WordEngineering

Ken Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence](#) ([2 Corinthians 10:9-18](#)). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.cs](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- Follow God as a character.
- To track dates and words? And find meaning correlation.

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Missler of [Koinonia House](#) (KHouse) is worthy of note, faith ([Hebrews 11](#)).

The author is indebted to [Iry Schechow](#), his Master's degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object-Oriented Technology instructor, both also at UTS. The author makes mention of his colleagues at UTS; Decier Mendez, Cesar Orlando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

Theory

2004-11-10 www.JesusInTheLamb.com		
Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename		The default, for example, is index.html
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND [ChapterID]<=(150)))
```

will set the range restriction.

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND [VerseID]<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInBasicEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
AccordingToManyHaveSpokenID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWord.html](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Linq to context](#) assertions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (V5) single t. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture Table's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
    cast(BookID as varchar(6))
    + '-'
    + cast(ChapterID as varchar(6))
)
FROM Bible..Scripture
```

Another SQL statement

```
; with cte
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
FROM Bible..Scripture
)
```

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Bibliographies](#)
- [Background](#)
- [Prophecy and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

```
select cnt = count(*)
from   cte

The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
```

is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('0'+CONVERT([varchar](2),[BookID]),(8)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(8)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(8)),(3))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SoC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Miller](#), who noted that the first occurrence of the word, [logos](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower word load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table's table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, KAA, is Karkaa, meaning [floor](#) ([Joshua 15:3](#)):

2026-03-30T11:30:00 I will assist if life doesn't share us apart -- spread us apart. ([Genesis 1:16](#)) [Hekai](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

```
SELECT COUNT(BibleWord) FROM Bible..Exact
```

is for determining the word count. The SQL statement

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
```

is 789631; this is the count of the words in the KJV Bible.

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember APass](#), [ActToGod](#).

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is [heins interpreted](#). ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 4:36](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedence mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [http://translate.google.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:26](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

1. 2015-11-02T22:55:00 [And the mercer is the money converter](#).
2. 2015-11-03T02:17:00 [The specifics, a language](#).

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column [and loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3,5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1,2,4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the [\(UTC-08:00\) Pacific Time \(US & Canada's time zone\)](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The HisWord_view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Misgar Hedhrachi method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. " The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Kononia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [salvadia.org](#) by Jimmy Weles.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ([Luke 4:18](#)).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts
Principle 2: Check Assumptions

- This whole thing started with keeping [a work reference](#).
- Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
- The author depends on a typing assistant.

Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:

- Data loss or corruption because of issuing the database modification command and lack of timely archiving
- Hardware, software, or network failure
- [Vendor withdrawal of support](#)

Microsoft:

- Introduced .NET core and Model-view-controller (MVC).
- Inability to restore deprecated Microsoft SQL Server backup versions.
- Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
Principle 6: Define Time Horizon
[What period has God used?](#)

- 1988, military census age: I Am taking you on a Journey.
- 1997, priesthood age: I have brought something against you, but I Am with you.
- 2007, generation timespan: This masturbation will bring water.

Principle 7: Generate Multiple Solution Options
[How variable am I...at attending others? I have to relay my perception to technology providers.](#)
Principle 8: Design Around Constraints
[Relational databases offer the ability to set constraints.](#)

- Data type
- Nullable
- Primary key and unique index
- Foreign key

Principle 9: Weigh the Pros and Cons

- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BitMapWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 - 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 - 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author; the WordEngineering database size, is currently 33351360 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1050.2
sp_spaceused	The WordEngineering database currently uses 32569.69 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 121880.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. Most select equates to Bible ..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, >, <, <=, >=, !=, <>, >= !=>	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. In most cases, rarely is this in use ..!= or/and !=>. This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Outcrops for a date or number will search for particular types.
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later link to capped rows .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction "%%"
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, >=, <=, >=, <=
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.

- Title
- Abstract
- Acknowledgments
- Index
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prosechy and Fulfillment
- Autobiography
- State of Writing

- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrst
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose datatype limits.

(Itzik Ben-Gan, 2013-07-03).

GitHub

The Author Uses the Git Code Repository

Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenij	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenij/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenij/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects. Each web page mainly contains 2025-11-29T08:56:00 the minimalist page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432>, which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432>, is does 2 types of date calculations. These are the:
 - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DatedFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordCoast/DonFeedAtBible.html> 2023-02-17...2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests- <https://github.com/KenAdenij/WordEngineering/blob/main/11S/WordEngineering/WordUnion/9432> is

```
fetchRender: async function
(
    fetchUri,
    fetchRequest,
    callback,
    uIdDisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUri,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uIdDisplay, rowColumn);
        })
        .catch (e) {
            uIdDisplay.innerHTML += e;
        }
    }
}
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages

Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asea Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.aspx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use ~~CSS sprites~~ since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Detach](#)

- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prose and Fulfillment
- Bibliography
- Series of Writing

4. SQL Server Data Definition Language (DDL)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys. (Joseph Seck, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eclairmech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4106610/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML outweighs the newness of the JSON transport medium.
- HTTP Status Codes: jQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputfirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var asciiA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index < lengthSize;
    ++index
)
{
    if (IsAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - asciiA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete. The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.aspx	Query(word)
AlphabetSequence.cs	ID(word)
	ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a postback, and the query string has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookahead scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right .NET Framework Data Providers. The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word)	50
	ScriptureReference(int alphabetSequenceIndex).	10
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators.

In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

1. Codebase: The WordEngineering application is storable in the [Github.com](https://github.com) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in Github.com are:
 1. git status
 2. git add
 3. git commit

4. git push
2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
3. Config: The web.config file contains the database connection strings, web services user specific credentials. The system administrator at external locations may customize this information for their specific use.
4. Backing services: These are external independent resources, such as the database, SMTP.
5. Build, release, run: These are the stages that a code goes through. Code compilation is deferential for scripting, as opposed to compilable languages. Even since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables.
7. The SQL Server encompasses services which are stoppable to the data files backup.
8. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
9. Concurrency: The author isolates his applications from the particulars of the base scaling concurrency choice.
10. Disposability: The author's take on expendable work includes the following:
- Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
10. Development/production pattern: By first finalizing non repetitive work, the author can now focus on specialization activities.
- The time gap: These include placing the common work in a central environment. Superceding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: Dev/ops experts
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend, therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
11. Log: The log, which is viewable in the Event Viewer. The author displays error messages to the user; the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

Deep Learning

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier bible versions serve as a resource for the later versions of the bible.

	• With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

[A voice of us: is a kind of us?](#) GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript. HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration. Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML. There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kelleher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kelleher).

Bias? Being the other?

(Adam Kelleher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1...H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. When did He promise operational growth (Psalms 22:30 , Genesis 3:15 , Genesis 12:7 , Genesis 13:15 , Genesis 15:13 , Genesis 15:18 , Genesis 17:8 , Genesis 24:7 , Genesis 26:3-4 , Isaiah 53:10)?
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

(Bruce Clay).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you.

This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce; in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively.

2024-01-06T05:43:00 [What does God choose as subject](#) ([John 15:15](#))?

The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: [My Condemn](#) The first word is the BookID; the second word is the VerseID.
- 3-Words: [Who is your manager?](#) [Crazy mister Martin](#), [Mister Martin as a good](#). The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

Biblical generation - 40 Biblical years

1. 2007...2008 Common Era - the author is 40 years old; the author mentions time.
2. 2021...2024 Common Era - the biological mother of the author is 80 years old; the word recorded by the author is time relevance specific.
3. Actor... role commencement date?
 - 2026-01-15T04:49:00 [You look at life... and you feel doom](#). A politician who is probably Bola Tinubu, said how he became a politician.
 - 2026-01-16T07:51:00 A person was making fun of Diembae Mutombo on his draft day. Diembae Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.
- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

2026-03-14T02:28:00 WordEngineering in Islam, Moslem

1. AlphabetSequence is the title of the algorithm which calculates chapters and verses placed forward and backward in the Bible. 2026-03-14T02:28:00 An Alfa is an Islam Moslem teacher.
2. 2004-07-16 Self, 1 in 1000, African descent United States of America (USA) abstain as mercenaries to Germany. Leviticus. And at that time, you rejoice, that the LORD, did have a heart. Father's land. Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000.
3. 2020-03-13 20:20:55.690 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, kinsman redeemer. He would come out after a side event. He risked financial loss, travel distance. A person died. I heard, air drop. I later heard Cain.
3. 2026-03-14T02:28:00 In a form, 1 of the query options was the writing direction, and another data entry term was robotics.

2025-12-07T20:58:00 Is AlphabetSequence prophetic?

1. Will the word and commentary match the AlphabetSequenceIndexScriptureReference?
2. Will the date match historical events?
3. 2026-01-08T13:56:00 [You are unique... the Bible... is it supportive?](#)
4. 2026-01-20T04:00:00 [Words create for activity](#).

2026-04-08T20:13:00

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about... a re-use?

The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webserve: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example:

```
SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word NOT LIKE '[a-g]%'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word LIKE '[a-g]%'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOfTotal
FROM WordEngineering..HisWord
```

InfoType	CountInfo	PercentageOfTotal
Alpha	111598	93.748811889146
Numeric	851	9.71487974713
NULL	6690	5.544388263539
Total	119841	100

• data-ssn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language ([Acts 22:2](#)).
- 1. Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
- 2. In the WordEngineering database, TheComingAdventOfTime table, contains learned spoken language translations.
- 3. In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.
- In the WordEngineering database, HisWord table, there is a location column, physical; and there is a scene column, dream.
- In the WordEngineering database, HisWord table, there is a PseudoCode column, my profession.
- When?
- 1. 2025-03-01T07:13:00 Microsoft Word and past-tense. Mark Boelens of Electronic Data Systems (EDS) and the verb, will, future reference.
- 2. 2025-03-01T07:11:00 Online transaction processing (OLTP)... Online analysis processing (OLAP).
- 3. How does the computer equip us? 2025-03-01T07:06:00 Improve on paper, the old writing medium?
- There is a datetime attribute which is only viewable inside the HTML source. Metadata? 2025-03-01T07:24:00 *Microsoft made the assumption... to automate mark-up?*

2025-01-31T08:51:00 What title... we are befriending?

