the compared God's word.**

2025-07-13T18:53:00 How to install and use the code

GetAPage.html is available via the browser, and so also are the web services it requests. The application-tier and database-tier are also accessible.

(Write the Docs).

The impetus for database recording was to re-use.

2025-06-29T04:18:00 Use Case Interpret Word

**Software Engineering: A Modern Approach** by Marco Tulio Valente. Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

- The user enters the word to interpret
- The system determines by using regular expressions the data type of the word
- The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
- The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

- The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
- The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
- The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
- The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
- The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

- 5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 **To replicate God's Word?**

- WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
- Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 **he relies on his ousurance of the truth**

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B Testing (or split testing)

| Interest of the users               |                                                                                                                                                                                                                                                                                                                                                         |                                                                                                    |      |   |                                                                                                    |   |                                                       |   |                                                            |

(Marco Tulio Valente).

2025-05-17T20:07:00 Functional Programming... Computed Columns

- 2025-05-17T20:16:00 Pure Function, referentially transparent:
  - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 **are the same languages**.
  - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). **Singularity of the Composition**.
- 2025-05-22T18:10:00 Immutability:
  - 2025-05-22T18:16:00 Object-oriented technology serves change states.
  - 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
  - 2025-05-22T18:17:00 As is of the need for database storage
  - 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.

3. 2025-05-22T18:31:00 Practical need for recursion?  
4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO
```

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINQ.  
(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction  
Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URI and HasDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute  
As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
  - 1. In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
  - 2. In 2007, when I was looking for work, I modeled the HasDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
  - The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate ( Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13 )

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
  1. Spelling corrections.
  2. Verb grammar tense.
  3. Synonym versus (vs) opposite.
  4. Singular versus (vs) plural.
  5. Deprecated.
  6. Currency.
  7. Locality, regional, custom, preference.
  8. Anglicized.
  9. Religion.
  10. Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
  11. Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways...and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

```
SELECT HiswordID, Dated, Word
FROM WordEngineering..Hisword HiswordLead
WHERE Dated >
(
    SELECT TOP 1 Dated

2025-02-19T12:20:00 What I offer of the truth?

1. Command-line interface (CLI)?
2. No .NET Core support
3. 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
4. The author does not make use of Microsoft SQL Server synonym support
5. The author rarely uses Microsoft SQL Server soundex support
6. Only English, there is no multi-lingua support
7. Limited Bible versions, dictionaries and commentaries
8. Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
9. Microsoft SQL Server will support Regular Expression (Regex)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, taborder.
- 2024-10-04T09:32:00 As much as possible, initially accept the default values, with, for example, the date columns. You may adjust and be precise, later.
- 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY, INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T02:44:00 This is what I am unable to do with the graphical user interface (GUI)... this is what I am inspired to do. 2024-10-05T02:49:00 Its interface... remains our reliance. 2024-10-05T02:52:00 I am equipped to doing the same... as I realize. 2024-10-05T02:54:00 This point... must elude to one. 2024-10-05T02:59:00 Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine pretends to do? 2024-10-05T03:01:00 God has done His part... where is my part?
- 2024-10-05T05:03:00 Next after 2024-10-05T05:10:00 ( 1 Kings 5:5 )? E. F. Codd in 1970, proposed the relational database.

2025-02-23T16:30:00 Company osi data... osi yemi.

2025-02-10T06:22:00 In Isaac shall your seed be called. I am on a narrow road in the north-center. This is either Bing's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing light-fitting white trousers. At the intersection of Fremont Boulevard and Paseo Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running from the center-west, upper, and turning towards the south-west. There were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

2025-03-28T19:12:00 What we are receiving. ( 2 Samuel 12:24 )?

- At University of Ife, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Oloyede started driving us to school.
- In Lagos, Benitoluwa graduated from Abasi Nursery and Primary School to Ikaja Grammar School, prior to my twin sibling and I are attending Abasi Nursery and Primary School.
- I lived with Romulo Lira prior to Romulo Lira graduating from Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC) and Romulo Lira returning to his home country, Venezuela.
- I was deported to Nigeria, shortly after the passing away of my adopted mother, and shortly before the separation of Major Lawal from Aunt Taiwo.
- Benitoluwa and Ademiloluwa. Uncle Demola and Danolola. You must be involve... for someone to use you. 2025-03-28T18:30:00 I consider father and son relationships. What we are... is how we are made after. I started tutoring computers to Hajara Adeola, a French lecturer, and wife of Fola Adeola, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritic alphabets.

(Mustafa Suleyman, Michael Baskar, 2023-09-05).

#### 2025-09-14T09:24:00 Contemporary

- Creation ( Genesis 1:1-6 , Genesis 1:26-Genesis 2:4 , Genesis 2:16-25 , Genesis 3:15-16 , Hebrews 11:4 )
- Born King of the Jews ( Matthew 2:2 , Luke 1:19 , Luke 1:43-44 )
- End times ( Revelation 5:5 , Revelation 21:23 , Revelation 22:2 , Revelation 22:8-9 )

#### 2025-09-14T13:07:00 What exclusively I use? 2025-09-14T17:40:00 Naming versus (VS) Called? Referred

- When: Called — In the beginning, 2 great lights ( Genesis 1:1 , Genesis 1:16 )
- Who: Naming — God, man ( Genesis 1:1 , Genesis 1:26 , Genesis 5:2 )

#### What true identity lies apart?

- The Messiah
- The King

#### How my organization is the best?

1. Alphabet places, word spelling, and sentence composition
2. Arabic numbers systems

#### What measures, forever?

The author is linking words spoken to related verses and dictionaries.

- BibleReference uses whole numbers for representation.
- Who, what, when, where, why?

| Proliferate | Bible publishers, versioning and language translation | Hebrew translation                                                        | Commentators                                                                                                                                                                 |

#### Relational Model

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

#### View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord\_view view appends computed columns to the HisWord table.

#### Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

#### Software Engineer versus (VS) Database Administrator

| Compatibility                                                                                       | Legacy? Backward compatible...re-engineering. New, creativity. Framework.                                                                                                   | Progressive                                                                                                                                                                                    |

(Itzik Ben-Gan, 2023-07-03).

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

#### Codd's 12 rules

##### Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord\_View.

2024-06-15T21:28:00 What is pertaining to the data?

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 To who... I exchange... my good?

Rule 3: Systematic treatment of null values:

2024-06-18T21:49:00 Unknown or inappropriate.

- Identity columns cannot be null
- Date/Time type columns will default to the system's date/time

- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION\_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

2024-06-20T18:39:00 It looks at the data as a whole.

| Sublanguage                        | Command                                | Usage                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Data query language (DQL)          | Select                                 | Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Data definition language (DDL)     | Create or alter or drop schema objects | The create statement is used once for each new object. The alter statement is mainly for an existing object.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Data manipulation language (DML)   | Insert, Update, Delete, Truncate       | Manipulation may fail in the following cases: <ul style="list-style-type: none"><li>• Primary key or unique index duplication. A primary key column may not be null.</li><li>• Invalid datatype or extra large data size or out-of-range</li><li>• Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datatype will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.</li></ul> |
| Data control language (DCL)        | Grant, Deny, Revoke                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Transaction control language (TCL) | Begin, Commit, Rollback transaction    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00 ...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 What part of yourself... do I desire as my future?

