WordEngineering

Kehinde (Ken) Adewumi Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.
[Translate English - Yoruba](#)

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence](#) ([2 Corinthians 10:9-18](#)). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.ca](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- 2021-05-20T17:26:00 [Follow God as a character](#)
- 2022-11-29T12:53:00 [To track dates and words? And find meaning correlation](#)

Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgements

Chuck Messler of [Kotomou House \(KHouse\)](#) is worthy of note, faith.
The author is indebted to [Lex Schenke](#), his Master's degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor, and Brian Henderson-Sellers, his Object-Oriented Technology instructor, both also at UTS. The author makes mention of his colleagues at UTS; Deider Mendez, Cesar Orcando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

Theory

2004-11-10 www.JesusInTheLamb.com		
Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename		The default, for example, is index.html
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

2026-06-24T18:01:00 What use is the word... according to you?

1. Synonymous ([Genesis 22:8](#), [Genesis 22:13](#))
2. Domain name valid
3. Grammar correct

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.

There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=(1) AND (ChapterID)<=(150)))
```

will set the range restriction.

[There are individual chapters for each book.](#)

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=(1) AND (VerseID)<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInHebrewEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
AccordingToManyShavespokenID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWorldIndex.ca](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [Design by contract](#) assertions, and particularly pre-conditions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (VS) single t. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture View's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
will decide the greatest value for ChapterIDSequence. An alternative SQL statement

```
select count(
distinct
  cast(BookID as varchar(6))
  + '-'
  + cast(ChapterID as varchar(6))
)
FROM Bible..Scripture
Another SQL statement
```

```
; with cte
(
  BookID
  , ChapterID
)
as
(
  select distinct BookID, ChapterID
  FROM Bible..Scripture
)
select cnt = count(*)
from cte
The SQL statement
```

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from [Genesis 1:1](#), and ending at [Revelation 22:21](#). The SQL statement

SELECT COUNT(*) FROM Bible..Scripture
will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),BookID),(0),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0),(3))))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 45 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

        public const int VerseIDMaximum = 176;
    }
}
```

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SoC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hugg](#), who will talk of each word's specifics, and [Chuck Missler](#) who noted that the first occurrence of the word, [love](#) is in ([Genesis 22:2](#)). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The [Exact](#) result for the author's initials, K.A.A., is Karkas, meaning [Babe](#) ([Joshua 15:3](#)).
2026-03-30T11:30:00 I will assist if life doesn't share us apart... spread us apart ([Genesis 1:16?](#) [Helkai](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
is for determining the highest value. The SQL statement
```

```
SELECT COUNT(BibleWord) FROM Bible..Exact
is for determining the word count. The SQL statement
```

ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
is 789631; this is the count of the words in the KJV Bible.
```

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY (FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible.Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - HisWord, Remember, APass, ActToGod.

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format (Numbers 12:6-8). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English which is better interpreted: (Matthew 1:23, Mark 5:41, Mark 15:24, Mark 15:24, John 1:38, John 1:41, Acts 4:26); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedance mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator, a recent success is with the <http://translate.google.com> web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings (1 Corinthians 12:30, 1 Corinthians 14). To account for the discrepancy in translation, the author sought help from the LORD:

- 2015-11-02T22:55:00 And, the money, is the money, convert.
- 2015-11-03T02:17:00 The specifics, a language.

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an insert trigger, will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column and loss of data.

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light (Genesis 1:3, Genesis 1:3). The action is in the commentary column; God separated the light from the darkness (Genesis 1:1-2, Genesis 1:4).

Microsoft SQL Server generates sequential numbers for the HisWordID identity column. The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the primary and/or foreign key; the backbone of the referential integrity constraint.

The Dated column is of the Date/Time type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the (UTC-08:00) Pacific Time (US & Canada) time zone. There is a preference for the Coordinated Universal Time (UTC) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The HisWord_view view composes of the computed columns deducted from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the refant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like (Genesis, Manar Hebraic method, Titles of God).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. "The terminus a quo DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The terminus ad quem DatedUntil is when a prophecy partially or entirely comes to pass." (Koionia House). DateDifference.ans is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from wikipedia.org by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs (Luke 4:19).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

HR children.

Scales & Measurements		
Type of Scale	Commentary	Example of Scale
Nominal Scales	The numbers may serve as tags or labels which are quantitative with no values.	- Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4, these postfix a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us. - Telephone number
Categorical Scales		Dewey Decimal Classification used in libraries
Absolute Scales	An absolute scale is a count of individual, distinct items in the set.	- This may be the physical count of word occurrences in the Bible. - The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. - The SQL COUNT() function returns the number of rows that matches a specified criterion. - The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query.
Ordinal Scales	An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it.	- In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. - An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. - The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE. - The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation.
Rank Scales	They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems.	- Military ranks - Mohs scale for hardness (geology) of minerals - Scoville scale for the strength of peppers - Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response Turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. The Contact table contains a title column. SQL offers a group by, and having clause. Strength of password? Soundex?
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	- HTML input range - CSS percentage

(See Celko, 2025-03-07).

Relational Database Hierarchy

- Catalog: Is a collection of databases, for example, Bible, WordEngineering, URL.
- Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
- Table: Is 2-dimensional with horizontal rows and vertical columns.
- Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf, BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VersID	Bible.Scripture_View.ScriptureReference	Bible.udf, ScriptureReference()
Determination is achieved through computed columns.		

(Allen G. Taylor, 2024).

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1</pre>
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	<pre>SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1</pre>
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5</pre>
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	<pre>SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)</pre>
Extremal query	It returns either the minimum or maximum extreme.	Statistics	<pre>SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)</pre>
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	<pre>SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC</pre>
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	<pre>SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup</pre>
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts
Principle 2: Check Assumptions
 ◦ This whole thing started with keeping [a work reference](#).
 ◦ Even though Yonuba is the native language of the author, he still and invariably relies on [translate.google.com](#).
 ◦ The author depends on a typing assistant.
Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:
 ◦ Data loss or corruption because of issuing the database modification command and lack of timely archiving
 ◦ Hardware, software, or network failure
 ◦ [Vendor withdrawal of support](#)
Microsoft:
 ▪ Introduced .NET core and Model-view-controller (MVC).
 ▪ Inability to restore deprecated Microsoft SQL Server backup versions.
 ▪ Command-line reverse-engineering of database script does not conform with the newly released data types.
Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
Principle 6: Define Time Horizon
 ◦ [What period has God used?](#)
 ◦ In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ([Numbers 1-3](#), [Luke 2:42](#)).
 ◦ On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ([Numbers 4-30](#), [Matthew 2-16](#)).
 ◦ In the year 2007 — generation time-span: this maturation will bring water. My 40th year ([Numbers 14:33-34](#), [Numbers 32-13](#)).
Principle 7: Generate Multiple Solution Options
 ◦ [How versatile am I, at amendine others? I have to rely my perception to technology providers.](#)
Principle 8: Design Around Constraints
 ◦ [Relational databases offer the ability to set constraints.](#)
 ◦ Data type
 ◦ Nullable
 ◦ Primary key and unique index
 ◦ Foreign key
Principle 9: Weigh the Pros and Cons
 ◦ Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
 ◦ The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture-reference column may not be a unit.
 2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author, the WordEngineering database size, is currently 33390528 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1115.1
sp_spaceused	The WordEngineering database currently uses 32607.94 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 122966.
sp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
sp_mover	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. Most select applies to Bible..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
<, <=, !=, <=, <=, <=, >, >=	The operators listed will check for a single value. The operators that consist of != will check for non-matches. In most cases, rarely is this in use. != or/and >= This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Querying for a date or number will search for particular types.
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later limit to required rows.

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction %*/%
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, <=, >=, !=, =
Table join supersedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identify Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non- surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfiled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWorldEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server imposes datatype limits.

(Itzik Ben-Gan, 2023-07-03).

Gitflub

The Author Uses the Git Code Repository

Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalistic page .load() and query .submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordUnion9432.js>, which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordUnion9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table. DateUtil - DateFrom: 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordCrossDateUtil/Calendar.js> 2023-02-17 - 2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordUnion9432.js>

```
fetchHeader: async function
{
    fetchUrl,
    fetchRequest,
    callback,
    uidisplay,
    rowColumn
}
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uidisplay, rowColumn);
        })
    }
    catch (e) {
        uidisplay.innerHTML = e;
    }
};
}
(Robert C. Etheredge, 2017)
```

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), JavaScript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation, the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordUnionGetAPage.html> calls the <http://github.com/KenAdenij/WordEngineering/blob/main/JS/WordEngineering/WordUnion9432.js> ajax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultTable div will contain the particular details that the program generates.

(Microsoft)

Data Science

What is data?

- The data that the author fundamentally operates on is the word from God. The initial and primary data is textual, but now the author places importance on dates and numbers.
- What should you do with a number? Even though the Hebrew language is AlphaNumeric, the numbers in the Bible are in words ([Leviticus 19:26](#)). When the author receives a number, he records it in the HisWord's table, Word column, as a numeral.
- The author extracts knowledge from data by finding meaning to the word.
 - The author uses scientific methods, such as counting the number of occurrences, determining the first and last occurrences, and excluding the parts of speech.
 - The actionable insights take, so far, is to computerize the work.
 - The vast majority of the work is structured data. Unstructured data does not fit into the background of the author.
 - The application domain is Bible studies; how relevant is the Bible to our work?

Practicing Data Science

- Empirical, find implication from the Bible?
- Theoretical, to determine a better way to doing work?
- Computational, is human labor replaceable?
- Data-Driven, constraints help us to sanitize data. Default values reduces task, are less error prone, brings arrangement.

Where to get Data

- The Bible is our primary source of data.
- The author records information sources. This is either a person or media?

What you can do with Data

- Data Acquisition: The Bible is available on the Microsoft Access database.
- Data Storage: The author imports this tabular data into the Microsoft SQL Server relational database.
- Data Processing: The SQL Select statement is the means of retrieving data from the database. This is not always a monolithic fashion; since there are various ways of composing the queries.
- Visualization / Human Insights:
 - The raw data is viewable on the Microsoft SQL Server Management Studio.
 - The web service, asmx, file, which is accessible from the browser, offers the opportunity to fill-in the query and see the JSON result.
 - The html presents the result in a human readable format.

Defining Data

- Quantitative Data: This makes itself subjective to numeric computation. AlphabetSequence is an attempt to give value to words.
- Qualitative Data: These are rarely measurable and are personal interpretation.

A brief introduction to Statistics and Probability

- At the beginning of the study, the author made a presumption that words are unique. Later the author found out that there are duplicate Bible verses.

(Microsoft)

Data

Structured and Unstructured

Structured data is alphanumeric put in row-column. Unstructured data is either text, image, audio, or video. This research is mainly structured data.

