WordEngineering

Kehinde (Ken) Adewumi Adeniji

A thesis submitted for the degree of Doctor of Philosophy in the Faculty of Science.
[Translate English... Yoruba](#)

Abstract

Thesis Statement: This dissertation introduces [AlphabetSequence](#) (2 [Corinthians 10:9-18](#)). The [AlphabetSequenceIndex](#) is the result of a pure function to sum alphabet places [AlphabetSequence.ca](#). The [AlphabetSequenceIndexScriptureReference](#) are the offsets from the beginning and the ending of the Scripture. The [AlphabetSequenceIndexScriptureReference](#) consists of four parts; there are two references each to particular chapters and verses. The first mention is the forward verse, which the author calculates by determining the [AlphabetSequenceIndex](#) verse in the Bible. The second mention is the forward chapter, and this the author calculates as before, but by substituting the verse with the chapter. Both the backward chapter and backward verse are the corresponding, anticlockwise places. The importance of this work?

- 2021-05-20T17:26:00 [Follow God as a character](#).
 - 2022-11-29T12:53:00 [To track dates and words? And find meaning correlation](#).
 - 2026-07-26T19:25:00 [He had the numbers that he combined with the words](#) ([Ezekiel 33:24](#), [Ephesians 6:2](#)).
- I was at Albertsons Lucky, Charter Square, and I was walking eastward in the south-west quarter of the parking lot, as I exited out of the south-east door, and I had not diverted nor divulged. I am speaking and quoting from the Christian Bible.
- Where does the Bible list? Creation days, genealogies, allies, plagues, tribes, journey, commandments, reigns, kingdoms, disciples, fruit of the Holy Spirit, churches.

Acknowledgments

Chuck Missler of [Koinonia House \(KHouse\)](#) is worthy of note, faith.
The author is indebted to [Iry Scheerow](#), his Master's degree supervisor, at the [University of Technology, Sydney](#) (UTS), 15 Broadway Ultimo (NSW), 2007, Australia. The author is grateful to Tom Osborne, his Artificial Intelligence instructor; and Brian Henderson-Sellers, his Object-Oriented Technology instructor; both also at UTS. The author makes mention of his colleagues at UTS; Decier Mendez, Cesar Orcando, Ricardo Lamas and Peter Milne. The author stretches his open hand to Robyn A. Lindley, his Doctorate degree supervisor at the [University of Wollongong](#) (UOW), NSW 2522, Australia.

Theory

2004-11-10 www.JesusInTheLamb.com		
Part	Example	Commentary
Sub-domain	www	A sub-domain defaults to www.
Domain	JesusInTheLamb	
Country code top-level domain (ccTLD)	.com	An abbreviation for commercial. A default domain extension.
Directory and filename		The default, for example, is index.html
Fragment		
It is not an e-mail address, since it does not include an at sign, @.		
It defaults to port 80.		
It defaults to the homepage.		

The issuing of this domain name may be related to commencing writing the book titled Ocean Senior on 2004-03-23. There has not been a follow-up on future artifacts. But when one reads the Bible, the book of Revelation, which starts with the letters to the 7 churches in Asia Minor, does not instigate future alteration.

1. 2026-07-24T08:54:00 Ongoing ([Exodus 23:30](#), Genesis 22)
2. Rest ([John 19:30](#), Hebrews)

2026-06-24T18:01:00 What use is the word... according to you?

1. Synonymous ([Genesis 22:8](#), [Genesis 22:13](#))
2. Domain name valid
3. Grammar correct

The Bible Database

The Scripture Table

The content of the Bible SQL Server database is principally the Scripture table. The Scripture table has a [composite primary key](#), which consists of three columns; the BookID, ChapterID, and VerseID columns. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT PK_Scripture PRIMARY KEY CLUSTERED
(
    BookID ASC,
    ChapterID ASC,
    VerseID ASC
)
```

is for setting the primary key.
There are varchar(MAX) columns which has the text for each Bible version.

The Scripture Table's BookID Column

Because there are sixty-six books in the Bible, the BookID ranges between 1 and 66; starting from Genesis and ending at Revelation. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_BookID_Range CHECK (BookID BETWEEN 1 AND 66)
```

will set the range restriction.

The Scripture Table's ChapterID Column

The ChapterID ranges between 1 and 150; the SQL statement

```
SELECT MAX(ChapterID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_ChapterID_Range CHECK (((ChapterID)>=1) AND [ChapterID]<=(150)))
```

will set the range restriction.
[There are individual chapters for each book.](#)

The Scripture Table's VerseID Column

The VerseID ranges between 1 and 176; the SQL statement

```
SELECT MAX(VerseID) FROM Bible..Scripture
```

is for determining the upper limit. The SQL statement

```
ALTER TABLE Bible..Scripture WITH CHECK ADD CONSTRAINT CK_Scripture_VerseID_Range CHECK (((VerseID)>=1) AND [VerseID]<=(176)))
```

will set the range restriction.

```
SELECT TOP (1) BookID, ChapterID, VerseID, AmericanStandardBible, BibleInBasicEnglish, DarbyEnglishBible, KingJamesVersion, WebsterBible, WorldEnglishBible, YoungLiteralTranslation, ChapterIDSequence, VerseIDSequence,
    AccordingToManySlavesSpokenID, Testament, BookTitle, ScriptureReference, ChapterIDSequencePercent, VerseIDSequencePercent, BibleReference, BookGroup, BookAuthor
FROM Scripture_View
ORDER BY VerseID DESC
```

Will say the longest verse occurs in the 19th book of the Bible, Psalms, and its 119th chapter; 597th chapter of the Bible, 16075th verse of the Bible.

The Scripture Table's KingJamesVersion Column

The author would have considered placing an index on the KingJamesVersion column, but the author found out during his research that the verses in the KingJamesVersion are not unique nor distinct, and indexes are not applicable to where like query conditions with leading wildcards.

The Scripture View's Testament Column

The SQL statement

```
(case when BookID <=(39) then 'Old' else 'New' end)
```

will set this computed column. The Testament column serves as a filter, such as, in the [BibleWordHelper.cs](#).

The Scripture View's BookTitle Column

The SQL statement

```
dbo.udf_BookTitle(BookID)
```

It is for determining this computed column. As expected, there is a correlation between the BookID column, and its corresponding BookTitle column; it progresses from Genesis to Revelation. Because SQL does not support arrays, the author chose to write an [SQL CLR C#](#) function for determining the BookTitle when passed the BookID. Although C# supports [nullable](#) assertions, and particularly pre-conditions, the author only checks BookID range validity, and returns NULL, if the argument does not fall within this range. The author could throw exceptions, but the author does not know the side effects nor the full ramifications. Instead of writing and determining the book title using C#, an alternative is to use a database table. A table with two columns, BookID and BookTitle, will store and make extractable the sixty-six books. For example, the first book of the New Testament, the 40th book, spelling is Matthew or Mathew, double t versus (V5) single t. An improvement on the current implementation is to use soundex to 2026-01-22T10:12:00 index the book title and determine the corresponding BookID.

The Scripture View's ScriptureReference Column

The SQL statement

```
dbo.udf_ScriptureReference(BookID, ChapterID, VerseID)
```

Will calculate the conjecture of the BookTitle, ChapterID, and VerseID. Since this is a computed column, therefore, the author is not able to set its [Entity Integrity](#); if it were not the SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT uc_Scripture_ScriptureReference UNIQUE (ScriptureReference)
```

Will set its entity integrity. The distinction between raw data versus computed columns is performance and space.

- Style of Writing

The Scripture Table's ChapterIDSequence Column

When loading data, the author decides the ChapterIDSequence column, and increments it when the BookID and ChapterID, change during loading. The ChapterIDSequence ranges between 1 and 1189, starting in Genesis 1 and ending at Revelation 22. The SQL statement

```
SELECT BookID, ChapterID FROM Bible..Scripture GROUP BY BookID, ChapterID ORDER BY BookID, ChapterID
```

```
select count(
distinct
        cast(BookID as varchar(6))
+ ' '
+ cast(ChapterID as varchar(6))
)
```

Another SQL statement

```

; with cte
(
    BookID
    , ChapterID
)
as
(
    select distinct BookID, ChapterID
    FROM Bible..Scripture
)
select cnt = count(*)
from cte

```

The SQL statement

The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
```

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31102)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence);
```

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 3
```

ScriptureReference	BibleReference
<u>John 1:1</u>	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

```

                    verseID
                )
            );
        }

        public const int BookIDMaximum = 66;
        public const int ChapterIDMaximum = 158;
        public const int VerseIDMaximum = 176;
    }
}

```

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving Separation of concerns (SoC).

The Exact Table

The Exalt table's primary task, is to tell, on the one hand, the Scripture table the Bible. Its information set includes each word's first and last scripture reference occurrence(s), and count of occurrence(s). On the other, occurs only once, then the last occurrence is set to null. The incentive for writing the exalt module comes from Dave Hunt, who will talk of each word's specifics, and Chuck Hinkle who noted that the first occurrence of the word, love is in (Genesis 22:1). The exalt table, is a holding area, for staging information, that could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using Language Integrated Query. The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a need to access the Scripture table. The Exalt table is dynamic, and it supports the other version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exalt table loading procedure needs expansion to add, this flexibility. Word Occurrence is dynamic, and it supports the other versions of the Bible.

The Exact result for the author's initials, KAA, is Karkaa, meaning floor (Joshua 15:3).

The Exact Table's ExactID Column

The ExactID is an identity column, meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statementer

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

- | Scales & Measurements | | |
|-----------------------|--|--|
| Type of Scale | Commentary | Example of Scale |
| Nominal Scales | The numbers may serve as tags or labels which are quantitative with no values. | <ul style="list-style-type: none"> Introduced on July 1, 1963, the ZIP Code system (an acronym for Zone Improvement Plan) traditionally contained five digits. In 1983, an extended code was introduced named ZIP+4; these possitly a hyphen and four additional digits for more specific addressing. The author does not validate the Zip Code, since it is not a world standard. 2025-06-07T07:08:00 Our view of the world attains us. Telephone number |
| Categorical Scales | | Dewey Decimal Classification used in libraries |
| Absolute Scales | An absolute scale is a count of individual, distinct items in the set. | <ul style="list-style-type: none"> This may be the physical count of word occurrences in the Bible. The count of books that are in the Bible groups. For example, there are 5 books by Moses, and 4 Gospel books. The SQL COUNT() function returns the number of rows that matches a specified criterion. The Microsoft SQL Server variable @@ROWCOUNT returns the affected rows from any statement, even if it's not DML or a SELECT query. |
| Ordinal Scales | An ordinal scale puts the attribute in a linear order. There are no operations or computations done with it. | <ul style="list-style-type: none"> In an ordered list HTML element, 2025-06-08T09:22:00 the list items are sequentially arranged. An identity column is a numeric column in a table that is automatically populated with an integer value each time a row is inserted. The SQL ROW_NUMBER() function is a temporary value calculated when the query is run. To persist numbers in a table, see IDENTITY Property and SEQUENCE The @counter-style CSS at-rule lets you extend predefined list styles and define your own counter styles that are not part of the predefined set of styles. The @counter-style rule contains descriptors defining how the counter value is converted into a string representation. |
| Rank Scales | They have a linear ordering, and an origin. Having an origin prevent some of the transitivity problems. | <ul style="list-style-type: none"> Military ranks |

Type of Scale	Commentary	Example of Scale
		• Mohs scale for hardness (geology) of minerals • Scofield scale for the strength of peppers • Completely Automated Public Turing Test to tell Computers and Humans Apart (CAPTCHA) is a type of challenge-response turing test used in computing to determine whether the user is human in order to deter bot attacks and spam. The Contact table contains a title column, SQL offers a group by, and having clause. Strength of password? Soundex?
Interval Scales	An interval scale is based on a standardized unit or interval. Another property of these scales is that they have no natural origin.	Date difference, UNIX epoch?
Ratio Scales	These scales have a base unit, natural origin and meaningful operations. We also allow the creation of compound units with ratio and interval scales. They are called ratio scales because the units of measure are expressed as multiples or fractions of some base unit.	• HTML input range • CSS percentage

(Joe Celko, 2025-03-07).

Relational Database Hierarchy

1. Catalog: Is a collection of databases, for example, Bible, WordEngineering, URI.
2. Schema: Is a collection of objects, which may include tables, views, indexes, stored procedures, triggers.
3. Table: Is 2-dimensional with horizontal rows and vertical columns.
4. Column: It is a physical actualized attribute.

Functional Dependencies		
Determinant	Functionally Dependent	Implementation
Bible.Scripture.BookID	Bible.Scripture_View.BookTitle	Bible.udf_BibleBookIDTitle()
Bible.Scripture.BookID, Bible.Scripture.ChapterID, Bible.Scripture.VerseID	Bible.Scripture_View.ScriptureReference	Bible.udf_ScriptureReference()
Determination is achieved through computed columns.		

(Allen G. Taylor, 2024).

Index Query Type

Query Type	Commentary	Example	Structured Query Language (SQL)
Point query	It will return only 1 record, and it is restricted by an equality condition on the primary key or unique index.	Useful for searching for a particular verse.	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = 1
Multipoint query	It may return more than 1 record, as there may be multiple records. It is restricted by an equality condition on part of a potential composite key.	Useful for searching for a particular chapter or book.	SELECT * FROM Bible..Scripture_View WHERE ChapterIDSequence = 1
Range query	It returns a set of records whose values are within an interval or half interval. If it is restricted by both lower and upper bounds, then there is an interval. It is a half interval, if it specifies only one bound.	Useful for searching for consecutive verses, chapters or books.	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence BETWEEN 1 AND 10 ; SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence <= 5
Prefix match query	The set is the match of an attribute.	The author is unfamiliar with any use-case where only the first part of the wildcard is searched. The first part of the scripture reference is similar. For the BibleWord searches, the author uses like for match queries.	SELECT * FROM Bible..Scripture_View WHERE KingJamesVersion LIKE (SELECT TOP 1 KingJamesVersion FROM Bible..Scripture_View GROUP BY KingJamesVersion ORDER BY COUNT(KingJamesVersion) DESC)
Extremal query	It returns either the minimum or maximum extreme.	Statistics	SELECT * FROM Bible..Scripture_View WHERE VerseIDSequence = (SELECT MAX(VerseIDSequence) FROM Bible..Scripture_View)
Ordering query	The records returned are sorted.	The results of the author are normally in ascending order.	SELECT TOP 10 * FROM Bible..Scripture_View ORDER BY VerseIDSequence DESC
Grouping query	The records returned are grouped.	Rarely does the author group rows by issuing the group by clause.	SELECT BookGroup, COUNT(BookGroup) BookGroupVersesCount FROM Bible..Scripture_View GROUP BY BookGroup ORDER BY BookGroup
Equi-join query	The records are retrieved from multiple sources.	The author uses views for table joins.	

(Allen G. Taylor, 2024).

Designing Software Architectures: A Practical Approach Making Design Decisions

- Principle 1: Use Facts
- Principle 2: Check Assumptions
- This whole thing started with keeping [a work reference](#).
 - Even though Yoruba is the native language of the author, he still and invariably relies on translate.google.com.
 - The author depends on a typing assistant.
- Principle 3: Explore Contexts
- Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
- Principle 4: Anticipate Risks
- The undesirable outcome and their probability of re-occurrence will include:
- Data loss or corruption because of issuing the database modification command and lack of timely archiving
 - Hardware, software, or network failure
 - ~~Vendor withdrawal of support~~
- Microsoft:
- Introduced .NET core and Model-view-controller (MVC).
 - Inability to restore deprecated Microsoft SQL Server backup versions.
 - Command-line reverse-engineering of database script does not conform with the newly released data types.
- Principle 5: Assign Priorities
- The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
- Principle 6: Define Time Horizon
- ~~What period has God used?~~
- In the year 1988 — military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ([Numbers 1:13](#), [Luke 2:42](#)).
 - On 1997-12-31 — priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ([Numbers 4:30](#), [Matthew 2:16](#)).
 - In the year 2007 — generation time span: this masturbation will bring water. My 40th year ([Numbers 14:33-34](#), [Numbers 32:13](#)).
- Principle 7: Generate Multiple Solution Options
- ~~How versatile am I... at amending others? I have to rely my perception to technology providers.~~
- Principle 8: Design Around Constraints
- ~~Relational databases offer the ability to set constraints.~~
- Data type
 - Nullable
 - Primary key and unique index
 - Foreign key
- Principle 9: Weigh the Pros and Cons
- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
 - The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BibleWord, HitWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.

- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prose and Fulfillment
- Autobiography
- State of Writing

Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.