Rule 9: Logical data independence:

2024-06-22T17:02:00 The position of someone else... is beside me.

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.  
(Edgar F. Codd, 1970).

**Concept: GetAPage.html**

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposive: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

**What did He dispose of in making man?** ( *Genesis 2:7, Genesis 6:3* )?

(Matt Chandoff, Merrick Furst, Daniel Sabbah, Mark Wiegman, Arvind Krishna, 2023-11-07).

**A conversion page**

Customize the content of an url? This is how the web page implements this technology. This is how-to implement it in your preferred technology.

| Keyword  | Find what         | Replace with          | Scripture Reference                             |
|----------|-------------------|-----------------------|-------------------------------------------------|
| Religion | Idolatry          | Monothelism           | <a href="#">Acts 7:40-43</a>                    |
| Learning | Egyptian          | Hebrew                | <a href="#">Acts 7:22</a>                       |
| Location | Egypt             | Promised Land         | <a href="#">Acts 7:3-7</a>                      |
| Vocation | Ruler and a judge | Ruler and a deliverer | <a href="#">Acts 7:10, Acts 7:22, Acts 7:35</a> |

**What is remembrance, associate?**

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

| Keyword  |                                                                               | Commentary |  |
|----------|-------------------------------------------------------------------------------|------------|--|
| Volume   | sp_spaceused @objname = 'HisWord'                                             |            |  |
|          | Keyword                                                                       | Value      |  |
|          | Rows                                                                          | 115689     |  |
|          | Reserved                                                                      | 28296 KB   |  |
|          | Data                                                                          | 17104 KB   |  |
|          | Index_Size                                                                    | 9648 KB    |  |
|          | Unused                                                                        | 1544 KB    |  |
|          |                                                                               |            |  |
| Velocity | The author does manual data entry.                                            |            |  |
| Variety  | At the beginning, the author parsed XML files into textual relational tables. |            |  |

(Jack Hyman, March 2024).

**Data Types**

HisWord table

Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly) or

Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

| Column name        | Column type             |
|--------------------|-------------------------|
| HisWordID          | Discrete (countable)    |
| Dated              | Continuous (measurable) |
| Word               | Nominal (non-ordered)   |
| Commentary         | Nominal (non-ordered)   |
| Uri                | Nominal (non-ordered)   |
| ContactID          | Discrete (countable)    |
| ScriptureReference | Nominal (non-ordered)   |
| Filename           | Nominal (non-ordered)   |
| EnglishTranslation | Nominal (non-ordered)   |
| Location           | Nominal (non-ordered)   |
| Scene              | Nominal (non-ordered)   |

| Data type               | Column type |
|-------------------------|-------------|
| Nominal (non-ordered)   | Text        |
| Discrete (countable)    | Numerical   |
| Continuous (measurable) | Date        |

(Jack Hyman, March 2024).

**Time for?**

- Birth ( *Acts 7:20* ).
- Family ( *Acts 5:31* ).
- People ( *Hebrews 3:9* ).

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- **What I am good at doing...is what He is good at making?** ( *Genesis 41:32-57, Genesis 1:1-1:2, Genesis 4:26* ).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
  1. GetAPage.html serves as a gateway to specialized links.
  2. GetAPage.html serves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: **Do you write it as a manual? Do you write it as describing the functionality?** ( *Daniel 9:24* )?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengths between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... [Why L46 #2](#)

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- **Where are the differences, companion?**
- **Experimenting...as the same?**

Influence

- Data:
  - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
  - For over 2 decades, the author has continuously received word that he constantly records and queries. [Simulates2](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
  - Language translation
  - Familiarity with the subject and tradition. Apply domain knowledge.
  - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. [We all make our following,](#)
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reiteration may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
  2. Simply creating a HTML anchor to a source url
  3. Fetching, parsing, and building the results of a web service
- [Our conversation our trade](#) ( *1 Samuel 25* ) **To be conformable of age.**

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- Title
- Abstract
- Acknowledgments
- Thesis
- Results and Discussion
- Terminology
- References
- Expendables
- Background
- Prospects and Fulfillment
- Autobiography
- Style of Writing

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ( [Joshua 1:8](#) )

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
  1. HisWord table Word Column: As much as God spoke it
  2. Period of Time Tables: With respect to time
  3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
  4. GetAPage.html HisWord section: Time variant*For a period of time we are as we seem we are? What needs a success.( [Genesis 4:7](#), [Matthew 14:8](#), [Mark 6:25](#) )?*

(John Calvin Maxwell, 2023).

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's datetime attribute and the time node give datetime information.

AlphabetSequence concerns include:

1. [How essential are we to the personification of God?](#)
2. The spirit man holds
3. [When did He exchange... His view as ours](#) ( [Genesis 18:19](#) )?
4. How are we acceptable; to what is new? How does God, build up, to His word ( [1 Samuel 9:15-17](#) )
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ( [Matthew 23:14](#), [Acts 8:37](#), [Acts 15:34](#) - [3 John 1:15](#) )
14. Naming of words ( [Genesis 32:28](#), [Genesis 35:10](#), [Genesis 47:22](#) )
15. We have been doing unconvincing power
16. I said, I heard. 2021-04-14T08:37:00 In a location, to the North, probably 99 Ranch Market or Marina Food, or Daiso. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, right. I said, 6 9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. [What does He volunteer as time?](#) AlphabetSequence is resource minimal:
  1. Doable by hand
  2. Compute: Not technologically demanding
  3. Maturity: Since 2002
18. [Separation into Segment](#).
19. [Is this a finalized work, and how is it accessible? It is a transient database.](#)
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... [and not swayed](#)... by the grammatical correctness.  
To co-operate as we are. [Robert Estienne English Alphabet](#)

2017-03-06T00:00:00 A Comparison of Age

Divided as separated. Go this way, that way.  
I want to program, but I don't want to match two programs together, except for deep thought.  
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ( [Genesis 37:5-11](#), [Genesis 30:24](#), [Genesis 40-41](#) ).  
IC2IC is separable into four layers; these are the link, Internet, transport and application layers. No breaking ( [Matthew 19:8](#) ).

Marriage

Marriage is not a practice, in the life after, resurrection ( [Matthew 22:30](#), [Mark 12:25](#), [Luke 20:35](#), [Revelation 21:2](#), [2 Corinthians 11:2](#) ). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. [It is more of a father that wants you](#). Jesus resurrected, after three days ( [Matthew 12:40](#), [Matthew 26:61](#), [Matthew 27:40](#), [Matthew 27:63](#), [Mark 8:31](#), [Mark 14:58](#), [Mark 15:29](#), [Luke 2:46](#), [John 2:19](#), [John 2:20](#), [2 Corinthians 11:2](#), [Revelation 21:2](#), [Revelation 21:9](#), [Revelation 22:12](#) ). The breaking of device ( [Psalms 148-20](#), [John 19:36](#) ).  
On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.  
The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logics, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.  
The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

Visibility ( [John 4](#) )

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript.  
The database contains the real information, that makes-up the result set.