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js> (Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but *now*, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationalTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use [CSS sprites](#), since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification, because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

```

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [GitHub.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Snapshot](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.

(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://ecomfortengineering.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/41906110/designing-rest-api-endpoints-path-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML, outweighs the newness of the JSON transport medium.
- HTTP Status Codes: Query satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary.

The Remember tables.ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column.

An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key.

The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.

When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system.

This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
{
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
}
{
    if (IsAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is $O(\text{word.LengthSize})$

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.

The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.aspx	Query(word)
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineScriptSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

[GetAPage.html](#) Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering – Systems and software Quality Requirements and Evaluation (SQuaRE) – System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right [.NET Framework Data Provider](#). The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.aspx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

1. Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 1. git status
 2. git add
 3. git commit
 4. git push
2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
3. Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for there specific use.
4. Backing services: These are external independent resources, such as the database, SMTP.
5. Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables. The SQL Server encompasses services which are stoppable to do data files backup.
7. Port binding: Web services traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
8. Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
9. Disposability: The author's take on expendable work includes the following:
 - Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
10. Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.
 - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: DevOps expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
11. Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

When

God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week (Genesis 1-2)? Seniority comes first ([John 1:15](#), [John 1:27](#), [John 1:30](#)).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

Machine Learning

Our entirety chiefly pertains to Him.

Multi-layer Perceptron (MLP)

DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DateDifference.aspx is a server-side C# ASP.NET web form.
The Remember's table computed columns are Transact-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.

Features

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900 \times (2^8 - 900 \times 256 = 1.932334983228891510545406872202e+756$.

Degree of Belief

In [GetAPage.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

Frequentist Probability

In [GetAPage.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ([John 19:30](#)). [Specifications, is done](#).

Bayesian Probability

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

Random variable

The AlphabetSequenceIndex may range between 1 and (8000×26) , 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

Probability Mass Functions

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.

(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

Discrete

The identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary

The Testament column is either Old or New.

Ordinal

The identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature

The most important predictor columns are the Word, Dated, and ContactID.

Outcome

The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.
The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

Web Design Fundamental

Business Model

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him.

Content Authoring

How query means more ([Isaiah 43:22](#))?

Steer	
Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization?
	- The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. - With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URL, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence	
Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

A type of [us](#) is a kind of [us](#)? GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript. HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration. Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML. There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

Naming Conventions

JavaScript relaxes variable declarations. Variables do not need explicit declaration, and these declarations are redefinable. In spite of this, the author is judicious about variables. The data- attribute is user customizable.

(LOOPE Lingo Object Oriented Programming Environment)

The author acknowledges positive bias in his work. Sometimes the author collaborates with what is said to him. The author may add reinforcement to his word. The author values the population average over the sampling average. For example, the Bible is complete, but the work of the author is on-going.

(Andrew Kellerher).

Causation versus (VS) Correlation? Let the involvement of a personal self; resemble the involvement of a useful self.

(Adam Kellerher).

Bias? Being the other?

(Adam Kellerher).

Search engine optimization (SEO)

Elements

It is only recently that the author has become aware of HTML composition.

Element	Commentary
Title tag	The maximum length of the title tag is 60 characters and it is shown on the browser's title bar or page's tab.
Meta Description tag	This may be upto 155 characters and it indicates the page's content.
Meta tags	The other meta names include keywords, robots and author.
Heading tags	H1...H6 with H1 being the most important.
Textual content	Search engines predominantly optimize for text. Other media are larger in size and duration. When did He promise generational growth (Psalms 22:30, Genesis 3:15, Genesis 12:7, Genesis 13:15, Genesis 15:13, Genesis 15:18, Genesis 17:8, Genesis 24:7, Genesis 26:3-4, Isaiah 53:10)?
Alt attribute on the img tag	Visually impaired people have difficulty comprehending images.
Fully qualified links	Relative links meet the author's requirement, since it is hostable on external sites.
Sitemaps (both XML and HTML)	A sitemap documents the files and their relationships.

(Bruce Clay, 2022).

Literature Review

Reading improvement? The literature review and bibliography sections are scanty and brief. The justification of the author is that in the Internet age the references and content are available on-line, and putting into words other people's work is not the author's core strength. When the author recounts non-original thoughts, the author mentions this.

Results and Discussion

The information in the Bible, written, thousands of years ago, is true and applicable, today; the words heard by the author is consistent and it correlates with the Biblical theme. It was Me. I was telling you. This research does not limit itself to a particular Bible subject nor word. But, rather it illustrates the response of the author to the word of God. What artifact can the author produce, in compliance with the word of God? Is the training of the author beneficiary or lacking? Biblical priesthood training and profession; begins at the ages of 25 and 30, respectively. 2024-01-06T05:43:00 [What does God choose as subject \(John 15:15\)?](#) The author is working on variations of AlphabetSequence: These are not suitable for general use. These are man's exposition of God's word. These are positional.

- 2-Words: [My Condemn](#) The first word is the BookID; the second word is the VerseID.
- 3-Words: [Who is your munseet? Crazy, mister Martin, Mister Martin as a seod.](#) The first word is the BookID; the second word is the ChapterID; and the third word is the VerseID.

Biblical generation - 40 Biblical years

- 1. 2007...2008 Common Era - the author is 40 years old; the author mentions time.
- 2. 2004-07-16 Self, I in 1000, African descent United States of America (USA) abstain as mercenaries to Germany. Leviticus. And at that time, you rejoice, that the LORD, did have a heart. Father's land. Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000.
- 3. Actor... role commencement date?
 - 2026-01-15T04:49:00 [You look at life... and you feel down.](#) A politician who is probably Bola Tinubu, said how he became a politician.
 - 2026-01-16T07:51:00 A person was making fun of Dikembe Mutombo on his draft day. Dikembe Mutombo was sitting to the center-west. A man planned to talk to a woman. Some people were eating, and someone took a piece of bread.

- Biblical numbers for calculation.
- Biblical separation into Testaments, books, chapters and verses for referencing.

2026-03-14T02:28:00 WordEngineering in Islam, Moslem

- AlphabetSequence is the title of the algorithm which calculates chapters and verses placed forward and backward in the Bible. 2026-03-14T02:28:00 An Alfa is an Islam Moslem teacher.
- 2004-07-16 Self, I in 1000, African descent United States of America (USA) abstain as mercenaries to Germany. Leviticus. And at that time, you rejoice, that the LORD, did have a heart. Father's land. Air Drop. 2026-03-14T02:28:00 In Arabic Alf is the word for 1000. 2020-03-13 20:20:55.690 I was told that an elderly male of undisclosed lineage that he wished to keep a secret was monitoring an event, kinsman redeemer. He would come out after a side event. He risked financial loss, travel distance. A person died. I heard, air drop. I later heard Cain.
- 2026-03-14T02:28:00 In a form, I of the query options was the writing direction, and another data entry term was robotics.

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL), a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget. Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	External - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment. Internet front-end files (html, js, .css)	Hard disk. Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

2020-08-10 [Creating Your Own Library Posted on July 25, 2026](#)

1. In 2002, while I was taking computer courses at [Oblivion College](#) 2026-08-11T22:29:00 to renew my skills... I started copying sample C# programming language source files.

2. On about 2003-10-06, I started to model relational databases to record the words spoken by the Holy Spirit to me, contact address, books, and booklets.

3. I also stored to reference 2026-08-11T22:38:00 religious work... Bible, dictionaries, and commentaries. 2026-08-11T22:56:00 These were initial Microsoft Access... and file stands for Master Database File, that I exported and imported into Microsoft SQL Server relational database tables.

4. 2026-08-11T23:02:00 My expectation... was to build work samples and demonstration deliverables for 2026-08-11T23:04:00 eventual employment.

5. 2026-08-11T23:05:00 I understood my limitations in the past... was not having a supportive framework, 2026-08-11T23:07:00 and recent work experience, and in-demand market skills.

6. 2026-08-12T00:03:00 [How the ease of using... helps me.](#)

7. 2026-08-11T23:16:00 [A readiness to listen... learn.](#)

8. 2026-08-11T23:20:00 [What uses are available.](#)

9. 2026-08-11T23:33:00 [What does the world prepare for me... that I need?](#)

Customize the content of an url? This is how the web page implements this technology. This is how-to implement it in your preferred technology.

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Expendable Data

AlphabetSequence concerns include:

2. How essential are we to the personification of God?
2. The spirit man holds
3. Why did He exclaim: "He view us again" (Genesis 18:19) ?
4. How are we acceptable to what is new? How does God, build up, to His word (1 Samuel 9:15-17) ?
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soets, etc, is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses (Matthew 23:14, Acts 8:37, Acts 15:34, 1 John 1:15)
14. Naming of words (Genesis 32:25, Genesis 35:10, Genesis 47:27)
15. We have been doing uncorrecting now
16. I said, I heard. 2021-04-11T08:37:30 In a location to the North, probably 99 Ranch Market or Marina Food, or Daiao. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6.9 is too short, tight, said, 6.9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. What does He, *revelation* as *dream*? Alphabet(six ten) is resource minimal:
 1. Doable by hand
