- Prophecy and Fulfillment
- Autobiography
- State of Writing

```
FROM Bible..Scripture
)
select cnt = count(*)
from cte
```

The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_ChapterIDSequence_Range CHECK (ChapterIDSequence BETWEEN 1 AND 1189)
```

will check the range correctness. Although it is good to know the ChapterIDSequence, but it is primarily used to decide the boundaries for scripture reference queries.

The Scripture Table's VerseIDSequence Column

When loading data, the author calculates the VerseIDSequence column, and increments it, every time, the BookID, ChapterID, and VerseID changes during the data load. There are some Bible books that have only one chapter, such as, Obadiah, Philemon, 2 John, 3 John, Jude; therefore, the author is careful when the choice is made to increment and update the VerseIDSequence column. The SQL statement

```
SELECT BookTitle FROM Bible..Scripture GROUP BY BookID, BookTitle HAVING MAX(ChapterID) = 1 ORDER BY BookID
```

is for listing these one chapter, Bible books. The VerseIDSequence ranges between 1 and 31102; starting from Genesis 1:1, and ending at Revelation 22:21. The SQL statement

```
SELECT COUNT(*) FROM Bible..Scripture
```

will decide the greatest value for VerseIDSequence, the total number of rows, records, in the Bible..Scripture table. The SQL statement

```
ALTER TABLE Bible..Scripture ADD CONSTRAINT CK_Scripture_VerseIDSequence_Range CHECK (VerseIDSequence BETWEEN 1 AND 31182)
```

will do the data integrity. As said earlier, although it is good to know the VerseIDSequence, but it is primarily used to decide the boundaries for scripture reference queries. The identity functionality which auto-increments, before inserting each row is useful, for ensuring this candidate primary key, abides by the entity integrity constraint; however, The SQL statement

```
ALTER TABLE Bible..Scripture
ADD CONSTRAINT AK_Scripture_VerseIDSequence UNIQUE (VerseIDSequence)
```

is supplementary.

The Scripture_View BibleReference Column

The SQL statement

```
((right('00'+CONVERT([varchar](2),[BookID]),(0)),(2))+right('000'+CONVERT([varchar](3),[ChapterID]),(0)),(3))+right('000'+CONVERT([varchar](3),[VerseID]),(0)),(3)))
```

will combine the BookID, ChapterID, and VerseID. This is a convention for referring to Bible rows, by a unique identifier, which consists of the BookID, ChapterID, and VerseID. The leading zeros are placeholders for blocks of IDs, such as, BookID which will have two digits, ChapterID which will have three digits, and VerseID which will also have three digits. It is easier, faster, and more compact to restrict and order by numbers rather than text. Listed below, is the result set, for this SQL statement.

```
SELECT ScriptureReference, BibleReference
FROM Bible..Scripture_View
WHERE BookID = 43 AND ChapterID = 1 AND VerseID = 1
```

ScriptureReference	BibleReference
John 1:1	43001001

There is a conversion page [BibleReference.html](#). Please note, that the author has not developed this further, it is just an introduction and speculation, which others may wish to adopt.

Most of the applications, extract information, and query the Scripture table. If the user chooses to, he may choose to load another Bible version, into the Scripture table and the application will still work as usual, and there will be no need to make changes to the application; thereby, achieving [Separation of concerns \(SoC\)](#).

The Exact Table

The [Exact](#) table's, primary task, is to tell, on the words that are in the Bible. Its information set include each word's first and last scripture reference occurrence(s), and count of occurrence(s). If the word, occurs only once, then the last occurrence is set to null. The incentive for writing the exact module comes from [Dave Hunt](#), who will talk of each word's specifics, and [Chuck Master](#) who noted that the first occurrence of the word, [love](#) is in [Genesis 22:2](#). The exact table, is a holding area, for staging information; it could be argued that there is no need, to have this table, because it sources its information from the Scripture table, and it is available using [Language Integrated Query](#). The reasoning of the author is that the Scripture table is static data, and it does not need processing, each time, there is a request. Speed and lower work load are the advantages of the approach of the author; its disadvantage is that the exact table needs re-population, when there is a shift to another Bible version, which the author does not project, at this time. If there is a need, to support another Bible version, then the Exact table loading procedure needs expansion to aid, this flexibility. [Word Occurrences](#) is dynamic, and it supports the other versions of the Bible.

The Exact result for the author's initials, KAA, is Karkaa, meaning [floor \(Joshua 15:3\)](#).
2026-03-30T11:30:00 I will assist if life doesn't share us apart... turned up exact.' [Genesis 1:16](#)? [Helel](#) or [Helek](#) translated part or portion ([Nehemiah 12:15](#), [Joshua 17:2](#)).

The Exact Table's ExactID Column

The ExactID is an [identity column](#), meaning the database, SQL Server, auto-increments its value, before insertion. There are 12891 unique words, in the Bible..Exact table. The SQL statement

```
SELECT MAX(ExactID) FROM Bible..Exact
```

is for determining the highest value. The SQL statement

```
SELECT COUNT(BibleWord) FROM Bible..Exact
```

is for determining the word count. The SQL statement