Lifecycle ( [John 3:3](#), [John 3:7](#) )

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany ( [Matthew 4:6](#), [Matthew 18:10](#) )

What are the pairing?  
The client started as HTML, but now has JavaScript and CSS.  
CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.  
JSON and XML have made in-roads.

To each resemblance

1. [Where His word expected mine?](#) When I get a word from God I could do the following?
  1. Write the word in my notepad, and never refer to it again.
  2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
  3. Produce an artifact based on the word.
- What do I desire... as part of significance?
  1. Moses' Prophet ( [Exodus 4:10-16](#), [Numbers 12:6-8](#), [Deuteronomy 18:15](#) ).
  2. Abraham? Senn ( [Genesis 17:1](#), [Genesis 15:2](#), [Genesis 22:2](#), [Genesis 22:12-18](#), [Hebrews 11:17-19](#) ).
- The drawback of the relational approach?

- Style of Writing

1. Centralized versus (VS) distributed storage?
  2. Unique foreign key? Master-child? Hierarchical?
  3. Duplicable
  4. Maintainability
  5. Expertise and familiarity? Isolated.
  6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
  7. When is ready-to-use enough?
    1. Databases may reside inside multiple files.
    2. Although databases may store different file types. This wasn't the original intention.
    3. Databases are abstractions.
- Lacking expertise?
1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
  2. Quality Assurance (QA): Some changes break existing code.
  3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
  4. Adoption by emerging technology? Mobile, cloud...

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a Journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Ile eyan mi lon to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations

Where will I be of the same?

| Word              | Scripture Reference                                           |
|-------------------|---------------------------------------------------------------|
| Burial place      | Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13 |
| Birth place       | Matthew 2:6                                                   |
| Matriach's origin | Genesis 25:20, Genesis 28                                     |

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to \*, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order; Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (*1 Samuel 3:18*.)

| Man | Machine |

Numbers in Themes

- He expressed good as how He felt ( Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:12, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22 ).
  - He expressed start and end of time ( Genesis 1:1, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:19, Genesis 1:23, Genesis 1:31, Genesis 2:1-6 ).
  - Kings of the Jews ( Matthew 2:2, Matthew 27:11, Matthew 27:23, Matthew 27:37, Mark 15:2, Mark 15:3, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:33, John 18:39, John 19:3, John 19:19, John 19:21 ).
- To be actual things
- Pronunciation ( Luke 1:13, Luke 1:60 )
  - Application ( Luke 1 )
  - Spelling ( Luke 1:63 )
  - Reference ( Matthew 11:14 )
- In telling the future, there are two parts: prophecy and fulfillment ( Revelation 19:10 ). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

| Prize                                                             | Target                                                | Scripture Reference          |

| http://github.com/Kenadenji/WordEngineering/tree/main/UIS/Gradual | I have decided to work on a gradual improving system. | Psalms 133                   |

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

### logparser

The log files for this observation are 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3c
sc-status sc-substatus COUNT(*)
200 0 18115
304 0 9407
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache. HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c

- ### Productivity
- Productivity is the measure of unit tasks completed within a time frame or at a cost.
  - A project cost is its work hours. A work day is 8 hours. A work month is ~2000 work hours.
  - The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
  - To predict productivity? Re-use.
  - Metric:
    - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialised array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
    - Machine Instructions Metric: This is the size or count of the machine instructions.
    - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
    - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
    - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
    - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hayes).

Word speaking. What did he use?

- Style of Writing

The author, first wrote his history, in multiple stand-alone files .HTML, .XML. ([Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a `ContactMaintenance.aspx` server-side page as a user-interface (UI) to record contact information. This page remains active, till today

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offsite, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

I have a product; where is the method?

**Adoptability:**

1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.

2. What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.

3. The Biblical account wrote dreams and visions textually, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.

4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this works as a reference. The widely acceptance of a work, accompanies preference and prevalence.

5. The result of the Bible, is how we use it. The emphasises of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

### Tasks

How to go about it:

### Purpose

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication

## Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge

## Elements

Word processing flows more naturally than data entry

### Guidelines and tools

A relational database is a substitute for text processing.

## Stakeholders

I am the primary contributor and beneficiary

### Outputs

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown

(Alison Cox)

## Lessons Learned

- \* Etem word: Leading up to 2008-03-07, I was not fully ready to find the word of the LORD ( Job 32:12 ).  
 \* I used to ask God for a word to realize what my opinion was?  
 \* Familiarization with data.  
 \* You previously stored your work in a database. You worked on a text in .html files. 2012-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ( Job 22:1-17 ) One of Myself offering as many as I use?  
 \* Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him.  
 \* Putting Him into words.  
 \* My time away from the family, United States of America (USA), may have helped me gain independence.  
 \* In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life, except ours?  
 \* Do I decide the truth? Do I choose the truth?  
 \* The importance of the word: how it is made.  
 \* Post-dated: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station, Bay Street Emeryville BN.com Fire Alarm Panel 8. FDC Building A 5604-5634. To mean, I decide the story?  
How did they handle the Messiah? ( Luke 1:1-38 )? ( Genesis 15:2 )? You know He is capable of you? ( 1 Samuel 17:36, Romans 4:12 )?  
 \* The Yorbua sentence. Ma fologion i me will wisdom to block it.  
 \* No difference in conception.  
 \* The Microsoft Windows Operating System is determining any? How diversification the changes? ( Genesis 4 )?  
 \* How useful, you have been?  
 \* The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.  
 \* Difficulty level: Your work is divisible into writing the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The commentary does not have to be an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. It was to be it is never forgotten of the LORD. Whose obscurity has the subject?  
 \* What can we be, in the midst of a people, certainly in God? ( Matthew 19:12 )?  
 \* What do you know how to use, as you desire yours?  
 \* Each of God, Search of God.  
 \* How many are others? ( Daniel 11:41 )?  
 \* I have to orient God, as I am allowed to be.  
 \* How I want it to be: how He wants it to be? When does the word become the answer? ( Acts 10:34 )?  
 \* People have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal recording is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Build or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work ( 1 Samuel 27:28 )? Needs to be met?  
 \* The author will record the publishing and receipt.  
 \* An identifier and possibly foreign key is possibly null, empty, when it is unknown, not particular, or it associates with the author.  
 \* I didn't shift, until the movement? ( Acts 1:6 )?  
 \* Did he ask you to do it? ( John 8:44 )?  
 \* Be him, about Him? ( Genesis 11, Genesis 4:26 )?  
 \* Timing urgency? ( Matthew 26:45-46, Mark 14:42 )?  
 \* Could you need one part of me and not deserve another? Biblical Calendar. Gregorian Calendar.  
 \* When we go without AlphaSequence? A place in the Bible justifies the word.  
 \* No on M, Burns, Carl. You know Burns, Carl is this. We are inside a building and we heard that food is being given away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center. 04:27 Dizzy sleep. 20:13 Beni or Buki, I forgot who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?  
 \* What past the time ( Isaiah 61:2, Luke 4:19 )?  
 \* What is it to use?  
 \* That chooses, I When I read the Bible, I adapt to the role I take.  
 \* Relative to the word ( Proverbs 3:5 ).  
 \* If the words do not join? Consider separating or putting the lesser word in the commentary column.  
 \* Do I determine I know?  
 \* Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.  
 \* When word and scenery do not fit exactly, it may be a larger scenario.  
 \* If the word C+ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?  
 \* What I have learnt from Bill Gates, through using the software from Microsoft.  
 \* Normalized the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HisWord table, and the Commentary column should not contain the duplicate data.  
 \* The BibleWord table may not be necessary to relate the HisWord table to the Scripture. How much manual work does the author do, and can the author automate this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26: I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Milk & Honey Cafe, Peapack Center. Hush Amy To took their order, and she was the waitress.