 2. Compute: Not technologically demanding
 3. Maturity: Since 2002
18. *Sanctification* into *Sanctum*
19. Is this a finalized work, and how is it accessible? It is a transient database.
20. Scripture reference in context.
21. To complete the life of pleasing God, as I choose men.
22. Hearing and spelling the word...and not covered... by the grammatical correctness.
- To co-operate as we are. Robert Estienne English Alphabet

Divided as separated. Go this way, that way.
 I want to program, but I don't want to match two programs together, except for deep thought.
 When God grants increases; such as in creation, when God counts the days, and separates it into evening and morning. Increase was denied were first explicitly mentioned during Noah's flood. Those differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Noah's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ([Exodus 1-12](#)). [Exodus 30:24](#), Genesis 40-41

[Exodus 30:24](#) is separable into four layers, those are the link, Internet, transport and application layers. No breaking ([Mathematics 19.8](#))

Marriage is not a practice, in the life after, resurrection. (Matthew 23:20, Mark 12:25, Luke 20:35, Revelation 21:2) 2 Corinthians 11:2 - Coincidentally, the disciple, who Jesus loved, John the apostle, does not mention this event, in the Gospel of John. It is more of a **farther** than **want**. Jesus resurrected, after three days (Matthew 12:40, Matthew 26:66, Matthew 20:35, Revelation 21:6) Mark 8:31, Mark 14:58, Mark 15:29, Luke 24:6, John 19:30, John 2:20, 2 Corinthians 11:2, Revelation 21:2, Revelation 21:7.

The breaking of bread (Psalm 24:10, John 19:36).

On the client, HTML, is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.

The application is not in a dynamic web library (DLL), and it is separable into client, database, and application logic, but the advent of a language integrated query (LINQ), this delineation is slowly diminishing. Ling rivals previous division of labor.

The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language. NoSQL is a challenger.

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript. The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?
The client started as HTML, but now has JavaScript and CSS.
CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.
JSON and XML have made in-roads.

To each resemblance

1. Where His word, expected mine? When I get a word from God I could do the following?
 1. Write the word in my notepad, and never refer to it again.
 2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 3. Produce an artifact based on the word.

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is capacity, full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability. The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

What did He find... as useful

What did He find... as useful (Matthew 21:42, Mark 12:10, Luke 20:17)

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: ▪ Client/Server autonomy. Client embedded-SQL. ▪ 1. The datetime column defaults. 2. The identity column is auto-generable. 3. Computed column: What can the computer do for us?
Microsoft sqlecmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenadeniji, kenadeniji.wordpress.com
Refer to dates.	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

A Causal to Hearing Words

He said and He did. Word work (Genesis 11:1-9) The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include:

- 2026-07-25T16:15:00 Learning and modeling the Bible and building a framework and a set of reusable components with class objects instantiated collections. This initial application, process logic, includes scripture reference, the 66 King James Version (KJV) Bible books and query-able Bible Word, and personal initiatives. For example, AlphabetSequence.

During my education, I learned how to write a thesis, do practical project building, select electives, and focus on specialization for specialty.

- 2026-07-25T19:17:00 What will have the most impact on your life?

At Newark, California (CA) 94560, I owned and lived in my 1st American house.

- 2026-07-25T18:11:00 What he was saying he wants to be (Genesis 4:1-26; Genesis 24-50)?

At the intersection of Paseo Padre Parkway and Hall Way, north-east. I was walking southward. When I first received word, it was pertaining to my personal life and experience, vocation, and relationship.

- 2026-07-25T18:11:00 We must succumb to use? Phoo Chan first changed his south-west tire, and secondly, Phoo Chan changed his north-west tire, and his son, Aiden Chan, watched and aided.

- Read and recite the Bible.
- Pray.
- Praise and worship.
- Take computer courses at [Ohlone College](#), in the Fremont and Newark campuses.
- Read books and magazines at [Barnes & Noble](#), [Borders](#), [Walden Pond Books](#), [Wal-Mart](#) and public libraries.
- Listen to Christian commentaries.
- Sexual abstinence and celibacy.
- Solitary living at [Newark City in California](#), [Patmos](#).
- Fast, everyday, only ate, once a day, in the evening. I ate [Nomura Holdings](#) Kokuho rice.
- Walk, two hours a day, between Newark and Fremont, to do programming. Learn how to program today's technology, with relevance to the word's revelation.
- I was living on a meager income ([Exodus 2:15-25](#)).
- Only familiar with [Case-based Reasoning](#) and [Use-Case](#).
- AlphabetSequence is abcedary.
- Set-based. Effort to record everything [Bible code](#).
- This is a man, he wanted to know about his favorite ([Daniel 1:3-21](#), [Daniel 9:23](#), [Daniel 10:11](#), [Daniel 10:19](#))?
- [Obsecrance](#) ([John 5:19](#))
- [Personalization of Realization](#) ([Proverbs 24:2](#))?
- I will make the difference ([Deuteronomy 26:5](#), [Ezekiel 16:3](#))?
- What we all ought to be?
- 1997-12-31 I will not entertain Nada. Prophets make New Year predictions.

There are duplicates in the Bible.

Type	Commentary
Name	Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2 Samuel 12:24 , 2 Samuel 12:25 , 1 Samuel 25:5 , 1 Samuel 25:25). • Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes names • Name changes, such as Abram to Abraham, Sara to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul • Name misspelling, Rahel for Rachel. A rewording of your view. • Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges • Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	• Deuteronomy - Remembrance • Monarchy - Kings versus Chronicles • Gospels - Our LORD's, life story • Apocalyptic - Daniel versus Revelation
Quotation	• Retelling previous events • Prophecy fulfillment • Answers based on scripture
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12-5

These duplicates may introduce statistical error and require clarification.

Chuck Missler versus (VS) the author

Chuck Missler of Koimonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2018-06-02 Candlelight Celebration of Life Service - Chuck Missler Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2025-12-22T08:48:00 Teachme...navisator 2014-08-18...2025-12-22T08:48:00~4144 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 Stay the course. 2026-05-16T18:40:00 What is in dispute? 2026-05-28T17:17:00 The author associates Chuck Missler with teaching each story in the Bible. • Strategic trend • Introducing other Bible scholars and mentioning their particular contributions. • Making laypeople teachers of the Bible.	

(Alberto Cairo, 2026)

1. 2026-05-16T07:26:00 Scripture references uttered to you

I am not asking You to take my word as Yours. I am asking You to change my word as ours. (Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13)?

- 2026-05-14 Inconsistency —
 2026-05-14T21:42:00 [The author has used different source from composing his work](#)
 2026-05-14T21:46:00 [How we are... in the midst... of each other.](#)

- AlphabetSequenceIndex language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026)

1. 2026-05-10T14:05:00 Re-locate:
 1. Prior to 1988-10-15 First dream:
 I Am taking you on a journey.
 2. 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).
 Face to face: Out of Egypt, have I called My Son (Hosea 11:1).
 3. 1999-05-07 First word, after re-locating to the United States of America (USA).
 Face to face, in the wardrobe, closet, of the master bedroom. Ile eyan mi lon lo yi. It is my person you are going to

1. They were taught by the spirit... to talk as the spirit

The difference between the ordered list tag, `ol`, and the unordered list tag, `ul`, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

1. I have always drifted toward the academic

1. Power of the Holy Spirit ([2 Peter 1:21](#))

1. **WorkflowEngineering query - database**
Structured Query Language (SQL) specification parts include the select column list, by filter restrictions, and order by sort.
1. Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
2. Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, or last name, or last name. When a user knows the full name, this is the advised option. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
3. Order by: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII.
2. **WorkflowEngineering query - client**
Technology include Document Object Model (DOM), XMLHttpRequest, XMLHttpRequest, XQuery, XPath.
1. Query arguments are possible to each client user-interface (UI) via hypertexts or browser-specific address links. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
2. Navigation: The ID attributes provide a document-wide unique identifier for an element. 2020-04-27T17:43:00 The author conforms by the Pascal notation.
3. 2020-04-27T18:10:00 Find is useful.

1. When I started Kowe, I was a deported Yoruba man.
 - 2026-04-27T19:59:00 This I will find useful... for my people.
 - 2026-04-27T20:13:00 I could use the computer... for my weakness.
2. When I started AlphabetSequence... 2026-04-27T20:22:00 I must find... for what... He accumulated in the past (Genesis 15:5, Revelation 16:12)

1. The titles of God, and their translations ([Genesis 16:13](#)).
2. The identification of His creation. For signs, after death, substitute, beginning and end ([Hebrews 9:17](#)).

Passover: 2026-04-02, 2027-04-22.
Feast of Unleavened Bread: 2026-04-03, 2027-04-23.
2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.
Implementation options include parsing a data-definition language script file (SQL), or interrogating the database schema.

- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
- For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
- 1. 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
2026-04-15T07:44:00 Natural primary key columns.
2. 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

How we repeat life? (Matthew 24:34)

1. Old Testament: Knew, birth, sacrifice, death, worship (Genesis 4)
2. New Testament: Worship, circumcision, baptism ([Matthew 11:11](#))

How elaborate... is the view... of my participation (Daniel 2:45)?

2026-05-03T15:49:00 Handling Missing Data

The author started receiving word from God shortly prior to his 21st birthday, which was coming up on 1988-10-15. But, the author did not start writing a blog until at about 2000-10-05. The author started using a database for data entry, and the author commenced AlphabetSequence at about 2002-12-03.

2026-05-03T15:49:00 [The greatest length](#)

1. The author was incarcerated at the Alameda County Santa Rita Jail, 5325 Broder Boulevard, Dublin, California (CA), (925) 551-6500, 2nd occasion between 2028-03-07T00:00:00 -2028-03-14T00:00:00.
2. 1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 2060 Fairmont Dr, San Leandro, California (CA) 94578, (510) 346-1300.
2. 2004-12-06T00:00:00 And, subsequently at Villa Farmington Mental Health Rehabilitation Center (MHRC), 15200 Foothill Boulevard, San Leandro, California (CA) 94578, (510) 352-9690.
3. 2026-05-03T17:42:00 *Information record is intermittent during trips.*
4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

Group by Testament

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books.

Group by HisWordIE

2026-05-04T18:05:20 The HisWorldID column is for groups of simultaneous words, most likely, that were spoken on the same dates.
2026-05-04T17:23:00 The Nigerian government versus (vs) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and mediocre Nigerian male partners. I saw 2 Microsoft-affiliated females beside a car in the north-center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Hebrews 11:7](#)).
2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, 16th, and thirty-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Luke 16:16](#)).

(Aileen A. Nielsen, 2020)

2025-03-17T11:47:00 [Side with church... or side with the children](#) (John 7:51, Genesis 21:9, Genesis 27:41)?

2025-03-22T17:52:00 Nullable column lifecycle? [How I bring about... a re-use?](#)

The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.

- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number. Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
- Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

Data Attribute

2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?

- data-webservice: An invocable web service to provide supporting information. Via a web address, url and query string.
- data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For example