Data Modeling: Normalization

1. First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
2. Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author, the WordEngineering database size, is currently 33390528 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1115.1
sp_spaceused	The WordEngineering database currently uses 32607.94 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 122966.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. <u>Most select applies to Bible..Scripture_View</u> . Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <, >, <=, >=, !<, >, >= !>	The operators listed will check for a single value. The operators that consist of !, will check for non-matches. <u>In most cases, rarely is this in use, !< or/and !>. This is the first time, he is becoming aware ...of these expressions. This is the first time, he is becoming aware ...of these operators. Overseeing for a date or number will search for particular types.</u>
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later <u>limit to required rows</u> .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction "%%"
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, >=, <=, >=, <>
Table join supersedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.
- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

1. Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
2. Install a DBMS.
3. Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
4. Create database. Microsoft SQL Server supports multiple instances and databases.
5. The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
6. The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
7. The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
8. Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChris
 - URIEntertainment
 - URIGoogleNews
 - URIScripture

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospects and Fulfillment
- Autobiography
- Style of Writing

- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. It is in order of occurrence.

Predicate logic

The choice of SQL Server impose7 datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

1. Excessive number of objects: Each web page mainly contains 2025-11-29T08:56:00 the minimalistic page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432> is which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
2. 2025-12-01T20:01:00 Unnecessary date manipulation: [http://github.com/KenAdenji/WordEngineering/WordUnion/9432](http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432) is does 2 types of date calculations. These are the:
 - Call the explicit nowTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DateFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordCross/DonFeetLeftAOne.html> 2023-02-17...2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
3. 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests: <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432> is

```
fetchRender: async function
(
    fetchUrl,
    fetchRequest,
    callback,
    uIdisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchUrl,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataSet = JSON.parse(responseJSON.d);
            callback(dataSet, uIdisplay, rowColumn);
        })
    } catch (e) {
        uIdisplay.innerHTML = e;
    }
};
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), JavaScript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referencable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/GetPage.html> calls the [http://github.com/KenAdenji/WordEngineering/WordUnion/9432](http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432) is ajax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

Arrays and Loops

- For displaying the Bible book titles, the 66 books are in a JavaScript iterable array. This reduces the data load from the server to client, and it offers spelling flexibility. The select options resemble similar customization.

HyperText Markup Language (HTML) Document

- The DOCTYPE is the first declaration in an HTML document, and it is the conformation standard specification.
- The html tag is the root and the container for all the other tags.
- The head tag contains the title and the meta tags for the search engine optimization (SEO). The various documents will indicate the cascading style sheet (CSS) directive.
- The body tag contains the visible content of the document. Its resultSet or resultSet div will contain the particular details that the program generates.

Database Standard

Database Design

1. The relational model is for storing information in tables.
2. The author normalizes data using Object-relational mapping.
3. All the databases are OJTP (Online Transactional Processing), not OLAP (Online analytical processing).
4. Avoid deadlock occurrences by not permitting user database updates.
5. All the transactions follow similar routes and sequences, and the author practices granularity with the locks.
6. Database updates are through stored procedures, which recognize and avoid the potential of integrity violation.

Database Security

1. The secretive web.config file contains the database access information.
2. The web.config file does not explicitly mention the user login name nor password.
3. Give access rights to roles, not to specific login identities nor user names.

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asaa Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use CSS sprites; since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification; because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [GitHub.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, CF, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)
2. [Attach](#)
3. [Snapshot](#)
4. [SQL Server Data Definition Language \(DDL\)](#)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.
(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.epraintech.com/WordEngineering>
 - The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
 - Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
 - Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4190610/designing-rest-api-endpoints-nath-params-vs-query-params>
 - Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
 - Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
 - Body Formats: The load penalty in XML overweighs the newness of the JSON transport medium.
 - HTTP Status Codes: JQuery satisfactorily handles the success or error of an asynchronous operation.
 - Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
 - Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic
- (Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations. When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

- The alphabets and words make-up the author's work. The composition of the words is indefinite.
- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
 - The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
 - The null character is in the Word column, when there is only commentary.
 - Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
{
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
}
{
    if (IsAlpha(word[index]))
    {
        alphabetSequenceIndex += (int)word[index] - ascIIA + 1;
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete. The author is comfortable and familiar with using datasets and datatables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.asmx	Query(word)
	ID(word)
AlphabetSequence.cs	ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

[GetAPage.html](#) Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right [.NET Framework Data Providers](#). The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50 10
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

1. Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 1. git status
 2. git add
 3. git commit
 4. git push
2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
3. Config: The web.config file contains the database connection strings; web services user specific credentials. The system administrator at external locations may customize these information for there specific use.
4. Backing services: These are external independent resources, such as the database, SMTP.
5. Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compileable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables. The SQL Server encompasses services which are stoppable to do data files backup.
7. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
8. Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
9. Disposability: The author's take on expendable work includes the following:
 - Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variable(s) initialization
10. Development/production parity: By first finalizing non repetitive work, the author can now focus on specialization activities.
 - The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: Dev/ops expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
11. Logs: The author logs exceptions, that is, viewable in the Event Viewer. The author displays error messages to the user, the .NET Framework determines the detail, and the localhost address offers in-depth peculiarities.
12. Administration processes: These are one-off tasks that the environment demands of the knowledge worker. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

(The Twelve-Factor App)

Who, what, when, where, why?

Who

The author gives credence to the information source. Whenever it is possible, the author identifies the speaker. If the source is attributable to him, the author rarely explicitly identifies himself.

What

The primary contribution of the author is the word. The author draws upon the word of God and tries to derive meaning.

When

God gives most of His information in a dream, vision or face-to-face.
How do people place date? On each day of the week (Genesis 1-2)? Seniority comes first ([John 1:15](#), [John 1:27](#), [John 1:30](#)).

Where

The author refers to the physical location or scenery of participation.

Why

The endeavor of the author is to share the word.

Artificial Intelligence

Deep Learning

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

Machine Learning

Our entirety chiefly pertains to Him.

MultiLayer Perceptron (MLP)

DateDifference.html is browser computation, built on JavaScript. The overall function calls particular functions for determining the days difference in the Biblical and Gregorian Calendar.
DateDifference.aspx is a server-side C# ASP.NET web form.
The Remember's table computed columns are Transcript-SQL and SQL-CLR functions.
Our computation is separable to back-end and forward-end code residence; SQL-CLR provides the opportunity to have functionality callable from both parts.
Code re-use sounds good, but it is dependent on many factors.

Feature

He addressed time. Each information the author measures is a feature that the author appraises. The features are the words spoken and the events seen.

Factors of Variation

These are out of context attributes that influence the outcome. Outside the context of managing. Their influence is not determinable.

Depth of the Computational Graph

The author does ASCII code alphabet place summations. There is just not one result, but a set of alternatives; the user may select the most right. For example, AlphabetSequence, produces an index and a scripture reference. The depth in the case of AlphabetSequence is two, with the first result, index, acting as an entry to the second result, scripture reference. The index is an arithmetic calculation, addition; the second result, scripture reference, is a composition algorithm that includes determining the beginning and end span, for the chapter and verse.

Depth of the Probabilistic Modeling Graph

This checks the path to our succession, the thread between concepts. Earlier and recent entries are comparable. The earlier Bible versions serve as a resource for the later versions of the Bible.

Probability

Formerly, the HisWord's table primary key is its Word column, and in SQL Server the maximum size of a unique key is 900 bytes; therefore, the limit of its distinct entries is $900 \wedge (2 \wedge 8) = 900 \wedge 256 = 1.932334983228891510545406872202e+756$.

Degree of Belief

In [GetAPage.html](#) the author will consider the word(s) AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference correlate. Each word is a feature, however, hidden and has a contributing influence on the result.
In the BibleWord section, the author will look at each word, in the context of the sentence, and see if it is in the Bible, as a phrase or word combination.
In the BibleDictionary section, the author will explain the meaning of each word. The degree of belief is most certain; since we display each word found in the Bible dictionaries.

- [Title](#)

- [Series of Writings](#)

[Frequentist Probability](#)

In [GetAPage.html](#) the same input will produce the same result; because the database is consistent. When the user enters a new word, this trains the system.
WordEngineering started out as the author trying to use the Bible to decipher God's word; however, to do growth, personalization, customization, appeal to more audience. Our task is to see them, say, I done ([John 19:30](#)). [Specifications...is done.](#)

[Bayesian Probability](#)

Making specific, a generalization; given one result set, can the author make a general result? Does it stand the test of a general audience? Does a sample, qualify for the total?

[Random variable](#)

The AlphabetSequenceIndex may range between 1 and (8000 * 26), 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite.

[Probability Mass Functions](#)

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences.
(Ian Goodfellow, 2016)

Statistics Terms

Key Terms for Data Types

Continuous

The Dated column is a valid DateTime, and generally, it is ongoing, rarely does the author backdate.

Discrete

The Identity columns and AlphabetSequenceIndex are integer values; that fall into a small unique set.

Categorical

The AlphabetSequenceIndexScriptureReference is of the scripture reference type, and it is a string.

Binary

The Testament column is either Old or New.

Ordinal

The Identity columns are all ordinal, following an ascending order.

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format.

Feature

The most important predictor columns are the Word, Dated, and ContactID.

Outcome

The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference.

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017).

Software Engineering

Programmer's Workbench (PWB)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable.

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.
The dreams are re-collect-able, and recallable ([Numbers 12:6-8](#)).

I have made what I have spoken, ready

Web Design Fundamental

Business Model

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him.

Content Authoring

How query means more ([Isaiah 41:22](#))?

Linking Strategy

This is what I have done; this is what you will do. What did we understand as His part, what did we understand as our future? To reflect, My correlate. In an anchor, if there is no href attribute or its empty; then the browser should link to the default search engine as its destination and pass its innerText. Alternatively, when the user right clicks on a browser hyperlink, there may be a suggestion option for the search engine to re-direct to a specific web page or to list URIs as in a browser search. Supplementary information for a href attribute is meta-data and [gibbs.com](#).

(Jakob Nielsen, 2000)

Web

We will make advancement over Tim Berners-Lee earlier idea of a unified web:

1. Cascading Style Sheets (CSS) will offer customization of what the user views by the use of, for example, Media Queries.
2. Single Page Application (SPA) will circumvent the unit of navigation.
3. Uniform Resource Identifier (URI) is supportable by other means of specifying information, such as Global Positioning System (GPS) Geo-Location.
4. Clients such as browsers store information on cookies, local and session storage.

(Jakob Nielsen, 2000).

Hypertext

The author presents this dissertation in a hypertext format. The table of content is to the left and it contains focusing anchors and internal links, to the rest of the document which is to the right. The references section contains broadening links to external documents, which are available on the web. The web applications do not contain internal links. Same Origin are for retrieving scripture reference, Bible word; Cross-Origin Resource Sharing (CORS) are for requesting information from external URIs.

(Department of Computer Science at the University of Cape Town).

Characteristic

Resilient

[GetAPage](#) The Bible is separable into parts; these are books, chapters, verses. Dividing a life, according to purpose ([Matthew 1:12](#)). 14 Biblical Generations = 14 * 40 * 360 = 201600.
[DateDifference.aspx](#) The .NET Framework, C# and SQL Server support the Common Era; the date ranges between 0001-01-01 and 9999-12-31. The date difference will display correctly for the time interval - days, Biblical Calendar, and all the dates after the introduction of the Gregorian Calendar.

Declarative

SQL, Linq, CSS are declarative languages, but JavaScript is a functional language.

Contextual

Enhancements to JavaScript, such as const and let influence hoisting. So does script literal, strict mode, class.
The C# class container model and the optional namespace alias content the author.
Cascading Style Sheets (CSS) is modular, and its rules trickle down.

Continuous

Placing the [App_Offline.htm](#) file in the virtual directory of the web application will shut-down the application, unload the application domain from the server, and stop processing any new incoming requests for the application.
A single batch file, with a single command line, builds the only .dll, InformationInTransit.dll
csc /out:InformationInTransit.dll /target:library /recurse:*.cs /
reference:System.DirectoryServices.AccountManagement.dll,"bin\Debug\WtlaGilityPack.dll","bin\Debug\lTextSharp.dll","bin\Debug\MongoDB.Bson.dll","bin\Debug\MongoDB.Driver.dll","bin\Debug\MongoDB.Driver.Core.dll","bin\Debug\Newtonsoft.Json.dll","C:\Windows\Microsoft.NET\Framework\v4.0.30319\WUP\PresentationFramework.dll","bin\Debug\System.Speech.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.ConnectionInfo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Smo.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Dmf.Adapters.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Dmf.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Dmf.SqlClnrWrapper.dll","C:\Program Files (x86)\Microsoft SQL Server\100\SDK\Assemblies\Microsoft.SqlServer.Management.Sds.Sfc.dll","Microsoft.VisualBasic.dll /nowarn:162,168,219,618,649 /unsafe

- State of Writing

After testing, InformationInTransit.dll is deployable to the WordEngineering's virtual directory, bin sub-directory. This transfer is via the xcopy command or the Microsoft Windows Explorer user interface (UI).

When the content of a server-side file with an .aspx or .asmx extension changes, the ASP.NET framework automatically re-compiles for serving future requests.

Query by John Resig is for making Ajax calls to the server. The more recent fetch command is also useful in later cases. JQuery helps to load the latest copy of the author's JavaScript repository 9432.js; since browser caching occurs for JavaScript files for a length of time.

The single .css file 9432.css is callable at the bottom of each .html file's head node; JavaScript statements are in the last lines of the .html files. This means that the browser knows how to show the HTML elements before reaching their origination, and the browser's JavaScript engine will not reference a HTML node before the declaration of its definition.

Set a Database to Single-user Mode