Africa. 2025-11-26, I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Milk & Honey Cafe, Pegasus Center. Hsueh Amy Tm took their order, and she was the waitress.

2025-10-23T20:25:00 Doctorate Candidate Internet Commerce

2025-10-19 Doctor Benitoluwa Adeniji asked me what I specialized in during my doctorate degree studies

- I learned how to program smart cards using the C programming language.
- I understood flash memory, and I focused on their secured access.
- I searched for a synonym of the word "understood," on Google.com, and I selected the word, "comprehended." I comprehended Unified Modeling Language (UML). Understood about period...and how it is manifested.. The first time, I dreamed, was in the year 1980, 12 years before the year 2000. The second time, I dreamed, was at the end of the year 1997, 2 years before the year 2000.
- I let Moslem....use the work.
- A critical intelligence file An adored riddle if Ailsa live has been nurtured - I couldn't find a company willing to talk about it. By James O'Donnell 2025-10-28 2025-10-28T03:35:00Z; 2025-10-28T03:53:00 When i re-located to the United States of America USA on 1999-01-11 I discovered my twin sibling built web pages and databases tracking contacts, websites (URL), and software. When i re-located to Newark, California (CA) 94560, I started building personal pages for tracking contacts and websites as well as doing database design and programming technology trend. I understand what URL means, but I did not continue the tradition of my twin abel who used his adopted technology, schema user-interface (UI), nor process. Also my Villavend Detention Center prison mission experience in Australia diverted me from Internet Commerce to given prisoners an opportunity to share their real-life
- 2025-10-28T03:50:00 testimony. When you see an example .... like 2025-10-28T03:51:00 make it your own way. In Australia, I was not using technology in my personal life. In the United States of America (USA) I am an adopter of technology for Christian
- .....at least at that point in time. I do have things like a Crystal Ball
- 2025-11-01T07:28:00 We are having a gathering at Quantum Trust Bank (GTB). We played cards. There were 2 beds placed on top of one another in the center. Dolapo Ogumokeun and some other high-profile employees were talking about leading-edge developments in the south-west quarter.
- Your suggestion for Ademilola is to work on a solution. AlphabetSequence came up as they were trying to find meaning to words spoken to by you in your dreams. Now, that AlphabetSequence as proven useful with English and Holy Spirit word, you may be able to code more words. I'm asking you on a journey, was facilitated by our dream. How could Ademilola 10-ST relay his case back. Finding a niche ..... a role to play 10-ST in the Christian direction. I was given time to separate time. IBM....you have the technology.... people Rita Bustilli....Aborigin? What do we have to work with? I studied, when I was at Newark, Daigaku Nihonyoku Center (DHC), and I was asked to have women help with WordEngineering. The question is what I want o do, and how will he help me get there. S's wife and Joe People dissuaded me from following the information technology career, but I now know I have a task, I use software. Working with the Document Object Model (DOM) has revealed missing links to me to be able to build records. 11:13 Received record is completed. Explain action, identify scene, build a story with supporting records. With Dolapo Ogumokeun owner of a business.... 11:13 Who does make it web-enabled? My adopted father, I learned from him. Critic At Github, I don't have a database or back-end! What can Ademiloluwa do? WITHOUT the infrastructure.... like I did in Newark.... without the internet,

database. I chose to build by myself, using my requirement. I will strike the shepherd. \*2025-11-01T11:21:00 Akedah. When you are in the midst of God... that is him... choosing by himself.

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it ( Genesis 4:26 )?

- Where?
  - Vocation ( [Matthew 4:1-9](#), [Mark 1:1-7](#) )
  - Place of origin ( [Matthew 2:1-11](#), [John 7:52](#), [John 18:5](#), [John 18:7](#), [Mirah 5:2](#), [Isaiah 6:1-2](#) )
  - Resting place ( [Genesis 23](#), [Genesis 48:21-22](#), [Genesis 49:29-33](#), [Genesis 50](#), [John 14:3](#) )
  - Inheritance ( [Ezekiel 44:28](#), [Isaiah 53:10](#) )
  - City of Refuge ( [Joshua 20:7-8](#), [Numbers 35:1-5](#) )
- The author started his tertiary education at Central Piedmont Community College (CPCC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
  - Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
  - Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
  - Using the JavaScript fetch keyword, the author places webservice requests.All the above examples are 2-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...
  - 2025-10-09T20:35:00 places enormous responsibility on the author.
  - 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-giving talent... it is okay.
  - 2025-10-09T20:46:00 How do they... pursue the level... you have attained?
  - 2025-10-09T20:52:00
    - When the author attended University of North Carolina, Charlotte (UNCC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
    - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible... reverse itself ( Numbers 11:16, Acts 6 )?

2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.

- 2025-10-09T02:01:00 This is where I want to be... if I am with you.
- 2025-10-09T02:10:00 Do you place a life... apart from you?

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself.

- During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon sessions.
- Considering processing and storing

How can I save knowledge... as sharing ( Genesis 2:7, 2 Peter 1:21 )?

- Computers consist of microprocessors and memory. A memory is either:
  - Read only memory (ROM)
  - Random access memory (RAM)
- Hard disk
- Object-orientation combines code with data.
  - Code - method
  - Data - field or property
- A relational database offers the opportunity... to program and store data.
- The ID attribute in HTML files for url hashing is case-sensitive, and it serves for spot reference, and while it is a fragment address, it is the entire unit. A relational database may support the like and between keywords for the partial and range restrictions respectively. So to use range checking, it cannot do range checking. There are no abnormalities in certainty.

What mentions the name?

- Variable and relative? Time, number ( [Genesis 1:1](#), [Genesis 1:16](#), [Genesis 2:2-3](#), [Genesis 2:16-17](#) ).
- Constant? Name ( [Genesis 2:18-23](#), [Exodus 3:14](#) ).

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to reorgantize the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromJudea Time Span, explicitly into the Remember table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation.

The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partiality, is our governance.

### The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro ( [Daniel%2012:4](#) )

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the book of Revelation, the only three mentions of king David, talk of movement ( [Revelation 3:7](#), [Revelation 5:5](#), [Revelation 22:16](#) ). Joseph ( [Genesis 37:3](#), [Genesis 37:9](#), [Genesis 37:19](#), [Genesis 39:12-18](#) ).