1. My first joke was about a screwdriver that I shared with my adopted father, which he classified as an old joke.
2. My first writing, a romantic love poem, was dedicated to Liza Muñoz of Central Piedmont Community College (CPC). My English speech oral communication classmate.
3. The first independent self-inspired software written by the author is Kowc.c for the Yonba language.
4. My first domain name was commonepeople.org
5. The first website I published and contributed to was Christianity.com
6. I am known for the AlphabetSequence algorithm
7. The first book I wrote is titled Ocean Senior
8. The url of the author is www.JesusInTheLamb.com

2024-07-12T09:12:00 Santorini, Greece t-shirt. The two elderly females are probably Asian and Caucasian. They were standing at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and they walked towards the south-east.

2024-07-12T09:12:00 Sort order? 2024-07-12T10:43:00 Is a url sortable in this order?

- Publication date: When was it written? The book of Job is regarded as the 1st written book in the Bible.
- Bible arrangement: The Bible starts with the 5 books of Moses, Pentateuch. The Bible concludes with the apocalyptic book of Revelation. The major prophets group finishes with the book of Daniel.
- Genealogy: The birth order. Our ancestors and offspring.
- Prophecy and fulfillment
- Bible word, synonym and opposite
- Traditional versus (VS) modern
- Speaker and audience
- Expiry date, for example, the Davidic Covenant transitioned to the Messianic Covenant.
- Author and book group
- Citation
- Geo-Location
- Holiness

2024-07-12T18:53:00 Robert Rouse, Minister of Data, viz.bible.

2024-07-12T19:03:00 How is it supporting?

2024-07-12T19:09:00 The author has queried the Bible versions and dictionaries but not the various commentaries which have non-standard scripture reference and opinions.

2024-07-12T21:22:00 Making a collection... making a correction.

What is best believable (Deuteronomy 13:3)?

I am not asking You to take my word as Yours. I am asking You to change my word as ours. (Numbers 3:12 Numbers 3:41 Numbers 3:45 Numbers 3:46 Numbers 8:18 Acts 10:9-16

Romans 2:25-29 Colossians 2:11, 1 Corinthians 7:19 Galatians 6:12-13)?

- In the HisWord table, the order of belief is:
 1. Scenery
 2. Commentary
 3. Word
 4. System generated: DateTime and identity columns
 5. Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
Author's experience	The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.	The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. ConversionTableTemperatureMachineLearning.pyx	The traditional architecture is client/server.
Software requirement	1. Microsoft SQL Server 2. SQL Server Management Studio 3. Author's HisWord database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include: • Views • User defined functions (UDF) • Stored procedures 4. Application code layer: • .asmx • Business and database access code 5. User-interface (UI) layer: 1. Browsers 2. .html, .js, and .css files	1. Python 2. Machine learning library for example Scikit-learn 3. Generate training data ConversionTableTemperatureCommaSeparatedValueCSVs 4. Training data which is storable in a .csv file. ConversionTableTemperature.csv 5. Predictive data analysis ConversionTableTemperatureMachineLearning.pyx	• How proprietary is the architecture? • What is the portability of the code? • Shift away... from server to client. • The world has moved away from packaged software to distributed software. • Offer only one functionality.

Progress	Commentary
Data entry	Word processing awards grades based on grammatical correctness. There must be uniformity in the language, spelling, and punctuation. 1. At Information Dialling Services (IDS) we commenced capturing telephone numbers, and movie text-to-audio. 2. At Wilson Market Research, we used consumer statistics and the viewing audience to target advertisements. • 2026-03-21T10:48:00 What do I capture...in hope of realism? • 2026-03-21T11:59:00 What did he want to know as you...and how did you represent it? • 2026-03-21T14:40:00 What you do query? Chronology...relativity. Data type? Number, date time, string, boolean, image, voice, video. 34300 Seward Drive, Fremont CA 94555. I was at the intersection of Paseo Padre Parkway and Seward Drive, north-east, and I was turning eastward. Between 34316 Seward Drive, the house of the Santos family... 34320 Seward Drive, the house of the Sahani family, was an orange pumpkin, and my right palm and fingers, stretched eastward between a black painting and a blond vertical stalk.

2026-03-20T13:32:00 What alternate team... did He built... and why?

1. Unity (1 Samuel 25:7)
2. Sequential ([Psalm 110:1](#), [Matthew 22:41-46](#), [Mark 12:35-37](#), [Luke 20:41-44](#), [Acts 2:34](#))
3. Exemption ([Psalms 16:10](#))

Layman	Know their God
When I first started, when I received a word, I would try to use my limited knowledge of the Bible...to draw use-cases.	Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.
I used to rely on my education and experience.	Now I draw on expert opinion? 2025-12-04T22:00:00 <u>Expert facts</u> , 2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. <u>What creates for the other?</u>

2025-07-31T13:25:00 What does the link provide?

- | | | | |
|--|-----|---------------------|---|
| | 1. | 2025-07-31T15:12:00 | The anchor tag provides a hyperlink resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location. |
| | 2. | 2025-07-31T15:33:00 | The img tag displays an image that is identified by its source, src, attribute. Consider displaying statistics on the image count types, alternate, alt, attributes, and locations. |
| | 3. | 2025-07-31T15:42:00 | The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus VJS availability? Static versus VJS dynamic? |
| | 4. | 2025-07-31T16:05:00 | The script tag embeds one HTML document within another. |
| | 5. | 2025-07-31T16:12:00 | The frame tag is referencing JavaScript. Count the various variable definition types: var, const, let. Count the source code lines and the estimated source size. Count the methods and their arguments. Compare inline, internal, external, and embedded? |
| | 6. | 2025-07-31T16:22:00 | The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)? |
| | 7. | 2025-07-31T16:35:00 | Count the various HTML types occurrences, and parents and children. For example, tables; head, body, foot, rows and columns, and lists. |
| | 8. | 2025-12-05T06:50:00 | Scene 1 : I told the family of Kim-Chin Chan that I was re-located to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some meals and I were walking to the south of Break Year Park, north-center-west, United Square, Union City, and they claimed that Rupert Murdoch loved drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes from Boudle Beach. Scene 3: I went to see the movie "The Untouchables". |
| | 9. | 2025-12-05T17:20:00 | What did he turn to... as usages / ?
Chronicles 16.1-3? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA), 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street. |
| | 10. | 2025-12-06T15:26:00 | What does He associate ...with me - how could it be the guide? |

2025-11-23T00:28:00 What have you... used... the Bible for (John 20:31, Acts 17:11, John 5:39, Joshua 1:8, Daniel 9:2):

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Spend each online electronically, according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text – reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion ([Acts 17:11](#)).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?
8. Compare times? For example, during the time the Bible was written, Jews worshipped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost

2025-10-11T03:24:00 Absent... of the same

A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 Can we determine... to be usage?

urlPerformance

1. webpagetest.org In the head element, the Cascading Style Sheets (CSS) were the only initial blocker to page requests, and there were no synchronous scripts. In the footer element, the document was last modified and copyright elements were the only client-side generations.

(Steve Souders, 2016-02-10)

Microsoft SQL Server limitations include:

- Microsoft SQL Server database connection string: ApplicationIntent=ReadOnly

- On the referencing side, it can only relate to a single relationship.
- Varchar columns have maximum sizes.
- Vbinary columns can be large.
- Leading zero Zero five eight four one. versus (VS) 5841

2025-07-30T10:22:00 Schema changes

- 2025-07-30T10:22:00 Schema changes a table

2025-07-14T15:13:00.10 Best Influences on Software Engineering

1. Reviews and Inspections: 2025-07-14T15:34:00 Can be merged as an object?
- 2007-08-04 FeCo is a free static code analysis tool from Microsoft that checks .NET managed code assemblies for conformance to Microsoft's .NET Framework Design Guidelines. 2025-07-14T16:50:00 To what extent do I know the culture of others?
 - !Mini-The JavaScript Code Quality and Coverage Tool
 - 2018-01-05 W3C Markup Validation Service
2. Information Hiding: 2025-07-17T20:46:00 Addressing 2025-07-18T15:33:00
- During his Master's degree programme at the University of Technology, Sydney (UTS), the author learned about the 3 tenets of object-orientation (OO). These are namely encapsulation, inheritance, and polymorphism.
 - 2025-07-18T19:45:00 While working on a project for Information Systems (IDS). 2025-07-18T19:47:00 Under the auspices of Ralph Silverman. 2025-07-18T19:49:00 The application client suffered from information overload.
 - 2025-07-18T19:50:00 0055 telephony callers were being recorded... In a data entry application. 2025-07-18T19:53:00 Client/Server and the Internet have this myopic view of data. 2025-07-18T20:03:00 The infrastructure was a client/Server with PowerSoft/Power as the client, and Watcom SQL Anywhere as the relational database. 2025-07-18T20:06:00 How much information were we bringing to the client? 2025-07-18T20:08:00 We need to build a data entry application? Specialized, customized? 2025-07-18T20:10:00 Is it a listner that speaks? 2025-07-18T20:12:00 Kawa is a writing tool... where is the speaker?
 - During his Doctorate's degree programme at the University of Wollongong, the author learned to program smart cards by using the C programming language.
 - 2025-07-18T20:50:00 The choice of AlphabetSequence... relies on alphabet places in a language... 2025-07-18T20:55:00 sacred scripture and sacred data management.
 - 2025-07-18T21:03:00 Methods: Separation into client presentation, application, and server data management.
1. Client presentation: A Web browser parses and displays an HTML document. A JavaScript fetch statement calls a method in a web service....asmx file, and sends a stringified JSON request. A JavaScript method parses and displays the JSON (JavaScript Object Notation) response.
 2. Application: A dynamic link library InformationTransit.dll queries the database.
 3. Server data management.

(Steve McConnell, January/February 2000).