```

(SELECT
  'Alpha' AS InfoType, COUNT(*) CountInfo,
  (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
  ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word NOT LIKE "[a-z]*"
UNION
SELECT
  'Numeric' AS InfoType, COUNT(*) CountInfo,
  (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
  ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word LIKE "[0-9]*"
UNION
SELECT
  'MAIL' AS InfoType, COUNT(*) CountInfo,
  (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
  ) PercentInfoTotal
FROM WordEngineering..Hisword WHERE Word IS NULL
UNION
SELECT
  'Total' AS InfoType, COUNT(*) CountInfo,
  (COUNT(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..Hisword)
  ) PercentInfoTotal
FROM WordEngineering..Hisword

```

InfoType	CountInfo	PercentageOfTotal
Alpha	111590	93.740811989146
Numeric	851	0.714879747313
NULL	6600	5.544308263539
Total	119041	100

- data-ssn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language" ([Acts 22:2](#)).
1. Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
 2. In the WordEngineering database, the *WordEngineering* column, contains learned spoken language translations.
 3. In the *WordEngineering* database, *HisWord* table, is my English/Translation column which is not null when the word column contains non-english words.
 4. In the *WordEngineering* database, *HisWord* table, there is a location column, physical; and there is a scene column, dream.
 5. In the *WordEngineering* database, *HisWord* table, there is a *PseudoCo* column, my profession.
- When?
1. 2025-01-01 07:13:00 Microsoft Word and past-tense. Mark Boeken of Electronic Data Systems (EDS) and the verb, will, future reference.
 2. 2025-01-01 07:11:00 Online transaction processing (OLTP). Online analysis processing (OLAP).
 3. 2025-01-01 07:09:00 The computer age prior to 2025-01-01 07:00 the Internet, no 60fps or more on the Internet.

From: Andrea Holzmann Andrea@SherlockTalent.com
Sent: Thursday, February 19, 2026 17:55
To:
Subject: Your SQL Server background caught our  -- 10-20 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:

- SQL Server DBA & User Support Specialist - 2000 Remote - Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance - provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution - no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SSRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bounties! Send referrals to referrals@sherlocktalent.com.

- 2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

1. 2024-10-04T09:00:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
2. 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, tabindex.
3. 2024-10-04T09:42:00 As in most cases, initially accept the default values, for, setting, the data columns. You may adjust and be precise, later.
4. 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY_INSERT, DBOC CHECKIDENT statements.
5. 2024-10-04T05:42:4000 This is what I am unable to do with the graphical user interface (GUI), this is what I am inspired to do. 2024-10-05T02:49:00 Inference... remains our resource... as realistic... as possible. 2024-10-04T05:42:4000 This point... more adjacent to one. 2024-10-05T02:59:00 Microsoft (Office)... Hypertext Markup Language (HTML)... Web page... no, the machine produces that? 2024-10-05T02:51:00 Good I am paired... doing the same?... as realistic... as possible.
6. 2024-10-05T05:05:00 What do I need the other person... to do?
7. 2024-10-05T05:05:00 Need after 2024-10-05T05:10:00 (I know 5.5)* E. F. Codd in 1970, proposed the relational database.
8. Primary key
 - The natural primary key for the url table is the column url, the 2026-07-16T10:54:00 database updates an existing url. URL (Uniform Resource Locator), Uniform Resource Identifier (URI).

Keyword	Commentary						
Volume	sp_spaceused @objname = 'HisWord' <table border="1"> <thead> <tr> <th>Keyword</th><th>Value</th></tr> </thead> <tbody> <tr> <td>Rows</td><td>115689</td></tr> <tr> <td>Reserved</td><td>28296 KB</td></tr> </tbody> </table>	Keyword	Value	Rows	115689	Reserved	28296 KB
Keyword	Value						
Rows	115689						
Reserved	28296 KB						

Keyword	Commentary	
	Keyword	Value
	Data	17104 KB
	Index_Size	9648 KB
Velocity	The author does manual data entry.	
Variety	At the beginning, the author parsed XML files into textual relational tables.	

(Jack Hyman, March 2024).

Data Types

HisWord table
Qualitative (categorical) non-numerical/descriptive - nominal (non-ordered), ordinal (orderly) or
Quantitative (numerical) uses numbers - discrete (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth (Acts 7:20)
- Family (Acts 3:41)
- People (Hebrews 3:9)

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- What I am good at doing...is what He is good at making (Genesis 41:32-57, Genesis 1:1-1:2, Genesis 4:26)
- Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
 - 1. GetAPage.html serves as a gateway to specialized links.
 - 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality (Daniel 9:24)?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deducible until ignoring the parts of speech
- Date difference difficulty lengths between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

You could say, this is what I do... Why I do it?

- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences...common?
- Experimenting...as the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. Stimulates?
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. We all make our followings.
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glasner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations. How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reorganization may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
2. Simply creating a HTML anchor to a source url
3. Fetching, parsing, and building the results of a web service

Our consuming our trade (1 Samuel 25) To be comfortable of app.

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8)

Location of content

- Flat files (html and xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependant
 4. GetAPage.html HisWord section: Time variant
- For a period of time, we are as we seem we are? What needs a success (Genesis 4:7, Matthew 14:8, Mark 6:25)?

(John Calvin Maxwell, 2023).

What do I desire...as part of significance?

1. Moses? Prophet (Exodus 4:10-16, Numbers 17:6-8, Deuteronomy 18:15)
2. Abraham? Seed (Genesis 17:3, Genesis 15:2, Genesis 22:3, Genesis 22:12-18, Hebrews 11:17-19)

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was Ie eyan mi Ion lo nyi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

2023-12-15T08:40:00

What substitution...we have ahead?

Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

- Machine Instructions Metric: This is the size or count of the machine instructions.
- Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
- Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
- Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
- McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspt, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The decorative work consisted of a proof-of-concept that is easily replicable.			

(DeLean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design

Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(DeLean Tolbert Smith).

To know my part as Hs?

- [Contact/Maintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- [I have decided to work on a gradual interopce system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? [To recognize the following as 1 \(2 Summed 3-39 \) ?](#)

Fixing your website's JavaScript performance

- Long tasks:
 - Yield to the main thread: the `PageLoad` event handler performs an `IsPostBack` check, and if it is not a `PostBack`, parses the `queryString`. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 - Optimize your rendering patterns:
 - Eliminating layout thrashing. 2025-07-11T18:17:00 [AJAX, only refresh updates](#).
 - Using efficient CSS selectors. The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 - The author does not use inline JavaScript.
 - The author minimally uses internal JavaScript for page-specific event handlers.
 - The author always uses an external JavaScript file, [9432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else](#) (Mark 7) ? 2025-07-12T16:44:00 [What did He do?](#) [How did I do](#) ([Luke 1:41](#), [Luke 1:44](#), Matthew 3, John 3) ?

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abundant's Law](#) comes into recognition in [GetAPage.html](#); by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://s-comfort.eprhaintech.com/WordEngineering/WordUnion/BecauseWeAreHeldThisOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreHeldThisOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Lifecycle

Period	Commentary
2000-10-05	Registered the WordEngineering trademark.
2002	Commenced recording the word from the LORD in the Microsoft SQL Server relational database, introduced the AlphabetSequence algorithm, and started developing Biblical applications using the Microsoft .NET and the ASP.NET framework, and coded with the C# language.
2015	Migrated to HTML files and web services using AJAX. What is resideable at home - is present abroad . This will continue the separation of duty approach. The benefit includes making accessible our work; focused user interface renewal. Open standard and performance gain.
2025-07-26T19:17:00	There is a table structure for repeat which would repeat the information in the preceding record. There is also a table structure for punable.

Interconnection

Technology	Commentary
Web pages	The bulk of the author's web pages are in 3 separate virtual directories.

Technology	Commentary	
	Virtual Directory	Commentary
	http://e-comfort.epraintech.com/InformationInTransit	http://e-comfort.epraintech.com/InformationInTransit/Contact/Maintenance.aspx Master-detail gridview http://e-comfort.epraintech.com/InformationInTransit/URIMaintenance/WebForm.aspx URI tables with a vertical view.
	http://e-comfort.epraintech.com/Gradual	Recruiters contact details. Master page with user components.
	http://e-comfort.epraintech.com/WordEngineering	AJAX website. Shared .dll. Stand-alone pages with hyperlinks to related information.

Development History

God doesn't use inform (Paulus 81-5, John 16:30). He mandates.	
Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.
Server-side Programming, Back-end	The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers purtion for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable.
Programming Style	This Inmange are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative.

In Australia, I got involved with the prison ministry at the Villawood Detention Center. The Christian missionaries that were serving felt that fellow migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contract consulting was at the Department of Training Education Committee (DTEC), so I had an understanding of integrating and skilling re-locating workers. I tried to share computer books, but inmates were undaunted by their relevance to their misery. They were expected to write letters to immigration officials. This influenced my desire to practice authoring Christian literature and improve my communication. How could I relate to less fortunate people? How may I be the one giving? How can I let the Holy Spirit partake on my side? What are these roles for, and how will I be a mediator? What do I share as a bargainer? All these are words to say. What do I mean as a human being? Where does the spirit hold its own? Computers are programmable, humans are useful. Where does a sick take the rest? What I am finding out, is how necessary I am as a person? How do I do my part in participating? What can you take from me, and make as your own? My words may not be what you will say, but how can your experience let you say? Imagine your life will be lived, as you say. When the times, programming lines, lines of code, play out a scenario. So words make meaning as sufficiency. Whose life have I lived to complexity? To the fall of His deed (John 15:24)? What can His prove relate to me?

What did He know as one? First, pre-eminence, join.

Word	Member	Scripture Reference
God	Trinity	Genesis 1:1-2 , John 1
Day	Time	Genesis 1, Genesis 2:1-3
Babel	Language	Genesis 11:3

Written about us how many?			
Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Enforce a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly, a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is usable in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node in the web config. When the user decides to stabilize and admit no further changes; then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of word, meets today's expectations. The addition of the ActToGod table, demonstrates the maturity of the author, since it advances from data to information.

The author, first wrote his history, in multiple stand-alone files: HTML, XML, (Ages 2-22). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

Since the beginning, the author wrote a Contact/Maintenance.aspx server-side page as a user-interface (UI) to record contact information. This page remains active, till today. The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

- I have a product; where is the method?
- Adaptability:
- What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 2020 visible.
 - What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndex.ScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
 - The Biblical account wrote dreams and visions textually, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.
 - Where is the word leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this works as a reference. The widely acception of a word, accompanies preference and prevalence.
 - The result of the Bible, is how we use it. The emphases of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

[How to go about it?](#)

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication.

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry.

Guidelines and tools

A relational database is a substitute for text processing.

Stakeholders

[I am the primary contributor and beneficiary.](#)

Outputs

Outputs are created, transformed, or changed in state? [The constancy of the word is what we have above.](#)

(Alison Cox).

Lessons Learned

- Estern word: Leading up to 2008-03-07, I was not fully recording the word of the LORD (Job 23:12).
- I used to ask God for a word? To realize where my opinion lies?
- [Familiarization with data.](#)
- You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Joshua 22:11](#))? One of Myself offering as many as I need?
- Words heard between waking up and walking outside are written in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him. Putting Him into words.
- My time away from the family, United States of America (USA), may have helped me gain independence.
- In Australia, the words that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. [How can we bring a life, except ours?](#)
- [Do I decide the truth? Do I choose the truth?](#)
- [The importance of the Word is how it is made.](#)
- Post-dated: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station. Bay Street Emeryville BN.com Fire Alarm Panel 8. FDC Building A 5604-5634. [To mean, I decide the story?](#)
- [How did they handle the Messiah? \(Luke 1:38 \)? \[Consume the divide?\]\(#\) To need someone as I \(\[Genesis 15:2\]\(#\) \)? You know Me as capable of you? \(1 Samuel 17:36, \[Rehume 4:19\]\(#\) \)?](#)
- The Yoruba sentence: [Ma forban di](#), I will use wisdom to block it.
- [No difference in communion.](#)
- [Here useful you have been in determining which? How diversification the changes? \(\[Genesis 4\]\(#\) \)?](#)
- The Microsoft Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
- Difficulty level? Our work is divisible into writing the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yoruba, where there may be spelling and substitution errors. The commentary does not have to be exact, since it is an inference. Determining the correlative between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words and I sought assistance from Him. [A step to do is never forgotten of the LORD. Whose obscurity has He solved?](#)
- [What can we be, in the midst of a people, pertaining to God \(\[Matthew 19:12\]\(#\) \)?](#)
- [What do you know how to use, as you desire yours?](#)
- [Rich of God. Reach of God.](#)
- [How many are others \(\[Daniel 11:41\]\(#\) \)?](#)
- [I have to present God as I am allowed to be.](#)
- [How I want it to be, how He wants it to be? When does the word prompt the answer? \(\[Acts 10:41\]\(#\) \).](#)
- People have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Build or buy? Another thing of note is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) may be lost when there is power loss or when the application or computer shuts down for any reason. What is on the hard disk may be lost when the computer does not start, or there is a viral and intruder attack. How do we resume our work (1 Samuel 22:28)? Needs to be met?