```
ALTER DATABASE WordEngineering
SET SINGLE_USER
WITH ROLLBACK IMMEDIATE;
GO
ALTER DATABASE WordEngineering
SET READ_ONLY;
GO
ALTER DATABASE WordEngineering
SET MULTI_USER;
```

If the research of the author is a team effort; the additional expense, time and effort, in staged deployments, is justifiable; such as development, test, production phases.

The author will place non-Microsoft DLLs in the virtual directory bin sub-directory, and the author will refer to Microsoft DLLs in the web.config file.

The web.config is generally consistent across deployment, the only variable is the database server name, and when the application and database server exists on the same machine, the connectionStrings may use Data Source=(local);Initial Catalog=master;Integrated Security=SSPI. This means that the author will explicitly specify the database, object owner, and system object name. The Application pool will take care of the security. There are no environment variables, in use, at this time. The HTML files, when calling web services, will specify the full virtual directory path, but when appending .css and JavaScript files, relative directories will suffice, full path directory and filename is unnecessary and an overkill.

The author standardized on Microsoft SQL Server as the relational database of choice. There are several alternatives in the market. All database interaction goes through one access point, DataCommand.cs, only this single file needs re-work if there is a database variety change.

When running a unit of code, for the first time, it will initialize the static variables. The ScriptureReference.html will issue a unique quote-of-the-day, every day; and a random quote, every time. The author program uses the release version of JQuery, which is the most up-to-date. The web services, such as, Sefaria.org, should not need code-revisit. The code in the third-party libraries, such as, Newtonsoft.Json.dll, is consistent, and should rarely need re-deployment.

The application is mostly stateless except for the database read.

Internet Information Server (IIS) HyperText Transfer Protocol (HTTP) by default runs on port 80, like other web servers, but this is modifiable.

Using the current architecture, the author takes care of concurrency and deadlocks; because database writes rarely occur and are short, reads are tolerant.

The threads are simple and conclusive; therefore, there are small start-up and short-down periods.

There is unity between the development and production team, environment, and time frame. The same knowledge worker can write, deploy, and run code.

The author has experience, reporting web server logs, using WebLogParser. The author relies on DebugView for logging and monitoring exceptions. The SQL Server Management Studio offers the Error Log, for viewing the database activities.

The SQL Server Maintenance Plan is for scheduling full database and transaction log backup, periodically.

To reduce database load, the author considers the selection operation - where clause, distinct and top; projection operation - specify the column list, and not use the universal *, for all columns. Rarely does the author join tables, minimizing the work and resultset, in a set-level language.

(DB2 Developer's Guide).

HTML5

Semantic Elements

The author makes heavy use of the table semantic element for rendering tabular information. The author uses the input element and specifies either the text, number or date type attribute. The author tries the canvas and video elements for proof-of-concept.

Non-Semantic Elements

The div and span elements are for rendering block and in-line information. The author uses the div as a container for the ubiquitous result set; which may contain a single or multiple tables. The span is a space for a non-block display.

Communication of God

- Audio: God first communicated with me by His Word.
- mih-out sound (MOS): This means of communication may occur when God intends interpretation or translation by a third-party.
- Video: This is the most resourceful use.

Biblically

What did the Jews used numbers for, as mentioned in the Bible?

- Time: Creation...end time, period of life, marriage, worship, occupation, anniversary, prophecy and fulfillment, schedule
- Babel: One language and of one speech (Genesis 11:1-9; Genesis 11:2)
- Witness: Two or three (Deuteronomy 17:6; Deuteronomy 19:15; Matthew 18:16; 2 Corinthians 13:1; 1 Timothy 5:19; Hebrews 10:28; Revelation 11:3)
- No man could number (Revelation 7:9; Matthew 10:30; Luke 12:7)

How are names issued Biblically?

- God initial naming such as, Adam, Ishmael, Isaac, John the Baptist, Jesus (Genesis 5:2; Genesis 16:11; Genesis 17:19; Luke 1:13; Isaiah 7:14; Matthew 1:23)
- God name changes such as, Abram to Abraham, Sarai to Sarah, Jacob to Israel (Genesis 17:5; Genesis 17:15; Genesis 32:28; Genesis 35:10)
- Family naming, such as, Eve, Cain, Seth (Genesis 3:20; Genesis 4:1; Genesis 4:25)

The word is the author's file naming convention.

Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.																				
Constructor method	To create and initialize a class instance.																				
Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.																				

Steer

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization? • The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion. • With search-engine queries, the author proposes a query-language. This potentially affords better resultset granularity restriction, arrangement option, and maturity of use compensation.

Data Science A Hands-On Introduction

This research largely deals with structured data that is put into a relational database. The word is easily associable with a table. The dated column is when the word occurs. The scripture reference column is the guide to the Bible. The columns contain numerical and categorical data. The numbers are the sequence and date columns. The categories are textual and these include the URI, location and scenery columns. Humans are familiar with the recording of information into tables. The [DatesComputation.html](#) is the first time that the author uses pairing data.

How does the work of the author accompany the Bible?

The Terminology of Machine Learning in Relation to AlphabetSequence

Term	Meaning
Training dataset or training set	The recording of the word in the database.
Example (or data point, data instance, sample)	Each database row or record.
Predict Label (or target)	The corresponding Bible text.
Linearity assumption	The features alphabet places.
Weight	Since the word is the only feature, it is the only influence.
Bias	A starting value.

(Dive into Deep Learning)

Object Oriented Programming - GetAPage.html

[A type of us: is a kind of us?](#) GetAPage.html is Bible specific.

Parent Scripts and Objects

GetAPage.html contains the HTML5 directive, head, and body sections. The head section contains the title and meta tags for search-engine optimization (SEO). The 3 languages that make up a web page are in the following ascending order: CSS, HTML, JavaScript.

HTML is an element's nodes. There are only single instances of the input and submit elements. There are multiple div containers for the result sets. Although HTML supports attributes, the ID attribute is the author's only general declaration.

Both CSS and JavaScript act on HTML tags. JavaScript and CSS render the contents of HTML.

There are minute uses of global variables. The author discourages this, because of encapsulation and debugging traceability and granularity.

- | Dated | Word | Commentary | Scripture Reference | Word inference | Count of verses | Running total | Percentage (%) then | Percentage (%) now |

1. 2026-06-01T03:14:10 In the south, at a station, I watched my twin sibling walk towards the north, after transport had departed, and I realized my own vocation was followed into the footsteps of my twin sibling to officiate game time.
2. 2026-06-01T08:40:00 [Separated into halves...separated into quarters](#) (Hebrews 11:23-29; Matthew 1:21-23; Revelation 21:23).
On 1993-09-24, I watched the Sydney 2000 Summer Olympics host selection. At Circular Quay railers' station, I saw the Olympic torch being lit by the Australian Olympic flame. The torchbearers were the Sydney Olympic torchbearers who walked from the north-east westward.
I know the end time. 2026-06-01T02:00:00 To a game, there may be interruptions. 2026-06-01T04:23:00 There are separation of intervals.
2026-01-20T07:07:00 A male was given an award for officiating what I perceived to be members of the opposite gender games. I went inside a room, and as I viewed from the south-west, I saw a male standing in the center-east and on top of him, his property was labeled with his first name initial and his last name ([Revelation 14:1](#), [Revelation 14:4](#)).
2. 2026-06-16T01:36:00 My twin sibling and I were attending a conference. My twin sibling warned me, and he briefed me that I have industry experience that it is user-experience that the interviewers will focus on. A form contains a question for the responder to check if they are currently employed. He told me to give a speech at a podium, and introduce my Olympic medal-winning husband, who walked from the north-center westward.
2026-06-16T19:10:25 My twin sibling is learning Progress database on the job, like I fully tried to learn JavaScript at Baynet World Inc. (BayNet.com) and Daigaku Honyaku Center (DHC).

5. = 2026-07-15T14:13:00 [Lam...making a person...as you.](#)
In the south-east vehicle parking lot of the Chan Family, 4701 Mallard Common, 2026-07-15T14:15:00, I contemplated the career starting point of Ademioluwa. I projected Ademioluwa should begin his industry experience in Quality Assurance (QA), which was the beginning for Kevin the son of the Chan Family, Sydney, Australia. Since the year 2000, my twin sibling has focused on Web Engineering and especially Agile methodology. On Friday, the 1995-05-07, my twin sibling and I traveled to Los Angeles for the christening of Ademioluwa on Saturday, 1995-05-08. In the master bedroom closet, the Holy Spirit said in the Yoruba language, Ibe yan ni ko, lo yi; which translated to English, which means, It is my person's house, you are going to. The word came in the center, between the houses of Mahdu, 4703 Mallard Common, and the house of the Chan family, 4701 Mallard Common, as I turned back, returned from the intersection of Mallard Common and Woodstock Common, east.
2026-07-21T12:59:00 off-beasted the AC Transit line 281 bus at the intersection of Fremont Boulevard and Paseo Padre Parkway, north-east, and I walked southwest. Kimberly Lee was walking in front of me towards the south. Audrey Russell of Milk & Honey Cafe, Peapack Community, is traveling to Amsterdam, Netherlands, and I am following her.
[Redemption](#). While walking on Paseo Padre Parkway between Blackstone Way and Sward Drive, on the overhead bridge, the word, salvation, was spoken. I saw on the bridge an orange pencil, Office Depot #Z7H/B.

The reading child prefers the other children to learn his language.... Scene 1: In the center-west, I am lost and afraid. This is probably in the vicinity of the house of Ahijah Lateef Kayode Jakande (JKJ), action governor: I heard some children speaking, learning, and specializing in a regional language. 16:12 The reading child prefers the other children to learn his language.... which is indigenous to their territory. Scene 2: Mathew Omoruyi is the host of an acquaintance, family and friends party. Mathew Omoruyi is standing in the center-west with a group of people, and I am looking at them. I asked Mathew Omoruyi about the absence of our mutual friend, Gordon Orji. Mathew Omoruyi said Gordon Orji depends on his Jamaican wife for travel, and Mathew Omoruyi is tired of the expectations of Gordon Orji. There are questions about the kinaryary travel plans of Gordon Orji. The indication is generational territorial grabbing will decide the 2024 presidential election. The temporal non-attendance of a dependent, Gordon Orji, is wait-and-see. The Republican is more pro-American and astute, while the Catholic party is more alive-giving.

- AlphabetSequenceIndex language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026).

2026-05-10T14:05:00 What exact... has He notice... about you?

- 2026-05-10T14:05:00 Re-locate:
 - Prior to 1988-10-15 First dream:
 - I am taking you on a journey.
 - 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).
Face to face: Out of Egypt, have I called My Son (*Isaiah 11:1*).
 - 1999-05-07 First word, after re-locating to the United States of America (USA).
Face to face, in the wardrobe, closet, of the master bedroom. Ile eyan mi lon lo yi. It is my person you are going to.

2026-05-07T17:49:00 Word rank

- They were taught by the spirit... to talk as the spirit.*

2026-05-06T11:52:00 HTML tags Unordered List Versus (VS) Ordered List

The difference between the ordered list tag, ol, and the unordered list tag, ul, is not enormous... to deserve 2 separate tags. An optional... style of numbering attribute will suffice... which may have a default. The ordered list tag already has a type attribute.

2026-05-07T12:22:00 How can he... be... like us?

- I have always drifted toward the academic.*

2026-05-02T21:30:00 Could I re-write this... biblical?

- Power of the Holy Spirit (2 *Peter 1:21*)

2026-04-27T16:01:00 WordEngineering query

- WordEngineering query - database
Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
 - Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
 - Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
 - Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or on the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
- WordEngineering query - client
Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
 - Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
 - Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
 - 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 To know at the start... what I Am?

- When I started Kowe. I was a deported Yoruba man.
 - 2026-04-27T19:59:00 This I will find useful... for my people.
 - 2026-04-27T20:13:00 I could use the computer... for my weakness.
- When I started AlphabetSequence... 2026-04-27T20:22:00 *I must find... for what... He accumulated in the east (Genesis 15:5. Revelation 16:12).*

2026-04-28T08:53:00 How you are known... by them?

- The titles of God, and their translations (*Genesis 16:13*).
- The identification of His creation. For signs, after death, substitute, beginning and end (*Hebrews 9:17*).

2026-04-15T05:43:00 Feature highlight its strength and weakness?

Passover: 2026-04-02, 2027-04-22.
Feast of Unleavened Bread: 2026-04-03, 2027-04-23.
2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.
Implementation options include parsing a data definition language script file (.SQL), or interrogating the database schema.

- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
- For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
 - 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
- 2026-04-15T07:44:00 Natural primary key columns.
- 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

2026-04-09T18:48:00

How we repeat life? (Matthew 24:34)

- Old Testament: Knew, birth, sacrifice, death, worship (Genesis 4)
- New Testament: Worship, circumcision, baptism (*Matthew 11:11*)

2026-04-08T20:13:00

How elaborate... is the view... of my participation (Daniel 2:45)?

- 2026-04-08T20:13:00
How reliable is the machine... in interpreting the word of God?
- 2026-04-08T20:34:00
What did he find... as useful as the present?

2026-04-07T08:21:00 I gave testimony to my biological mother about dreaming her, and Pastor Bert Bain chastised Brian, a Caucasian churchman elder who was married to Fatu, an Islander nurse. I remembered the circumcision of Abraham's only son, Isaac, as an explanation for Akedah.

2026-04-07T14:50:00 Mary's Bakery. 34370 Fremont Boulevard. Fremont, California (CA) 94555.

A confider who is in need.

- Abraham (*Genesis 18:17*)

2026-04-05T04:04:00 Be

- 2026-04-05T04:04:00 The 7 "I Am" of Jesus
 - The bread of life (*John 6:35*)
 - The light of the world (*John 8:12*)
 - The door (*John 10:2*)
 - The good shepherd (*John 10:11. John 10:14*)
 - The resurrection and the life (*John 11:25*)
 - The way the truth and the life (*John 14:6*)
 - 2012-01-01 Pastor Andrew Huang: *John 15. The "I Am" of Jesus. I Am the true vine, and My father is the husbandman. Remain in Me. Abide in Me. If you remain in Jesus, you can not help, but bear fruit. Scripture reading: If My words, remain in you. Prayer: Ask what ever you wish. Obey: Obey what the bible says, as the Holy Spirit leads you. Expository (John 15:1)*
- 2026-04-05T23:06:00
My twin sibling cooled, and he served me pounded yam translated to iyan in the Yoruba language, okra translated to ile in the Yoruba language, and stew.
My twin sibling also offered me a 99 Ranch Market food voucher, light green worth \$2, redeemable for purchases in the hot stove, and the in-house bakery.
The word came as I brushed and I gagged my teeth in the upstairs, north-center, bathroom.
Begin as Me and you will end as Me (Matthew 2:1-2. Micah 5:2. John 3:3. John 3:13).
2004-07-18 Andrew Leon Meko of Family Life, Campus Crusade for Christ preached at Christian Layman Church.
2004-07-18...2026-04-05=7931 days (22 biblical years, 11 days) (21 years, 8 months, 2 weeks, 3 days)
3. 2026-04-05T04:23:00 *The institutor of a new covenant* versus (VS) The mediator of a new covenant (*Hebrews 9:15*)
My father versus (VS) My God.
4. And about the ninth hour Jesus cried with a loud voice, saying, Eli, Eli, lama sabachthani? that is to say, My God, my God, why hast thou forsaken me (*Matthew 27:46. Psalms 22:1*)?
5. Paschal Lamb (*John 13:3. John 1:29. 1 Corinthians 5:7*)
2026-04-05T11:02:00 Scene 1: We were inside a room, and either in the center-west or north-center, we discovered some missiles belonging to a party were stolen by a third party. I was distrusted by this theft. Scene 2: Uncle Demola, who was standing in the south-center, confessed that he had taken some agricultural farming produce, which were probably leaves, flowers or seeds prior to their harvest for their safety (*Genesis 3:22-24. Genesis 4:18*).
2014-08-18 Stay the course dream of Chuck Mosler. 2014-08-18...2026-04-05=4248 days (11 biblical years, 9 biblical months, 18 days) (11 years, 7 months, 2 weeks, 4 days) 2025-10-25 (*James 3:4*).

2025-03-11T08:20:00 DataType software

2025-03-21T21:08:00 I am standing among the north-west seats. I was told that out of the 3 promoted people, 2 were made mayors. There is a path to the north-east. 2025-03-21T22:47:00 It is not the only thing. 2025-03-21T22:58:00 Was this all that was said?

DataType	Software	Commentary
Varchar	GetAPage.html	This is the most prevalent, and earlier focused on.
Integer	GetAPage.html DateAdd.aspx Number15411.html	
Date	DateDifference.aspx DateYear2010Month09Day09.html	Jesus Christ refrains from declaring judgment day (Luke 4:19-21 , Isaiah 61:1-2).
Time	TimeHourMinute4.html	12-hour clock, so far. The time of the day is emphasized; the ninth hour is 2025-03-22T00:12:00 explicitly mentioned (Matthew 27:46).
Percent (%)	BiblePercentage.html IamSeventyPercent75SheedOfAmdahWFi.html	and there died the third part of the creatures which were in the sea, "even" they that had life, and the third part of the ships was destroyed (Revelation 8:9).

- 2026-03-27T19:30:00 What did I relate to as the usage?
- 2026-03-27T19:49:00 As long as you are with us... we have... each of us.

1. My love poem, inspired by Lisa Munoz, my speech communications classmate, was probably written within a few minutes at Central Piedmont Community College (CPC), Charlotte, North Carolina (NC), in the personal computer (PC) laboratory with an editor.
2. Kowe was programmed within a few days at Gestco, 34 Association Avenue, Ilupeju, Lagos State, Nigeria. I require a C language compiler, Tagged Image File Format (TIFF), English and Yoruba alphabets, dictionary and translator, graphics monitor mode, 2 lines per editing.
3. AlphabetSequence is a divine-inspired algorithm, and it requires a relational database with support for Structured Query Language (SQL) input and query, C# application layer, and HTML, CSS, and JavaScript for the user-interface (UI).
2026-03-28T11:45:00 Daily, since 2002.
 - 2026-03-27T23:34:00 To retain... a part of myself... as the other.
 - 2026-03-28T11:45:00 When did he personally relate who he is... to who he has been?
 - 2026-03-29T11:30:00 Look at what he want to say through you...; leave what he has to say through you.

Perceive our world

1. A relational database stores data in rows and columns. The columns supports storing specialized datatypes. A primary key is for uniquely identifying a particular row. A foreign key offers the opportunity to associate rows of the same values.
2. Object-orientation is for combining data and programming logic. A collection or list of objects.
3. The Bible is a history of the Jewish people.

Time Series Analysis

1. 2026-04-03T14:22:00 This is a sampling of the word of God.
2026-04-19T19:12:00 The author would like to place more emphasis... during nighttime dreaming at the Pacific Standard Time (PST).
2026-04-19T20:20:00 What must he... particularly use ([Joshua 14:7](#), [Joshua 14:9](#), [Joshua 14:12](#))?
1967-10-15 + 85 Biblical years=1967-10-15 + 30600 = 2051-07-26
2026-04-19...2051-07-26=9229 days (25 biblical years, 7 biblical months, 19 days) (25 years, 3 months, 1 week)
2. 2026-04-03T14:24:00 The date occur at random intervals.
3. 2026-04-03T14:26:00 Grouping interval?
 1. Saturday, 2021-07-17 60th birthday celebration of Uncle Jimi Adeniji.
 2. Sunday, 2021-07-18 Uncle Jimi Adeniji re-located to Atlanta, Georgia.
 3. Monday, 2021-07-19 Uncle Jimi Adeniji commenced medical work in Atlanta, Georgia.
Sprint Airlines bookinfo@fl.sprint-airlines.com time duration Las Vegas, Nevada Sunday, 2021-07-18T11:17:00 01 h 31 min Oakland Sunday, 2021-07-18T12:48:00 Flight terminal 1711. I sat beside a Hispanic male, a manager at Tesla and his female partner, on my way back journey, between Las Vegas and Oakland.

- 2021-07-18...2026-04-05 Easter Sunday=1722 days (4 biblical years, 9 biblical months, 12 days) (4 years, 8 months, 2 weeks, 4 days)

2026-05-03T15:49:00 Handling Missing Data

- The author started receiving word from God shortly prior to his 21st birthday, which was coming up on 1988-10-15. But, the author did not start writing a blog until at about 2000-10-05. The author started using a database for data entry, and the author commenced AlphabetSequence at about 2002-12-03.
- 2026-05-03T15:49:00 The greatest length
1. The author was incarcerated at the Alameda County Santa Rita Jail, 5325 Broder Boulevard, Dublin, California (CA), (925) 551-6500. 2nd occasion between 2028-03-07T00:00:00...2028-03-14T00:00:00.
 1. 2004-05-26T00:00:00 The author was hospitalized initially at the John George Psychiatric Pavilion, 2060 Fairmont Dr, San Leandro, California (CA) 94578. (510) 346-1300.
 2. 2004-12-06T00:00:00 And, subsequently at Villa Fairmont Mental Health Rehabilitation Center (MHRC), 15200 Foothill Boulevard, San Leandro, California (CA) 94578. (510) 352-9690.
 3. 2026-05-03T17:42:00 Information record is intermittent during times.
 4. The computer malfunctions, and specifically, the hard disk of the computer fails; therefore, resort to restore database.

Group by Testament

1. Pentateuch: The Old Testament starts with the 5 books of Moses.
2. Gospel: The New Testament starts with the 4 Gospels of Jesus Christ books.

Group by HisWordID

- 2026-05-04T18:05:00 The HisWordID column is for grouping simultaneous words... most likely, that were spoken on the same dates.
- 2026-05-04T07:23:00 The Nigerian government versus (VS) Microsoft dispute over sexual intercourse between eligible Microsoft-affiliated females and mediocre Nigerian male partners. I saw 2 Microsoft affiliated females beside a car in the north-center-west. In the center-west, I attempted to give a Microsoft-affiliated female my business card, but she did not receive my business card, because there is no job hope ([Isaiah 61:2](#)).
- 2026-05-04T12:23:00 I re-located to the United States of America (USA) in my sixteenth, 16th, and thirty-second, 32nd, years, 1983-12-29, and 1991-01-18, respectively ([Luke 16:16](#)).

(Aileen A. Nielsen, 2020).

2025-03-17T11:47:00 Side with church... or side with the children (John 7:51, Genesis 21:9, Genesis 27:41)?

2025-03-22T17:52:00 Nullable column lifecycle? How I bring about...a re-use?

- The is distinct, supplements is null, and is not null, variables comparison. Primary keys, and unique constraints and indexes restrict table rows and columns. Foreign key constraints restrict related table rows and columns. Efforts must be made, when enforceable, to guide the user interface (UI) for client-side and server-side validations on mandatory, and so-called required columns.
- Structured Query Language (SQL) Insert Statement: When the value of a nullable identity column is not specified in an insert statement, then the database will generate the next continuous number: Microsoft SQL Server @@Identity value will reflect the value of the most recently generated identity column.
 - Structured Query Language (SQL) Select Statement: When the value of a nullable column is set to null, then an outer join is required to retrieve foreign-related rows.

Data Attribute

- 2025-03-23T21:10:00 He has used data attributes for a long time now. But he has used it for documentation. How could it provide programming functionality?
- data-website: An invocable web service to provide supporting information. Via a web address, uri and query string.
 - data-code: With the option of running the code? XML or JSON format, with language extensions that enforce compatibility and interoperability. 2025-03-24T12:42:00 For Example:

```
SELECT 'Alpha' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOffTotal
FROM WordEngineering..HisWord WHERE Word NOT LIKE '[A-Z]*'
UNION
SELECT 'Numeric' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOffTotal
FROM WordEngineering..HisWord WHERE Word LIKE '[0-9]*'
UNION
SELECT 'NULL' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOffTotal
FROM WordEngineering..HisWord WHERE Word IS NULL
UNION
SELECT 'Total' AS InfoType, COUNT(*) CountInfo,
(
    Count(*) * 100.0 / (SELECT COUNT(*) FROM WordEngineering..HisWord)
) PercentageOffTotal
FROM WordEngineering..HisWord
```

InfoType	CountInfo	PercentageOffTotal
Alpha	111508	93.748811989146
Numeric	851	0.71487974713
NULL	6680	5.544388261539
Total	119841	100

- data-ssn: For example, Representation State Transfer (REST).

Pros and Cons

- English is our colonial language; Yoruba is my native language ([Acts 22:2](#)):
 1. Accessible from a webpage, the author hard-coded translations from the Bible by using a New Testament phrase.
 2. In the WordEngineering database, TheComingAdventOfTime table, contains learned spoken language translations.
 3. In the WordEngineering database, HisWord table, there is my EnglishTranslation column which is not null when the word column contains non-english words.

- | Word | Ocean Senior | www.JesusInTheLamb.com | From... until | | | |
|------|--------------|------------------------|---------------|------------|--|---|
| | | | From | Until | From... until | Commentary |
| | | | 2004-03-02 | 2011-01-09 | 2504 days (6 biblical years, 11 biblical months, 14 days) (6 years, 10 months, 6 days) | 2011-01-09 Our Lady of Lourdes. Two babies were baptized, a boy and a girl. This Sunday celebrate the Baptism of Jesus Christ. |
| | | | 2004-03-02 | 2024-06-24 | 2504 days (6 biblical years, 11 biblical months, 14 days) (6 years, 10 months, 6 days) | Run against Italy. We are inside a house and Buki closes the doors eastward. Outside on a beach, an acquaintance, Buki or Stacy Brothers drinks coffee, a recent habit of his. There are 4 sachet bags of coffee. Someone speedily drives a car to our north. I worried about children pedestrians. A male speaker said that Australia will attract a large population of migrants in the end, as a half residence. He quoted Daniel 12 fictitiously, saying the longest length between the top of a building and a mountain top exists in Australia. Australia coincides that when it makes economic reports, it is always before Italy, so it does not have to match Italy. He said Greece does not run, either.
7420 days / 7 = 1060 weeks. |
| | | | 2010-01-25 | 2014-03-14 | 1509 days (4 biblical months, 9 days) (4 years, 1 month, 2 weeks, 3 days) | 2010-01-25 Dear America, your loom angle of contract is dead.
2014-03-14 Ko ni ri iyawo, today. He won't see his wife, today. |
| | | | 2014-03-14 | 2021-04-20 | 2594 days (7 biblical years, 2 biblical months, 14 days) (7 years, 1 month, 6 days) | 2014-03-14 Ko ni ri iyawo, today. He won't see his wife, today.
2021-04-20 I am standing to the west of a 7-Eleven store; the scenery is Dulhan Grocery, Charter Square. |

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
 1. WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.
 2. SacredText table: 2025-12-25T12:41:00 is nearer to the whole set.

2025-12-24T15:46:00 Word Re-use

Word	Commentary
What word are part of His? Is what word He use as His.	Composite primary key, foreign key, and index; rollback or commit transaction; primary-child table, orphan record
	Outer join
	like % ?
	< or/and >

2025-12-15T12:52:00 When was it leading? When was it lagging? When was it exact?

Title	Actor	Scripture Reference	Leading, lagging, exact
Romance of Redemption	Ruth	Ruth 1:6, Ruth 1:22, Ruth 2:7-8, Ruth 2:14, Ruth 2:17, Ruth 2:19, Ruth 2:21, Ruth 2:23, Ruth 3:1-2, Ruth 3:8, Ruth 3:10, Ruth 3:13, Ruth 3:18, Ruth 4:7, Ruth 4:9-10, Ruth 4:13-15	Exact

2025-12-20T10:43:00 Relationship between... number and the Bible?

Percentage	Commentary	Scripture Reference	Sacred Text
75%	Wo 75%	Matthew 7:10, Jonah 3, 1 Kings 7, 1 Samuel 21:3	Greek Kingdom (Daniel 2:38)

2025-12-20T21:42:00 Building a UI Framework

2025-12-20T21:42:00 Application architectures

The author follows a multi-tier client/server architecture. Each unique browser client HTML web page, features a JavaScript, .js, fetches an AJAX request to an ASMX web service, which calls the application layer .dll written in C#, .cs, and this finally sends a SQL to the database server.

2025-12-21T21:45:00 Ephemeral Applications

1. Server-side rendering (SSR): The server initially generates a static user-interface (UI) input form based on an HTML document. This facilitates a fast page load time.
2. Client-side rendering (CSR): By using JavaScript, the client requests an input data-driven dynamic JSON from the server, with which it later builds its specialized HTML result set fragment.

2025-12-22T18:12:00 What is a UI framework?

- Widget libraries: The author primary uses pairs of labels and inputs; submit button; and rarely select, and radio controls. Although the author has experimented with the Microsoft ASP.NET link button, in the past, it is no longer a utensil, since it depends on the availability of JavaScript.
- UI description: The domain-specific language (DSL) that the author now favors is HTML, but he initially, adopted XML/XSLT.
- Layout: For backward compatibility, the author still relies on the HTML table as his layout manager.
- Focus and focus traversal: The author bothers to set the default 1st row and 1st column entry to the autofocus attribute, but the author defers the sequential tab order: tabindex = -1 Element will not get focus.

2025-12-25T20:40:00 Role of adopter

- 2025-12-25T17:37:00 Author: His work began by sharing examples of words pertaining to Biblical passages and figures in HTML format. 2025-12-25T17:42:00 Each HTML document was based on a word. 2025-12-25T17:45:00 These stories rarely imply living people's biographies or testimonies.
- 2025-12-25T17:54:00 Data Science: The author records each precise word received in a relational database in a particular location — HisWord table, Word column. The surrounding related information is inferred and subjective (Matthew 16:23).

2025-12-25T21:46:00 Time to first frame

When did He define His rule (Genesis 18:19)?

1. Time to first paint: HTML presentation
2. Time to interactive: JavaScript generation of Document Object Model (DOM)

2025-12-26T21:59:00 Timeline inspector

GetAPage.html Includes performance.now() for AJAX calls 2025-12-26T22:35:00 Initiation and completion. 2025-12-26T22:28:00 We must... schedule one another... as purposely.

2025-12-28T19:25:00 User Interface API Documentation

2025-12-28T19:30:00 Content

2025-12-28T19:32:00 Why would I ever use this API?

The web pages and their associated web services calls provide examples 2025-12-28T19:37:00 on how a client can access the database.

2025-12-29T21:15:00 How should I use this API?

- 0%...100%: BiblePercentage.html
- 2-Words: MyCondemn.html
- 3-Words: WhatYourManagerCrazyWaterMartinWaterMartinAsAGood.html

2026-01-03T19:03:00 How does the API work?

ScriptureReference.html 2026-01-03T19:10:00 [unclear wrong] inelible (Matthew 4:2).

2025-10-23 19:51 UTC Building a UI Framework...2026-01-03T19:10:00=72 days (2 biblical months, 12 days) (2 months, 1 week, 4 days)

2026-01-03T20:46:00 Mission

2026-01-03T20:54:00 We are bringing you... to accept our known (2 Samuel 12:24).

Ian Hickson (2025-10-23T19:51:00).

2025-12-21T06:47:00 A block of records.

GetAPage.html Sub-divisions

1. AlphabetSequence
 - AlphabetSequence.html is the sum of alphabet places, and the separation of the Bible into chapters and verses.
 - AlphabetSequence.html AlphabetSequence languages.
 - AlphabetSequence.html is for AlphabetSequence, and specifying the Bible sections.
2. BibleWord.html supports specifying the combination logic (and, or, phrase). 2025-12-21T11:03:00 Also, restrictions can be placed... on the various divisions of the Bible. Parts of speech are ignorable.
3. BibleDictionary.html 2025-12-21T11:16:00 will retrieve meaning of the words.

2025-12-03T22:38:00 To be reciprocal... of the value?

1. http://crlb.com/2025/12/03/stock-market-crash-risk-black-monday-october-1987.html?utm_source=firefox-news&utm_medium=referral
2. <http://crlb.com/video/2025/12/03/former-treasury-sec-robert-rubin-on-markets-october-1987-like-risk.html>

Layman	Know their God
When I first started, when I received a word, I would try to use my limited knowledge of the Bible... to draw use-cases.	Now I rely on the computer to query Biblical resources. I have not automated the retrieval of commentaries.
I used to rely on my education and experience.	Now I draw on expert opinion? 2025-12-04T22:00:00 Expert facts...2025-12-05T01:00:00 I opened and I closed the garage door, northward, from the garage. What prepares for the other?

2025-07-31T13:25:00 What does the link provide?

1. 2025-07-31T15:12:00 The anchor tag provides a hyperlink to a resource that is identified by its source, src, attribute. Consider providing statistics on the resource type and location.
2. 2025-07-31T15:33:00 The img tag displays an image that is identified by its source, src, attribute. Consider providing statistics on the image count types, alternate, alt, attributes, and locations.
3. 2025-07-31T15:42:00 The video and audio are media types that are identified by their source, src, attributes. Consider displaying the source rank, priority order versus (VS) availability? Static versus (VS) dynamic?
4. 2025-07-31T16:05:00 The iframe tag embeds one HTML document within another.
5. 2025-07-31T16:12:00 The script tag is for referencing JavaScript. Count the various variable definition types: var, const and let. Count the source code lines, and the estimated source size. Count the methods and their arguments. Compare inline, internal, and external JavaScript?
6. 2025-07-31T16:22:00 The style tag is for referencing styles. Count the various variable definition types: class attribute, style attribute, style element. Count the source code lines, and the estimated source size. Compare inline, internal, and external Cascading Style Sheets (CSS)?
7. 2025-07-31T16:35:00 Count the various HTML types occurrences, and parents and children. For example, tables: head, body, foot, rows and columns, and lists.
8. 2025-12-05T06:50:00 Scene 1: I told the family of Kim-Chin Chan that I was re-locating to Kansas to work, and I was unsure when I would come back, and at the airport prior to my departure we exchanged telephone numbers. Scene 2: Some males and I were walking to the south of Break Your Fast, north-center-west, Union Square, Union City, and they claimed that Rupert Murdoch went drinking with them, but later on Rupert Murdoch refused to go to the nightclubs. The scenery changes to Bondi Beach. Scene 3: I was trying to feed the relationship between the availability of theorists and theorems.
9. 2025-12-05T12:09:00 What did He turn to... as usage (2 Chronicles 16:9)? San Jose Market Center. 685 Coleman Avenue Suite 10. Taylor Street. San Jose, California (CA). 95110. The scripture reference came at the intersection of Bascom Avenue and San Carlos Street, south-east.
10. 2025-12-06T15:26:00 What does He associate... with me... and how do I be the guide?

2025-11-23T00:28:00 What have you... used... the Bible for (John 20:31, Acts 17:11, John 5:39, Joshua 1:8, Daniel 9:2)?

1. Survey ranking for uses of the Bible.
2. Recommended scripture reading. Quote of the day? Keep a historical record.
3. Swear oath online electronically... according to religion, and 2025-11-23T01:39:00 choice text.
4. Learn language by using sacred text — reading, writing, hearing, speaking, translating.
5. Check religion 2025-11-23T01:52:00 for conversion (Acts 17:11).
6. Bible calendar for events and anniversaries.
7. Which authority for which event?
8. Compare times? For example, during the time the Bible was written, Jews worshiped on Saturdays, the day of the Sabbath. Passover versus (VS) Easter... Day of Pentecost.

2025-10-11T03:24:00 Absent... of the same.

- A database gives the author the ability to reference and proceed with the word. 2025-10-11T04:55:00 Can we determine... to be usage?
- Nullable

- State of Writing

Append a record in the HisWord table for each sentence spoken by God. Do not make assumptions about entries not uttered by God. The discretion of the author governs his data input into the supporting tables. The database validation rules apply to mandatory, data type, and referential integrity. The ActToGod table manages major and minor column relationships. The URL and DriveDecidedToWorkOnAGradualImprovingSystem Databases are not his input. The author is not their source. The author is the custodian of the WordEngineering database. When the author is not the original source, 2025-05-19T08:18:00 should be the custodian? Is the monitor... automatic?

As advised, the author specifies the English language on the HTML tag. As of this time, the language attribute is not specified elsewhere. 2025-05-20T09:32:00 Who speaks... on... authority?

2025-05-15T20:20:00 Data Modeler

- A data modeler uses data definition language (DDL) to design the information container.
 - In 2002, when I was recording the word of God, I modeled the WordEngineering database, HisWord table.
 - In 2007, when I was looking for work, I modeled the HaveDecidedToWorkOnAGradualImprovingSystem database, and I developed its Internet application.
- The primary and most basic information container is a table and its rows and columns. For the author, the HisWord table is essential, and its word column is appropriately God's given.

(John Dean, 2018-01-09).

2025-04-14T09:59:00 Conversion Translate (Genesis 23:15-16, Leviticus 27:14, Zechariah 11:12-13)

- Alphabetic: Monetary values vary according to inflation and foreign exchange rates.
- Unit of Measurement: Age stays constant for a year?
- Individual versus (VS) general: The Temptation of Christ... The 10 Commandments. What will expand? I choose.
- The writing assistant may suggest word changes:
 - Spelling corrections.
 - Verb grammar tense.
 - Synonym versus (vs) opposite.
 - Singular versus (vs) plural.
 - Deprecated.
 - Currency.
 - Locality, regional, custom, preference.
 - Anglicized.
 - Religion.
 - Formal versus (VS) colloquial, pidgin. Written or spoken word usage and terminology.
 - Personal extension. Longevity. Insertion. Customization. Adaptation.
- When did he part ways... and when did he section ways?

Validation? Chronologically?

2025-09-08T13:03:00 What do you search by?

2025-09-08T14:05:00 Before you can search... you must have a query... parameter.

Five Ws	Example	Usage	Scripture Reference
Actor	Jesus Christ	Meta name? Author	Revelation 19:10
When	Sabbatical rest	document.lastModified	Daniel 9:2
Where	Jerusalem	id attribute	Daniel 9:2

2025-02-19T12:20:00 What I offer of the truth?

- Command-line interface (CLI)?
- No .NET Core support
- 2025-02-19T14:24:00 Data repository? Microsoft SQL Server relational database
- The author does not make use of Microsoft SQL Server synonym support
- The author rarely uses Microsoft SQL Server soundex support
- Only English, there is no multi-lingua support
- Limited Bible versions, dictionaries and commentaries
- Support Structured Query Language (SQL), and accessible via Language Integrated Query (LINQ)
- Microsoft SQL Server will support Regular Expression (Regex)

2024-10-04T09:03:00 Data entry with Microsoft SQL Server Management Studio

- 2024-10-04T09:07:00 Familiarize with the database schema, data dictionary, and entity-relationship model.
- 2024-10-04T09:25:00 Understand that today's web pages offer greater flexibility and customization, and they are more universal and generic than previous generation's desktop applications. Data entry column attributes include autofocus, for, placeholder, required, style, taborder.
- 2024-10-04T09:12:00 As much as possible, initially accept the default values, with, for example, the date columns. You may adjust and be precise, later.
- 2024-10-04T09:44:00 Only in rare cases should you resort to a table identity column value setting, like, for example, by stipulating in advance the SET IDENTITY, INSERT, DBCC CHECKIDENT statements.
- 2024-10-05T02:44:00 This is what I am unable to do with the graphical user interface (GUI)... this is what I am inspired to do. 2024-10-05T02:49:00 Its interface... remains our reliance. 2024-10-05T02:52:00 I am equipped to doing the same... as I realize. 2024-10-05T02:54:00 This point... must allude to one. 2024-10-05T02:59:00 Microsoft Office... Hypertext Markup Language (HTML). Why not... the machine pretends to do? 2024-10-05T03:01:00 God has done His part... where is my part?
- 2024-10-05T03:05:00 What do I need the other person... do do?
- 2024-10-05T03:03:00 Next after 2024-10-05T03:10:00 (L King 5.5) E. F. Codd in 1970, proposed the relational database.
- Primary key
 - The natural primary key for the url tables is the url column. When a user attempts to insert a duplicate url, the 2026-07-16T10:54:00 database updates an existing url. URL (Uniform Resource Locator). Uniform Resource Identifier (URI).

2025-02-23T16:30:00 Company osi data... osi yemi.

2025-02-24T00:52:00 In the center-east is a wheel.

2025-02-24T06:35:00 Dadiag Jane, Feminine.

- 2025-02-24T06:55:00 ... 6.
- The Jewish day begins at 6pm.
- Naphtali was either listed in the Bible as the 6th or 8th son of Jacob.
- Moses' leadership commenced in his third season.
- Jesus' beginning miracle was turning water into wine.

2025-02-24T08:13:00... 2025-02-24T08:19:00 microsoft windows operating system, mozilla firefox browser will not refresh nor go to a link from the address bar.

2025-02-10T05:41:00 Until the land has its rest. I saw a house in the center-west.