2025-06-29T04:18:00 Use Case Interpret Word

Software Engineering: A Modern Approach by Marco Tullio Valente, Use-cases

2025-06-29T04:26:00 Actor: User

2025-06-29T04:27:00 Main Flow:

1. - The user enters the word to interpret
2. - The system determines by using regular expressions the data type of the word
3. - The system determines the AlphabetSequence of the word, which include the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference
4. - The system informs the user the corresponding sacred text

2025-06-29T04:51:00 Extensions:

- 3a- If the word is a positive integer, the system should set the value of the AlphabetSequenceIndex to the word, and determine the AlphabetSequenceIndexScriptureReference, and complete processing
- 3b- If the word is a negative integer, the system should inform the user to enter a valid word
- 3c- 2025-06-28T22:10:00 If non-English alphabets flag?
- 4a- If the word(s) count is either 2 or 3 words, determine the associated sacred text

2025-08-28T06:58:00 Use Case WordEngineering

2025-08-28T06:59:00 Actor: User

2025-08-28T07:00:00 Main Flow:

1. - The user records the word into the HisWord table by using the Microsoft SQL Server Management Studio
2. - The system generates the HisWordID column, sequentially, by adding, and incrementing by 1, the previous, last, HisWordID column
3. - The system sets the Dated column to the current system time. The Dated column the user may adjust, backdate, if it is late
4. - The user records the unbiased supporting columns, such as the Commentary, Contact, url, and Location. The commentary is the activity in the user's own words. Both the contact and url are 2025-08-28T16:51:16 single-valued attributes. The contact is the system allocated identifier. When there are multiple contacts, their names are determinable from the record as a whole
5. - The user 2025-08-28T07:35:00 traces historical data

2025-08-28T07:33:00 Extensions:

5a- The user determines the date differences between the corresponding words and events

2025-09-02T20:24:00 To replicate God's Word?

1. WordEngineering started with the author receiving an idea, and the author documenting similar scenarios in the Bible
2. Now, when the author hears a word, or the author dreams... 2025-09-02T20:33:00 he relies on his pursuance of the truth

2025-06-27T20:10:00Minimum Viable Product (MVP) and A/B testing (or split testing)

Interest of the users									
ASP.Net Web Forms - control version	HTML5 Asynchronous JavaScript XMLHttpRequest (AJAX) - treatment version								
Prototype	Minimum Viable Product (MVP) build-measure-learn								
	<table><tr><th>Step</th><th>Task</th></tr><tr><td>1</td><td>Build: The author conceived of a product idea to interpret his dream by building AlphabetSequence.</td></tr><tr><td>2</td><td>Measure: Public testing to collect data on its usage.</td></tr><tr><td>3</td><td>Learn: Validated learning by analyzing the collected data.</td></tr></table>	Step	Task	1	Build: The author conceived of a product idea to interpret his dream by building AlphabetSequence.	2	Measure: Public testing to collect data on its usage.	3	Learn: Validated learning by analyzing the collected data.

(Marco Tullio Valente).

2025-05-17T20:07:00 Functional Programming... Computed Columns

1. 2025-05-17T20:16:00 Pure Function, referentially transparent:
 - In 2002, while programming AlphabetSequence the author made the assumption that the English and Yoruba 2025-05-17T20:32:00 are the same languages.
 - 2025-05-17T21:17:00 The author only considered the King James Version (KJV). Singularity of the Composition.
2. 2025-05-22T18:10:00 Immutability:
 1. 2025-05-22T18:16:00 Object-oriented technology serves change states.
 2. 2025-05-22T18:25:00 Inheritance, interface, method overloading, encapsulation, polymorphism, are all object-oriented principles.
 3. 2025-05-22T18:17:00 As is of the need for database storage.
 4. 2025-05-22T18:20:00 Variable declarations and initializations. Variables refreshing with default values, constants, statics, read-only.
3. 2025-05-22T18:31:00 Practical need for recursion?
4. 2025-05-31T04:44:00 First-class and higher-order functions. The author's investment in SQL-CLR and C#. 2025-05-31T05:07:00 What am I learning... as I progress? Azure SQL Database. What am I learning... as I make progress?

```
EXEC sp_configure 'allow updates', 0
RECONFIGURE

sp_configure 'show advanced options', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

sp_configure 'clr enabled', 1;
GO
RECONFIGURE WITH OVERRIDE;
GO

5. 2025-05-31T06:22:00 Lazy evaluation... is a scenario for LINO.
```

(Ben Weidig, 2023-05-09).

2025-05-15T20:10:00 How to be a SQL editor?

Instruction

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URL and HaveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should he be the custodian? Is the monitor... automatable?

lang attribute

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
- 1. In 2002, when I started recording the word of God, I modeled the WordEngineering database, HisWord table.
- 2. In 2007, when I was looking for work, I modeled the HaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13.)

- AlphaNumeric: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 1. Spelling corrections.
 2. Verb grammar tense.
 3. Synonym versus (vs) opposite.
 4. Singular versus (vs) plural.
 5. Deprecated.
 6. Currency.
 7. Locality, regional, custom, preference.
 8. Anglicized.
 9. Religion.
 10. Formal versus (VS) colloquial, pidgin, Written or spoken word usage and terminology.
 11. Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways...and when did he section ways?

Validation? Chronologically?

- 2025-01-23 11:23:11.163 Compare the identity column and date column order, and highlight when the date column is out of sequence?

- 2025-01-25T10:26:00 Mighty men of David? Arranged according to accomplishment? Men killed (2 Samuel 23);

2025-09-08T14:05:00 Before you can search... you must have a query... parameter.

2025-02-19T12:20:00 What I offer of the truth?

1. Command-line interface (CLI)?
2. No .NET Core support
3. 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
4. The author does not make use of Microsoft SQL Server synonym support
5. The author rarely uses Microsoft SQL Server soundex support
6. Only English, there is no multi-lingua support
7. Limited Bible versions, dictionaries and commentaries
8. Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
9. Microsoft SQL Server will support Regular Expression (RegEx)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00: Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00: Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, taborder.
- 2024-10-04T09:12:00: As much as possible, initially accept the default values with, for example, the date columns. You may adjust and be precise, later.
- 2024-10-04T09:44:00: Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY_INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T07:00:00: This is what I am unable to do with the graphical user interface (GUI). It will be inspired to do. 2024-10-05T07:49:00: The interface... remains as it is. 2024-10-05T07:52:00: I am equipped to doing the same... as I realize. 2024-10-05T07:54:00: This point... must elude to one. 2024-10-05T07:59:00: Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine pretends to do? 2024-10-05T08:31:00: God has done His part... where is my part?
- 2024-10-05T07:30:00: What do I need the other person to...?
- 2024-10-05T07:05:00: Need after 2024-10-05T07:10:00 (J.Kings 5.5-7) E. F. Codd in 1970, proposed the relational database.

2025-02-23T16:30:00 Company osi data... osi yemi.

2025-02-24T00:52:00 In the center-east is a wheel.

2025-02-24T06:35:00 Ending lane, Feminine.
2025-02-24T06:55:00 2 6

- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob.
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00...2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar.

2025-02-10T05:41:00 Until the land has its rest. I saw a house in the center-west

2025-02-10T06:22:10 In Isaac: shall your seed be called am on a narrow road in the north-center. This is either Bing's Duglump or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As we went to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing light green leggings and a black t-shirt. She was walking towards the parking area. As we walked back towards the south-west with the color of the United States of America (USA) flag, red, white, and blue, I saw a group of young females walking towards the south-west. They were wearing Asian females running from the center towards the south-west. They were cars moving and crossing the Paseo Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female running towards the south-west.

Work... holiness

The Exhaustive Concordance of the Bible, generally known as Strong's Concordance, is a Bible concordance, an index of every word in the King James Version, constructed under the

AlphabetSequence builds on Bible verse separation.

How representative am I of my people (Philippians 3:5)?

2026-03-10 16:36:54.680 You have to do your work.... like you are

2025-03-28T19:12:00 What we are receiving. (2 Samuel 12:24)?

- At University of Ife, Staff School, Stephen re-located, prior to my twin sibling and me re-locating to Lagos. Wumi Oloyede started driving us to school.
- In Lagos, Bentolulwa graduated from Abati Nursery and Primary School to Ikaja Grammar School, prior to my twin sibling and I attending Abati Nursery and Primary School.
- I lived with Romulo Lira prior to Romulo Lira graduating from Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC) and Romulo Lira returning to his home country, Venezuela.
- I was deported to Nigeria, shortly after the passing away of my adopted mother, and shortly before the separation of Major Lawal from Aunt Awilo.
- Bentolulwa and Ademilulwa, Uncle Demola and Damola. Who must be involved... for someone to use you. 0205-03-28T18:30:00 I consider father and son relationships. What we are... is how we are made after. I started tutoring computers to Benjuna Adeola, a French lecturer, and wife of Fola Adeola, prior to Guaranty Trust Bank commencement. The only separation between the English language and the Yoruba language is the diacritical alphabets.

(Mustafa Suleyman, Michael Bhaskar, 2023-09-05).

2025-09-14T09:24:00 Contemporary

- Creation (Genesis 1:1-6, Genesis 1:26-Genesis 2:4, Genesis 2:16-25, Genesis 3:15-16, Hebrews 11:4)
- Born King of the Jews (Matthew 2:2, Luke 1:19, Luke 1:43-44)
- End times (Revelation 5:5, Revelation 21:23, Revelation 22:2, Revelation 22:8-9)

2025-09-14T13:07:00 What exclusively I use? 2025-09-14T17:40:00 Naming versus (VS) Called? Referred

- When: Called — In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)
- Who: Naming — God, man (Genesis 1:1, Genesis 1:26, Genesis 5:2)

What true identity lies apart?

- The king
- How my organization is the best?

1. Alphabet places, wo

2. Arabic numbers systems
What measures, forever?

- BibleReference uses whole numbers for repr

Relational Model

1. The author progressed from authoring disparate HTML files to recording information in a relational database.
2. This transition offers an opportunity to analyze tables, columns and rows.
3. Functional dependencies of relationships between columns are determined.
4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

Views

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Software Engineer versus (VS) Database Administrator

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging, GitHub.com version control. E-mail body, attachment. Internet front-end files (.html, .js, .css).	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.

- Background
- Prospects and Fulfillment
- Autobiography
- Style of Writing

Keyword	Software Engineer	Database Administrator
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

[Itzik Ben-Gan, 2023-07-03].

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Codd's 12 rules

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View.