- The author will record the publishing and receipt.
- An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
- [I didn't shift, until the movement \(\[Acts 1:8\]\(#\) \).](#)
- [Did he ask you to do it? \(\[John 8:44\]\(#\) \).](#)
- [By Him, about Him \(\[Genesis 1:1\]\(#\), \[Genesis 4:26\]\(#\) \).](#)
- [Timing urgency? \(\[Matthew 26:45-46\]\(#\), \[Mark 14:42\]\(#\) \).](#)
- [Could you need one part of Me and not deserve another? Biblical Calendar, Gregorian Calendar.](#)
- When can we do without AlphabetSequence? A place in the Bible justifies the word.
- O mo Bunmi, Clari re. You know Bunmi, Clari is this. We are inside a building and we heard that food is being giving away at West. I jumped down multiple rocks. There is a team to the South East and either Beni or Buki and their friends are sitting at Center. 04:27 Dizzy sleepy. 20:13 Beni or Buki, I forget who? I grew up with them, but I am no longer associated with them. Nuclear or extended family?
- What past the time ([Isaiah 61:2](#), [Luke 4:19](#))?
- What is in use?
- [That chooses I.](#) When I read the Bible, I adapt to the role I take.
- Relative to the world ([Deuteria 3:2](#)).
- If the words do not join? Consider separating or putting the lesser word in the commentary column.
- Do I determine I know?
- Check for grammatical correctness. As much as possible, put all the spoken word. Only adjust for spelling.
- If the word and scenery do not fit exactly, it may be a larger scenario.
- When C++ converts to an integer, it always rounds down, unlike C#. There may be a day discrepancy. To dual own?
- What I have learnt from Bill Gates, through using the software from Microsoft.
 - Normalize the relational database for on-line transaction processing (OLTP); specifically the Remember table should reference the HasWord table, and the Commentary column should not contain the duplicate data.
 - The BibleWord table may not be necessary to relate the HasWord table to the Scripture. How much manual work does the author do, and can the author automate this work?
 - What value can we attach to this work?

2025-11-27T16:13:00 When did you differ?

2025-11-27T16:13:00When did you defer? 2025-11-27T14:50:00 Ayesha Patel of Dulhan Grocery said her parents and her maternal grandmother traveled to India for a wedding, and either in July 2025 or August 2025 her parents had previously traveled to Africa. 2025-11-26, I saw a set of Hindi females, especially women, ordering food, and they were waiting to eat at Milk & Honey Cafe, Pegasus Center. Hauch Amy Tm took their order, and she was the waitress.

Considering processing and storing

How can I pass knowledge...as sharing (Genesis 2:7, 2 Peter 1:21)?

- Computers consist of microprocessors and memory. A memory is either:
 1. Read only memory (ROM)
 2. Random access memory (RAM)
 3. Hard disk
- Object-orientation combines code with data.
 1. Code - method
 2. Data - field or property
- A relational database offers the opportunity... to program and store data, respectively. Key names, checking, it cannot do range checking. There are no attributes.
- that means the name?
- Variables and self ref? Time, number ([Garcia 1-15](#) - [Garcia 1-16](#), [Garcia 2-2-3](#) - [Garcia 2-16-17](#))
- Constant? Name ([Garcia 19-2-3](#), [Exodus 3-1-4](#))

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to recompute the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the From/Until Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore non-standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partiality, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and closer affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro (Daniel 12:4)

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ([Revelation 3:7](#), [Revelation 5:5](#), [Revelation 22:16](#)). Joseph ([Genesis 37:2](#), [Genesis 37:9](#), [Genesis 37:19](#), [Genesis 39:12-18](#)).

Why we Accumulate the Same (Matthew 26:53, Revelation 9:16, Revelation 7:4-8)

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#)). Knew versus lay

Wanting a Member of..

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development: it had a beginning.

In the second sentence, second verse, God mentions that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

What relates a place...as one another? Observance of a particular use?

Word	Scripture Reference
Work word	John 14:10
Charity	

Word	Scripture Reference
Timeliness	Deuteronomy 18:22

The business of selling us apart?

Word	Scripture Reference	Commentary
Naming	Genesis 2, Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?

Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelling of the last ([Daniel 9:24-27](#), [Revelation 3:12](#), [Revelation 21:2](#), [Revelation 2:7](#), [Revelation 22:2](#), [Revelation 22:14](#))?

The author will want a conciliation with time?

AlphabetSequence is a novice attempt to tie the what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ([Genesis 3:8](#))?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/XenAdeniji>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 [However, time substantiated](#)
[link](#)2. The author suggests that Baptism of the Holy Spirit (Acts 1-2) is achievable in individual locations as a passage to the 3rd temple in Jerusalem.

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APlus tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BallFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Travin).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams. A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children. Comments do not impact programmatically, they only serve as guides for readers. A directed relationship may exist between a collection of source and target. A namespace is a container separator. An import facilitates the admittance of an external namespace. Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66. A constraint represents the range of valid values that a member may have. A dependency replicates changes between the supplier/client.

Value

Lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime. A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators. An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse. A Boolean is either true or false and it is normally used for validation. A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceCollection.Exact.cs](#). The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable](#) [UtilizeSQLServerManagementObjects.SMO.cs](#). A child may override a parent's virtual member.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods. Signals and receptions are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally. Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form nurtured from code-behind to code-behind. For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule. In C# version 9, a method may offer a covariant return type.

4. [Specialty of view](#) ([Genesis 12:11, Genesis 13:10, Genesis 22:14](#)) ?
1. 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
2. 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 **What attribute the word? Autobiography... tying it into Biblical event.**

[www.JesusInTheLamb.com](#)

Saint James the Apostle Catholic Church, 34700 Fremont Boulevard. At the intersection of Fremont Boulevard and Ferry Lane. On the 3rd day, he lifted up his eyes. 3rd bed from east. 5 poles east. 3 poles west.

1. What? - Jesus Christ ([John 8:56, Genesis 22:13](#))
2. What? - Passover Lamb ([John 1:29, Genesis 22:8](#))
3. When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations ([Matthew 1:17](#))
4. Where? - Galgaltha ([Matthew 27:33, Mark 15:22, John 19:17](#))
5. Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission ([Hebrews 9:22](#))

2025-04-05T09:04:00 **Composable Design**

2025-04-05T13:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. [How will I dictate His use as a person?](#)

(Juval Löwy of IDesign, 2019).

2025-04-24T11:20:00 **What did he see... on their side?**

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophetic attempt to understand technology, and its application to Christianity. The only date observed at the beginning was the calculation of the crucifixion of Christ. This is not defamatory, nor inflammatory.
- 2025-04-24T13:45:00 While the author is aware of other sources of information and conjecture, the author is undaunted.

2025-04-07T09:40:00 **What he found out... without?**

1. Faith ([Hebrews 11:1-2, Hebrews 11:8-19](#))
2. Without the camp ([Hebrews 13:11-12](#))
3. Rest ([Hebrews 4:4](#))
4. Reverence ([Daniel 4:5](#))

2025-02-22T05:31:00 **Our continuation of what we have here**

2025-02-22T06:19:00 Akehdah the binding of Isaac ([Genesis 22:12, Genesis 22:20](#))

[youtube.com/watch?v=9dXs9VHILXo](#)

2018-07-01...2025-02-22~2428 days (6 biblical years, 8 biblical months, 28 days) (6 years, 7 months, 3 weeks, 2 days)

2025-02-24T13:07:00 **With equal remembrance**

- Prophecy
 1. Passover Lamb: Our LORD's Supper
 2. Beware of the Yeast of the Pharisees ([Matthew 16:5-12](#))
 3. Fig tree ([Matthew 21:19-21](#))
 4. Cook crow ([Matthew 26:34, Mark 14:72](#))
- Fulfillment
 1. Temptation of Christ ([Matthew 4:1-11, Luke 4:1-13, Deuteronomy 8:3, Deuteronomy 6:13, Deuteronomy 6:16, Mark 1:13](#))

70th Week of Daniel ([Daniel 9:24-27](#))

2025-02-24T16:25:00 **Do I bring the future as one of ours, or one of people?**

- Who: Seed of the woman versus seed of Satan
- Where: Revived Roman Empire
 - 1. When: Interrupted after the completion of the first 69 weeks, which commenced from the commandment to rebuild Jerusalem.
 - 2. Time span: 2520 days, punctuated in the midst of the week with the Abomination of Desolation.
 - 3. Completion followed by: 1000 years.

2025-02-13T02:58:00 **Bible meaning**

1. 2025-02-13T07:05:00 God counted the days during creation... God blessed the day of rest, the 7th day.

2025-01-20T02:59:00 **What is like?** It is late at night, and I am riding a train with a few intermittent stops. The train will make its first early morning stop at Strathfield railway station at 6AM. In the center, there were free donated rectangular paper boxed fruit drinks. There was also a yellow banana wrapped in a transparent container. 2025-01-20T14:39:00 [They keep on insistine... on their brand of Christianity, just before walking northward to the intersection of Paseo Padre Parkway and Blackstone Way.](#)

1. 2025-01-20T07:37:00 12,000 virgins from the tribes of Israel, sum of 144,000 ([Revelation 14:4](#))

2025-01-15T15:22:00 **What our lesson has?**

1. 2025-01-15T15:22:00 Data: It is primarily the word of God, in the WordEngineering database, HisWord table, Word column. With supportive information in the other columns on the HisWord table. The information in the other tables, such as, the Remember, APass, ActToGo tables are extractable and computable from the HisWord table.
2. 2025-01-15T15:29:00 Teachable: Can a student learn to generate this data, as you have? The only pre-requisite is the Holy Spirit.
3. 2025-01-15T15:42:00 Textual: The author hears the word. The author is able to transcribe the words. The accent of the author is not fluent. The author is not artistically inclined, nor trained at capturing and transmitting audio or video.
4. 2025-01-15T16:02:00 Customization: How is this word supposed to be used? When the author receives the word, he makes effort to temporarily record the word on paper. At a convenient time, the author records the word on a computer electronically.
- 2025-01-15T16:07:00 How can my approach survive? 2025-01-15T16:08:00 What is the result of this thing? 2025-01-15T16:08:00 [What extent is the favor, only to me?](#) ([Daniel 12:13, Daniel 11:45, Daniel 10:21, Daniel 9:27, Daniel 8:27, Daniel 7:28, Daniel 6:27, Daniel 5:31, Daniel 4:37, Daniel 3:36, Daniel 2:49, Daniel 1:21](#)) ?
5. 2025-01-15T16:35:00 [What according to the same?](#) ([Genesis 22:2, Daniel 9:24](#)) ? 2025-01-15T16:42:00 Your adopted father once chastised you. Why you are not like your twin sibling, asking? He said your earlier effort was not preaching. He asked, so won lo? Are they using your software at Dagaku Housaka Center (DH)?
6. 2025-01-15T19:14:00 At the intersection of 4737 Mallard Common and Decoy Terrace. [What do we need... each other for? As example](#) ([Daniel 9:24, Genesis 4:7, Genesis 4:24-26](#)) ? 2025-01-15T19:14:00 Milk & Honey Cafe, Pegasus Center, 34265 Fremont Boulevard, Fremont, California (CA) 94555. [What is transigent? What have you included?](#)

2025-02-21T13:28:00 **When did he search... a reference as a usage?**

1. 70 years in Babylon ([Daniel 9:2](#))
2. Reverence ([Daniel 5:17-31](#))
3. Lot ([Daniel 12:13](#))

2025-02-08T20:06:20 **Paseo Padre Parkway just before the overhead bridge south, between Siward Drive and Blackstone Way, walking northward What are you working with?**

1. 2025-02-08T22:32:00 Going along with the prognosis of the LORD, I feel my best utilization at the moment is to re-cap my history. To look at how I technically made decisions, in light of the spirit. With Chuck Mawler as a mentor, he led information technology companies, and tutored Bible classes. Not to explain the Bible, but give an understanding of scripture. I found out at PowerSoft that my software engineering skills were not fully developed during my Master's degree programme at the University of Technology, Sydney (UTS). It may be that I did understand the paradigm shift, client/server, or specifically, Powerbuilder? Master-slave lacking. I had not led a team software project, nor taught a non-technical female student to transition into software engineering. These opportunities and challenges to train a female prodigy include:
 - The Iranian Persian female student at Central Piedmont Community College (CPC), personal computer (PC) laboratory 3 Pascal programs.

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference. 2024-10-17T21:38:00
- Link the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham (Ezekiel 33:24).
- Consistency with the Bible (Genesis 25:23)?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/have/mediapresence/MyLife48in.aspx>
- 2019-12-07 <http://www.google.com/books?id=1Dw9wIcHw4cC&pg=PA133&pg-views=1&asins=frontcover>

Separating realizable

- Baptism of John... Baptism of the spirit (Acts 2:1)
- Dead... resurrection (Hebrews 11:12)
- Ishi, husband (Hosea 2:16)
- Antichrist (2 John 1:7)
- No separation... in bonding. What did He ask for unity in? I and... man. Man brother.
- God: Garden of Eden - Adam and Eve, Cain and Abel (Genesis 2:8, Genesis 2:15, Genesis 3:23-24, Genesis 4:10-17)
- Jesus Christ: Church - Peter (Matthew 16:18)

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in (Numbers 3:8, Numbers 24, Romans 1, Acts 13:38)?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years (Genesis 15:13, Acts 7:6)
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau (Genesis 25:28, Genesis 27:5, Genesis 28:22, Genesis 31:38, Genesis 31:41)
- Children and grandchildren: Benjamin, Joseph, Judah (Genesis 42:36, Genesis 43:14)

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27, Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1, Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produces? What the society produces... what can happen?
- Ratio percentage versus (VS) quantity? At 3 for 9? GroupPrice.com
- In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness (Daniel 5:5, Daniel 5:11, Daniel 5:26, Daniel 5:30-31, Genesis 4:3, Genesis 4:8, Genesis 4:12-14)
- Quantification (Daniel 6:5)
- Original self (Daniel 3:17)
- How we let Him know (1 Corinthians 5:7, Acts 23:5)?
- I want not a... user meaning there are...
- A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming (Genesis 2:19-20, Genesis 2:23, Genesis 3:20, Genesis 4:1, Genesis 4:25-26)
- Reverence (Genesis 4:26, Exodus 20:7, Deuteronomy 5:11)
- Interpret (Genesis 37:9, Hebrews 11:23-30, Daniel 5) to each entirely its own.

2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.

- 2024-07-12T06:25:00 How much period... we have the same?
- Telvis integrates programmable script and audio recording. MP3 is an industry standard.
- The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give description?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side... the decoder.

1. IBM PC compatible:

- At Central Piedmont Community College (CPEC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.
- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ilupeju, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Kontosombon, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How-to verify the work of the spirit?

- Is it compatible with the Bible (John 10:30, John 17:22, 1 John 5:8)?
- Is this a link (Genesis 41:32, 1 Corinthians 15:45, Acts 9:3, Genesis 2:2)?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our vision.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a result of what? Take a word? Store as a record version (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible (Daniel 5:31)?