Why we Accumulate the Same ( [Matthew 26:53](#), [Revelation 9:16](#), [Revelation 7:4-8](#) )

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ( [Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#) ). Knew versus lay.

Wanting a Member of...

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

When time is maximal used, time is ideal allowed. When our association to follow; is association to the end.

|---------|-------------------------------------|
| Light   | Sun, Moon: Evening and day, Sabbath |
| Man     | Image of God, helper, seed          |

What did He see as His? A remodelling of the last? ( Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14 )?

The author will want a conciliation with time?

AlphabetSequence is a novice attempt to be what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words?

Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ( [Genesis 3:8](#) )?

### Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

### Computer Listing

The software is available at <http://github.com/KenAdenji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

### Technical Field

Seeing the Bible as enlightening to man.

### Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated  
that? The author suggests that Baptism of the Holy Spirit ( [Acts 1:2-3](#) ), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

(Allen G. Taylor, 2019)

| Title                    | Description                                                                                                                                     | Commentary                                                                                                                                                             | Universal Resource Index (URI)                |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| Accessor Pattern         | Get and set an attribute by using a property.                                                                                                   | The boundary to a property value. Readonly is achievable by disabling the set method.                                                                                  |                                               |
| Delegation Pattern       | Composition substitutes for inheritance.                                                                                                        | The author does not inherit any class. But the author delegates by using composition to include existing services.                                                     | <a href="#">@libBook.cs</a>                   |
| Factory Pattern          | Create subclasses from one or more methods.                                                                                                     | At runtime, instantiate a variable object.                                                                                                                             | <a href="#">BallFactory.java</a>              |
| Immutable Pattern        | An immutable object is unchangeable after creation.                                                                                             | A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A Stringbuilder object is changeable. |                                               |
| Marker interface Pattern | The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable. | A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.                                        | <a href="#">@libBook.java</a>                 |
| Singleton Pattern        | Only a single instance is creatable.                                                                                                            | At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.                                                          | <a href="#">SingletonPattern@libBook.java</a> |

- Data quality standards: The author is imitating religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates

(Unified Modeling Language)

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.

A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.

Comments do not impact programatically, they only serve as guides for readers.

A directed relationship may exist between a collection of source and target.

A namespace is a container separator.

An import facilitates the admittance of an external namespace.

Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.

A constraint represents the range of valid values that a member may have.

A dependency replicates changes between the supplier/client.

- A lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime.
- A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators. An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.
- A Boolean is either true or false and it is normally used for validation.
- A real is a number with decimal relevance, such as ratios and percentages.

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference and pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceParser.Exact.cs](#). The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable](#) [IUtility50](#) [ServerManager.Objects.SMO.cs](#). A child may override a parent's virtual member.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.

Signals and receptors are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.

Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web forms matured from code-behind to code-behind.

For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule.

In C# version 9, a method may offer a covariant return type.

**What part of me?**

1. When making man, God made some choices?
  1. Form: In His Image
  2. Location: Garden of Eden
  3. Vocation: Caretaker
  4. Helper: Eve
  5. Model: First man, mother of all the living.
2. How can we resemble His use?
  1. As a software engineer, I replicate my work.
  2. When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
  3. I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
  4. I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
  5. Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike ( [Exodus 2:10.1?](#) )

2025-05-13T16:52:00 **What did He start... that I improve**

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 **What apart I have set as necessary?**

[what is/who is/why/who source=new-jaholm medium=frnfoac:disks:rdm cana:gn-native:article-creds](#)  
Hong Kong was driving to Albertsons Lucky, Brookvale, Hong Kong drove me from their house to 99 Ranch Market.

I cut my finger nails. I shaved my beard. I cut my hair.

[Is Koko still with you? Ni mi se ri be mo](#). Is Koko still with you? That is why I don't see it like that anymore. 2025-05-06T17:09:00 (what) What is beyond a place? 19:09 (color to show) 2025-05-06T18:52:00 I am referring to my conversation with Benitlouwa

- 2024-12-27T02:14:00 A young lady came to visit me. I introduced her to my adopted father and uncle Niyi. She does documentation, probably more specifically technical writing. She has written a lot of papers, but we would like to supplement them. The site is the Onyekwere family SAAP-Tech business. She is returning to Europe, where she intends to sit for a universally coordinated examination.
- 2. Latest employer, Daigaku Honyaku Center (DHC):
  - 2007-09-25T01:49:00 Guy Kawasaki. Asian angel of death.
  - 2008-03-11 September 22. Hayward Hall of Justice, 24405 Amador Street Hayward, California (CA) 94544, 510-690-2700.
- 3. Next of kin, Benitokuwa Adegoke Adimolunle Adejorji
  - 1999-05-07 He exan mi, ton lo yi. It is my person's house, you are going to. Christening of Ademilolunla.
  - 1999-05-07 Her husband ko kin ba sorro bedtime. A separate ara e. Her husband does not speak to her at bedtime. Will separate self.
- 4. Tribes in Nigeria
  - 2024-04-13 Santa Clara, Ibo female. Tammy. Ezinne translated sweet mother: Barnes & Noble (BN.com) El Cerrito Plaza. You are acknowledging that you are different...but you want to die for the people of God.
  - 2024-05-04 Nur Ahihaussai. Light. 6' 1" basketball high school forward. Both sides of my family are Hausa not Fulani. Nordstrom, Emeryville.

2024-12-21T06:02:00 We don't have to be surrounded.

From my bedroom, I walked into the light of the upstairs lobby to wear my Spyder Active trousers that I purchased from Costco on 2024-03-21. Where does God reveal Himself? There are 47 occurrences of the word light in the King James Version (KJV) of the Bible Gospel books. Google.com may have a statistics attribute for providing additional/specific information. Alternatively, what type of information... am I searching for? Image, audio, video, news, statistics... 2024-12-21 05:25:50.117 [May rank statistics?](http://icr.org/books/defenders/029%20Pharisee%20magicians%20were%20somehow%20able%20to%20duplicate%20the%20first%20plagues.%202024-12-21T07:18:00%20May%20rank%20statistics%20)

1. 2024-12-21T06:18:00 Locality... between people ( [Exodus 1:10](#) ).

2024-12-21T07:45:00 What accurate proceeding?

1. 2024-12-21T07:52:00 In the event... of time... there I Am ( [Genesis 1:1](#), [Genesis 1:14-19](#), [Revelation 21:7-3](#) ).