2025-02-10T06:22:00 In Isaac shall your seed be called. I am on a narrow road in the north-center. This is either Bing's Dumpling or 99 Ranch Market. I gave a piece of chocolate to a boy who was among the other boys. As I was about to leave, I gave my last chocolate to the same boy, so he could share and eat with his colleagues. They began to break and eat the given chocolate bar. Towards the door to our west, I saw some young females coming inside. I admired a slender female who was wearing tight-fitting white trousers. At the intersection of Fremont Boulevard and Paso Padre Parkway, I saw a van that was painted across with the color of the United States of America (USA) flag, red, white, and blue, but the red color looked like orange. There were young Asian females running from the center-west, upper, and turning towards the south-west. There were cars moving and crossing the Paso Padre Road from Fremont Boulevard, east, that almost had accidents with the young Asian female runners.

Datetime	Word	Commentary	World Event	Place	Person	Scripture Reference
2009-09-30T10:32:00	Mister Adeniji		Ken Lewis announces his resignation from Bank of America (BoFA)

Data from until (Numbers 26:4, Numbers 4:30, Luke 3:23)

AlphabetSequence builds on Bible verse separation.
How representative am I of my people (Philippians 3:5)?
 03-10 16:36:54.680 You have to do your work... like you are

2025-03-28T19:12:00 What we are receiving (2 Samuel 12:24)?

- (Mustafa Suleyman, Michael Bhaskar, 2023-09-05).

- Creation ([Genesis 1:16](#), [Genesis 1:26-Genesis 2:4](#), [Genesis 2:16-25](#), [Genesis 3:15-16](#), [Hebrews 11:4](#))
- Born King of the Jews ([Matthew 2:2](#), [Luke 1:19](#), [Luke 1:43-44](#))
- End times ([Revelation 5:5](#), [Revelation 21:23](#), [Revelation 22:2](#), [Revelation 22:8-9](#))

- When: Called — In the beginning, 2 great lights (Genesis 1:1, Genesis 1:16)
- Who: Naming — God, man (Genesis 1:1, Genesis 1:26, Genesis 5:2)

How my organization is the best?

1. Alphabet places, word spelling, and sentence composition
2. Arabic numbers systems

- BibleReference uses whole numbers for representation.

- Who, what, when, where, why?
- Prophecy and Fulfillment: Keyw

Relational Model

- View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

(Itzik Ben-Gan, 2023-07-03)

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Focusing on the Word.

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL)

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View

2024-06-15T21:28:00 What is pertaining to the data?

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable

2024-06-16T16:30:00 To who... I exchange... my good?

Rule 3: Systematic treatment of null values:

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model

INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule

2024-06-20T18:39:00 It looks at the data as a whole.

Rule 6: The view updating rule

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete

A base or derived relationship should comply with an operation to select, insert, update, and delete

Rule 8: Physical data independence:
Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy

2024-06-22T15:36:00 What part of yourself... do I desire as My future?

Rule 9: Logical data independence:

2024-06-22T17:02:00 The opinion of some

Rule 10: Integrity independence:
The author is not influenced

The author is not implementing constraints.

Rule 11: Distribution independence:
The user is not aware that

Rule 12: The nonsubversion rule:

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purpose: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional word that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man (Genesis 2:7, Genesis 6:3)?

(Matt Chandoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

A conversion page

Customize the content of an uri? This is how the web page implements this technology. This is how-to implement it in your preferred technology.

Keyword	Find what	Replace with	Scripture Reference
Religion	Idolatory	Monothelism	Acts 7:40-43
Learning	Egyptian	Hebrew	Acts 7:22
Location	Egypt	Promised Land	Acts 7:3-7
Vocation	Ruler and a judge	Ruler and a deliverer	Acts 7:10, Acts 7:22, Acts 7:35

What is remembrance, associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Volume, Velocity, Variety

Keyword	Commentary												
Volume	sp_spaceused @objname = 'HisWord'												
	<table><tr><th>Keyword</th><th>Value</th></tr><tr><td>Rows</td><td>115689</td></tr><tr><td>Reserved</td><td>28296 KB</td></tr><tr><td>Data</td><td>17104 KB</td></tr><tr><td>Index_Size</td><td>9648 KB</td></tr><tr><td>Unused</td><td>1544 KB</td></tr></table>	Keyword	Value	Rows	115689	Reserved	28296 KB	Data	17104 KB	Index_Size	9648 KB	Unused	1544 KB

	Index_Size	9648 KB											
	Unused	1544 KB											
Velocity	The author does manual data entry.												
Variety	At the beginning, the author parsed XML files into textual relational tables.												

(Jack Hyman, March 2024).

Data Types

HisWord table
Qualitative (categorical) non-numerical/descriptive -
 nominal (non-ordered), ordinal (orderly)
 or
Quantitative (numerical) uses numbers - discrete
 (countable), continuous (measurable)

Column name	Column type
HisWordID	Discrete (countable)
Dated	Continuous (measurable)
Word	Nominal (non-ordered)
Commentary	Nominal (non-ordered)
Uri	Nominal (non-ordered)
ContactID	Discrete (countable)
ScriptureReference	Nominal (non-ordered)
Filename	Nominal (non-ordered)
EnglishTranslation	Nominal (non-ordered)
Location	Nominal (non-ordered)
Scene	Nominal (non-ordered)

Data type	Column type
Nominal (non-ordered)	Text
Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth ([Acts 7:20](#))
- Family ([Acts 5:31](#))
- People ([Hebrews 3:8](#))

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarity with JavaScript meant client-side work.
- What I am good at doing...is what He is good at making! ([Genesis 41:32-57, Genesis 1:1-1:7, Genesis 4:26](#)).
- Derivation...variety: Processing of a word spoken by God to the author is initiated by [GetAPage.html](#)
 1. GetAPage.html serves as a gateway to specialized links.
 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality? ([Daniel 9:24](#))?

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengthens between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

- You could say, this is what I do... Why I do it?
- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
 - Where are the differences, companion?
 - Experimenting...is the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. [Simplified?](#)
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
 - Maturity and relevance to our time
- Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. We all make our followings.
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia uri. For Bible literates, this regurgitation may be redundant. What programming skills are in demand?

1. Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
 2. Simply creating a HTML anchor to a source uri
 3. Fetching, parsing, and building the results of a web service
- Our connecting our reader (1 Samuel 25) - To be conformable of age.

- Autobiography
- Style of Writing

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together ([Joshua 1:8](#))

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word from God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 1. HisWord table Word Column: As much as God spoke it
 2. Period of Time tables: With respect to time
 3. BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependent
 4. GetAPage.html HisWord section: Time variant

For a period of time, we are as we seem we are? What needs a success. ([Genesis 4:7](#) [Matthew 14:8](#) [Mark 6:25](#))

(John Calvin Maxwell, 2023).

Chuck Misler versus (VS) the author

Chuck Misler of Kolonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2018-06-02 Candlelight Celebration of Life Service - Chuck Misler. Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Misler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2025-12-22T08:48:00 Backdoor...navigating 2014-08-18...2025-12-22T08:48:00=4144 days (11 biblical years, 6 bibical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 Stay the course. 2026-05-18T18:40:00 What is in dispute? 2026-05-28T17:17:00 The author associates Chuck Misler with teaching each story in the Bible. • Strategic trend. • Introducing other Bible scholars and mentioning their particular contributions. • Making laypeople teachers of the Bible. • Referring to terminology, Jewish history and practice, world events.	
2024-11-03 21:33:37.887 Pattern of assemblies .	
	2024-11-03T11:58:00 What we brings... as amount...to what?
Chuck Misler was not listening to his own word. Chuck Misler was listening to the Word read to him.	
Chuck Misler was preaching from his understanding of the Bible.	The author is relating the word spoken to him to the Bible.
Chuck Misler was trying to convert people to Christianity. Chuck Misler was trying to make believers out of the Bible.	The author is relating to people. Coming from experience with people.
	You were trying to reach the Bible...through your word.
	Interaction with Him ...I start writing words received when I sleep. I introduced words when I shower.
	What I Used ...Chuck Misler used the Bible... I used myself?
2025-04-09T15:30:00 What did you set out to achieve as a personal notion? Hal Lindsey suggested to Chuck Misler that he convert a Christian ministry hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Misler from pursuing a doctorate degree in Physics. 2025-04-10T14:14:00 How the Bible can be...worthy use? 2025-04-10T14:14:00 Jennifer Melow gave 2 breads burn to Danielle Hall to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. Cancer diagnosis?	2025-04-10T04:17:00 Scene 1: Lauretta is driving me, and I mentioned the first name of Nada Madjar, but I did not disclose her last name; therefore, I am not gossiping. Lauretta plowed further and Lauretta asked if I was talking of Nada that I now infer to be Nadia Comaneci. Scene 2: A man concedes that he has lived in Fremont, since he moved from further away. 2025-04-10T04:46:00 Limitation per person . (Ezekiel 3:17-21). AlphabetSequence takes specific places... out of the Bible. 2025-04-10T06:47:00 When did he desire...a people as I . (Genesis 2:20-25 Genesis 4:3-12)?

2022-05-26T14:05:00

[What events in Abraham's life are additions?](#)

2025-03-29T16:15:00

[I am reminded of the presence of others](#). ([Ezekiel 33:12](#)).

Word	Commentary	Scripture Reference
Partner	Sarah, Hagar, Keturah	Genesis 11:29
Pilgrimage	Canaan	Genesis 12:1-5
Gulfian	Lot	Genesis 12:4-5
Possessional Blessing		Genesis 14:19
Faith	Belief in God, counted for righteousness	Genesis 15:6
Covenant	Abrahamic	Genesis 15:18
Seed	Ishmael and Isaac	Genesis 16:11
Name change	From Abram to Abraham	Genesis 17:5
Making mention at ages	75 years old when he departed out of the land of Haran, had lived in Canaan for 10 years, 86 years old when Hagar bare Ishmael to Abram, 99 years old God's request to walk before Him and be perfect, 100 years old gave birth to Isaac, 175 years lived	Genesis 12:4 Genesis 16:3 Genesis 16:16 Genesis 17:1 Genesis 21:5 Genesis 25:2
To do without someone	Separation from his wives and sons, from the physical to the spiritual	Genesis 15:13 Genesis 21:12 Genesis 22:2 Genesis 23 Genesis 25:6 Acts 7:3-6 Hebrews 11:17-19
Sarah - the first matriach	What seems natural as brotation?	Genesis 18:12 1 Peter 3:6

2024-01-17T13:36:00 Alphanumeric

Date	Type	Word	Commentary
2004-07-11	Money currency	English pound 45 percent	The financial stock market has made a concerted effort to keep the British pound from rising beyond forty five percent 45%
2008-03-11	Calendar	September 22	

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

1. [How essential are we: to the personification of God?](#)
2. The spirit man holds
3. [When did he exchange...his view as ours](#). ([Genesis 18:19](#))?
4. How are we acceptable; to what is new? How does God, build up, to His word ([1 Samuel 9:15-12](#))?
5. Copyright violation: Not giving credit to the original speaker
6. Separating the word from the deed
7. The grammar needs refining
8. Name spelling, for example, Bryan versus Brian
9. Non-English alphabets
10. British versus American spelling
11. Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
12. Inference, such as, abbreviation
13. Differences in Bible verses ([Matthew 22:14](#) [Acts 8:37](#) [Acts 15:34](#) [3 John 1:15](#))
14. Naming of words ([Genesis 32:28](#) [Genesis 35:10](#) [Genesis 47:27](#))
15. We have been doing unconvincing power
16. I said, I heard. 2021-04-11T08:37:00 in a location to the North, probably 99 Ranch Market or Marina Food, or Daiso. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight. I said, 6 9, in my deep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
17. [What does the volunteer as time?](#) AlphabetSequence is resource minimal:
 1. Doable by hand
 2. Compute: Not technologically demanding
 3. Maturity: Since 2002
18. [Separation into Segment](#).
19. [Is this a finalized work...and how is it accessible? It is a transient database.](#)
20. Scripture reference in context.
21. To complete the life of pleasing God, as I chose men.
22. Hearing and spelling the word... [and not saved](#)... by the grammatical correctness.
- To co-operate as we are. [Robert Estienne English Alphabet](#)

2017-03-06T00:00:00 A Comparison of Age

Divided as separated. Go this way, that way.
I want to program, but I don't want to match two programs together, except for deep thought.
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt ([Genesis 37:5-11](#) [Genesis 30:24](#) [Genesis 40-41](#)).
[12:42](#) is separable into four layers; there are the link, Internet, transport and application layers. No breaking ([Matthew 19:4](#)).

Marriage

Marriage is not a practice, in the life after: resurrection ([Matthew 22:30](#) [Mark 12:25](#) [Luke 20:35](#) [Revelation 21:2](#) [2 Corinthians 11:2](#)). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. [It is more of a father, that wants you](#), Jesus resurrected, after three days ([Matthew 12:40](#) [Matthew 26:51](#) [Matthew 27:40](#) [Matthew 27:63](#) [Mark 8:31](#) [Mark 14:58](#) [Mark 15:29](#) [Luke 2:46](#) [John 2:19](#) [John 2:20](#) [2 Corinthians 11:2](#) [Revelation 21:2](#) [Revelation 21:9](#) [Revelation 22:12](#)). The breaking of device ([Psalms 34:20](#) [John 19:36](#)).
On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.
The application tier is in a dynamic link library (DLL), and is separable into client, database, and application logics, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.
The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenger.

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prophecy and Fulfillment
- Autobiography
- Style of Writing

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The Bible versions are selectable options in HTML or JavaScript. The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?
The client started as HTML, but now has JavaScript and CSS.
CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.
JSON and XML have made in-roads.

To each resemblance

1. Where His word expected mine? When I get a word from God I could do the following?
 1. Write the word in my notepad, and never refer to it again.
 2. Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 3. Produce an artifact based on the word.

What do I desire...as part of significance?

1. Moses? Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).
2. Abraham? Seed (Genesis 17:5, Genesis 15:2, Genesis 22:2, Genesis 22:12-18, Hebrews 11:13-19).

The drawback of the relational approach?

1. Centralized versus (VS) distributed storage?
2. Unique foreign key? Master-child? Hierarchical?
3. Duplicable
4. Maintainability
5. Expertise and familiarity? Isolated.
6. Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
7. When is enough...full enough?
 1. Databases may reside inside multiple files.
 2. Although databases may store different file types. This wasn't the original intention.
 3. Databases are abstractions.

Lacking expertise?

1. Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
2. Quality Assurance (QA): Some changes break existing code.
3. Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
4. Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00 What substitution...we have ahead?		
Post Resurrection	Pre Resurrection	Scripture Reference
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 22:19
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

What did He find...as useful

What did He find...as useful (Matthew 21:42, Mark 12:10, Luke 20:17)	
Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: • Client/Server autonomy. Client embedded-SQL. • 1. The datetime column defaults. 2. The identity column is auto-generable. 3. Computed column: What can the computer do for us?
Microsoft sqcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Memory Storage

Work	Commentary
Websites storage	folders.live.com, drive.google.com, github.com/kenadenij, kenadenij.wordpress.com
Refer to dates.	en.wikipedia.com
Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was lle eyan mi lon to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2, Genesis 23:20, Genesis 49:30, Genesis 50:13
Birth place	Matthew 2:6
Matrachi's origin	Genesis 25:20, Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With .asmx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supercedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order. Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-gritty.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable (1 Samuel 3:18)

For	Against
Prudent	Disposable
Hyperlink	Diversion
Quality Assurance (QA)	Prone to error
God	Man
Word	Commentary
Location	Scenery
Transaction commit rollback	Data cleansing

Typing Assistant

To be actual things

In telling the future, there are two parts: prophecy and fulfilment ([Revelation 19:10](#)). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations

What prize at the target?

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains databables and ASP.NET uses GridView.

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938495