- When is the Bible specific about time (Genesis 41:32, Genesis 41:1, Genesis 41:5, Genesis 41:9, Genesis 41:11, Genesis 41:26-32, Genesis 41:34-36, Genesis 41:43, Genesis 41:46-48, Genesis 41:50-54)?

How admissible is the word (Genesis 41, Daniel 2)?

GetAPage.html depends on the word.

What did I fit into a place?

- Ark of the Covenant
- Temple
- Jerusalem
- Judah
- Israel

What did He see Himself as?

- Joseph (Genesis 37:2)
- Moses (Acts 7:24)

Robert Law Joss

- 2024-06-05T04:49:00 Technically...reliable? Maturity...saturation? Information Age, personal computers (PC), client/server, object-oriented (OO), graphical user interface (GUI), Microsoft Windows Operating System monopoly, relational database, integrated development environment (IDE), labor, cost, support, manual, debugger, help assistance, market, usage, stability, productivity, re-use, distributed, performance, scalability.
- 2024-06-05T04:49:00 What do we deserve as our own... what do we deserve as others?
- 2024-06-05T04:49:00 Are we doing... the part of God? 2024-06-05T04:49:00 What was I working for? 2004-09-16 Bob Joss said North Atlantic Treaty Organization (NATO). 2024-06-05T05:07:00 Hmm. We're having trouble finding that site. We can't connect to the server at www.google.com. If you entered the right address, you can: Try again later Check your network connection Check that Firefox has permission to access the web (you might be connected but behind a firewall) 2024-06-05T05:25:00 2015-10-23DoctoralDissertation.pdf 27 pages. Is NATO a godly organization? 2024-06-05T05:44:00 E:\WordEngineering\git push final: unable to access 'https://github.com/KenAdegnj/WordEngineering': Could not resolve host: github.com 2024-06-05T06:08:00 http://en.wikipedia.org/wiki/The_Network_is_the_Computer 2024-06-05T06:23:00 Is Microsoft on the network? 2024-06-05T06:24:00 Access. 2024-06-05T06:46:00 microsoft windows operating system error calendar folder move.
- 2024-06-14 22:20:55 053 Go and search out the land? Albertsons Lucky, Charter Square, north west shopping cart station. Initially, as I moved the shopping carts away from this location, God told me to remember the words He said to me at this location. The word came as I moved the shopping carts from the north east and I walked past. And returned to this location on my route to the south west shopping cart station.

What does He involve?			
Speak face-to-face	Dream or vision	Commentary	Scripture Reference
Moses	Other prophets	Leader	Numbers 12:6-8
Jesus Christ	Other teachers	Authority	Matthew 7:29

Word	Actor	Scripture Reference
Holy Spirit and people	Adam	Genesis 2:7, Genesis 2:20-25, Genesis 4:25-26
After Mine own heart	David	1 Samuel 13:14, Acts 13:22, 1 Samuel 25:3

Effect of the Progress (Luke 1:1-4, Daniel 9:22-23)?

- 1...many (Genesis 1:16, Genesis 1:26-24, Daniel 9:2)

- [Money at the same](#) (John 15)

When did Israel...seek no region...as its own (Acts 1:6)?

1. The prophets
2. New Testament
1. The Gospels: King of the Jews, the disciples
2. Pauline Epistles, General Epistles
3. Revelation, starting with the letters to the 7 churches in Asia Minor

We now fold our task

Study analysis? What complexity does it reason with? Temple lamb. [How can computer use itself? What ability of mine? I have stored using people as myself.](#)

- The database is not currently multi-user. The HisWord table and the other tables in the WordEngineering database does not have a user column. Other people's point of view are pointed out in the ContactID, URI and scripture reference columns. The later work, The HisWordDecidedToWorkOnAGradualImprovingSystem database offers multi-user support.
- The bulk of the work is query.
- There are input, processing, output. [How is your task...delectable?](#)

2024-11-20T05:38:00 Ordering

2024-11-20T07:59:00 Do I make a separation between physical and spiritual?

- Forerunner: Jesus and John the Baptist (Luke 1, Matthew 3, John 3:22-36, Matthew 17:12-13)
- Levitical priesthood ([Hebrews 7:1-4](#), 1 Samuel 13, Numbers 3)
- Sitting on a high place: Humble...exalt ([Luke 14:7-11](#))
- Baptism: Washing of feet (John 13)
- Marriage: Younger before the firstborn? ([Genesis 29:26](#))

What will count, forever?

Word	Scripture Reference
Believer in Jesus Christ	John 11:26
Kingdom of God	Daniel 2:44-45
Charity	1 Corinthians 8:1 , 1 Corinthians 13:1 , 1 Corinthians 13:2 , 1 Corinthians 13:3 , 1 Corinthians 13:4 , 1 Corinthians 13:8 , 1 Corinthians 13:13 , 1 Corinthians 14:1 , 1 Corinthians 16:14 , Colossians 3:14 , 1 Thessalonians 3:6 , 2 Thessalonians 1:3 , 1 Timothy 1:5 , 1 Timothy 2:15 , 1 Timothy 4:12 , 2 Timothy 2:22 , Timothy 3:10 , Titus 2:2 , 1 Peter 4:8 , 1 Peter 5:14 , 2 Peter 1:7 , 3 John 1:6 , Jude 1:12 , Revelation 2:19
First resurrection	Revelation 20:5-6
Promised Land	Revelation 2:17 , Revelation 21:2
Messianic Covenant	Jeremiah 31:31-33
Divided according to the children of Israel	Deuteronomy 32:8

What I use people for (John 35:6-8)?

- Sin against people.
- Sin against God.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2)

1. The SQL is being built dynamically with the Bible version and the query condition clause customizable.
2. The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.
- God said, What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). [When one finds good? That is the meaning](#) (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). [We demonstrate...how we are. It is not misleading...That is the deception](#) (Revelation 12:10). [Appreciate as](#) (Matthew 16:18)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thyself.	Matthew 22:36-40 , Deuteronomy 6:4-9 , Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11 , Genesis 3:15
Lead	Matthew 23:9 , John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- [What exists as the present](#) ([Deuteronomy 32:8](#))?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way (Genesis 1:26).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:29

What is according to time?

Word	Scripture Reference	Commentary		
Bereavine	Genesis 1:1	Word	Scripture Reference	Commentary
		Jesus Christ	John 1:18, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	Only begotten Son of God
		Eunuch	Matthew 19:12	
		Paul	Acts 21:39, Acts 22:3, Acts 22:28	
Forever	Matthew 18:22			
Sign rainbow, festival, event, cumulative	Genesis 1:14			

Intellectual presuppositions to enable the rise of science

1. Intelligibility of nature: Words were part of his life.
2. Order in nature: To digest what has been and reckon what will be.
3. Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

1. Observe: Read the Bible and record words spoken.
2. Test: Compare the words in the Bible with the words heard.
3. Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- Alphabet/Sequence spreads out.
- Dates are lined up.

Words out of numbers.

[Where is the knowledge added?](#) The word column is how the author is up-to-date? The others are man's work.

[Telling intelligence?](#) What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I awake to task.		
Event	Feature	Scripture Reference

Actor	The law and the prophets. Can I prepare man for an event of time?	
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does he want as a set? O pe. In Yoruha?
 - Complete
 - Late
 - Call
 - Thanksgiving
- Where am I, as a human being?
- The life of someone something as myself.

Word Inference

- A lot of Yoruha language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Precminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword Noun.
- Letters in the English language?
- The work? Is to associate the reference.
- How could I look someone fact with what I know?

On behalf of someone, I seem		
Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you than you are (Ephesians 2:18).

We want personal data, when is public data sufficient?

- Until AlphabetSequence
- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?	
Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?		
Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-24
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- Quality Assurance
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [JSInt](#), [ExCn](#)
- Questionnaire: [RatingRank](#), [InDefine](#)

Prepared for Time

On 2019-04-04T09:00:00 andrea.nguyen@sgarm.com will telephone me about the role with Google's co-founder Larry Page john.lever.co/kittyhawk_aero/701c6b9a-2d8a-4727-a345-d4a93d6dc277?agencyId=3b8e6b44-7127-4709-ad21-6eb8ea5f7403 Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 You have tried to supplement... what God has given you.

2026-03-03T11:24:00 He compliments... our way, I was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. [How relevant is Your word to our opinion?](#) This projection may result in entries of new records in the Remember and APass tables. [Where are people, his relation?](#)

However, he is present, that is how I use.

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.

- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Sward Drive, Fremont, California (CA) 94555

[How do we develop... our past time?](#) (Genesis 37:19-20, Daniel 6:5)?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
 - Scripture reference is the Biblical theme
 - Scenery which is the dream setting
 - Location which is an awake surrounding
 - Language translation
- Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.
- What we do minimally, is how we do enormously.
- God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?
- How do you, reference the Bible?
- Search Engine? Requires Internet access.
 - ScriptureReference.html Requires Bible knowledge and place in the Bible.
 - BibleWord.html Requires word knowledge
- What is the certainty of the word:
- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
 - Grammatically correctness is also vital.
 - If a word correlates with a historical event, then it is credible.
 - When the Spirit leads and guides towards an utterance (Matthew 10:19-20).
 - Where am I, resemblance of how I am made (1 Corinthians 14)?
- What does He choose as example?
- God rested on the Sabbath day (Luke 23:46)
 - Jesus Christ (Daniel 9:24-27; 1 Corinthians 15:45; 1 Corinthians 15:47)
 - Man such as King David (2 Kings 14:3; 2 Kings 16:2; 2 Chronicles 28:1; Amos 6:5)
 - Place such as Sodom (Matthew 10:15; Matthew 11:25-24; Mark 6:11; Luke 10:12; Luke 17:29; Romans 9:29; 2 Peter 2:6; Jude 1:7; Revelation 11:8).
 - Other living things (Numbers 22:31-33).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy (2 Samuel 12:14). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently, Firmer consequence (Isaiah 23:15; Isaiah 23:17; Jeremiah 25:11; Jeremiah 25:12; Jeremiah 29:10; Daniel 9:2; Zechariah 7:3). Listed below are some of the repeated reinforcements.

Samson's Birth (Judges 13)

An angel of the LORD appears to the wife of Manoah and prophesy that she will give birth to a Nazirite son (Judges 13:2-5). The same angel appears to Manoah and his wife (Judges 13:6-24). The angel reinforces the their responsibility and defers reverence to God.

The Birth of the Messiah (Luke 1)

Foretelling the birth of John the Baptist (Luke 1:5-25; Malachi 4:5). Transitioning the present to the after (Luke 1:17). Foretelling the birth of Jesus Christ (Luke 1:26-38). Continuing the Davicid line (Luke 1:32-33; 2 Samuel 7:12-13; 2 Samuel 7:16).

The Baptism of Cornelius (Acts 10)

The Bible does not explicitly mention the citizenship of Cornelius, but it mentions his rank as a centurion in the Italian band (Acts 10:1). Simon Peter is a fisherman, but without the LORD's presence, fishery is not sustaining (Luke 5:4-11; John 21:3-6; Matthew 17:24-27; Acts 10:9-16). What I bring to Him; is me alone, to value Him.

Full Position

The first occurrence of the word, full, in the Bible, occurs in (Genesis 14:10), and is in reference to the vale of Siddim, which was full of slime pits, and this is where the kings of Sodom and Gomorrah fled, and fell. The father of the faithful, Abraham, died, full of years, and the son of promise, Isaac, died, full of days (Genesis 25:8; Genesis 35:29). The last occurrence of the word, full, in the Bible, occurs in (Revelation 21:9). Living a presence (Jeremiah 28:11). To creating a future full of all. To creating a future free of all.

One Chance; Seem the Rest.

Our LORD's prayer is a communal prayer; directed to the one God (Matthew 6:9-13; Luke 11:2-4). Please note that it is Jesus; teaching this prayer; so He doesn't refer to Himself or the Holy Spirit explicitly; as in another passage, when He mentions Himself as the bread (John 6:31-35). He explains the truth; that we may full short of it, by explicitly referring to the Father. He is alluding to the events in the apocalyptic books, Daniel and Revelation. We are on earth, and we have an earthly father; where we are, is not where, we wish and will to reside (Matthew 6:9; Luke 11:2; Daniel 2; Revelation 5). When no matter, where I go; this is how, I Am found (John 20:17).

To set everything true

The word, true, occurs in seventy-seven verses in the Scripture Bible, and there are eighty-one occurrences. True, first occurs in Joseph's interaction with his brothers (Genesis 42:11; Genesis 42:19; Genesis 42:31; Genesis 42:33; Genesis 42:34); Jacob had colluded with Rebecca, his mother, to get Isaac, his father's, blessing; God shows that Joseph will have elevation over his parents and siblings. There are ten occurrences of the word, true, in the book of (Revelation); in response, to God.

To Whom Masculine?

How the Bible compares the gender?

Man, after his Fall

During Creation, God asked all living things, be fruitful and multiply; God asked Adam to name the living creatures, and God required Adam to take care of the Garden of Eden, but this taking care is to dress and keep the garden; there is a role for man, the tree of the knowledge of good and evil, and the tree of life. God did not specify the welfare of animals. Out of Adam, God made a helper for Adam, Eve. After the Fall of Man, Adam's labor will be thorough; and there is enmity between the serpent and Eve, and each other's seed; and Eve will have pain, during child-birth. God made coats of skins, and clothed them; it is our presumption, that the clothing is from living things, generally perceived as an sacrificial animals, but since this clothing is not specified, an alternative, is that it is a plant, or another creature entirely. God created an adult male, Adam; and his female counterpart, Eve (Deuteronomy 2:14; John 5:5). There is no mention of Adam's activity, after the fall of man; as Eve bares and name their children; Adam's earlier effort, which was to cater for the Garden of Eden and name the animals.

Man at Birth

We can only suggest, that the struggle between good and evil, continues upon the birth of Cain, Abel, and Seth. Eve named Cain, as her possession; and Seth, as the appointed seed. God instituted male circumcision, which should take place on the eighth day, as man's responsibility in keeping the Abrahamic covenant. At times, there is proclamation of a mantle, before livelihood; as in the case of Ishmael, Isaac, Jacob, Samson, John the Baptist, and Jesus Christ. In each example, there is a relationship between God and a parent; and God is directing, the offspring's onus. The want similar to Christ; is to see yourself, among fold.

Man's Task

Historical man's profession are keeper of sheep, a tiller of the ground, handle the harp and organ, an instructor of every artificer in brass and iron. Unlike the first men, in the Bible, Seth's service was not identified, we only know that after the birth of Seth's son, Enos, men began to call, on the name of the LORD. The 10 Commandments details the relationship we aspire to have with God, and our fellow-men. God may consign men to oversee, as in the case of Melchizedek king of Salem, the priest of the most high God, and collector of tithes; Joseph, dreamer and interpreter, and he will save much life, in Egypt; as in incorporating the end. We share among us; as no foundation separates us.

Our choice is where we want to be? What we want to be?

A choice between what you have, and what you will want? (Revelation 5:5; Matthew 1:25; Luke 2:7; Romans 8:29; Colossians 1:15; Colossians 1:18; Hebrews 11:28; Hebrews 12:23). Where I take you; is where you belong (Genesis 13:14-18; Deuteronomy 34).

What points arrive at succession?

What points arrive at succession?	
Title	Scripture Reference
Begotten Son	John 1:18; John 3:16; John 3:18; 1 John 4:9

Future Work

- 2024-11-12T01:57:00
 - The National Basketball Association (NBA) released the profile of an NBA player.
 - My twin sibling said he received a religious video, and he doesn't want to go to work. There were arrests, but he was excluded.

2024-11-12T02:08:00 You are release. Once you fail a test.
2024-11-12T02:11:00 How am I transparent?
I no longer... take further input.

- 2024-11-12T08:07:00 How do I accommodate... the future... as myself?
The 2 upgrades to-date of the primary keys and/or unique indexes have been:
1. IHaveDecidedToWorkOnAGradualImprovingSystem database Contact table: Add the organization name to the unique composite index.