2024-06-15T21:28:00 **What is pertaining to the data?**

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, .txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 **To who... I exchange... my good?**

Rule 3: Systematic treatment of null values:

2024-06-18T21:49:00 **Unknown or inappropriate.**

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

2024-06-20T18:39:00 **It looks at the data as a whole.**

Structured Query Language (SQL) sublanguage		
Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fall in the following cases: • Primary key or unique index duplication. A primary key column may not be null. • Invalid datatype or extra large data size or out-of-range • Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in DatedFrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 **What part of yourself... do I desire as My future?**

Rule 9: Logical data independence:

2024-06-22T17:02:00 **The opinion of someone else... is beside me.**

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposeful: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did the diaspora of in making man / Genesis 2:7, Genesis 6:3?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wiegman, Arvind Krishna, 2023-11-07).

	Unused	1544 KB											
Velocity	The author does manual data entry.												
Variety	At the beginning, the author parsed XML files into textual relational tables.												

(Jack Hyman, March 2024).

Data Types

HisWord table

Qualitative (categorical) non-numerical/discriptive - nominal (non-ordered), ordinal (orderly) or

Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text

- | Data type | Column type |
|-------------------------|-------------|
| Discrete (countable) | Numerical |
| Continuous (measurable) | Date |

- Birth (Acts 7:20)
- Family (Acts 5:31)
- People (Hebrews 3:9)

- Initially, the author's stringent lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- What I am about to do, is what He is good at making.** (Genesis 41:32-37, Genesis 1:1-1:2, Genesis 4:26)
- Derivation...varietly: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
 - GetAPage.html serves as a gateway to specialized links.
 - GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: **Do you write it as a manual? Do you write it as describing the functionality.** (Daniel 9:24-17)

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendars

- You could say, this is what I do... Why I do it?
- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio
- Where are the differences...companion?
- Experimenting...as the same?

• **Data:**

- Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
- For over 2 decades, the author has continuously received what he constantly records and queries: **Stipulates?**

Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze it?

- Language translation
- Familiarity with the subject and tradition. Apply common knowledge.
- Maturity and relevance to our time

Choosing a closer relationship with God.

- **Software:** Algorithms are patentable? The author has not applied to patent AlphabetSequence... it should be open issues. **We all make our own...**
- **Hardware:** Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...although he is pertaining to Him.

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
 4. GetAPage.html HisWord section: Time variant

For a period of time, we are as we seem we are? What needs a success? (Genesis 4:7, Matthew 14:8, Mark 6:25)

Chuck Missler versus (VS) the author

Chuck Missler	Chuck Missler versus (vs) the author	Author
2018-06-02 <u>Candlelight Celebration of Life Service - Chuck Missler</u> Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2015-12-22T08:48:00 <u>Deadly...throughout</u> 2014-08-18...2025-12-22T08:48:00+144 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2024-11-03 21:33:37.887 <u>Pattern of assemblies</u>.		
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him. Chuck Missler was preaching from his understanding of the Bible. Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.		2024-11-03T11:58:00 <u>What we bring... as amount... to what?</u> The author is relating the word spoken to him to the Bible. The author is relating to people. Coming from experience with people.
	<u>You were trying to reach the Bible...through your word.</u> <u>Interaction with Him...</u> I start writing words received when I sleep. I introduced words when I shower. <u>What I used...</u> Chuck Missler used the Bible.... I used myself?	
2025-04-09T15:30:00 <u>What did you set out to achieve as a personal reason?</u> Hal Lindsey suggested to Chuck Missler that he convert a Christian ministry hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Missler from pursuing a doctorate degree in Physics. 2025-04-10T14:14:00 <u>How the Bible can be...worthwhile</u> 2025-04-10T14:14:00 Jennifer Melow gave 2 breads burnt to Danielle Hal to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. <u>Carcare decision</u>		2025-04-10T09:17:00 Scene 1: Lauretta is driving me, and I mentioned the first name of Nada Madjar, but I did not disclose her last name; therefore, I am not gossiping. Lauretta plowed forward and Lauretta asked if I was talking of Nada that I now infer to be Nadia Comaneci. Scene 2: A man concedes that he has lived in Fremont, since he moved from further away. 2025-04-10T04:46:00 <u>Limitation on persons</u> (Ezekiel 3:12-24). AlphaBertsequences takes specific places... out of the Bible. 2025-04-10T06:47:00 <u>When did he desire... a people as I</u> (Genesis 2:20-25, Genesis 4:1-12)?

I am reminded of the presence of others. (Ezekiel 33:17)

2008-03-11	Calendar	September 22	

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's datetime attribute and the time node give datetime information.

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (J Samuel 3:19.)

For	Against
Man	Machine

Numbers in Themes

- He expressed good as how He felt (Genesis 1:4, Genesis 1:10, Genesis 1:12, Genesis 1:18, Genesis 1:21, Genesis 1:25, Genesis 1:31, Genesis 2:9, Genesis 2:17, Genesis 2:17-18, Genesis 3:5-6, Genesis 3:22).
- He expressed start and end of time (Genesis 1:1, Genesis 1:5, Genesis 1:8, Genesis 1:13, Genesis 1:19, Genesis 1:23, Genesis 1:31, Genesis 2:1-4).
- Kings of the Jews (Matthew 2:2, Matthew 27:11, Matthew 27:29, Matthew 27:37, Mark 15:2, Mark 15:9, Mark 15:12, Mark 15:18, Mark 15:26, Luke 23:3, Luke 23:37, Luke 23:38, John 18:39, John 19:3, John 19:19, John 19:21).

To be actual things

- Pronunciation (Luke 1:13, Luke 1:60)
- Application (Luke 1)
- Spelling (Luke 1:63)
- Reference (Matthew 11:14)

In telling the future, there are two parts: prophecy and fulfillment (Revelation 19:10). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

Prize	Target	Scripture Reference
Know.exe	Diversified language	Genesis 11:9, Revelation 7:9
http://github.com/KenAdenji/WordEngineering/tree/main/115/Gradual	I have decided to work on a gradual improving system.	Palms 131

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:

.aspx	.aspx.cs
http://github.com/KenAdenji/WordOfGod/lob/master/ContactMaintenance.aspx	http://github.com/KenAdenji/WordOfGod/lob/master/ContactMaintenancePage.aspx.cs
http://github.com/KenAdenji/WordEngineering/lob/main/115/Gradual/Contacts/ContactList.aspx	http://github.com/KenAdenji/WordEngineering/lob/main/115/Gradual/Contacts/ContactList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3c
sc-status sc-substatus COUNT(ALL *)
200 0 18115
304 0 9407
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.
HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC" -i:w3c
cs-uri-stem Total MaxTime AvgTime
```

Task completed with parse errors.

Parse errors:

1356596 parse errors occurred during processing (To see details about the parse error(s), execute the command again with a non-zero value for the "-e" argument)

Statistics:

Elements processed: 266572

Elements output: 28

Execution time: 84.46 seconds (00:01:24.46)

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is ≈176 work hours. A work year is ≈2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Re-use.
5. Metric:

- Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
- Machine Instructions Metric: This is the size or count of the machine instructions.
- Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
- Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
- Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
- McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The declarative work consisted of a proof-of-concept that is easily replicable.			

(De)Lean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(De)Lean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(De)Lean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(De)Lean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
 - Engineering skill needed to build
 - Robust design
 - Primary function independence
- The competing solution will include:
- Server-side JavaScript, for example, Node
 - Front-end library and framework, for example, React

(De)Lean Tolbert Smith).

To know my part as His?

- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- ~~I have decided to work on a gradual improvement system.~~ is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? [To recognize the following as I \(2 Samuel 3:39 \) ?](#)
- [Who it comes to \(Hebrews 11:24 \) ?](#)
- [What is the following? List of C-family programming languages](#)
- [The mechanism of selective breeding.](#)
- [What notion of the same do I have?](#)
- [What I keep member of \(John 17:12 \) ?](#)
- [What did he find as suitable for him \(Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27 \) ?](#)
- [What did he find re-occurring as him?](#) Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX - only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [9432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \(Mark 2 \)?](#) 2025-07-12T16:44:00 [What did he do?](#) [How did I do \(Luke 1:41, Luke 1:44, Matthew 3, John 3 \)?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Alphabet's Law](#) comes into recognition in [GradPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ehpraimtech.com/WordOfEngineers@WordUnion/BecauseWeAreNotThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreNotThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Unit	Value	Commentary
Internet speed test Testing download...	8.54 Megabits per second	
Internet speed test Testing upload...	4.74 Megabits per second

Development History

A Causal to Hearing Words

He said and He did. Word work (Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include:

- Read and recite the Bible.

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at Dillons College, in the Fremont and Newark campuses.
- Read books and magazines at Barnes & Noble, Borders, Walden Pond Books, Wal-Mart and public libraries.
- Listen to Christian commentators.
- Sexual abstinence and celibacy.
- Spiritual living at Reagan, Kiko in California, Patmos.
- First, evening, only ate, once a day, in the evening: 1 ate Namuna Holding Koshu rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the world's revolution.
- I was living on a meager income (Exodus 24-25-26).
- Only familiar with Care-based Reasoning and Use-Care.
- Alphabet=Sequence is abecedary.
- Set-based: Effort to record everything Bible code.
- This is a man, he wanted to know about his favorite: (Daniel 1-3-21, Daniel 9-23, Daniel 10-11, Daniel 10-19).
- Personification: (John 5:18).
- Dimensional of Realization: (Proverbs 25-2).
- I will make the difference: (Deuteronomy 26:5, Ezekiel 16:3).
- What are all worth to us?
- 1997-12-31 I will not entertain Nada. Prophets make New Year predictions.

In Australia, I got involved with the prison ministry at the Villages Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process so, I could better understand Australia's law. Finally, my most productive contact consulting was at the Department of Training Education Council (OTEC), so I had an understanding of integrating and training re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. The OTTC staff would tell me that they were not interested in computers because they were not allowed to have them. I said, "I will show you how to use a computer without having one." I showed them how to use a word processor, how to use a mediator? What do I share as a bargain? All these words are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable, humans are useful. Where does a side take the rest? What I am finding out, is how necessary I am as a person? How do I play my part in participating? What can you take from me, and make as your own? My words may not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you see. When the times programming lines close, I do it on a scenario. So words make meaning as suffering. Whose life have I lived to complexity? To the full of his word? [John 10:24-29](#)? What can His prove relate to me?

Word	Jew	Price of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Sign a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly, a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is the work is usable in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; in which the author switches to, by changing the database connection string of one node in the web.config. When the user decides to stabilize and admit no further changes; then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of word, meets today's expectations. The addition of the ActToGo! demo, demonstrates the maturity of the author, since it advances from data to information.

The author, first wrote his history, in multiple stand-alone files .HTML, .XML. ([Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

I have a product; where is the method?

Adaptability:

1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
2. What is the literacy level required? If you know the alphabet arrangements, then you can determine the AlphabetSequencesIndex word. To determine the AlphabetSequencesIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
3. The Biblical account wrote dreams and visions tirelessly, without resorting to the database. Search Engines Crawl past the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this work as a reference, the widely acceptance of a work, accompanies presence.
5. The result of the Bible, is how we use it. The emphases of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned instruction to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

How to go about it?

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication.

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry.

Guidelines and tools

A relational database is a substitute for text processing.

Stakeholders

I am the primary contributor and beneficiary.

Outputs

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown.

(Alison Cox).

Lessons Learned

- Istem word: Leading up to 2008-03-07, I was not fully reading the word of the LORD. [Job 32:12](#).
 I want to ask God for a word? To realize where my opinion lies?
 • Familiarization with data.
 • You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Joshua 22:14](#))? One of Yourself offers as many as 1 use.
 • Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for others? Is how I needed Him.
 • Putting Him into words.
 • My time away from the family, United States of America (USA), may have helped me gain independence.
 • In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. [How can we bring a life, except ours?](#)
 • Do I decide the truth? Do I choose the truth?
 • The importance of the Word is how it is made.
 • Post-dict: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station, Bay Street Emeryville 94601 Fire Alarm Panel & FDC Building A 5604-5634. [To mean, I decide the story?](#)
 • How did they handle the Messiah? Luke 1:38-19? Crossing the divide? To need someone as 1 (Genesis 15:2-17)? You know Me as capable of you? 1 Samuel 17:36. Romans 4:19-17
 • The Yordas sentence. MacJordon 1 will use wisdom to block it.
 • No difference in confusion.
 • How useful you have been in determining issues? How diversification the changes? 1 (Genesis 4)
 • The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
 • Difficulty level Our work is divisible into writing the word, commentary, and deducting meaning. When the people, from God, the data entry is easy when it is in English, except when it is in Yordas, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how they types me. As I wrote this paragraph, I entered in my own words and I sought assistance from him. [As in, do I do in never-forgotten of the LORD. Whose closeness has He solved?](#)
 • What can we be in the midst of a people, pertains to God? (Matthew 10:12)?
 • What do you know how to use, as you desire yours?
 • Rich of God. Reach of God.
 • How many are others. (Daniel 11:44)?
 • I have to present God, as I am allowed to be.
 • How I want it to be: How He wants it to be? When does the word command the answer? 1 Acts 10:11.
 • People have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Build or buy? Another kind of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be words and I have power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work (1 Samuel 25:28)?
 • Needs to be met?
 • The author will record the publishing and receipt.
 • An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
 • I didn't shift...until the movement. (Acts 1:8)
 • Did he ask you to do it? (John 8:44)
 • By Him...about Him. (Genesis 1:1. Genesis 4:26)
 • Timing... (Matthew 26:45-46. Mark 14:42)
 • Could you read now, not of me and not desire another? Biblical Calendar, Gregorian Calendar.
 • When can we do without Alphabet? Sequence? A place in the Bible justifies the word.
 • O mo Bunn! Dear. You know Bunn! Clari is this. We are inside a building and we heard that food is being giving away at West. I jumped down multiple floors. There is a team to the South East and either Beni or Buki and their friends are sitting at Centro 04:27. Crazy sleep, 20:13 Beni or Buki, I forget who? I grew up with them, but I am no longer associated with them. Nuclear or extended family.
 • What past the time ([Isaiah 61:12. Luke 4:19](#))?
 • What is it use?
 • That chooses 1. When I read the Bible, I adapt to the role I take.

2025-10-23T20:25:00 Doctorate Candidate Internet Commerce

- 2025-10-19 Doctor Benlouis Adeniji asked me what I specialized in during my doctorate degree studies.
- I learned how to program smart cars using the C programming language.
 - I understood flash memory, and I focused on their secured access.
 - I searched for a synonym of the word, "understood," on Google.com, and I selected the word, "comprehended". I comprehended Universal Modeling Language (UML). I understood about period and how it is manifested. The 1st time, I dreamed, was in the year 1988, 12 years before the year 2000. The 2nd time, I dreamed, was at the end of the year 1997, 2 years before the year 2000.
- I did Not learn... use the work.
- Artificial intelligence like AI has been used. It's also been discussed. I couldn't find a company willing to talk about it. [B. James O'Donnell 2025-10-28 2025-10-28T03:15:00Z; 2025-10-28T03:15:00Z](#) When I re-located to the United States of America I started my own twin sibling build web pages and databases tracking contacts, websites (URL), and software. When I re-located to Newark, California (CA) 94640, I started building personal page for tracking contacts and websites (URL) using Microsoft ASP.NET, CA, SQL Server. Unlike my twin sibling, I did not find software a growing technology trend. I understood I wanted to have a database for contacts and websites (URL), but I did not continue in the tradition of my twin sibling by using his adopted technology, schema, user-interface (UI), nor process. Also my Villavend Detention Center prison ministry experience in Australia diverted me from Internet Commerce to give prisoners an opportunity to share their real-life.