2024-12-16T08:00:00 Metric Scalability. In the order of their mentioning

- 2024-12-16T08:00:00 Time: beginning, evening, morning, day, season, year, generation, month, die
- 2024-12-16T09:27:00 Place: earth, city, house, kingdom, country, tribe

2024-12-10T15:23:25 The Journey to WordEngineering

- 2024-12-14T12:14:00 Availability ( [Daniel 2:33-35](#), [Daniel 2:41-43](#) ) Wake-up orientation: My right foot is in the center and on the top of my left foot.
    - After the author completed his 3 Associates degrees, the president of Central Piedmont Community College (CPC), doctor Richard Hagemeier, asked the author if he would like to go to Africa?
    - After the author completed his Bachelors degree, the author did technician work in separate telephone call areas, and the upgrade of Borland Turbo C language software that prints labels for the offsite storage of reel tapes.
    - After the author completed his Master's degree, the author did database replication between the central database and remote databases.
    - The author's doctorate study was based on intelligent appliance security and storage.
  - 2024-12-14T15:48:00 Scalability ( [Genesis 41:24-26](#), [Genesis 41:47-49](#), [Genesis 41:53-57](#) )
    - When the contract of the author was terminated where he first did database replication, the author commenced a lead software engineer role in a client/server trainee and apprenticeship project.
    - The author initially used a Sybase PowerSoft Watcom Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE). The Polish heart attack survivor project manager restricted workers to 40 hours a week.
- Do you not believe I will provide your need?
- 2024-12-14T17:23:00 Security: What do we have as sufficiently giving ( [Daniel 6:22](#) )?
    - 2024-12-14T18:25:00 Agility: The idea of the author is not... [Comprehensive of people](#).
  - 2024-12-14T16:13:00 What we have of the east?
  - 2024-12-14T22:15:00 How can we prove you wrong... we are right ( [1 Samuel 22:2](#) ) ?

(Haishi Bai, 2019).

2021-01-04 14:22:14.250 Relational database Will target Tuesday December thirty first ( [Daniel 12:13](#), [Matthew 22:41-46](#), [Matthew 4:7](#), [Deuteronomy 6:16](#) ) ? 2024-12-31

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering ( [Daniel 9:2](#) ). Is there a date? Not null.
  - Calculate the date difference between the beginning of the prophecy and the ending of the prophecy ( [Daniel 9:24-27](#) ).
- 2021-01-04... 2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)
- Is the date before or after?

2024-12-13T14:00:01 What I have that is partial to me ( [John 16:7](#), [2 Samuel 7:15](#), [Luke 18-13](#) ) ? Holy Spirit

- You are still partial to self

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest ([Matthew 22:36-40](#), [Matthew 18:1-4](#), [Matthew 23:11](#))
- New ([John 13:34](#), [Hebrews 8:13](#), [2 Corinthians 5:12](#))
- 2...1 ([Genesis 2:24](#), [Genesis 41:25](#))

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit ([Luke 24:49](#), [2 Thessalonians 2:7](#))
- Time representation ([Matthew 24:14](#))
- Trade of man ([Revelation 13:16-18](#))
- No changes to the Word ([Deuteronomy 4:2](#), [Revelation 22:18-19](#))
- End-times ([1 Peter 4:7](#), [Genesis 6:13](#))
- Recompense ([Job 42:10-17](#), [Job 1:2](#))

Entity-Relationship Model

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To delegate the user? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

- 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, manually, SQL Server is a service.
- 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moderns, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part... to follow the truth. 2024-10-28T06:06:00 What input has He contributed... that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no.

The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

- At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
  - At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
  - At McKley Real Estate, I worked on a R:base 5000 application.
- These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 What is suitable... for replacement?

Initially, I registered the trademark, WordEngineering. After offering me a book, Ocean Senior, I afterwards, was issued the domain name, [www.JesusInTheLamb.com](http://www.JesusInTheLamb.com). ( [Revelation 21:23](#), [Revelation 21:2](#), [Revelation 2:17](#) ). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walkers. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Him? Web HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham ( [Ezekiel 33:24](#) ).
- Consistency with the Bible ( [Genesis 25:23](#) )?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/bac/media/Presence/Hydfile/asax>
- 2019-12-07 <http://google.com/books/edition/Design+for+How+People+Think/UF5ODwAAB7hI=an&q=bcv=1&printsec=frontcover>

Separating realizable

- Baptism of John... Baptism of the spirit ( [Acts 2:1](#) )
- Dead... resurrection ( [Hebrews 11:12](#) )
- Ishi, husband ( [Hosea 2:16](#) )
- Antichrist ( [2 John 1:7](#) )

No generation... in bonding. What did He ask for unity in? Land, man, Men, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel ( [Genesis 2:8](#), [Genesis 2:15](#), [Genesis 3:23-24](#), [Genesis 4:10-12](#) )
- Jesus Christ: Church - Peter ( [Matthew 16:18](#) )

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in ( [Numbers 3:8](#), [Numbers 24](#), [Romans 1](#), [Acts 13:38](#) )?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ( [Genesis 15:13](#), [Acts 7:6](#) )
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau ( [Genesis 25:28](#), [Genesis 27:5](#), [Genesis 28:22](#), [Genesis 31:38](#), [Genesis 31:41](#) )
- Children and grandchildren: Benjamin, Joseph, Judah ( [Genesis 42:36](#), [Genesis 43:14](#) )

This word must make remainder necessary. Does He use people as Him?

| Word              | Actor        | Scripture Reference                                                                                                                               | Probability |

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?
- Ratio percentage versus (VS) quantity? At 3 for 97 GroupPrice.com
- In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness ( [Daniel 5:5](#), [Daniel 5:11](#), [Daniel 5:26](#), [Daniel 5:30-31](#), [Genesis 4:3](#), [Genesis 4:8](#), [Genesis 4:12-14](#) )
- Quantification ( [Daniel 6:5](#) )
- Original self ( [Daniel 5:12](#) )
- How we let Him know ( [1 Corinthians 5:7](#), [Acts 23:5](#) )?
- Learn to look...
- I want not a... user meaning there are...
- A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming ( [Genesis 2:19-20](#), [Genesis 2:23](#), [Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25-26](#) )

- Title
- Abstract
- Acknowledgments
- Index
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospect and Fulfillment
- Autobiography
- Style of Writing

- Reverence ( Genesis 4:26, Exodus 20:7, Deuteronomy 5:11 )
  - Interpret ( Genesis 37:9, Hebrews 11:23-30, Daniel 5 ) to each entirely its own.
- 2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.
- 2024-07-12T06:25:00 How much period... we have the same?
    - Tetis integrates programmable script and audio recording. MP3 is an industry standard.
    - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give descriptions?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side...the decider.

1. IBM PC compatible:

- At Central Piedmont Community College (CPOC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04)

How to verify the work of the spirit?

- Is it compatible with the Bible ( John 10:30, John 17:22, 1 John 5:8,)?
- Is this a link ( Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 5:3,)?

## Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire...to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect...out of the Bible ( Daniel 5:31,)?

- When is the Bible specific about time ( Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-51,)?

How admissible is the word ( Genesis 41, Daniel 2,)?

GetPage.html depends on the word.

What did I fit into a place?

- Ark of the Covenant
- Temple
- Jerusalem
- Judah
- Israel

What did He see Himself as?

- Joseph ( Genesis 37:9, )
- Moses ( Acts 7:25, )

Robert Law Joss

- 2024-06-05T04:49:00 Technically...reliable? Maturity...saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we desire as our own...what do we reserve as others?