```
CREATE UNIQUE NONCLUSTERED INDEX [IX_Contact_Names] ON [dbo].[Contact]
(
    [firstname] ASC,
    [lastname] ASC,
    [lasttime] ASC,
    [nickName] ASC,
    [organizationName] ASC
)
```

- WordEngineering database HisWord table: Make the HisWordID column the primary key, and add the content of the dream table to make a foreign key.
2024-11-12T08:51:00 We are not where we want to be... where we are set to be.

- 2024-09-06T23:57:00 Unassigned... column.
The general format of the Bible is to place the book titles on the top, repeat the book titles and chapter numbers at the beginning of each chapter, and place the verse number beside its text. In so doing, there are alphanumeric book titles, and numeric chapters and verses. For the work of the author there are tables with rows and columns.
2024-10-29T04:05:00 Web Services 2024-10-29T16:31:00 I want to do a runtime service that gives me this ability... or do I want to continue to do Client/Server?
2024-12-11T14:03:00 East Bay Vision Center Optometry 3420 Fremont Boulevard Suite E, Fremont, California (CA) 94555. A person to my south walked westward. What is adaptable to the extra (Genesis 41:36)?
2025-01-04T12:12:00 The Passion of Christ was the culmination of the 69 weeks of Daniel, and the 70 weeks of Daniel were interrupted. 2025-01-04T12:12:00 I agreed to attend a concert with Jasmine, a Malaysian Chinese person, but I did not go bush dancing with Ross, nor did I go on night walks with Tess Pierchovich. After Jasmine started living with a woman, I did not have sexual intercourse with her. Advanced age? I held the hands of Noriko Yoshida, but I did not pet Carolyn Clancy Handy (Daniel 9:24-27).
2024-11-13T11:35:00 What I found many of Him... is how I obtain a realization? (Genesis 49:16; Daniel 5:22-23; Daniel 4:33-37).
2024-10-27T08:36:00 Intersect table, Associative entity, 2024-10-27T08:47:00 Yesterday, he said he didn't finish his work, so he couldn't write a summary in the middle of the process, 2020-04-18 19:45:02.183 Merging HisWord table to the Dream table. As I walked out of the Milk & Honey Cafe, Pegasus Court, I understood a word was coming. Bing's Dumping. Disputable... to use. David Cai said I have friends. Miriam Shoham LTD. shoham premium mango. www.mshoham.com www.ima.co.il Empty boxes were placed at the door of Mary's Bakery. 21:18 dizzy, sleepy, 21:30 left neck. 21:46 feces small odor. 21:53 dizzy, sleepy, 22:15 urine.
2024-10-18T03:37:00 When you started AlphabetSequence, you recorded the word of God. 2024-10-18T04:03:00 The superiority of the scripture... is in its truth (1 John 3:2).
2024-09-23T18:35:00 When did He feel... a response... of our supervision (John 16:7)? This is what I want to do... with my life... how will you help me (Genesis 4; Daniel 1:8-21)?
2024-09-12T17:47:00 In Australia, after I started Client/Server Sylbus/Powersoft contract consulting, I realized my limitations and I sought corrections. The same way, I had sought grammar punctuation learning from a Liberian male colleague of Central Piedmont Community College (CPCC) at Freedom Mall, Charlotte, North Carolina (NC) (Jeremiah 50:11). 2024-09-12T18:08:00 Please kneel?
2024-09-13 What do you know... as your own? 2024-09-13T17:55:00 As particular.
2024-09-09T06:27:00 The scenery resembles ARCO - Brookvale. There are Bridgette Hendricks, my twin sibling, and I. My twin sibling brought out a box of chicken or hamburger. My twin sibling said some young females invite him to go the nightclub, but he is too old. I thought that she could drive me home, but she was gone, disappeared. 2024-09-10T08:07:00 In the last few days, God has asked me to focus on the people in my life. And, their prophetic role. 2024-09-10T08:08:00 What might be the same?
2024-09-22T05:21:00 1st scene: Aunt Taiwo was sleeping on a bed with her head in the east. There were at least 2 acquaintances that were standing by the north-east door. I started orally stimulating the vagina of aunt Taiwo. I locked the north-east and south-east doors. I took off my clothes. I checked if I was still wearing my socks. On the bed, aunt Taiwo lied down with her face, body, and buttocks pointing downwards. She intended for me to come in from the back. Scene 2: Benitola or Buki was driving me on a road like Mission Boulevard. He said he takes classes between Thursdays and Fridays with Google in Nigeria.
What days of the week are between Thursday and Friday in the different calendars? How actualities... balance the word?
2024-09-16T17:59:00 Contradiction and consistency? Soundex (Matthew 2:1; Matthew 2:6; Matthew 2:18; Jeremiah 31:15).
Exemption exception.
The choice I've ahead... is the choice I finish ahead.
What label I have? He be is a Yoruba phrase which translates to an English phrase house like that. Do I start at who? The Bible books about kings and poems. Is this a beginning or a continuation?
Work... you will do later, null is useful... when information is not presently known (Revelation 17:10; Hebrews 5:8; Revelation 21:7).
2024-09-04T29:35:00 The improvement of the scripture reference, 2024-09-04T29:52:00 Given the scripture reference... the scriptural text... is largely available. 2024-09-05T00:03:00 The work of the author may be considered numerology, if it had stopped at determining only the AlphabetSequences but it had progressed into giving more weight to the AlphabetSequencesIndexScriptureReference. 2024-09-06T20:00:00 What did He get when He divided? Adam's rib? Eve.

2024-09-05T10:31:00 [Getting right as Himself? One](#), versus (vs) [Getting one right as Himself](#), 2024-09-05T14:59:00 I have preferred... the order of the word.

2024-08-24T12:15:00 [What did he find... he needed perfection in?](#), 2024-08-27T21:29:00 [Expand beyond your zone/ Acts 5:4](#)).

2024-08-24T20:05:00 [Is it just an address... you are communicating with?](#)

2024-08-27T12:27:00 [How favorable... time has been](#), Some features that were available in SQL set-based are not available in C#, prior to the introduction of Language Integrated Query (Linq). These include Full-Text Search Thesaurus, soundex, regular expression (Regex).

2024-08-27T17:45:00 [To who determine the same?](#)

2024-08-09T11:49:00 [Leviticus 11:47](#), 1 [Chronicles 11:47](#), [Luke 11:47](#), [John 11:47](#) Should the timing be relevant and specific to the author's location, scenery, or event?

2024-08-05T14:30:00 [Four six nine or 469](#) Word or number? The Hebrew language is alphanumeric. The digits were pronounced, not the combined number.

2024-08-18T21:05:00 [To associate the same](#) ([Genesis 4](#), [Genesis 2:18-25](#), [Genesis 1:14-19](#))?

As of 2024-05-22T14:48:00 Microsoft SQL Server does not support sql.2003 Assertion. Microsoft SQL Server does not yet implement CREATE ASSERTION assertion-name CHECK (constraint) [http://stackoverflow.com/questions/4130039/docs-sql-server-2008-support-the-create-assertion-syntax](#), 2024-05-22T15:28:00 Potential fallback? CHECK CONSTRAINT or trigger.

The technical limitations of the current implementation include:

1. Unknown, prior to building?
2. Multi-user support
3. Security login
4. Content management system (CMS)
5. Single entry-point
6. Update rollback

What is the repository? If the user only needs to store the Word from God, a text file is sufficient? A comma-separated value (CSV) may suffice for multiple columns.

AlphabetSequence considers the whole word. Separate words into?

1. Buzz word
2. Keyword
3. Parts of speech
4. Simple versus (VS) complex

[This part is my existence, which I will never receive](#).

[Can I reason as a god will listen?](#)

1. Adam named the animals ([Genesis 2:19-20](#))
2. Pronounce Shabbath ([Judges 12:6](#))
3. Pray continually ([Luke 18:13](#))

How to...use the word? My earlier work has been to refer to the word. [To look for one I deem as I? Mo fo wa productive in the word?](#) I want to be productive in the word?

[When My word has decided His need](#) ([2 Kings 4:5](#))?

The select inputs do not have default values.

The Scripture table is a one-to-one mapping between the Bible version and column. These arrangements are futile when there are inconsistencies in the Bibles versions separations. An alternative is to have a table for each version. Publishers issue Bible version.

What does the Bible teach us about twin? Full-Text search? We have given preference to the word, not the commentary, which is subjective.

Word to Today

The remember table correlates the events and the calendar. Currently, the author is manually deriving the entries for the Remember table. When there is an association, then the author considers the first, last, relevant mentions.

1. [To forget time is responsible](#) ([Revelation 21:23](#), [Matthew 17:5](#), [Mark 9:7](#), [Luke 9:35](#)).
2. [What readiness time](#) ([Ruth 1:13](#))?

The gain from automating this process will include:

1. Limiting human labor
2. Speeding up the task
3. Reducing storage need

[Don't Fail at Home.html](#)

He Handicapped Time: as His Usage

Title	Scripture Reference
Servitude	Jeremiah 25:11-12 , Jeremiah 29:10 , Daniel 9:2
Fulfillment	Luke 9:31
Incentive	Daniel 12:13 , Isaiah 53:12

We may need, human help, to determine, the theme-of-the-day?

The author's work is record specific. GetPage.html. Further work may consider the entries for a particular date, datetime range, or HisWordID set basket? What this information have in common?

On 2022-01-10, I will recall that the holiday of biological mother is coming up, on 2022-01-12, I should pray about this and reinforce effort. What is He, starting to say?

[Is there going to be a safe development to this design?](#) There is key to reason. This work is not defamatory nor inflammatory.

Reuse

1. Issue a SQL database query statement [SQL To HTML Table.html](#). This is the most raw form of querying the database, and it offers the most flexibility, and it does not restrict, to pre-built application.
2. Navigate the web pages from a client browser [2019-10-05 Artifact Description.html](#) [When The Pastor Preaches You Don't With The Scripture To Come In Subsequent.html](#)
3. Build a web service requester, without the limitations of Cross-origin resource sharing (CORS).
4. Download the DLLs, or the source files, and customize, if necessary [WordEngineering](#)

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship?

[know wife](#) SELECT ScriptureReference, KingJamesVersion FROM Bible..Scripture WHERE KingJamesVersion LIKE 'know' and KingJamesVersion LIKE 'wife'

[wife child](#) SELECT ScriptureReference, KingJamesVersion FROM Bible..Scripture WHERE KingJamesVersion LIKE 'wife' and KingJamesVersion LIKE 'child'

WordToNumberHelpers

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language [AlphabetSequence.cs](#). Later work, saw translation to:

- [AlphabetSequence.c](#)
- [AlphabetSequence.com](#)
- [AlphabetSequence.cn](#)
- [AlphabetSequence.java](#)
- [AlphabetSequence.js](#)
- [AlphabetSequence.py](#)
- [AlphabetSequence.rs](#)
- [AlphabetSequence.ru](#)
- [AlphabetSequence.sh](#)
- [url_AlphabetSequenceIndex.asp](#)
- [AlphabetSequence.vb](#)

Perhaps, other programming languages should have their own sample code. The author is only conversant in English and Yoruba, additional work will be to see the use in other lingua franca. [And, the priest said, Are one only for me?](#)

Data Residence

Where should the data reside? Database, JSON or XML files?

Which side, the love felt?

SQL returns records in rows; there is a result set. Would we, be able, to amalgamate the result set? For example, how can we, find themes in the Bible? When you enter a topic, can we return a trend? Clustering, can we return a number; as its present ([1 Kings 19:11-13](#))?

Where I arrive, is where He as conclusively use

Initially, when I got a word, I made efforts to expound, on this word; but now, I share the word, and wait on God to reinforce the word, or share a new theme.

2019-05-30 My ancestral home is Ile-Ife, the site of the Orammian staff. My search for the word, [Staff](#), inspired relating the Bible to my life. [Staff](#), first occurs in, ([Genesis 32:10](#)). In my ninth year, my twin sibling and I, relocated from Ile-Ife Staff School to Lagos.

In our tenth year, we visited London. In my 32nd year, I re-located to the United States of America (USA).

I Am letting myself; be many as a people.

God intended man, to be a personal use. The work of the author is an individual effort, and it targets a singular person. The author separates his work into web pages, but the user may click on a hyperlink, to get more information, and sometime do additional work.

The work of the author, builds on the efforts of other people, like the Bible, dictionary and commentary. The HisWord table and associated queries, only currently refers to the contribution of the author. How could we, specialize our work? Who uses, and for what? The setting, is it normal? What are the influence of God, as a person? What are His contribution, solely to man? What part of Him, as He analyzed, as a person? What role, as man, placed on Me? What stimulate you, as a human being; is where My opinion placed? The author read the Bible and listened to His word, prior to the introduction of AlphabetSequence. Where do we follow, His partnership? He has said the word; I have collaborated with Him.

Outstanding Work

The source code and schema are available at GitHub.com. This means that the public can review and make updates to the original work of the author. This aged work is not up-to-date with the industry trend, such as cloud computing, mobile applications, decentralized ledger, nosql. Part of the justification for this immaturity; is the need to maintain a low entry point and capture a wide audience for its adoption.

Whols for social networking sites like WordPress, GitHub, Twitter, LinkedIn, Facebook, etc. [When nothing without Me, is sufficient without Me, Where I retain](#).

I use [grammarcheck.net](#); I am proposing a specialization to correct scripture reference. For example, there are many questions and answers, [but a further development is to automate the task of correction](#) ([Luke 3:23](#), [Matthew 22:41-46](#), [Matthew 22:28](#), [Mark 7](#), [Genesis 38](#)). They are not one another.

When does He say a word, when does He put a thought ([Daniel 5:25-28](#))? Ability to say.

When does He talk in the past, present or future?

Which is the information container? The ActToCsd table, Major column value, Comparative verse; supersedes the WordsInTheBible table; which is the exact word for the King James Version (KJV) and not all versions of the Bible; and doesn't take into consideration the English language British versus American spelling, such as favour versus favor, nor the generic word, such as, man versus men. When is this, anointing of the Spirit ([1 Samuel 2:26](#), [Luke 2:52](#))?

Can you create a fictitious record in the Contact table, that meet later fulfillment. This record in the contact table will contain a word that is placeable in the title or company field/column. This information is substantiable in the commentary column of the CareflowReasoning table. This is compatible to Ghost city. A bit column is settleable, for this contact. It allows to keep the contact ID as a foreign key. A record to be someone else.

The effort of the author is to share and comprehend the word of God. What can the author provide to the other; to substantiate the work of the author? God made man as similar to Him to see how life can be? If I spoke the same, how am I the same? I know, I am. The love of being the same supersedes feeling the same. Being in the spirit; is alluding to the sufficiency of men.

[When did He immediately get what He wanted?](#)

Who	What	When	Where	Why	Scripture Reference
Abraham	Sacrifice	3 days	Mount	Temp	Genesis 22
Jesus Christ	Sacrifice and resurrection	3 days	Jerusalem at Golgotha	Temp	Matthew 27:33 , Mark 15:22 , John 19:17 , Matthew 16:21 , Matthew 17:23 , Matthew 20:19 , Matthew 27:64 , Mark 9:31 , Mark 10:34 , Luke 9:22 , Luke 13:32 , Luke 18:33 , Luke 24:7 , Luke 24:21 , Luke 24:46

Search engine optimization (SEO)

Search indexes or search engines

2026-03-07T14:15:00 Since the inception of Google.com... the author has relied on it.

Search directories

2026-03-07T14:15:00 A directory contains categorized website information which may be input by humans, and it does not crawl nor necessarily contain particular web page information.

2026-03-07T15:04:00 The emergence of AJAX blurs the distinction between a website and its various web pages.

Most significant search directories

- [dir.yahoo.com](#)
- [Open Directory Project](#)

Determining Your Plan of Attack

- Keyword analysis; 2026-03-07T20:56:00 I will like My word to begin at My representation.
- Create searchbot crawlable web pages