- [2025-10-28T03:50:00Z testimony](#). When you see an example... [2025-10-28T03:51:00Z](#) make it your own way. In Australia, I was not using technology in my personal life. In the United States of America (USA) I am an adopter of technology for doing things that are different than what we do in our country.
- [2025-11-01T03:20:00Z](#) We are having a challenge at Guaranty Trust Bank (GTB). We played cards. There were 2 beds placed on top of one another in the center. Dolapo Ogunkunne and some other high-profile employees were talking about leading-edge web development in the south-west quarter.
- Your suggestion for Adenioluwale is to work on a solution, AlphaSequence came as they were trying to find people who spoke to you in your dreams. Now, that AlphaSequence as proven useful with English and Holy Spirit word, may be able to help you understand a message. I used AI Am taking you on a journey, was facilitated by other people. How could Adenioluwale 10:57 meet me there. Finding a niche... a role to play 10:58 in the Christian direction. I was given time to separate time. IBM... you have the technology... people. Rita Bustuti... Aborigine? What do we have to work with? I studied, when I was at Newark, Daigaku Honyaku Center (DHC), and I was asked to have women help with WordEngineering. The question is what I am to do, and who will help me get there. S's and W's and how people dissuaded me from following the information technology; but I now have a task, I take a service. Working with the Document Object Model (DOM) has revealed missing info., and the need to build the submit button as part of the process. Dissertation requires a summary to defend: 11k Receive and record word is completed. Explain action, identify scene, build a story with database records. With Dolapo Ogunkunne owner of the business I learned from him. Critic At GitHub, I had a basis on what he said. What can Adenioluwale do without the infrastructure... like I did in Newark... without the internet. I chose to build by myself using my requirement. I will strike the shepherd. [2025-11-01T11:21:00Z Akeke](#) Receive and record word is completed. Explain action, identify scene, build a story with database records. With Dolapo Ogunkunne owner of the business I learned from him. Critic At GitHub, I had a basis on what he said. What can Adenioluwale do without the infrastructure... like I did in Newark... without the internet.

2025-10-09T20:02:00 Our opinion... among others. 2025-10-09T21:12:00 What I am doing... where will you find it (Genesis 4:26)

1. Where?
- Vocation ([Matthew 4:19](#), [Mark 1:17](#))
 - Place of origin ([Matthew 2:1-11](#), [John 7:52](#), [John 18:5](#), [John 18:7](#), [Micah 5:2](#), [Isaiah 9:1-2](#))
 - Resting place ([Genesis 23](#), [Genesis 49:21-22](#), [Genesis 49:29-33](#), [Genesis 50](#), [John 14:3](#))
 - Inheritance ([Exodus 44:28](#), [Leviticus 53:10](#))
 - City of Refuge ([Joshua 20:7-8](#), [Numbers 35:15](#))
- * The author started his tertiary education at Central Piedmont Community College (CPC), and he worked in its computer laboratory for 3 years. Though he was an exemplary student, he did not attain the same height as a programmer. What could he take to the industry? What did prepare him for a professional life?
- Re-use?
- 1. Using either of 2 JavaScript methods, the author displays in tabular format the various database results.
 - 2. Using an overloaded method in C# and various SQL statements, the author retrieves information from the database.
 - 3. Using the JavaScript fetch keyword, the author places webservice requests.
- After the above examples are 1-line statements that deprecate previous redundant code. It is the hope of the author that using the database to supersede word processing... 2025-10-09T20:33:00 is enhanced. Knowing his children in the LORD are following his footsteps...
- 1. 2025-10-09T20:35:00 places enormous responsibility on the author.
 - 2. 2025-10-09T20:42:00 While it is not imperative they use data entry, or word processing... as long as they use their God-given talent... it is okay.
 - 3. 2025-10-09T20:46:00 How do they...pursue the level... you have attained?
 - 4. 2025-10-09T20:52:00
- When the author attended University of North Carolina, Charlotte (UNC) to further his Bachelor's degree studies, the author perceived it as a diversion from his career interest in software engineering.
 - 2025-10-09T20:57:00 This is how the task is done... this is how I will do mine.

2025-10-09T01:35:00 How can the Bible...revere itself (Numbers 11:16, Acts 6)

- 2025-10-09T02:19:00 During my first half, 3.5 years in Australia, I studied for my Master's degree with 3 Hispanic male migrants. I lived opposite a Brazilian migrant nurse who later re-located to Camden. Once, Colin Turner drove me to soccer practice.
- 2025-10-09T02:01:00 This is where I want to be... if I am with you.
 - 2025-10-09T02:10:00 Do you place a life... apart from you?

2025-09-04 MomentOfLift.com/the-worlds-i-see Microsoft ASP.NET User Controls:

2025-09-05T07:23:00 He is not asking you... if you want to do it... by yourself

1. During the 1st year of secondary school, my twin sibling and I were taught by our adopted father course curriculum in the morning prior to us attending classes in the afternoon session

Considering processing and storing

How can I pass knowledge...as sharing.(Genesis 2:7, 2 Peter 1:21)?

- Computers consist of microprocessors and memory. A memory is either:
 - 1. Read only memory (ROM)
 - 2. Random access memory (RAM)
 - 3. Hard disk
- Object-orientation combines code with data.
 - 1. Code = method
 - 2. Data = field or property
- A relational database offers the opportunity... to program and store data.
- The ID attribute in HTML files for url hashtag is case-sensitive, and it serves for spot reference, and respectively. It is no range checking. It cannot do range checking. There are no abnormalities in case mentions the name?
- Variable and relative? Time, number (Genesis 1:1, Genesis 1:16, Genesis 2:2-3, Genesis 2:16-17)
- Constant? Name (Genesis 2:19-23, Exodus 3:14.)

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to regurgitate the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the biological time period, and Common Era computation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partially, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidences

How do we give our actualities? I have found written text the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history: You will find, and must find, a steadily realizing the dream. In my case, when I try to recall the past, a chain of joyous, married and saved, do, friends in the world, and more to resurrection. The final words appear more higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro (Daniel%2012:4)

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor, and overthrew him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ([Revelation 3:7](#), [Revelation 5:5](#), [Revelation 22:16](#)). Joseph ([Genesis 37:2](#)).

Why we Accumulate the Same ([Matthew 26:53](#), [Revelation 9:16](#), [Revelation 4:8](#))

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#)). Knew versus lay

Wanting a Member of..

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven,

the last point for good on earth. To seek a development; it had a beginning.

When time is maximal used; time is ideal allowed. When our association to follow; is association to the end

Place	Actor	Scripture Reference

Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelling of the last? Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:14, 7? The author will want a conciliation with time? AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow? That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God (Genesis 3:8)?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <https://github.com/WordEngineering>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself. The author suggests that Baptism of the Holy Spirit (Acts 1:2), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

Keyword	Scripture Reference

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BallFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.

1. Joseph ([Genesis 50:20](#))

2025-06-07T15:13:00 What we have as a later use?

1. 2025-06-07T17:22:00 Joseph ([Genesis 41:34-36](#))

2025-05-15T22:09:00 What did He call time?

1. [In the beginning](#) ([Genesis 1:1](#), [John 1:1-2](#))
2. Declaration of our adopted Father to His only-begotten Son ([Psalms 2:7](#), [Hebrews 5:5](#))

2025-05-14T15:08:00 What did He make variable... what did He associate with age?

- Role: Army, Priest, King of the Jews ([Numbers 1:3](#), [Numbers 4:30](#), [Numbers 8:24-25](#), [Matthew 2:4](#))
2025-05-07T01:29:50 [kelelode](#) (the last-born of the twins) ([Genesis 45:6](#))

K	E	H	I	N	D	E
1st position, beginning	2nd position	3rd position	4th position, center	5th position	6th position	7th position, ending
11th alphabet	5th alphabet	8th alphabet	9th alphabet	14th alphabet	4th alphabet	5th alphabet

2025-05-13T16:52:00 What did He start... that I improve

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 What apart I have set as necessary?

[solist.ai/onboarding?utm_source=new-tab&utm_medium=firefox-desktop&utm_campaign=native-article-cards](#)

Hong Kong was driving to Albertsons Lucky, Brookvale. Hong Kong drove me from their house to 99 Ranch Market.

I cut my finger nails. I shaved my beard. I cut my hair.

[Is Koko still with you? Koko is a big dog. Is Koko still with you? That is why I don't see it like that anymore.](#) 2025-05-06T17:09:00 (what) What is beyond a place? 19:09 (color to show) 2025-05-06T18:52:00 I am referring to my conversation with Benitokuwa about Ademiloluwa. I had a run-in with the police... which was fruitless.

1. The Holy spirit ([Genesis 1:2](#), [Genesis 2:7](#), [John 1:33](#), [John 16:7](#), [2 Thessalonians 2:7](#), [Acts 1:4-5](#))
2. Man ([Genesis 1:26-31](#), [Genesis 2:18-25](#), [Genesis 49:26](#), [Matthew 2:23](#), [Revelation 13:18](#), [Genesis 41:34-36](#), [1 Corinthians 7:1-9](#), [1 Corinthians 7:36](#))

2025-04-30T04:03:00 Timeline of WordEngineering

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

1. [My counterpart has yours.](#)
2. [The tool a man has render as himself](#) ([John 16:7](#), [Matthew 16:18](#), [John 4:14](#), [John 6:35](#), [Matthew 26:17-19](#)) ?
3. [What did they produce](#) ([Genesis 4](#)) ?
4. [Specialty of view](#) ([Genesis 12:11](#), [Genesis 13:10](#), [Genesis 22:14](#)) ?
1. 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
2. 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 What attribute the word? Autobiography... tying it into Biblical event.

[www.JesusInTheLamb.com](#)

Saint James the Apostle Catholic Church. 34700 Fremont Boulevard. At the intersection of Fremont Boulevard and Ferry Lane. On the 3rd day, he lifted up his eyes. 3rd block from east. 5 poles east. 3 poles west.

1. Who? - Jesus Christ ([John 8:56](#), [Genesis 22:11](#))
2. What? - Passover Lamb ([John 1:29](#), [Genesis 22:8](#))
3. When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations ([Matthew 1:17](#))
4. Where? - Golgotha ([Matthew 27:33](#), [Mark 15:22](#), [John 19:17](#))
5. Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission ([Hebrews 9:22](#))

2025-04-05T09:04:00 Composable Design

2025-04-05T13:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. How will I dictate his use as a person?

(Juval Löwy of IDesign, 2019).

2025-04-24T11:20:00 What did he see... as on their side?

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophetic attempt to understand technology, and its application to Christianity. The only date observed at the beginning was the calculation of the crucifixion of Christ. This is not defamatory, nor inflammatory.
- 2025-04-24T13:45:00 While the author is aware of other sources of information and conjecture, the author is undanted.

2025-04-07T09:40:00 What he found out... without?

1. Faith ([Hebrews 11:1-2](#), [Hebrews 11:8-19](#))
2. Without the camp ([Hebrews 13:11-13](#))
3. Rest ([Hebrews 4:8](#))
4. Reverence ([Daniel 4:3](#))

2025-02-22T05:31:00 Our continuation of what we have here

2025-02-22T06:19:00 Akeidah the binding of Isaac ([Genesis 22:12](#), [Genesis 22:20](#))
[youtube.com/watch?v=9u7xv9VHlXw](#)
2018-07-01...2025-02-22=2428 days (6 biblical years, 8 biblical months, 28 days) (6 years, 7 months, 3 weeks, 2 days)

2025-02-24T13:07:00 With equal remembrance

- Prophecy
 1. Passover Lamb: Our LORD's Supper
 2. Beware of the Yeast of the Pharisees ([Matthew 16:5-12](#))
 3. Fig tree ([Matthew 21:19-21](#))
 4. Cook crow ([Matthew 26:34](#), [Mark 14:72](#))
- Fulfillment