- 2024-06-05T04:49:00 Are we doing...the part of God? 2024-06-05T04:49:00 What was I working for? 2024-09-16 Bob Joss said North Atlantic Treaty Organization (NATO). 2024-06-05T05:07:00 Hmm. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can: Try again later Check your network connection Check that Firefox has permission to access the web (you might be connected but behind a firewall) 2024-06-05T05:25:00 2015-10-23DocronDisertation.pdf 27 pages. Is America a godly nation? Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering>git push fatal: unable to access 'https://github.com/KenAdenji/WordEngineering/': Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The\_Network\_Is\_the\_Computer 2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 Faces. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55.053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What offering I have for people?

| Speak face-to-face | Dream or vision | Commentary | Scripture Reference |
|--------------------|-----------------|------------|---------------------|
| Moses              | Other prophets  | Leader     | Numbers 12:6-8      |
| Jesus Christ       | Other teachers  | Authority  | Matthew 7:29        |

What does He involve?

| Word                   | Actor | Scripture Reference                           |
|------------------------|-------|-----------------------------------------------|
| Holy Spirit and people | Adam  | Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26 |
| After Mine own heart   | David | 1 Samuel 13:14, Acts 13:22, 1 Samuel 25:1     |

Effect of the Progress ( Luke 1:1-4, Daniel 9:22-23,)?

- ...many ( Genesis 1:16, Genesis 1:26-2-4, Daniel 9:2, )
- More at the same ( John 15, )

When did Israel...seek no region...as its own ( Acts 1:6,)?

- The prophets
- New Testament
  - The Gospels: King of the Jews, the disciples
  - Pauline Epistles, General Epistles
  - Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of vision? I have stored using people as myself.

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. How is your task...duplicable?

2024-11-20T05:38:00 Ordering

- 2024-11-20T07:59:00 Do I make a separation between physical and spiritual?
- Forerunner: Jesus and John the Baptist ( Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13, )
- Levitical priesthood ( Hebrews 7:1-1, 1 Samuel 3, Numbers 3, )
- Sitting on a high place: Humble... exalt ( Luke 14:7-11, )
- Baptism: Washing of feet ( John 13, )
- Marriage: 'younger before the firstborn'? ( Genesis 29-26, )

What will count...forever?

| Word                                        | Scripture Reference                                                                                                                                                                                                                                                                                                                                                                                                       |

| Messianic Covenant                          | Jeremiah 31:31-33                                                                                                                                                                                                                                                                                                                                                                                                         |
| Divided according to the children of Israel | Deuteronomy 32:8                                                                                                                                                                                                                                                                                                                                                                                                          |

What I use people for ( Job 35:6-8,)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful ( Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2, ).

- The SQL is being built dynamically with the Bible version and the query condition clause customizable.
- The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.

God said. What are the other activities of God? The spirit of God moved. He saw it was good ( Genesis 1, ) When one finds good? That is the meaning ( Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26, ) We demonstrate...how we are. It is not misleading...That is the deception ( Revelation 12:18, ) Associate as ( Matthew 16:18,)?

What is the supplement?

| Word                 | Commentary                                            | Scripture Reference                                |
|----------------------|-------------------------------------------------------|----------------------------------------------------|
| Greatest Commandment | Love the LORD thy God. Love thy neighbor as thy self. | Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31 |

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.

Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Hagar say? Her only speaking with the one that sees?

What specially like Him?

| Event      | Feature                | Scripture Reference                                  |
|------------|------------------------|------------------------------------------------------|
| Creation   | Image of our ancestors | Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38 |
| Redemption | Image of the Son       | 1 John 3:2                                           |

| Do you know mine? ( Deuteronomy 18:15 ) |                        |                                                      |
|-----------------------------------------|------------------------|------------------------------------------------------|
| God                                     | Actor                  |                                                      |

| Place of Origin                         | Egypt ( Exodus 2:19 )  | Bethlehem ( Matthew 2:1-18, Luke 2:1-20, John 7:42 ) |

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:12:00 Place, troupe, ... man opening, 2025-04-1804:06:00 ( Genesis 48:4 )?

2025-04-17706:16:00 Do we choose ... a realization of him?

• 2024-07-09T18:30:00 He has always out it in context of time.

• 2024-09-15T13:39:00 How our past ... a new design as testing?

• 2022-08-08T19:00:00 Discusses the Devil?

• 2024-07-23T09:22:00 To be an African's Nation.

• 2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.

• 2023-10-08T11:08:00 To work as a part of Me?

• 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

1. Associated culture ( Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5 )

What I am rendering? To what particular use is me ( Matthew 16:18 )?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony ( Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45 )?

What is the reward of the past?

From that day ( 1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53 )...

1. Salvation ( Exodus 14:13 )

2. Commit ( Luke 22:46, Psalms 31:5 )

What personifies the time?

1. First and Last Adam ( 1 Corinthians 15:45 )

2. Firstborn ( Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23 )

What does authoring the word do? To shed as much light as our opening ( Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11 ).

Why consider cannot be our gap? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love, I will won, including love the own father.
- What I do see able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. ( 1 Timothy 6:17 ).

| Word  | Commentary                                                                    | Scripture Reference |
|-------|-------------------------------------------------------------------------------|---------------------|
| Actor | The law and the prophets: Can I prepare man for an event of time?             | Amos 3:7            |
| Event | When does man decide His future is as reminded? Connecting the past as I use. | Genesis 1, John 1   |

To Reckon as Size

- Light ( Genesis 1:16, )
- Sabbath ( Genesis 2:2-3, )
- Autonomy ( Genesis 4:8, )

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. *What exactly I know, as necessary of me? How numerous we are made.*
- *You do remember based on the data, do you need to collect the data, if you don't do remember?*
- *What does the want as a set?* O pe. In Yoruba?
  - Complete
  - Late
  - Call
  - Thanksgiving
- Where am I, as a human being?
- *The life of appointing something as myself.*

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword *Noun*,
- *Letters in the English language?*
- *The work? is to associate the reference.*
- *How could I collaborate fact with what I know?*

What did He see Himself as?

There is more to you, than you are. (Ephesians 3:18)

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific
- To acknowledge, where I am present. I had left West
- God did not initially identify Himself, with a particular

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions (John Whalen).

| As the Open? |                                     |                                                        |

| Adam         | The first man will need a companion | <a href="#"><u>Genesis 1:26-31, Genesis 2:6-25</u></a> |
| Jesus Christ | Transformation of the spirit        | <a href="#"><u>John 3</u></a>                          |

- **Quality Assurance**
  - To achieve performance beneficiary, the author uses AJAX, a single JavaScript and CSS file, and minify images.
  - The author's work is largely based on the SQL\*SELECT statement, a naturalized declarative language, which the author uses to query God's word.
  - The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
  - The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
  - The SQL COUNT(), AVG() and SUM() Functions are row-based.
  - Code Analysis: [JSling](#), [ExoGo](#)
  - Questionnaire: [RatingBank](#) [Feedback](#)

On 2019-04-04T09:00:00 [andre.nguyen@gogm.com](#) will telephone me about the role with Google's co-founder Larry Page [jobs.larry@cs.drbhawaii.aero/701c6f28-2d84-4727-a345-d4a936ddc277?sourceid=3b8e0b44-7127-4709-ad21-6ebba57f403](#) Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 [you have tried to suggest something, what God has given you.](#) 2026-01-07T11:24:00 [the conclusion is that, as a, I was reading the Bible... He was giving me a word.](#) When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. How relevant is Your word to our opinion? This projection may result in entries of new records in the Remember and APass tables. Where are people, his relation?