```
logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3
sc-status sc-substatus COUNT(ALL *)
200      0      185115
304      0      9467
```

The count of requests served from the server, HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache HTTP 500 Status Code, internal server error, sum is approximately 6400.

```
logparser.exe "SELECT cs-uri-stem, COUNT(*) FROM *.log WHERE sc-status=500 GROUP BY cs-uri-stem ORDER BY COUNT(*) DESC" -i:w3c
```

```
logparser.exe "SELECT TOP 20 cs-uri-stem, COUNT(*) AS Total, MAX(time-taken) AS MaxTime, AVG(time-taken) AS AvgTime FROM *.log GROUP BY cs-uri-stem ORDER BY Total DESC " -i:w3
```

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is ~176 work hours. A work year is ~2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Reverse.
5. Metric:
 - Executable Size Metric: is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, `wc`, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It takes about 10% of the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has been a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde)

	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
made	2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(DeLean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Wait to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (VS) buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
- Engineering skill needed to build
- Robust design
- Primary function independence

The competing solution will include:

- Server-side JavaScript, for example, Node
- Front-end library and framework, for example, React

(DeLean Tolbert Smith).

To know my part as His?

- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- I have decided to work on a gradual improving system is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? To recognize the following as I (2 Samuel 3:32) ?
- Who it comes to, (Hebrews 11:24) ?
- What is the following? List of C-family programming languages
- The mechanism of selection pagelet?
- What notion of the same do I have?
- What I keep member of, (John 17:12) ?
- What did He find as suitable for him, (Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27) ?
- What did He find re-occurring as him? Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 Sets the input value of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 AJAX, only refresh updates.
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 table inner elements sub-ordinates.
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file. 9d32d8a, for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 What contribution I have... as someone else, (Mark 7) ? 2025-07-12T16:44:00 What did He do?

How did I do, (Luke 1:41, Luke 1:44, Matthew 3, John 3) ?

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Almida's Law](#) comes into recognition in [GetAPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ehpraintech.com/WordEngineering/WordUnion/BecauseWeAreHere!ThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreHere!ThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Development History

God doesn't use inform. (Psalms 81:6, John 46:38). He mandates.	
Technology	Commentary
Relational Database	After the introduction of the author to Microsoft SQL Server; the author does not feel the need to adopt newer technology like object-oriented database, nor nosql.

- | Technology | Commentary |
|-----------------------------------|---|
| Server-side Programming, Back-end | The author learnt C#, and there has been no reason to adopt upgrades. When Microsoft MVC learning is not necessary. The scripture reference class offers partition for instantiation. The Microsoft platform is the author's choice, although the migration to .NET core may be inevitable. |
| Programming Style | This lineage are passage. C# is object-oriented. JavaScript is functional programming. SQL is declarative and imperative. |

He said and He did. Word work(Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include

- | Word | Member | Scripture Reference |
|-------|----------|---------------------------------|
| God | Trinity | <u>Genesis 1:1-2</u> , John 1 |
| Day | Time | Genesis 1, <u>Genesis 2:1-3</u> |
| Babel | Language | <u>Genesis 11:9</u> |

Written about us how many?			
Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Enforce a covenant with the many	Genesis 9:24-27

It is firstly a database work. That is the author records God's word. What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technique. The benefit includes storage and archive, that is, the work is useful in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node to another. This is a good idea, but it is not a good idea to have a database connection string in a text file. It is better to have a configuration file, which is a text file, but it is not a database connection string. The choice of word, "need," today's expectations. The addition of the ActToGo tool, demonstrates the maturity of the author; since it advances from data to information.

The author, first wrote his history, in multiple stand-alone files HTML, XML, (see 7.2.2). This documentation didn't allow for enough detail, to track with change and, nor easy querying. Therefore, the decision to move to a relational database; that will

Since the beginning, the author wrote a ContactMaintenance.aspx server-side page as a user-interface (UI) to record contact information. This page remains active, till today.

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offline, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