- 2026-03-07T20:41:00 Make the search systems aware of your site

Search engine task

1. 2026-03-10T17:59:00 Word
 - Phrase: [BibleWord](#)
 - Occurrence: [Index.html](#)
 - Proximity: [ScriptureReference.html](#)
 - Soundex: [Carlos.html](#)
 - Dictionary

- [Contact](#)
- [URI](#)
- [Career](#)

Site indexed

2026-03-14T21:00:00 Search on Google by data entering site:JesusInTheLamb.com, and Google will return a list of pages it has found on the site
 ** (Peter Kent, 2004).

Terminology - Words and Meaning

When you write a thesis, it is a paradigm work, shift in thinking, and it should contain a terminology section. The practice of the author will be to list existing words, and include their meanings. For technical jargons, the author will rely on the Internet, as a definition resource. If the author is introducing a new word, the author will explain its meaning, but this is rare.

WordEngineering Created of an intell

Client-Side Programs
The norm of today is to build with HTML, JavaScript, CSS

Database
The database of choice is Microsoft SQL Server. Prior to specializing on SQL Server, the author experienced fifth generation scripting languages such as dBase, R-Base, Clipper, Access, FoxPro; other relational databases, like Oracle, SQL Anywhere from Watcom, Sybase, and Informix. When the author applies the Microsoft implementation of SQL, Transact-SQL and [SQL CLR or SQL CLR/SQL Common Language Runtime](#) the author risks not being vendor-agnostic.

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)
The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and it gives us the opportunity to test our Microsoft implemented software in a non-proprietary, vendor neutral environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, mobile telephones emulators and simulation.

HTTP Server
The author uses Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

Latency
This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page

Linking
This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

[Machine Learning](#)

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P , if its performance at tasks in T , as measured by P , improves with experience E (Goodfellow et al. 2016). Machine Learning takes as input data and answers and derives rules (Bileschi et al. 2020).

Page Size

The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files

Page Title

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

This is the choice of a particular HTML tag, to reinforce its meaning and content.

Server-Side Programs
Ever circulating

Style Sheet
The author prefers linked to embedded style sheet

Web Application

The everyday web pages of the author include:

1. [GetAPage.html](#)
2. [BibleWord.html](#)

3. [ScriptureReference.js](#)
4. [DateDifference.aspx](#)

WordEngineering

To study the Bible by using an engineering approach

[SQL Server Execution Plan - ScriptureReference.html#ScriptureReference-Genesis 22, Daniel 9:24-27, John 1:1, Jude](#)

[ScriptureReference.sql](#) [ScriptureReference.sql](#) [ScriptureReference.png](#)

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK_Scripture. These three have trivial optimization levels.

Query 2 does an Index Seek on the IDX_Scripture_VerselDSequence, since the where clause is on the VerselDSequence column. The IDX_Scripture_VerselDSequence indexes on the VerselDSequence column; it is not a covering index, since the Select column-list includes the BookID, ChapterID, VerselID; therefore, the PK_Scripture is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

The Definitive Guide to SQL Server Performance

(Don Jones).

Performance Monitor - SQL Server Objects

http://content.mackinnonshpna.com/jean/yelbu/1a.pdf	
SQL Server Objects	Commentary
SQLServer:Access Methods	Logical data access.
SQLServer:Buffer Manager Object	Physical data access. Such as, Buffer cache hit ratio, is how often, data is accessible from memory, rather than the hard disk.

Artifact Description

[2019-10-05/ArtifactDescription.html](#)

Background

The author's country of birth, Nigeria, gained independence on, 1960-10-01, a [biblical generation](#) before the end of the second [millennium](#) (plural [millennia](#)). There are 2570 days between 1960-10-01 and the author's date of birth, 1967-10-15. Nigeria became a republic on 1963-10-01. The difference in days between when Nigeria became a republic, 1963-10-01, and 1967-10-15; is 1475 days, 4 biblical years, 1 month, 5 days; 4 Gregorian years, 2 weeks. The difference in days between the creation of Lagos State, [1967-05-27](#) and the author's date of birth is 141 days (4 biblical months, 21 days) (4 months, 2 weeks, 4 days). 1967-10-15 + 75 Biblical years is 2041-09-16 ([Genesis 12:4](#)).

[illegible]

In Australia, the author first worked at:
Australian Army Headquarters Training Command
Suakin Drive
Georges Heights NSW 2088
Telephone 61 2 9960 9452
Fax 61 2 9960 9452

The word, covenant, occurs twenty-four times in the New Testament. The word, marriage, occurs sixteen times in the New Testament.

The New Testament began on 12th 10-26, between the days of 43 biblical years, 7 days (42 years, 11 months, 3 weeks). (24 - 20) / (70 - 20) = 8% (Numbers 13, Psalm 90:10).

6966 Nigaran.com date occurred between 1966-01-15 and 1966-01-16 and the author was born on 1967-10-15, 638 days after.

Bahá'í commenced on 1967-05-30, and 1967-10-15 is 138 days after.

When Sunrise traditionally begins, June 21, and October 15, is a span of 1 (month, 3 weeks, 3 days).

October 15 is the forty-fifth day, in the September, October, November, December cycle.

Between September 22 and October 15, is 23 days (22 days) (3 weeks, 2 days).

Between October 15 and Winter starts, December 21, is a span of 67 days (2 biblical month, 7 days) (2 months, 6 days).

Between October 15 and Winter ends, March 20, is a span of 157 days (5 biblical month, 7 days) (5 months, 5 days).

During Leap Years between the preceding October 15, and May 7, are 205 days (6 biblical month, 25 days).

Müller (Declaration Six Day War) was fought between 1967-06-05 and 1967-06-10. I was born on 1967-10-15, and 9 Biblical months, before that, then, was, 1967-01-18. Between 1967-01-18 and 1967-06-10 is 143 days (4 biblical month, 23 days) (4 months, 3 weeks, 2 days).

2 Bihhal years, after I was born, 1969-10-04, [Israel](#) was accepted to the United Nations on 1949-05-11, between then and 1969-10-04, is 7541 days (20 bihhah years, 8 bihhah months, 11 days) (20 years, 4 months, 3 weeks, 2 days). The adoption of the [United Nations Partition Plan for Palestine](#) occurred on 1947-11-29, between then, and 1969-10-04, is 7980 days (22 bihhah years, 2 bihhah months) (21 years, 10 months, 6 days). The [1948 Arab-Israeli War](#) commenced on 1948-05-15, between then, and 1969-10-04, is 7812 days (21 bihhah years, 8 bihhah months, 12 days) (21 years, 4 months, 2 weeks, 4 days). The [1948 Arab-Israeli War](#) ended on 1949-03-10, between then, and 1969-10-04, is 7513 days (20 bihhah years, 10 bihhah months, 13 days) (20 years, 6 months, 3 weeks, 3 days).

Approximately, the author became a critic, eight weeks after contention, on 1967-03-15 between when [Israel](#) became a nation, 1948-05-14, and 1967-03-15 = 6879 days (19 (biblical years), 1 (biblical month, 9 days) (18 years, 10 months) between when [United Nations Partition Plan for Palestine](#), 1947-11-29, and 1967-03-15 = 7046 days (19 (biblical years), 6 (biblical months), 26 days) (19 years, 3 months, 2 days) between when the [American Revolutionary War](#) began, 1775-04-19, and 1967-03-15 = 70091 days (194 (biblical years), 8 (biblical months), 11 days) (191 years, 3 months, 3 weeks, 3 days). Between when the [American Revolutionary War](#) ended, 1783-09-03, and 1967-03-15 = 67032 days (186 (biblical years), 2 (biblical months), 12 days) (183 years, 6 months, 1 week, 5 days). Between when the [American Revolutionary War](#) ratification was effective, 1784-05-12, and 1967-03-15 = 66780 days (185 (biblical years), 6 (biblical months) (182 years, 10 months, 2 days).

Between the beginning of the [400 Silent Years](#) and 1967-10-15, are 864,455 days.
Between the end of the 69th week, 0032-04-06, and 1967-10-15, are 706935 days (1963 biblical years, 8 biblical months, 15 days).
Between the end of the 70th week, if there had been no interruption, 0039-03-01, and 1967-10-15, are 704415 days (1956 biblical years, 8 biblical months, 15 days).
Between 1967-10-15 and 2020-06-03 are 19225 days (53 biblical years, 4 biblical months, 25 days) (52 years, 7 months, 2 weeks, 5 days).

The Yoruba tribe speak the Yoruba language and the Yorubas in the South West of Nigeria. The Yorubas practice the Christians and Moslems religions. The East of Nigeria include the Ibo who speak the Igbo language and are mainly Catholics. The Hausas and Fulanis are in the North of Nigeria. At the Highway 880 South Fremont Exit, the road separates into two, the Alvarado Boulevard, West direction, and Fremont Boulevard, East direction. The author's primary languages are English, a *Germanic* language; and *Yoruba*, a language spoken by western Nigerians. Between the age of twenty and twenty-four, the author developed Kowe, a word and graphic processor. Kowe is an editor, for typing; Kowe's

Between 1997–1998, the author pursued his Doctorate at the University of Wollongong, New South Wales (NSW), Australia; and he visited Villawood Detention Center, a place for illegal migrants and asylum seekers, every Friday, as a Christian missionary. One of those migrants, a Ghanaian, had been at the detention center for up-to six years, and he corresponded with immigration officials, regularly. The author thought of building a website that will allow these migrants to share their experiences with the rest of the world. However, the Internet, was still in infancy, and the author's knowledge was lacking. Also there were only dial-up access, at that time; and the inmates at Villawood, did not have computer access.

Like Jacob, the author's biological father is the second born, and the author is the second twin. **Ortion B. Facing Adversity, Building Resilience, and Finding Joy**. I lived in Australia, Down Under, which is in the Asia-Pacific geographical region, for seven years; we can see a demarcation, West and East Germany, North and South Italy. Tukombo is the author's biological father's fourth child, and she gave birth to twins.

Massacre of the Innocents, 1967-10-15, 1967-12-28, 74 days (2 biblical months, 14 days) (2 months, 1 week) (6 months, 1 week) 1966-12-28...1967-12-28, 291 days (9 biblical months, 21 days) (9 months, 2 weeks, 3 days). 2003-12-28...2004-07-11, 196 days (6 biblical months, 16 days) (6 months, 1 week, 6 days). 2004-07-11...2004-12-28, 170 days (5 biblical months, 20 days) (5 months, 2 weeks, 3 days).

Prophecy & Fulfillment

From	1997-12-31
To	1998-05-08
Time Span	128 days (4 biblical months, 8 days) (4 months, 5 days)
Prophecy	I have brought something against you, but I Am with you.
Fulfillment	Out of Egypt, have I called My son (Hosea 11:1 , Matthew 2:15). My girlfriend, went to Kings Cross and subsequently Campsie, to sleep with another Yoruba man, at my enemies house. 2020-05-02 You were going through, your not being necessary. 1997-12-31 + 7 Biblical Years = 1997-12-31 + 2520 days = 2004-11-24 Silvanu Livemp. 1604-02-03...1998-05-08 = 400 Biblical years = 400 * 360 = 144000 days (Genesis 15:13 , Revelation 7:4). Do you not believe, that I will provide, that need? 1996-02-14... 1998-05-08, 814 days (2 biblical years, 3 biblical months, 4 days) (2 years, 2 months, 3 weeks, 3 days). 1996-06-06... 1998-05-08, 701 days (1 biblical year, 11 biblical months, 11 days) (1 year, 11 months, 1 day). 1995-10-15... 1996-02-14, 122 days (4 biblical months, 2 days) (3 months, 4 weeks, 2 days). 1996-02-14... 1996-10-15, 244 days (8 biblical months, 4 days) (8 months, 1 day). 122 / 366 = 0.3333333333333333333333333333333333.

From	2003-12-12
To	2014-09-25
Time Span	3940 days (10 biblical years, 11 biblical months, 10 days) (10 years, 9 months, 1 week, 6 days)
Prophecy	You don't have the best time, you are my best time line.
Fulfillment	Published on Mar 29, 2015 (Rabbi Jonathan Cahn reveals how he learned about the two coms with the number 7 on their heads having appeared in America. The news about the first one was spread on the 1st day of the Shearith Year 7th year, this 2nd one was born on that same day on the beginning of the Shearith Year on September 25th, 2014. What do they stand for?). These video sections have been published at the Jim Bakker Show on March 25 and 26, 2015.

From	2004-03-23
To	2004-11-10
Time Span	232 days (7 biblical months, 22 days) (7 months, 2 weeks, 4 days)
Prophecy	Do you want a book, Ocean Senior.
Fulfillment	www.JesusInTheLamb.com Walking in the Lamb, you shall follow Me.

From	1973-01-01
To	2004-07-11
Time Span	11514 days (31 biblical years, 11 biblical months, 24 days) (31 years, 6 months, 1 week, 3 days)
Prophecy	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent (45%). Epoch timestamp: 1089504000.
Fulfillment	2004-01-01... 2004-07-11 192 days (6 biblical months, 12 days) (6 months, 1 week, 3 days). 2008-06-12T10:00:00 Interview. Forty five percent, 45%, day Gregorian calendar. 16th & Mission Bart Station. Walk up Mission, from the 2000 block. Van Ness Munt Stop. Interviewers: Mike, Matthew, Raj Guri, Allaire Cold Fusion, Adobe. We don't know disaine alike, as the two of us.

From	1939-04-03
To	2004-07-16
Time Span	23846 days (66 biblical years, 2 biblical months, 26 days) (65 years, 3 months, 2 weeks)
Prophecy	Tuskegee Airmen, money to train.

Prophecy	We need to replace the cook top as the current is too old and not worth fixing. Cost will be \$659 supply and install of cooktop and dispose of old one.
Fulfillment	Joshua 6:26 Shimon Peres .

Autobiography

2024-12-25T19:12:00 Bimpe Bakarar Lawal returned my telephone call. Bimpe Bakarar Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi.

- At Central Piedmont Community College (CPCC), the major course, students and colleagues include:
 - 1. An African American female senior, Gayle.
 - 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
 - 3. Michael Poke, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
 - My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning. 2024-12-25T22:00:00 [What estrange... of the people?](#)
 - I planned to build a traffic light for my project.
 - In a multicultural church where I was part of the congregation, Bernie Alpaugh mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
- 2024-12-25T19:12:00 [When I had the option... I have acclimated.](#)
 - 2024-12-25T19:23:00 [Australia had brought me in... to fit into the crowd.](#)

2024-09-29T01:41:00 Adeyemo Adewuyi Adeniji

What role he played in your life?

They had varying mother... but one father ([Genesis 32:28](#)).
2024-12-31T16:48:00 M Hair. Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
2024-12-31T19:55:00 A male-dominated family. [What adjustment did you need to make to your life? How your living resemble who?](#)

- Post 9-year-old re-location from Ile-Ife to Lagos
 - 1. Patriach, brother Yemo
 - 2. Captain of the Nigerian national hockey team
 - 3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
 - 4. The managing director of Gostio provided lunch money to eat at the Baptist Academy secondary school during form 2...5
- Post-1988 deportation: You called him Daddy, that is what everybody else called him
 - Where did he serve... a people?
 - Where did I... remove myself from the past ([Genesis 31:41](#))?
 - What apart... are new?
 - Spending time... to reality?

Faith An Yao

Age difference

- Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
- 2023-08-31T08:57:00
 - In the year 2024, the author will turn 57 years old.
 - In the year 2024, Faith An Yao will turn 18 years old.
 - In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

- The author's 1st workplace in Nigeria and Australia was with Iboas and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Muñoz? Oral communication and speech. [Where will I find the same... as me?](#) I was setting trainee on how to... place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

In-spite of racism...we can observe.

- Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
- I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
- During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
- Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
 - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 x 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R-Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. [What do I need of a capable human being? What resemblance has He made \(\[Genesis 32:28\]\(#\), \[Genesis 5:3\]\(#\), \[Genesis 4:17\]\(#\) \)? What word reminds \(\[Mark 11:23\]\(#\) \)?](#)