However, time is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-17T18:20:00 34324 Siward Drive, Fremont, California (CA) 94555

How do we develop... our next time / Genesis 37:19-20 Daniel 6:5-7

The author separates the word of God from the supporting information:

- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another

- Search Engine? Requires Internet access.
- [ScriptureReference.html](#) Requires Bible knowledge and place in the Bible
- [BibleWord.html](#) Requires word knowledge

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ( [Matthew 10:19-20](#) ).
- Where am I, resemblance of how I am made ( [1 Corinthians 14](#) )?

- What does He choose as example?
  - God rested on the Sabbath day ( Luke 23:56 )
  - Jesus Christ ( Daniel 9:24-27, 1 Corinthians 15:45, 1 Corinthians 15:47 )
  - Man such as King David ( 2 Kings 14:3, 2 Kings 16:2, 2 Chronicles 28:1, Amos 6:5 )
  - Place such as Sodom ( Matthew 10:15, Matthew 11:23-24, Mark 6:11, Luke 10:12, Luke 17:29, Romans 9:29, 2 Peter 2:6, Jude 1:7, Revelation 11:8 )
  - Other living things ( Numbers 22:31-33 )

In every scenario, we participate in, our last outcome should be holy ( 2 Samuel 12:14 ). Future study, may consider the actors in the Bible, and award their holiness in each scenario

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ( [Isaiah 23:15](#), [Isaiah 23:17](#), [Jeremiah 25:11](#), [Jeremiah 25:12](#), [Jeremiah 29:10](#), [Daniel 9:2](#), [Zechariah 7:5](#) ). Listed below are some of the repeated reinforcements.

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazarite son ( [Judges 13:2-5](#) ). The same angel appears to Manoah and his wife ( [Judges 13:6-25](#) ). The angel reinforces the their responsibility and defers reverence to God.

Foretelling the birth of John the Baptist ( Luke 1:5-25, Malachi 4:5 ). Transitioning the present to the after ( Luke 1:17 ).  
Foretelling the birth of Jesus Christ ( Luke 1:26-38 ). Continuing the Davidic line ( Luke 1:32-33, 2 Samuel 7:12-13, 2 Samuel 7:16 ).

Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining ( Luke 5:4-11, John 21:3-6, Matthew 17:24-27, Acts 10:9-16 ). What I bring to Him; is me alone, to value Him

The first occurrence of the word, full, in the Bible, occurs in ( [Genesis 14:10](#) ); and is in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days ( [Genesis 25:8](#), [Genesis 35:29](#) ); The last occurrence of the word, full, in the Bible, occurs in ( [Revelation 21:9](#) ). Living a presence ( [Jeremiah 28:11](#) ). To creating a future full of all. To creating a future free of all.

Our LORD's prayer is a communal prayer; directed to the one God ([Matthew 6:9-13](#), [Luke 11:2-4](#)). Please note that it is Jesus; teaching this prayer; so He doesn't refer to Himself or the Holy Spirit explicitly; as in another passage, when He mentions Himself as the bread ([John 6:31-35](#)). He explains the truth; that we may fall short of it, by explicitly referring to the Father. He is alluding to the events in the apocalyptic books, Daniel and Revelation. We are on earth, and we have an earthly father; where we are, is not where, we wish and will to reside ([Matthew 5:9](#), [Luke 11:2](#), [Daniel 2](#), [Revelation 5](#)). When no matter, where I go; this is how, I am found ([John 20:17](#)).

The word, true, occurs in seventy-seven verses in the Scripture Bible, and there are eighty-one occurrences. True, first occurs in Joseph's interaction with his brothers ( Genesis 42:11, Genesis 42:19, Genesis 42:31, Genesis 42:33, Genesis 42:34 ); Jacob had included with Rebecca, his mother, to get Isaac, his father's, blessing; God shows that Joseph will have elevation over his parents and siblings. There are ten occurrences of the word, true, in the book of ( Revelation ); in response, to God.

How the Bible compares the gender?

After the Fall of Man, Adam's labor will be thorough; and there is enmity between the serpent and Eve, and each other's seed; and Eve will have pain, during child-birth.

God created an adult male, Adam; and his female counterpart, Eve ( [Deuteronomy 2:14](#), [John 5:5](#) ). There is no mention of Adam's activity, after the fall of man; as Eve bares and name their children; Adam's earlier effort, which was to cater for the Garden of Eden and name the animals.

At times, there is proclamation of a mantle, before livelihood; as in the case of Ishmael, Isaac, Jacob, Samson, John the Baptist, and Jesus Christ. In each example, there is a relationship between God and a parent; and God is directing, the offspring's onus. We want similar to Christ; is to see yourself, among fold.

SQL Server Execution Plan

(Grant Fritchey).

[SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis 22, Daniel 9:24-27, John 1:1, Jude](#)

[ScriptureReference.sql](#) [ScriptureReference.sql.htm](#) [ScriptureReference.sql.htm](#)

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK\_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the IDX\_Scripture\_VerseIDSequence, since the where clause is on the VerseIDSequence column. The IDX\_Scripture\_VerseIDSequence indexes on the VerseIDSequence column; it is not a covering index, since the Select column-list includes the BookID, ChapterID, VerseID; therefore, the PK\_Scripture is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

The Definitive Guide to SQL Server Performance

(Don Jones).

Autobiography

2024-12-25T19:12:00 Bimpe Bakarar Lawal returned my telephone call. Bimpe Bakarar Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
  1. An African American female senior, Gayle.
  2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
  3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
    - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 What estrange... of the people?
    - I planned to build a traffic light for my project.
    - In a multicultural church where I was part of the congregation, Bernie Alspaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
- 1. 2024-12-25T19:12:00 When I had the option... I have acclimatized.
- 2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

- They had varying mother... but one father ( Genesis 32:28. )
- 2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
- 2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble who?
- 1. Post 9-year-old re-location from Ile-Ife to Lagos
- 2. Patriach, brother Yemo
- 3. Captain of the Nigerian national hockey team
- 3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
- 4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
- 2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
  - Where did he serve... a people?
  - Where did I... remove myself from the rest? ( Genesis 31:41 )?
  - What sort... are new?
  - Spending time... to really?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
  1. In the year 2024, the author will turn 57 years old.
  2. In the year 2024, Faith An Yao will turn 18 years old.
  3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Muñoz? Oral communication and speech. Where will I find the same... as me? I was setting training on how-to... place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In-spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
  - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 x 14 inches)
  - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
  - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has he made? ( Genesis 32:28 - Genesis 5:3 - Genesis 4:17 )? What word reminds? ( Mark 11:23 )?

Style of Writing

What has prompted your interest in the topic?

- The driving forces of arriving at the author's work are:
  - During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
  - The author was receptive and felt most at home during worship.
- (Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent...where is it needed?