 1. Temptation of Christ ([Matthew 4:1-11](#), [Luke 4:1-13](#), [Deuteronomy 8:3](#), [Deuteronomy 6:13](#), [Deuteronomy 6:16](#), [Mark 1:13](#))

70th Week of Daniel ([Daniel 9:24-27](#))

2025-02-24T16:25:00 Do I bring the future as one of ours, or one of people?

- Who: Seed of the woman versus seed of Satan
- Where: Revived Roman Empire
- 1. When: Interrupted after the completion of the first 69 weeks, which commenced from the commandment to rebuild Jerusalem.
- 2. Time span: 2520 days, punctuated in the midst of the week with the Abomination of Desolation.
- 3. Completion followed by: 1000 years.

2025-02-13T02:58:00 Bible meaning

1. 2025-02-13T07:05:00 God counted the days during creation... God blessed the day of rest, the 7th day.

2025-01-20T02:59:00 What is like? It is late at night, and I am riding a train with a few intermittent stops. The train will make its first early morning stop at Strathfield railway station at 6AM.

In the center, there were free donated rectangular paper boxed fruit drinks. There was also a yellow banana wrapped in a transparent container. 2025-01-20T14:39:00 They keep on insisting... on their brand of Christianity. Just before walking northward to the intersection of Paseo Padre Parkway and Blackstone Way.

1. 2025-01-20T07:37:00 12,000 virgins from the tribes of Israel, sum of 144,000 ([Revelation 14:4](#))

2025-01-15T15:22:00 What our lesson has?

1. 2025-01-15T15:22:00 Data: It is primarily the word of God, in the WordEngineering database, HisWord table, Word column. With supportive information in the other columns on the HisWord table. The information in the other tables, such as, the Remember, APass, ActToGod tables are extractable and computable from the HisWord table.

- Style of Writing

- 2025-01-15T15:29:00 Teachable: Can a student learn to gate this data, as you have? The only pre-requisite is the Holy Spirit.
- 2025-01-15T14:52:00 Textual: The author hears the word. The author is able to transcribe the words. The accent of the author is not fluent. The author is not artistically inclined, nor trained at capturing and transmitting audio or video.
- 2025-01-15T14:00:00 Customization: How is this word supposed to be used? When the author receives the word, he makes effort to temporarily record the word on paper. At a convenient time, the author records the word on a computer electronically.
- 2025-01-15T16:07:00 How can my approach survive? 2025-01-15T16:08:00 What is the result of this thing? 2025-01-15T16:08:00 **What text is the favor only to me?** [Daniel 12:17, Daniel 14:45, Daniel 10:21, Daniel 9:27, Daniel 8:27, Daniel 7:28, Daniel 7:29]
- 2025-01-15T16:35:00 **What according to the name?** [Daniel 9:24, Daniel 9:25, Daniel 9:26, Daniel 9:27]
- 2025-01-15T16:35:00 **What according to the name?** [Daniel 9:24, Daniel 9:25, Daniel 9:26, Daniel 9:27]
- 2025-01-15T16:42:00 *Your adopted father once chastised you. Why you are not like your twin sibling, asking? He said your earlier effort was not preaching. He asked, so we not!* Are they using what accordance to the name? Diglogia Honyoku Center (DHCC)
- 2025-01-15T19:14:00 At the intersection of 4727 Mallard Common and Decoy Terrace. **What do we need... each other for?** As example [Daniel 9:24, Genesis 4:7, Genesis 4:24-26:] 2025-01-15T19:14:00 Milk & Honey Cafe. Pegasus Center. 34265 Fremont Boulevard, Fremont, California (CA) 94555. **What is transgression? What have you included?**

2025-02-21T13:28:00 When did he search... a reference as a usage?

1. 70 years in Babylon (Daniel 9:2)
2. Reverence (Daniel 5:17-31)
3. Lot (Daniel 12:13)

2025-02-08T20:06:20 Paseo Padre Parkway just before the overhead bridge south, between Siward Drive and Blackstone Way, walking northward What are you working with?

- 2025-02-08T23:23:00 Going along with the prognosis of BORD, I feel my best utilization at the moment is to re-cap my information. To look at how I technically made decisions, in light of the spirit. With Chuck Messer as a mentor, he fed information technology, and tutored Bible classes. Not to explain the Bible, but give an understanding of scripture. I found out that PowerSoft that my software engineering skills were not fully developed during my Master's degree programme at the University of Technology, Sydney (UTS). It may be that I did not understand the paradigm shift, client/server, or specifically, PowerBuilder? Master-slave logging. I had not led a team software project, nor taught a non-technical female student to transition into software engineering. These opportunities and challenge to train a female graduate include:
- The Iranian Persian female student at Central Piedmont Community College (CPC), personal computer (PC) laboratory 3 Pascal programs.
 - Teaching Hajera Adeola a French teacher, the wife of Fola Adeola, the co-founder of Guaranty Trust Bank (GTB), how to use a personal computer (PC).
 - Helping Jerry Stevens of PowerSoft with how-to use a client/server tool as a spreadsheet.
 - At Electronic Data Systems (EDS)/Safeway, the reference table had a composite primary key that consisted of major and minor columns.
 - At Dengata Honyaku Center (DHC) the reference table I wrongly implemented as a single instance.
3. Up-to-now, what I have are raw ideas which need refinement. 2025-02-08T23:23:00 You have used...how do you use?

2025-02-09T20:52:00 Paseo Padre Parkway just before the overhead bridge south, between Siward Drive and Blackstone Way, walking northward. Do you have to partition?

2. **W**ork distribution
- 2.1. Database modeling includes normalization
- 2.2. At Dagaku (Niyatika Center) (DNC) there were 2 duplicate product tables, and a plan in place to differentiate product items and prices by their colors.
- 2.3. CF static cases are not instantaneous, but they support extension methods which allow a static variable to be called from a class name
- 2025-01-31:17:02:00 **How will I assist him?** (Numbers 2:45-47) Initially, your work was original. 2025-01-31:17:54:10 Now... your work is **supplementary to Holy Spirit** (1 Corinthians 2:2). 2025-01-31:17:56:10 With Richard Tembo, a Zimbabwe-born Canadian student migrant, and Andria a Greek descent female of Tembo Electronics, I did not keep track of the amount of money loaned nor repayment. With Paul Watson, a New Zealander, and Kerry Watson, a Greek-descent nurse from New Country Software, I did not keep track of hours worked, hourly pay rate, nor the amount of money loaned nor repayment. Doctor Makani Talayeh and I spoke about the Los Angeles (LA) fire, and Doctor Makani Talayeh said it was about 4 miles away from his home in Los Angeles. Makani Talayeh said it was due to global warming and wind, and may occur again in 2-3 years' time. Specifically... algorithm? Trademark... patent? (Lazarus 12:1-4)
- 2025-01-31:17:59:00 With Alpha-Sequence, you were making the Bible... what? 2025-01-31:17:11:10 What application... have I used? 2025-01-31:17:11:10 What applies... as the same? 2025-01-31:17:12:10 What exactly... as the author... applied? 2025-01-31:17:13:00 How can... the motorist... stay the same? 2025-01-31:17:14:00 What exactly as passed someone? 2025-01-31:17:15:00 How are we made as? 2025-01-31:17:16:00 What **opportunity** has He given (Hebrews 1:2)?

2025-01-11T18:41:00 Database optimization

1. 2025-01-11T17:23:22 [queryprocessor.com/2025-01-11/841:00 Join Estimation Intervals in SQL Server April 24, 2018 by Dmitry Bulguzin](#) - It was built with transport model... in question? Extensible Markup Language (XML)... JSON (JavaScript Object Notation). [ContactMaintenance.aspx](#) joins contact information, but it is in a master-detail hierarchy. 2025-01-13T09:46:00 [SQL Server 2016: Scalar UDF Estimation and Project Normalization April 25, 2018 by Dmitry Bulguzin](#) - When searching by Bible verses, these are scalar functions. 2025-01-13T11:40:00 [Do we have to be earth of this? Acts 2:25, Genesis 37:20?](#)

(Dmitry Pilugin)

2025-01-27T16:58:00 The Power of Networks

2025-01-28T10:45:00 The three Rs of the Internet Age: rating, ranking and recommending

1. 2025-01-28T12:32:00 Rating: 2025-01-28T13:01:00 [earthly... heavenly](#) ([Luke 1:19](#), [Psalms 8:5](#), [Hebrews 2:2](#), [Hebrews 2:7](#), [Matthew 26:53](#), [Matthew 19:14](#))
2. 2025-01-29T13:35:00 Recommending ([Philemon 1:9-11](#))

2025-01-27T16:58:00 Six Principles That Connect Our Lives

1. 2025-01-27T16:58:00 Sharing is hard: An address may be for a domain, page, anchor, or more recently, text fragments. An Address may also be for a single or multiple e-mail addresses. The advent of client/server computing...
2. 2025-01-27T16:19:00 guarding the content of shared information... to complete a task-Asynchronous JavaScript and XML (AJAX) supports activities such as background data exchange, and partial page refresh.
3. 2025-01-27T18:16:00 Ranking is hard
4. 2025-01-27T18:56:00 Crows are not wise: Where am I supposed... to be open? Jesus Christ included open (Mark 10:40)... 2025-01-27T17:09:00 The author... sought adaptation to the Bible.
5. 2025-01-27T19:25:00 Crows are not so wise
6. 2025-01-27T19:33:00 Divide and conquer: In his first role at the then leading client/server technology provider, PowerSoft, the author's task was to migrate the management spreadsheet to a client/server architecture. The steps would have included:
 1. Install the Sybase relational database on a UNIX Solaris Operating System
 2. Reverse-engineer with probably S-Designer the cells into database schema and tables
 3. Migrate the data from a spreadsheet and populate the database
 4. Regularly manage the data, and set up the database maintenance wizard, including backup
7. 2025-01-27T20:02:00 End to end: The first database, may, after time, not be a single island, managed by one-person, but it may grow into an enterprise application

(Christopher G. Brinton, Mung Chiang, 2016)

24-12-27T08:08:00 Mediate between me and my people

1. Today:
- 2024-12-27T00:20:00 In the north-east, there is a href, hyperlink reference, to an e-mail address. In the north-west, I found a url, web address, when I looked deeper. 2017-12-04 When-is-day of mailbox address?
 - 2024-12-27T01:14:00 A young lady came to visit me. I introduced her to my adopted father and uncle Niyi. She does documentation, probably more specifically technical writing. She has written a lot of papers, but we would like to supplement them.
2. Latest employer, Daigaku Honyaku Center (DHC):
- 2007-09-25T01:49:00 Gyu Kawasaki. Asian angel of death.
 - 2008-03-11 September 22. Hayward Hall of Justice, 24405 Amador Street Hayward, California (CA) 94544, 510-690-2700.
3. Next of kin, Benetokun Adegoke Ademilola Adeniji
- 1999-05-07 Ife Iyan mi, kin lo yi. It is my person's house, you are going to. Christening of Ademilolulawa.
 - 1999-05-07 Her husband ko kin ba soro bedtime. A separate are a e. Her husband does not speak to her at bedtime. Will separate self.
4. Tribes in Nigeria
- 2024-13 Santa Clara, Ibo female. Yemine. Ezime translated sweet mother. Barnes & Noble (BN.com) El Cerrito Plaza. You are acknowledging that you are different...but you want to die for the people of God.
 - 2024-05-04 Nur Ahluksawasi. Light. 6' 1" basketball high school forward. Both sides of my family are Hausa not Yorubaland. Nordstrom, Emeryville.

2024-12-21T06:02:00 We don't have to be surrounded.

From my bedroom, I walked into the light of the upstairs lobby to wear my Spyder Active trousers that I purchased from Costco on 2024-03-21. Where does God reveal Himself? There are 47 occurrences of the word light in the King James Version (KJV) of the Bible Gospel books. Google.com may have a statistics attribute for providing additional/specific information. Alternatively, what type of information... am I searching for? Image, audio, video, news, statistics... 2024-12-21 05:25:50.117 [icr.org/books/defenders/629/Pharaoh's magicians were somehow able to duplicate the first two plagues. 2024-12-21T07:18:00](https://icr.org/books/defenders/629/Pharaoh's%20magicians%20were%20somehow%20able%20to%20duplicate%20the%20first%20two%20plagues.%202024-12-21T07:18:00) May rank statistics?

1. 2024-12-21T06:18:00 Locality... between people ([Exodus 1:10](#)).
- 2024-12-21T07:45:00 What accurate proceeding?
1. 2024-12-21T07:52:00 In the event... of time... there I Am([Genesis 1:1](#), [Genesis 1:14-19](#), [Revelation 21:23](#)).

2024-12-16T08:00:00 Metric Scalability: In the order of their mentioning

1. 2024-12-16T08:00:00 Time: beginning, evening, morning, day, season, year, generation, month, day
2. 2024-12-16T09:27:00 Place: earth, city, house, kingdom, country, tribe

2024-12-10T15:23:25 The Journey to WordEngineering

1. 2024-12-14T12:14:00 **Completed** ([Daniel 2:33-35](#), [Daniel 2:41-43](#)) Wake-up orientation: My right foot is in the center and on the top of my left foot.
2. 2024-12-14T12:14:00 **Completed** 3 Associates degrees, the president of Central Piedmont Community College (CPC), doctor Richard Hagemeier, asked the author if he would like to go to Africa?