```
1.hava a object: where f is fn.method2
```

1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
2. What is the literacy level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequencedIndex value. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
3. The Biblical account wrote dreams and visions tirelessly, without resorting to the database. Search Engines Crawl page the standard HTML files and rarely query the database. The date: years, months, days, may benefit from the stipulation and generability of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this work as a reference. The widely acceptance of a word, accompanies reference and prevalence.
5. The result of the Bible, is how we use it. The emphasises of Jesus Christ and apostle Paul is the word for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Task

How to go about it

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication

Input

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Elements

Word processing flows more naturally than data entry

Guidelines and tool

A relational database is a substitute for text processing

Stakeholder

I am the primary contributor and beneficiary

Outputs

Outputs are created, transformed, or changed in state? The constancy of the word is what we have shown

(Alison Cox)

Lessons Learned

- E is used: Leading up to 2008-03-07, I was not fully recording the word of the LORD ([Job 23:12](#)).
- I used to ask God for a word? To realize where my opinion lies?
- Familiarization with data**
 - You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Draw intelligence from your work ([Zechariah 22:11](#))? Of one of Myself offering as many as I use?
 - Words heard between waking up and walking outside are written in the author's backspace's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him.
 - Putting Him into words
 - My time away from the family, United States of America (USA), may have helped me gain independence.
 - In Australia, the women that came into my life were suffering from solitude. In Port Kembla, I left for the weekends for Sydney. How can we bring a life, exceed ours?
 - I decide the truth? Do I like the the truth?
 - The importance of the Word is how it is made.
 - Post-dated: God convicted me, I do not take the plight of the people to heart. MacArthur BART Station. Bay Street Emeryville Bn Fire Alarm Panel 8. FDC Building A 5604-5634. To mean, I decide the story?
 - How did they handle the Messiah? Luke 1:18-37? Examining the divide? To need someone to block it? ([Genesis 1:26](#))? You know He is capable of using it? ([1 Samuel 17:36](#) , [Romans 4:15](#))?
 - The Yordis sentence: Ma-fordon do I will use wisdom to block it.
 - No difference in comparison.
 - How useful you have been in determining wisely? How diversification the changes? ([Genesis 4](#))?
 - Windows Windows Operating System offers the clipboard copy command. When using the Mozilla Firefox browser and copying the address bar, the author selectively only copies the domain name and leaves out the protocol when it is http or https. This saves storage space, since this is the default protocol. When copying information from the page, please note that there may be leading blank spaces, which requires truncation.
 - Difficulty level: Your work is divisible into writing the word, commentary, and deducting meaning. When the word is from God, the data entry is easy when it is in English, except when it is in Yorduba, where there may be spelling and substitution errors. The commentary does not have to be exact, since this is an inference. Determining the correlation between people, places, and historical information, may require expertise. What I am able to do is how He types me. As I wrote this paragraph, I entered in my own words.
 - I sought assistance from Him. Alone I do to do a lesser facilities of the LORD. Whose clarity has he solved?
 - What can we be in the midst of a people, certain to God? ([Matthew 19:12](#))?
 - What do you know how to use, as you desire yours?
 - Rich of God, Reach of God.
 - How many are others? ([Daniel 11:41](#))?
 - How I want to present God? As I am allowed to be.
 - I want to it to be: how He wants it to be? When does the word omit the answer? ([Acts 10:11](#)).
 - How have asked me how I do my work? My twin sibling calls my work, data entry. I start my day, electronically recording the activities of the previous night. The bare minimal requirement is an editor, but I now use a database. I have always contemplated whether I should personally store my information, or look for a cloud provider? Build or buy? Another thing of mine is storage? How often should I backup and archive my memory and to where? What is in random access memory (RAM) was 28-28
 - ? Needs to be met?
 - The author will record the publishing and receipt.
 - An identifier and possibly foreign key is possibly null, empty, when it is unknown, non particular, or it associates with the author.
 - Let's let what until the movement? ([Acts 1:8](#)).
 - Did he ask you to do it? ([John 8:4](#))?
 - By Him, about Him ([Genesis 1:1](#) , [Genesis 4:26](#)).

An angel said to prophet Daniel, many shall run to and fro (Daniel 12:4)

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement (Revelation 3:7, Revelation 5:5, Revelation 22:16). Joseph (Genesis 37:2, Genesis 37:9, Genesis 37:19, Genesis 39:12-18).

Why we Accumulate the Same (Matthew 26:53, Revelation 9:16, Revelation 7:4-8)

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead (Genesis 2:2-3, 2 Samuel 11:4, 2 Samuel 12:24, Ruth 3:1, Ruth 3:8, Ruth 3:18). Knew versus lay.

Wanting a Member of..

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning. In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water. When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.

Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8, Genesis 2:10, Genesis 2:15, Genesis 3:23-3:24
Field	Cain and Abel	Genesis 4:8-4:15
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?	
Word	Scripture Reference
Work word	John 14:10
Charity	
Timeliness	Deuteronomy 18:22

The business of telling us apart?		
Word	Scripture Reference	Commentary
Naming	Genesis 2, Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?	
Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did he see as his? A remodelling of the last (Daniel 9:24-27, Revelation 3:12, Revelation 21:2, Revelation 2:7, Revelation 22:2, Revelation 22:14) ?
The author will want a conciliation with time?
AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?
That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words?
Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God (Genesis 3:8) ?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/WordEngineering>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself. The author suggests that Baptism of the Holy Spirit (Acts 1:2), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

Keyword	Scripture Reference
Place of Residence	Acts 1:4, Acts 1:8
Sign	Acts 1:3, Acts 1:5
Place of Worship	Acts 2:1
Speak with other tongues	Acts 2:2-2:11
Worshippers	Acts 2:5
Leader	Acts 2:14-2:47

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

RACI matrix. RACI is an abbreviation for Responsible, Accountable, Consulted, and Informed

Stakeholder	Task
Responsible	The actual person doing the work.
Accountable	The person that is answerable for the correct completion of the deliverable or task. Only one person is accountable for each task or deliverable.
Consulted	The subject matter experts (SMEs) that participate in two-way communication.
Informed	The recipients of one-way progress report.

Task	Responsible	Accountable	Consulted	Informed
Obtain funding for project		Executive Sponsor		Business Analyst

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prospecty and Fulfillment](#)
- [Autobiography](#)
- [State of Writing](#)

This is the largest number of possible occurrences on one side of a relationship. There can be only one contact for each contact detail.

Minimum cardinality

There may be no contact details for a contact.

Strength of Entity

The contact entity is strong because it can exist on its own. The weak contact details are existence-dependent on the contact entity.

ID-dependent entities

The weak contact details, primary keys include their ContactID.

(Allen G. Taylor, 2019).

Design Pattern

Title	Description	Commentary	Universal Resource Index (URI)
Accessor Pattern	Get and set an attribute by using a property.	The boundary to a property value. Readonly is achievable by disabling the set method.	
Delegation Pattern	Composition substitutes for inheritance.	The author does not inherit any class. But the author delegates by using composition to include existing services.	BibleBook.cs
Factory Pattern	Create subclasses from one or more methods.	At runtime, instantiate a variable object.	BallFactory.java
Immutable Pattern	An immutable object is unchangeable after creation.	A string object is immutable. Although behind the scenes a string object is a reference type, it is treatable like a value type. A StringBuilder object is changeable.	
Marker Interface Pattern	The marker interface pattern is empty. It is metadata that refers to additional work. Examples in Java include Cloneable, Remote, Serializable.	A class may implement the cloneable interface to identify support for the clone method, which may perform shallow or deep copy.	BibleBook.java
Singleton Pattern	Only a single instance is creatable.	At Daigaku Honyaku Center (DHC) there was a database table which is a reference and contains a single record.	SingletonPatternBible.java

Data quality management

- Data quality standards: The author is importing religious data from trusted sources. The author is following rigorous practice.
- Data quality assessment: The author is reducing human error by automating labor. Once a process is understood, the author computerizes the work.
- Data quality monitoring: The work has been on-going for at least the last 20 years; therefore, there is awareness of the expected results.
- Data quality reporting: There have been spurious cases of data loss, referential integrity violation, corrupt databases, computer breakdown and hard disk not recoverable.
- Data quality issue management: Having data facing the Internet is a risk, so there is password protection, no web access, little metadata.
- Data quality improvement: The author educates about data safety.

Data observability

- Data pipeline tracking: Microsoft SQL Server offers overwhelming statistics. There is information on the duration of backup, restore and other tasks in its maintenance plan, profiler, query plan, logs.
- Data quality assessment: Microsoft .NET limits the timeout between request and response. Data growth is manageable by size or percentage. Schema changes are done via Transact-SQL, which propagates.

(Petr Trávník).

Unified Modeling Language (UML)

(Unified Modeling Language)

Common Structure

UML composes elements and relationships as in its predecessor Entity-Relationship (ER) diagrams.

A model contains elements which may have descendants for specializations. A contact may have children such as addresses. When a contact is removed, this cascades to the removal of its children.

Comments do not impact programatically, they only serve as guides for readers.

A directed relationship may exist between a collection of source and target.

A namespace is a container separator.

An import facilitates the admittance of an external namespace.

Types and multiplicity restrict the units of information. For example, a scripture reference can only identify book titles, chapters and verses. For the King James Version of the Bible, the cardinality of the books is 66.

A constraint represents the range of valid values that a member may have.

A dependency replicates changes between the supplier/client.

Value

Lack of a value is null. A data type may place its own degree of significance on a value. For example integer versus (VS) decimal, date versus (VS) datetime.

A string is a combination of alphabets, numbers and symbols. For example, as in scripture reference, when it may concatenate Bible book titles, chapters, verses, and separators.

An integer is a whole number. For example, BibleReference which consists of Book ID, chapter and verse.

A Boolean is either true or false and it is normally used for validation.

A real is a number with decimal relevance, such as ratios and percentages.

Classification

This work is largely based on migrating from free-text to relational data. Classification serves well with scripture reference pre and post, and book titles, chapters and verses. The C# language class instantiations occur in [ScriptureReferenceHelper.cs](#). [Example](#)

The author's work has not featured inheritance. There are no generalizations, parents, nor specializations, children, classes. A substitution for this is an interface, such as, [IScriptable](#) ([UtilitySQLServerManagementObjectsSMO.cs](#)). A child may override a parent's virtual member.

In the C# language, an abstract class is static, not instantiable. A static class may contain extension methods.

Signals and receptors are similar to events and handlers. A page load or close is an asynchronous signal that its subscribers handle separately. A click event is triggered and resolved internally.

Microsoft .Net supports components such as a pre-compiled dynamic link library (.dll), and compiling web forms and web services at first request. Web form matured from code-behind to code-be-side.

For the Java language, there must be a correlation between package and directory names. Microsoft .Net does not impose such consistency. But the author abides by this rule.

In C# version 9, a method may offer a covariant return type.

2025-07-10T03:34:00 Decler Mendez said I attended Central Piedmont Community College (CPCC), and my twin sibling attended Johnson C. Smith University (JCSU). I unsuccessfully tried to locate either the GetAPage.html or AlphabetSequence.html page for Decler Mendez to view.

2025-07-10T04:32:00 There was a written test that included the comparison between extensible markup language (XML) and the other data structures. My twin sibling answered data bindings shared by other people. 2025-07-10T05:04:00 Data storage versus (VS) data arrangement. 2025-07-10T07:2:00 What did he assure... he will lead off 2025-07-10T10:07:00 Beware the yeast of the Pharisees ([Matthew 16:6](#)). 2025-07-10T11:50:00 Teresa Keng, Milk & Honey Cafe. Red in the hallway... to the lobby. [This deus is this scripture fulfill in your eyes](#) ([Luke 4:21](#)).

1. 1983-1988, Charlotte, North Carolina (NC), United States of America (USA)
1. During my 3 Associate degrees' graduation ceremony, Doctor Richard Hagemeier asked if I would like to go to Africa?
2. At Central Piedmont Community College (CPCC), I tutored in the personal computer (PC) laboratory with Laura Lawhorne and her African-American female supervisor.
3. My first contract was at Sunhealth Corporation.
4. At Central Corporation I was a technician with 2 African American females, that probably attended school together, and then lived together. The telephone operators were mostly African American females, including my stepmother.
5. At McKey Real-Estate, I was contracted to develop an R-Base 5000 5GL application.

					2004-07-11	Oranjees	The Oranjees are your wickets.

What part of me?

- When making man, God made some choices?
 - Form: In His image
 - Location: Garden of Eden
 - Vocation: Caretaker
 - Helper: Eve
 - Model: First man, mother of all the living.
- How can we resemble His use?
 - As a software engineer, I replicate my work.
 - When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
 - I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
 - I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
 - Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike (Exodus 2:18)?

There are duplicates in the Bible.

Type	Commentary
Name	- Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2.Samuel 12:24, 2 Samuel 12:25, 1 Samuel 25:5, 1 Samuel 25:25). - Giving a person's name to a place, such as, Enoch, Israel, Judah, tribes names - Name changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul - Name misspelling, Rahel for Rachel. A rewording of your view. - Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges - Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple
Historical Account	- Deuteronomy - Remembrance - Monarchy - Kings versus Chronicles - Gospels - Our LORD's, life story - Apocalyptic - Daniel versus Revelation
Quotation	- Retelling previous events - Prophecy fulfillment - Answers based on scripture
Discrepancy between question and answer	Joshua 5:13-15
Canaan words repetition?	Genesis 12:5

These duplicates may introduce statistical error and require clarification.

Contribution

The Contribution of the Author's Historical Information	
Unit	Value

Dream	Unique
Freight	Free
Cost and Price	Free
Expiry Date	Indefinite
Ownership	Shareable
Audience	Bible scholars
Technology	Practicable low entry point with optional matured technology

2025-07-04T13:33:00 What part of the same He realize?

Actor	Word	Scripture Reference
Abraham	Seed; Abrahamic covenant, Davidic covenant, Messianic covenant	Genesis 12:7, Matthew 1:17
Moses	Season; civil calendar, religious calendar	Exodus 12:2

2025-06-29T18:34:00 What our part we share?

Part	Requester	Audience	Fulfiller	Duration	Scripture Reference
Ear	Apostle John	Church	The reader and the hearer of the book of Revelation	Shortly come to pass	Revelation 2:7, Revelation 3:22
Head	Jesus Christ	The 12 disciples	Simon Peter	End-times	Matthew 16:18, Daniel 2:32, Daniel 2:37-38

2025-06-09T12:52:00 What must I hold as truth? What must I perform as truth? When does God add? What I bring to Israel... is all my people.

- King Saul (1 Samuel 15:22)
- King David (1 Samuel 30:18-31)
- King Solomon (1 Kings 10:1-10)

2025-05-28T18:40:00 How did He position?

- Joseph (Genesis 50:20)

2025-06-07T15:13:00 What we have as a later use?

- 2025-06-07T17:22:00 Joseph (Genesis 41:34-36)

2025-05-15T22:09:00 What did He call time?

- In the beginning (Genesis 1:1, John 1:1-2)
- Declaration of our adopted Father to His only-begotten Son (Psalms 2:7, Hebrews 5:5)

2025-05-14T15:08:00 What did He make variable... what did He associate with age?

- Role: Army, Priest, King of the Jews (Numbers 1:3, Numbers 4:30, Numbers 8:24-25, Matthew 2:2)
- 2025-05-07T01:29:00 Kehinde (the last-born of the twins) (Genesis 45:8)

K	E	H	I	N	D	E
1st position, beginning	2nd position	3rd position	4th position, center	5th position	6th position	7th position, ending
11th alphabet	5th alphabet	8th alphabet	9th alphabet	14th alphabet	4th alphabet	5th alphabet

2025-05-13T16:52:00 What did He start... that I improve

- God made the first man, Adam, and out of a rib of Adam God formed the first woman, Eve. Adam was like an angel, and Eve was a helper to Adam.
- Man prophesies and fulfills the word of God. Man interprets dreams and translates words spoken in tongues.

2025-05-06T23:25:00 What apart I have set as necessary?

test:ai/onboard/on?utm_source=new-tab&utm_medium=firefox-desktop&utm_campaign=naive-article-cards
Hong Kong was driving to Albertsons Lucky, Brookville, Hong Kong drove me from their house to 99 Ranch Market.

I cut my finger nails. I shaved my beard. I cut my hair.

Is Koko still with you? Ni mi se ri be mo...Is Koko still with you? That is why I don't see it like that anymore. 2025-05-06T17:09:00 (what) What is beyond a place? 19:09 (color to show) 2025-05-06T18:52:00 I am referring to my conversation with Benitokuwa about Ademiloluwa. I had a run-in with the police... which was fruitless.

- The Holy spirit (Genesis 1:2, Genesis 2:7, John 1:13, John 16:2, 2 Thessalonians 2:7, Acts 1:4-5)
- Man (Genesis 1:26-31, Genesis 2:18-25, Genesis 49:26, Matthew 2:23, Revelation 13:18, Genesis 41:34-36, 1 Corinthians 7:1-9, 1 Corinthians 7:36)

2025-04-30T04:03:00 Timeline of WordEngineering

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When you adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

- My counterpart has yours.
- The lost a man... has render as Himself (John 16:7, Matthew 16:18, John 4:14, John 6:35, Matthew 26:17-19) ?
- What did they produce (Genesis 4) ?
- Specialty of view (Genesis 12:11, Genesis 13:10, Genesis 22:14) ?
- 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
- 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

How are people as a result of Me?

A programmable approach

This I have devoted to...that you may find me useful (Revelation 2:7, Revelation 22:2, Revelation 22:14, Revelation 21:23, Revelation 21:27, Revelation 3:12, Revelation 21:2).

- The SQL is being built dynamically with the Bible version and the query condition clause customizable.
 - The output is in the JSON and HTML format with support for export into the CSV, JSON, XML.
- God said: What are the other activities of God? The spirit of God moved. He saw it was good (Genesis 1). When one finds good? That is the meaning (Genesis 1:16, Genesis 2:19-20, Genesis 4:1-2, Genesis 4:26). We demonstrate...how we are. It is not misleading...That is the deception (Revelation 12:18). Appreciate as (Matthew 16:18)?

What is the supplement?

Word	Commentary	Scripture Reference
Greatest Commandment	Love the LORD thy God. Love thy neighbor as thy self.	Matthew 22:36-40, Deuteronomy 6:4-9, Mark 12:28-31
Forerunner	The law and the prophets were until John	Luke 16:16

Is this generation the same?

Word	Scripture Reference
Seed	Isaiah 53:11, Genesis 3:15
Lead	Matthew 23:9, John 15:15
Interval	Hebrews 11:39-40

The phases are optional of the progress

- The distribution of allocation? Time, place...
- What exists as the present? (Deuteronomy 32:8)?
- It is one man doing...it is many doing.

2026-02-09T21:51:00 What did He pair? To be essentially the way (Genesis 1:26).

- Father, Son, Holy Ghost: Creator
- Great lights: Signs
- Angels and man

To seek someone else as I

Actor	Commentary	Scripture Reference
God	Man	Genesis 1:26-27
Adam	Helper	Genesis 2:18-25
Eve	Seed of the woman	Genesis 3:15
Leader	Successor	Acts 26:29

What is according to time?

Word	Scripture Reference	Commentary		
Beginning	Genesis 1:1	Word	Scripture Reference	Commentary
		Jesus Christ	John 1:18, John 3:16, John 3:18, Hebrews 11:17, 1 John 4:9	Only begotten Son of God
		Eunuch	Matthew 19:12	
		Paul	Acts 21:39, Acts 22:3, Acts 22:28	
Forever	Matthew 18:22			
Sun,rainbow, festival, event, cumulative	Genesis 1:14			

Intellectual presuppositions to enable the rise of science

- Intelligibility of nature: Words were part of his life.
- Order in nature: To digest what has been and reckon what will be.
- Contingency of nature: To take one's own as one's possibility.

Understanding is achievable

- Observe: Read the Bible and record words spoken.
- Test: Compare the words in the Bible with the words heard.
- Measure: Apply metrics to gain closeness.

(Stephen C. Meyer).

What is the aptitude of this work?

- AlphabetSequence spreads out.
- Dates are lined up.

Words out of numbers.

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.

Telling intelligence? What did Nagar say? Her only speaking was with the one that sees?

What specially like Him?

What specially like Him? (1 Corinthians 15) I spoke to task.		
Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2
Do you know mine? (Deuteronomy 18:15)		
God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:19)	Bethlehem (Matthew 2:1-18, Luke 2:1-20, John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?

2025-04-1700:50:00 Epoch timestamp: 1744848000

2025-04-1705:12:00 Place grouping...man grouping...2025-04-1804:06:00 (Genesis 48:4)?

2025-04-17706:16:00 Do we choose...a realization of him?

- 2024-07-09T18:30:00 He has always out it in...context of time.
- 2024-09-15T13:39:00 How our part...is never...design as lasting?
- 2022-08-08T19:00:00 Discusses the Devil?
- 2024-07-23T09:22:00 To be an African's...Nation.
- 2024-09-24T11:01:00 I have brought shame to my people...The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overhead bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
- 2022-10-08T11:08:00 To work as a part of Me?
- 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

- Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Mark 7:5, Daniel 1:3-5)

What I am rendering? To what particular use...is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53)...

- Salvation (Exodus 14:13)
- Commit (Luke 23:46, Psalms 31:5)

What personifies the time?

- First and Last Adam (1 Corinthians 15:45)
- Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)

What does authoring the word do? To shed as much light as my opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).

Why computer cannot be our part? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love babe it won...Including love their own father.
- What I do was able to learn the importance of the disease. I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not be eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to westward (1 Timothy 6:12).

Word	Scripture Reference	Commentary
Prophecy Fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Iota

Words are way.

Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:9
Stricter versus (VS) Flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count

Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life

Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2, Hebrews 11:25

What is the Bible divisible to?

Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1, John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1, Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?

Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?

Word	Scripture Reference
Holy Spirit	Genesis 1:2, John 4:24, Genesis 6:3, Genesis 41:38
Evil spirit	Judges 9:23, 1 Samuel 16:14, 1 Samuel 16:15, 1 Samuel 16:16, 1 Samuel 16:23, 1 Samuel 18:10, 1 Samuel 19:9, Luke 7:21, Luke 8:2, Acts 19:12, Acts 19:13, Acts 19:15, Acts 19:16
Lying spirit	1 Kings 22:22-23, 2 Chronicles 18:21-22
State of spirit	Genesis 45:27, Exodus 6:9, 1 Kings 10:5, 2 Chronicles 9:4

Word opposites

Word	Reference
Anti	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, Revelation 2:13
Un	Ungood, unholy, unrighteous

Beyond association of time, where am I?

Word	Scripture Reference
Role	Genesis 32:28
Place	Matthew 23:37
Times	Luke 21:24
Language	Genesis 11:9

Rajeev Kame telephone interview. What iterate a place?

Word	Scripture Reference
Alter	Acts 6:13-14
Iterate	Jeremiah 25:11-12, Jeremiah 29:10
Utilize	Numbers 35:25, Numbers 35:26-28, Numbers 35:32, Joshua 21:13, Joshua 21:21, Joshua 21:27, Joshua 21:32, Joshua 21:38, 1 Chronicles 6:57
Utter	Judges 12:6

Why numbers are preferred?

Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

A remembrance of Himself in us?

Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association, with guidance?

Word	Scripture Reference
Greatly beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:9	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. What exactly I know, as necessary of me? How numerous we are made.
- You do remember based on the data, do you need to collect the data, if you don't do remember?
- What does the want as a said? O pe. In Yotuba?
 - Complete
 - Late
 - Call
 - Thanksgiving

Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35 Numbers 14:33-38 Numbers 32:13 Deuteronomy 2:7 Deuteronomy 8:2 Deuteronomy 8:4 Deuteronomy 29:5 Joshua 5:6 Jeremiah 9:21 Psalms 95:10 Amos 2:10 Amos 5:25 Acts 7:36 Acts 7:42 Acts 13:18 Hebrews 3:3 Hebrews 3:17
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

What did He see Himself as?	
Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you...than you are ([Ephesians 3:18](#)).
We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?	
Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?		
Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31 Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- [Quality Assurance](#)
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: [JSMin](#), [FxCop](#)
- Questionnaire: [RatingBank](#) [InDefine](#)

On 2019-04-04T09:00:00 [andre.nguyen@gogcm.com](#) will telephone me about the role with Google's co-founder Larry Page [jgbs.lever.co/0itvhwk.agsr/201c6d9a-2d8a-4727-a345-d4a93d6dc277?necrcid=3b8e0b44-7127-4709-ad21-6eb8ea5f7403](#) Andre Nguyen asked how I spend my day? 2026-01-19T11:32:00 [You have tried to supplement...what God has given you.](#)

2026-03-03T11:24:00 [He examines...and says, I was reading the Bible... He was giving me a word.](#)

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such-as:

- Wake-up
- Brush my teeth and shower
- Breakfast
- Work
- Lunch
- Dinner
- Bedtime

This is how most people, live their lives; this is what I have accepted as mine. When I receive a word, I make it my work, to record the word and personalize my entries. I try to match this new story segment, with the preceding and forthcoming event threads.

When the author observes explicit experiences, he may record this additional data, in the HisWord's table ContactID, ScriptureReference, Location and Scene columns. [How relevant is Your word to our opinion?](#) This projection may result in entries of new records in the Remember and APass tables. [Where are people, his relation?](#)

[However, he is present, that is how I use.](#)

- If I have a paper and pencil available, I write down the word, and I calculate the AlphabetSequenceIndex.
- When I have access to the database, I enter and store the record electronically.
- Computer access means the resultset is retrievable via GetAPage.html.
- Text editor is useful for writing SQL.

2024-07-01T18:27:00 34324 Seward Drive, Fremont, California (CA) 94555

[How do we develop...our past time.](#) ([Genesis 37:19-20](#) [Daniel 6:5](#))?

God's Word; Human Interpretation

The author separates the word of God from the supporting information:

- Cast which fits into the Contact ID column
- Scripture reference is the Biblical theme
- Scenery which is the dream setting
- Location which is an awake surrounding
- Language translation

Specificity guides our entries into the HisWord table; for example if the information is not explicit, do not record it. This means that the nullable columns may be left empty. When there are more than one possible entries, choose the most rare.

[What we do minimally, is how we do enormously.](#)

God may put a thought or question in my mind, rather than sharing a word? To know the need of revealing one another?

How do you, reference the Bible?

- Search Engine? Requires Internet access.
- [ScriptureReference.html](#) Requires Bible knowledge and place in the Bible.
- [BibleIndex.html](#) Requires word knowledge

What is the certainty of the word:

- When the author hears a word and there is a reference to a place in the Bible, this affirms the word's relevance to the Scripture.
- Grammatically correctness is also vital.
- If a word correlates with a historical event, then it is credible.
- When the Spirit leads and guides towards an utterance ([Matthew 10:19-20](#)).
- Where am I, resemblance of how I am made ([1 Corinthians 14](#))?

What does He choose as example?

- God rested on the Sabbath day ([Luke 23:56](#))
- Jesus Christ ([Daniel 9:24-27](#) [1 Corinthians 15:45](#) [1 Corinthians 15:47](#))
- Man such as King David ([2 Kings 14:3](#) [2 Kings 16:2](#) [2 Chronicles 28:1](#) [Amos 6:5](#))
- Place such as Sodom ([Matthew 10:15](#) [Matthew 11:23-24](#) [Mark 6:11](#) [Luke 10:12](#) [Luke 17:29](#) [Romans 9:29](#) [2 Peter 2:6](#) [Jude 1:7](#) [Revelation 11:8](#)).
- Other living things ([Numbers 22:21-33](#)).

To whose advantage am I?

In every scenario, we participate in, our last outcome should be holy ([2 Samuel 12:18](#)). Future study, may consider the actors in the Bible, and award their holiness in each scenario.

Centeredness

This is our attempt to find follow-up, continuity in the Bible. A brief repetition of our activities, subsequently. Firmer consequence ([Isaiah 23:15](#) [Isaiah 23:17](#) [Jeremiah 25:11](#) [Jeremiah 25:12](#) [Jeremiah 29:10](#) [Daniel 9:2](#) [Zechariah 7:5](#)). Listed below are some of the repeated reinforcements.

- Title
- Abstract
- Acknowledgments
- Theory
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prospects and Fulfillment
- Autobiography
- State of Writing

1. Buzz word
2. Keyword
3. Parts of speech
4. Simple versus (VS) complex

This part is my existence, which I will never recover.

Can I reason as a god will listen?

1. Adam named the animals (Genesis 2:19-20)
 2. Pronounce Sibboleth (Judges 12:6)
 3. Pray continually (Luke 18:1-8)
- How to use the word? My earlier work has been to refer to the word. To look for one I deem as [2] Me fe was productive in the word? I want to be productive in the word?
- Where My word has developed His need (2 Kings 8:5)
- The select inputs do not have default values.

The Scripture table is a one-to-one mapping between the Bible version and column. These arrangements are futile when there are inconsistencies in the Bibles versions separations. An alternative is to have a table for each version. Publishers issue Bible version.

What does the Bible teach us about twins? Full-Text search? We have given preference to the word, not the commentary, which is subjective.

Word to Today

The remember table correlates the events and the calendar. Currently, the author is manually deriving the entries for the Remember table. When there is an association, then the author considers the first, last, relevant mentions.

1. To forget time is responsible (Revelation 21:23, Matthew 17:5, Mark 9:7, Luke 9:35)

2. What replaces time? Both 1:11?

The gain from automating this process will include:

1. Limiting human labor
2. Speeding up the task
3. Reducing storage need

Don't feed a horse.html

He Handicapped Time; as His Usage	
Title	Scripture Reference
Servitude	Jeremiah 25:11-12, Jeremiah 29:10, Daniel 9:2
Fulfillment	Luke 9:31
Incentive	Daniel 12:13, Isaiah 53:12

We may need, human help, to determine, the theme-of-the-day?

The author's work is record specific, GetAPage.html. Further work may consider the entries for a particular date, datetime range, or HisWordID set basket? What this information have in common?

On 2022-01-10, I will recall that the birthday of biological mother is coming up, on 2022-01-12, I should pray about this and reinforce effort. What is He, starting to say?

Is there going to be a safe development to this design? There is key to reason. This work is not defamatory nor inflammatory.

Reuse

1. Issue a SQL database query statement [SQLToTfMTable.html](#). This is the most raw form of querying the database, but it offers the most flexibility, and it does not restrict, to pre-built application.
2. Navigate the web pages from a client browser [2019-10-05ArtifactDescription.html](#) WhenThePastorIsPreachingYouDontWithTheScriptureToCameInSubsequent.html
3. Build a web service requestor, without the limitations of Cross-origin resource sharing (CORS).
4. Download the DLLs, or the source files, and customize, if necessary [WordJoining](#)

Will SQL deliver all the purpose in the Bible?

Such as, will a query language find the mother, father, and child relationship?