3. After the author completed his Bachelor's degree, the author did technical work in the separate telephone, fax areas, and the upgrade of Roland Turbo C language software that prints labels for the offsite storage of reel tapes.
4. After the author completed his Master's degree, the author did database replication between the central database and remote databases.
5. The author's doctorate study was based on intelligent appliance security and storage.
2. 2024-12-14T15:48:00 **Scalability** ([Genesis 1:14-16](#), [Genesis 1:17-18](#), [Genesis 1:20-22](#))
- When the contract of the author was terminated where he first did database replication, the author commenced a lead software engineer role in a client/server trainee and apprenticeship project.
3. The author initially used a Sybase Powersoft Watcom Anywhere database server prior to the South-African Hindi database administrator (DBA) migrating to an Oracle Designer 2000 Computer-Aided Software Engineering (CASE).
4. The Polish heart attack survivor project manager restricted work to 40 hours a week.
- Do not believe I will provide your needs?**
1. 2024-12-14T17:23:00 **Scalability** ([Daniel 6:22](#))
2. 2024-12-14T18:25:00 **Agility**: The idea of the author is not... **Comprehensive of people.**
3. 2024-12-14T16:33:00 **What we have of the west?**
2. 2024-12-14T22:15:00 **How can we move you wrong**... we are right (1 Samuel 22:2) ?

(Haishi Bai, 2019)

2021-01-04 14:22:14.250 Relational database Will target Tuesday December thirty first (Daniel 12:13, Matthew 22:41-46, Matthew 4-7, Deuteronomy 6:16) ? 2024-12-31

- Determine the date by checking the next occurrence of the day in the calendar, and software engineering ([Daniel 9:2](#)). Is there a date? Not null
- Calculate the date difference between the beginning of the prophecy and the ending of the prophecy ([Daniel 9:24-27](#))
2021-01-04...2024-12-31 = 1457 days (4 biblical years, 17 days) (3 years, 11 months, 3 weeks, 6 days)

2024-12-13T14:00:01 What I have that is partial to me (John 16:7, 2 Samuel 7:15, Luke 18-13) ? Holy Spirit

- You are still partial to self

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest (Matthew 22:36-40, Matthew 18:1-4, Matthew 23:11)
- New (John 13:34, Hebrews 8:13, 2 Corinthians 5:17)
- 2...1 (Genesis 2:24, Genesis 41:25)

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit (Luke 24:49, 2 Thessalonians 2:7)
- Time representation (Matthew 24:14)
- Trade of man (Revelation 13:16-18)
- No changes to the Word (Deuteronomy 4:2, Revelation 22:18-19)
- End-times (1 Peter 4:7, Genesis 6:13)
- Recompense (Job 42:10-17, Job 1:2)

Entity-Relationship Model

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does? I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To delegate the use? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, punctually. SQL Server is a service.
2. 2024-11-03T04:52:00 Significant: What you do with so ever? Microsoft SQL Server Management Studio.

(Allen G. Taylor, 202

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moslems, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part...to follow the truth. 2024-10-28T06:06:00 What input has He contributed...that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no
The 3 private sectors jobs I held in Charlotte, North Carolina (NC) were:

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospects and Fulfillment
- Autobiography
- State of Writing

What does he involve?		
Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many (Genesis 1:16, Genesis 1:26-2:4, Daniel 9:2)
- More at the same (John 15)

When did Israel...seek no region...as its own (Acts 1:6)?

1. The prophets
2. New Testament
 1. The Gospels: King of the Jews, the disciples
 2. Pauline Epistles, General Epistles
 3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

- Study analysis? What complexity does it reason with? Temple lamb. How can computer use itself? What ability of using? I have storaged using people as myself.
- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The IHaveDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
 - The bulk of the work is query.
 - There are input, processing, output. How is your task...duplicable?
- 2024-11-20T05:38:00 Ordering
- 2024-11-20T07:59:00 Do I make a separation between physical and spiritual?
- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13)
 - Levitical priesthood (Hebrews 7:14, 1 Samuel 3, Numbers 3)
 - Sitting on a high place: Humble... exalt (Luke 14:7-11)
 - Baptism: Washing of feet (John 13)
 - Marriage: Younger before the firstborn? (Genesis 29:26)

Word	Scripture Reference
Believer in Jesus Christ	John 11:26
Kingdom of God	Daniel 2:44-45
Charity	1 Corinthians 8:1, 1 Corinthians 13:1, 1 Corinthians 13:2, 1 Corinthians 13:3, 1 Corinthians 13:4, 1 Corinthians 13:8, 1 Corinthians 13:13, 1 Corinthians 14:1, 1 Corinthians 16:14, Colossians 3:14, 1 Thessalonians 3:6, 2 Thessalonians 1:3, 1 Timothy 1:5, 1 Timothy 2:15, 1 Timothy 4:12, 2 Timothy 2:22, 2 Timothy 3:10, Titus 2:2, 1 Peter 4:8, 1 Peter 5:14, 2 Peter 1:7, 3 John 1:6, Jude 1:12, Revelation 2:19
First resurrection	Revelation 20:5-6
Promised Land	Revelation 3:12, Revelation 21:2
Messianic Covenant	Jeremiah 31:31-33
Divided according to the children of Israel	Deuteronomy 32:8

What I use people for (Job 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2)

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
 2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.
- God said. What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the deception (Revelation 12:18). Appreciate as (Matthew 16:18)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15
Lead	Matthew 23:9, John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present (Deuteronomy 32:8)?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way (Genesis 1:26).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:29

What is according to time?

Word	Scripture Reference	Commentary												
Beginning	Genesis 1:1	<table><tr><th>Word</th><th>Scripture Reference</th><th>Commentary</th></tr><tr><td>Jesus Christ</td><td>John 1:18, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9</td><td>Only begotten Son of God</td></tr><tr><td>Eunuch</td><td>Matthew 19:12</td><td></td></tr><tr><td>Paul</td><td>Acts 21:39, Acts 22:3, Acts 22:28</td><td></td></tr></table>	Word	Scripture Reference	Commentary	Jesus Christ	John 1:18, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	Only begotten Son of God	Eunuch	Matthew 19:12		Paul	Acts 21:39, Acts 22:3, Acts 22:28

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

When is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Tell me intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.		
Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? (Deuteronomy 18:15)		
God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:19)	Bethlehem (Matthew 2:1-18, Luke 2:1-20, John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:00:00 Epoch timestamp: 1744848000

2025-04-1705:22:00 Place grouping...man grouping 2025-04-1804:06:00 (Genesis 48:4)?

2025-04-1706:16:00 Do we choose...a realization of him?

- 2024-07-09T18:30:00 He has always not a B...context of time.
- 2024-09-15T13:39:00 How our nature...never...design as lastings?
- 2022-08-08T19:00:00 Dispossess the Devil?

- 2024-07-23T09:22:00 To be an African's...Nation.
- 2024-09-24T11:01:00 I have brought shame to my people...The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

- Associated culture (Acts 7:22_Matthew 15:2_Mark 7:3_Daniel 1:3-5)

What I am rendering? To what particular use...is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25_Genesis 3:15_Genesis 41:45_Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13_1 Samuel 18:9_1 Samuel 30:25_Ezekiel 39:22_Ezekiel 48:35_Matthew 22:46_John 11:53)...

- Salvation (Exodus 14:13)
- Committ (Luke 23:46_Psalms 31:5)

What personifies the time?

- First and Last Adam (1 Corinthians 15:45)
 - Firstborn (Romans 8:29_Colossians 1:15_Colossians 1:18_Hebrews 12:23)
- What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5_Luke 4:16-4:32_John 2:1-2:11)
- Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love, hate, love...Including love the own father.
- What I do was able to learn the importance of the disease, I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness. (1 Timothy 6:12).

How do you reference the Bible?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.		
Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?		
Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. *What exactly I know as necessary of me? How numerous we are made.*
- *You do remember based on the data do you need to collect the data if you don't do remember?*
- *What does he want as a set?* 0 pe. In Yoruuba?
 - Complete
 - Late
 - Call
 - Thanksgiving
- Where am I, as a human being?
- *The life of appointing something as myself.*

Word Inference

- A lot of Yoruuba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword **Noun**.
- Letters in the English language?
- The word? It is to associate the reference.
- How could I collaborate fact with what I know?

On behalf, of someone, I seem		
Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?		
Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age.		
Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 2:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:17
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you than you are (Ephesians 3:18).
We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?		
Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- **Quality Assurance**
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: Jsting, FxCop
- Questionnaire: [BatesBates](#) [JstDefine](#)

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@gagym.com will telephone me about the role with Google's co-founder Larry Page [jobs.lever.co/dillyhawk_sero/701c6d9a-2d8a-4727-a345-d4a93d6dc277?openyid=3b8e0b64-7127-4709-ad21-6eb8ea57f403](#) Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 *You have tried to supplement... what God has given you.*

2026-03-07T11:24:00 *His commission... and and...* I was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. *How relevant is Your word to our opinion?* This projection may result in entries of new records in the Remember and APass tables. *Where are people, his relation?*

However he is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the result is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555
How do we develop... our east time (Genesis 37:19-20, Daniel 6:5)?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Autobiography

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- * At Central Piedmont Community College (CPC), the major course, students and colleagues include:
- 1. An African American female senior, Gayle.
 - 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony
 - 3. Michael Peko, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - 4. My twin sibling and I listened to American Top 40 with Casey Kasen, every Saturday morning. 2024-12-25T12:00:00 What estrange... of the people?
 - 5. I wanted to build a raft to go to the South Island for my vacation.
 - 6. In a multicultural church where I was part of the congregation, Bernie Alsapugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option...I have acclimated.
2. 2024-12-25T19:23:00 Australia had brought me in...to fit into the crowd.

2024-09-29T01:41:00 Adeyemo Adewuyi Adenij

What role he played in your life?

They had varying mother... but one father ([Genesis 32-28](#)).

2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.

2024-12-31T19:55:00 A male-dominated group. What adjustment did you need to make to your life? How your living resemble who?

- Post 5-year-old relocation from Ile-Ife to Lagos
1. Patrick, brother Yemo
 2. Captain of the Nigerian national hockey team
 3. Teacher for the 1st year of Baptist Academy secondary school, evening schedule
 4. The managing director of Gestop provided lunch money to eat at the Baptist Academy secondary school during form 2...
- Post 1988 deportation: You called him Daddy, that is what everybody else called him
- When did he serve – a people?
- Where did I... remove myself from the east? (Genesis 31:41)?
 - What apart... are new?
 - Seending time... to reality?

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the

same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5.
 - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made? (Genesis 32:28 - Genesis 5:3 - Genesis 4:12.) What word reminds? (Mark 11:22.)

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:

- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
 - The author was receptive and felt most at home during worship.
- (Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent, where is it needed?