```
know wife SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE "know" and KingJamesVersion LIKE "wife"
wife child SELECT ScriptureReference, KingJamesVersion From Bible..Scripture WHERE KingJamesVersion LIKE "wife" and KingJamesVersion LIKE "child"
```

WordToNumberHelper.cs

Numbers in the Bible are written out as words. The author made effort to parse these words and find the numbers, but it was not totally successful, largely because of the arrangement of the numerals.

Translate the Original AlphabetSequence C# Code to the Other Programming Languages

AlphabetSequence was first implemented in the C# programming language [AlphabetSequence.cs](#). Later work, saw translation to:

- [AlphabetSequence.c](#)
- [AlphabetSequence.cpp](#)
- [AlphabetSequence.go](#)
- [AlphabetSequence.java](#)
- [AlphabetSequence.js](#)
- [AlphabetSequence.py](#)
- [AlphabetSequence.rs](#)
- [AlphabetSequence.sh](#)
- [AlphabetSequence.sv](#)
- [AlphabetSequence.sv](#)

Perhaps, other programming languages should have their own sample code. The author is only conversant in English and Yoruba, additional work will be to see the use in other lingua franca. [And, the priest said, Are one only for me?](#)

Data Residence

Where should the data reside? Database, JSON or XML files?

Which side, the love felt?

SQL returns records in rows; there is a result set. Would we, be able, to amalgamate the result set? For example, how can we, find themes in the Bible? When you enter a topic, can we return a trend? Clustering, can we return a number; as its present (1 Kings 19:11-13)?

Where I arrive, is where He as conclusively use

Initially, when I got a word, I made efforts to expound, on this word; but now, I share the word, and wait on God to reinforce the word, or share a new theme.

2019-05-30 My ancestral home is Ile-Ife, the site of the Oramiyan staff. My search for the word, [Staff](#), inspired relating the Bible to my life. Staff, first occurs in, ([Genesis 32:10](#)). In my ninth year, my twin sibling and I, relocated from Ile-Ife Staff School to Lagos. In our tenth year, we visited London. In my 22nd year, I re-located to the United States of America (USA).

I am letting myself; be many as a people.

God intended man, to be a personal use. The work of the author is an individual effort, and it targets a singular person. The author separates his work into web pages, but the user may click on a hyperlink, to get more information, and sometime do additional work. The work of the author, builds on the efforts of other people, like the Bible, dictionary and commentary. The HisWord table and associated queries, only currently refers to the contribution of the author. How could we, specialize our work? Who uses, and for what? The setting, is it normal? What are the influence of God, as a person? What are His contribution, solely to man? What part of Him, as He analyzed, as a person? What role, as man, placed on Me? What stimulate you, as a human being; is where My opinion placed? The author read the Bible and listened to His word, prior to the introduction of AlphabetSequence. Where do we follow, His partnership? He has said the word; I have collaborated with Him.

Outstanding Work

The source code and schema are available at [Github.com](#). This means that the public can review and make updates to the original work of the author. This aged work is not up-to-date with the industry trend, such as cloud computing, mobile applications, decentralized ledger, noSQL. Part of the justification for this immaturity; is the need to maintain a low entry point and capture a wide audience for its adoption.

Whols for social networking sites like WordPress, Github, Twitter, LinkedIn, Facebook, etc. [When nothing without Me; is sufficient without Me, Where I retain.](#)

I use [grammarcheck.net](#). I am proposing a specialization to correct scripture reference. For example, there are many questions and answers, [but a further development is to automate the task of correction \(Luke 3:23, Matthew 22:41-46, Matthew 22:28](#)

Mark 7, Genesis 38). [They are not one another.](#)

When does He say a word, when does He put a thought ([Daniel 5:25-28](#))? Ability to say.

When does He talk in the past, present or future?

Which is the information container? The ActToGod table, Major column value, Comparative verse; supercedes the WordsInTheBible table; which is the exact word for the King James Version (KJV) and not all versions of the Bible; and doesn't take into consideration the English language British versus American spelling, such as favour versus favor, nor the generic word, such as, man versus men. When is this, anointing of the Spirit ([1 Samuel 2:26, Luke 2:52](#))?

Can you create a fictitious record in the Contact table, that meet later fulfillment. This record in the contact table will contain a word that is placeable in the title or company field/column. This information is substantiable in the commentary column of the CaseBasedReasoning table. This is compatible to Ghost city. A bit column is settable, for this contact. It allows to keep the contact ID as a foreign key. A record to be someone else.

The effort of the author is to share and comprehend the word of God. What can the author provide to the other; to substantiate the work of the author? God made man as similar to Him to see how life can be? If I spoke the same, how am I the same? I know, I am. The love of being the same supercedes feeling the same. Being in the spirit; is alluding to the sufficiency of men.

[When did He immediately get what He wanted?](#)

Who	What	When	Where	Why	Scripture Reference
Abraham	Sacrifice	3 days	Mount	Tempt	Genesis 22
Jesus Christ	Sacrifice and resurrection	3 days	Jerusalem at Golgotha	Tempt	Matthew 27:33, Mark 15:22, John 19:17, Matthew 16:21, Matthew 17:23, Matthew 26:19, Matthew 27:64, Mark 9:31, Mark 10:34, Luke 9:22, Luke 13:32, Luke 18:33, Luke 24:7, Luke 24:21, Luke 24:46

Search engine optimization (SEO)

Search indexes or search engines

2026-03-07T14:15:00 Since the inception of Google.com... the author has relied on it.

Search directories

2026-03-07T14:15:00 A directory contains categorized website information which may be input by humans, and it does not crawl nor necessarily contain particular web page information.

2026-03-07T15:04:00 The emergence of AJAX blurs the distinction between a website and its various web pages.

Most significant search directories

- [dir.yahoo.com](#)
- [Open Directory Project](#)

Determining Your Plan of Attack

- Keyword analysis: 2026-03-07T20:56:00 I will like My word to begin at My representation.

Terminology - Words and Meaning

When you write a thesis, it is a paradigm work, shift in thinking, and it should contain a terminology section. The practice of the author will be to list existing words, and include their meanings. For technical jargons, the author will rely on the Internet, as a definition resource. If the author is introducing a new word, the author will explain its meaning, but this is rare.

WordEngineering Created of an intellect

Client-Side Programs
The norm of today is to build with HTML, JavaScript, CSS

The database of choice is Microsoft SQL Server. Prior to specializing on SQL Server, the author experienced fifth generation scripting languages such as dBase, R:BASE, Clipper, Access, FoxPro; other relational databases, like Oracle, SQL Anywhere from Watcom, Sybase, and Informix. When the author applies the Microsoft implementation of SQL, Transact-SQL and SQL CLR or SQLCLR (SQL Common Language Runtime) the author risks not being vendor-agnostic.

The document that the reader is currently reading, uses rudimentary formatting and links. JavaScript dynamically accesses and updates the Document Object Model (DOM). During the first page load, the application retrieves the available Bible versions. Based on the user's request, the application generates the result sets, on-the-fly.

HyperText Transfer Protocol (HTTP)

The web uses the HTTP network protocol; there is a limit to how many requests that a particular host, may handle simultaneously

HTTP Client (or Web Browser)

There is partiality of the author towards Mozilla's Firefox, because Mozilla is a non-profit organization, committed to web standards, and it was closely associated with Brendan Eich, the creator of JavaScript, the software is open source, and its gives us the opportunity to test our Microsoft implemented software in a non-proprietary, vendor neutral environment. For compatibility with standard, the author performs tests on Microsoft's Internet Explorer (MSIE), Google's Chrome, mobile telephones emulators and

simulat
HTTP Server

The author use Microsoft Internet Information Server (IIS), the author has experience with both the Apache HTTP Server, Apache Tomcat Server. The author preference for IIS, includes its tight integration to the Windows Operating System, SQL Server and .net framework.

Latenc

This is the amount of time, it takes to respond to request. The use of AJAX, helps to decrease the duration, the length of time, it takes to load-up a page

Linking

This dissertation depends on the structural navigation links for the table of contents. The associative links help to drill-down to particular scripture reference and Bible words. The author also lists, outbound links, re-direct to source web references, as in the bibliography section. Registration with search engines is one of the ways to encourage incoming links.

Machine Learning

A computer program is said to learn from experience E with respect to some class of tasks T and performance measure P , if its performance at tasks in T , as measured by P , improves with experience E (Goodfellow et al. 2016). Machine Learning takes as input: data and answers and derives rules (Bileschi et al. 2020).

Page Size
The HTML file sizes are small; since the author distributes the work between HTML, JavaScript, CSS and the back-end source files

Page 1

The page title is a microcontent that serves as a prominent content in search engine listing, bookmarks, history lists and the page header on the browser.

Semantic HTML

This is the choice of a particular HTML tag, to reinforce its meaning and content

Server-Side Program

Ever circulating

Style Sheet

The author prefers linked to embedded style sheet.

Web Application

The everyday web pages of the author include:

1. GetAPage.html

2. [BibleWord.html](#)

3. Scripture Reference

4. DateDifference.asp

Diagrams

The diagram illustrates the Factory Method pattern. It shows a hierarchy of classes and how a method in a base class can create objects of different subclasses.

Classes and Prototypes:

- Base** (Object prototype)
 - Method: `newWoman prototype()`
- Base.men** (Men prototype)
 - Methods: `0: (Man prototype)`, `1: (Woman prototype)`, `2: (Man prototype)`, `3: (Man prototype)`, `4: (Man prototype)`, `5: (Man prototype)`
 - Length: 5
- Man prototype** (Object prototype)
 - Constructor: `Man()`
 - Attributes: `breath: breathe()`, `name: name()`, `know: know()`
 - Length: 5
 - Interface: `1: eat() prototype`
- Woman prototype** (Object prototype)
 - Constructor: `Woman()`
 - Attributes: `length: 5`, `name: "Woman"`
- Man prototype** (Object prototype)
 - Constructor: `Man()`
 - Attributes: `breath: breathe()`, `name: name()`, `know: know()`
 - Length: 5
 - Interface: `1: eat() prototype`

Method Calls and Object Creation:

- Base.men** calls `newWoman prototype()` to create a **Woman prototype**.
- Base.men** calls `0: (Man prototype)` to create a **Man prototype**.
- Base.men** calls `1: (Woman prototype)` to create a **Woman prototype**.
- Base.men** calls `2: (Man prototype)` to create a **Man prototype**.
- Base.men** calls `3: (Man prototype)` to create a **Man prototype**.
- Base.men** calls `4: (Man prototype)` to create a **Man prototype**.
- Base.men** calls `5: (Man prototype)` to create a **Man prototype**.

Object Details:

- this men 1** (Man prototype)
 - named: "Eve"
 - father: null
 - mother: null
 - title: "Mother of all the living"
 - vocation: "Helper"
- this men 2** (Man prototype)
 - named: "Adam"
 - father: "God"
 - mother: null
 - title: "First man"
 - vocation: "Gardener"
- this men 3** (Man prototype)
 - named: "Cain"
 - father: "Adam"
 - mother: "Eve"
 - title: "Possession"
 - vocation: "Tiller of the ground"
- this men 4** (Man prototype)
 - named: "Seth"
 - father: "Adam"
 - mother: "Eve"
 - title: "Substitute"
 - vocation: "Call on the name of God"
- this men 5** (Man prototype)
 - named: "Enosh"
 - father: "Seth"
 - mother: null
 - title: null
 - vocation: "Call on the name of God"

```
@startuml
Adam -> Eve: Knew
Eve -> Cain: Bare
Eve -> Abel: Bare
Abel -> Sheep: Kept
Cain -> Ground: Tillage
Cain -> God: Sacrifice
Abel -> God: Sacrifice
God -> Abel: Respect
God -> Cain: Reject
God -> Cain: Admonish

Artifact Description

[2019-10-05ArtifactDescription.html](#)

[illegible]

From	1997-12-31
To	1998-05-08

[illegible]

2024-12-25T19:12:00 Bimpe Bakarat Lawal returned my telephone call. Bimpe Bakarat Lawal said both uncle Demola and uncle Jimi had invited her to a party at the house of uncle Jimi

- At Central Piedmont Community College (CPC), the major course, students and colleagues include:
- 1. An African American female senior, Gayle.
 - 2. Michael Peko, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
- My twin sibling and I traveled to America Top 40 with Casey Kasen, every Saturday morning. 2024-12-25T22:00:00 What strange... of the people?
- I tried to build a liturgical light for my sister.
- In a multicultural church where I was part of the congregation, Bernie Alsopgaard mentored. Perry drove me to church. I went to altar calls for masturbation prayers.
1. 2024-12-25T19:12:00 When I had the option, I have acclimated.
2. 2024-12-25T19:23:00 Australia had brought me in... to fit into the crowd.

What role he played in your life?

They had varying mother... but one father (Genesis 32:28)

2024-12-31T16:48:00 HZ Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward

2024-12-31T19:55:00 A male-dominated family. What adjustment did you need to make to your life? How your living resemble you?

1. Post-Syria-aid re-education from Yie-lie to Lagos
1. Patrick, brother Henry
2. Captain of the Nigerian national hockey team
3. Teacher for the 14 year of the Baptist Academy secondary school, evening schedule
4. The managing director of Gecoco provided lunch money to eat at the Baptist Academy secondary school during form 2...5

2. Post-1988 deportation: You called him Daddy, that is what everybody else called him

- Where did he serve... a people?
- Where did I... remove myself from the past? (Genesis 31:41)?
- What exact... are new?
- Spending time... to reality?

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 - 1. In the year 2024, the author will turn 57 years old.
 - 2. In the year 2024, Faith An Yao will turn 18 years old.
 - 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Mufoz? Oral communication and speech. Where will I find the same...as me? I was getting training on how to...place my work in life? Looking at me as a reflection of you.

Education in Charlotte, North Carolina (NC)

- In spite of racism...we can observe.
1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
 - I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 × 14 inches)
 - I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
 - In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. What do I need of a capable human being? What resemblance has He made? (Genesis 32:28, Genesis 5:3, Genesis 4:12)? What word reminds? (Mark 11:23)?
5.

Style of Writing

What has prompted your interest in the topic?

- The driving forces of arriving at the author's work are:
- During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
- The author was receptive and felt most at home during worship.
- (Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not spent, where is it needed?