```
ALTER TABLE Bible..Exact ADD CONSTRAINT CK_Exact_ExactID_Range CHECK (ExactID BETWEEN 1 AND 12891)
```

is for the range restriction. For storage reason, the author has chosen, not to have a unique index, on this candidate primary key; in-spite, of it being a query item. Future implementation, may issue the SQL statement

```
CREATE UNIQUE INDEX AK_Exact_ExactID ON Bible..Exact(ExactID)
```

```
SELECT SUM(FrequencyOfOccurrence) FROM Bible..Exact
is 789631; this is the count of the words in the KJV Bible.
```

The Exact Table's BibleWord Column

These are the words that occur in the Bible, in the order of their occurrences. The author sets the [primary key](#), the constraint, by issuing the SQL statement

```
ALTER TABLE dbo.Exact ADD CONSTRAINT PK_Exact PRIMARY KEY CLUSTERED (BibleWord ASC)
```

The Exact Table's FirstOccurrenceScriptureReference Column

This is the scripture reference where the word first occurs in the Bible. The author may set-up the relationship by issuing the SQL statement

```
ALTER TABLE dbo.Exact WITH CHECK ADD CONSTRAINT FK_Exact_Scripture
FOREIGN KEY(FirstOccurrenceScriptureReference)
REFERENCES dbo.Scripture (ScriptureReference)
```

Please note, that as discussed earlier, the author cannot have, a unique constraint, on the Bible..Scripture.ScriptureReference column, since this is a computed column; the author can not keep up the relationship, at this time.

The Exact Table's LastOccurrenceScriptureReference Column

This is the reference to the scripture where the word last occurs in the Bible; if there is only one occurrence, the value of this entry is null. As with the FirstOccurrence column, the referential integrity rule applies.

The Exact Table's Difference Column

This is to measure the word's longevity; the difference in VerseIDSequence between when it first and last appeared.

The Exact Table's Occurrence Column

This is the pervasiveness of the word, how often is the word used in the Bible?

The WordEngineering Database

The WordEngineering SQL Server database, mainly consists, of four tables - [HisWord](#), [Remember APass](#), [ActToGod](#)

The HisWord Table

The HisWord table is what the author heard from the source. The entries in the HisWord table are exact and representable in alphanumeric format ([Numbers 12:6-8](#)). In following, the Bible's New Testament convention, where there are translations of Hebrew words to English [which is being interpreted](#) ([Matthew 1:23](#), [Mark 5:41](#), [Mark 15:22](#), [Mark 15:34](#), [John 1:38](#), [John 1:41](#), [Acts 4:36](#)); so also, there are translations of Yoruba words to English.

There have been cases when the author cannot spell and fully comprehend what he heard. In such cases, and not dispose of the records, the author will partly enter what he heard. This impedence mismatch between what the speaker said and what the listener heard, rarely occurs with English words. But it is likely, in the author's native language, Yoruba, which exploits word combinations and phrases. The alphabets differ slightly between the English and Yoruba languages; Yoruba contains diacritic alphabets. The author requires a Yoruba dictionary and translator; a recent success is with the [http://translate.ooole.com](#) web page.

The HisWord table's most important column, as the name suggests, is the word column, which is either English or Yoruba; or a mixture of both languages. The author will yield to the Holy Spirit in translating Yoruba words to English. From previous experience, this translation is not always the most right or relevant, and different words may contain the diacritic alphabets; therefore, introduce various meanings ([1 Corinthians 12:30](#), [1 Corinthians 14](#)). To account for the discrepancy in translation, the author sought help from the LORD:

- 2015-11-02T22:55:00 [And the meros is the money convert.](#)
- 2015-11-03T02:17:00 [The specifics, a language.](#)

The word column is a potential natural primary key, since duplicates are rare. When redundancies do occur, we may append the sequence to the word, to generate a unique word. We do this manually, but an [insert trigger](#), will offer automation, and will cut the risk of primary key violation, which leads to gaps in the identity column [and loss of data](#).

The HisWord's table, commentary column, contains implicit information. This communication is most likely non-verbal, and it is information such as creatures standing or moving towards particular locations or engaging in other visible activities.

As such, from the creation account, on the first day, there is a commandment, and there may be an action/response. The commandment is in the word column God created light ([Genesis 1:3-5](#)). The action is in the commentary column; God separated the light from the darkness ([Genesis 1:1-2-4](#)).

Microsoft SQL Server generates sequential numbers for the HisWordID [identity column](#). The goodness of this technique is that it is a candidate primary key, data loss is trackable, and it provides a sort key. The HisWordID column may serve as the [primary](#) and/or [foreign key](#), the backbone of the [Referential Integrity Constraint](#).

The Dated column is of the DateTime type. If an insert statement does not explicitly specify a value for the dated column, then it defaults to the current date and time of the [\(UTC-08:00\) Pacific Time \(US & Canada\) time zone](#). There is a preference for the [Coordinated Universal Time \(UTC\)](#) format.

A relational constraint limit to a single foreign key? The author will choose either the most vivid or rare?

HisWord_view

The HisWord_view composes of the computed columns deduced from analyzing the Word. The two most significant computations are the AlphabetSequenceIndex, and the reliant AlphabetSequenceIndexScriptureReference, respectively. The author derives the AlphabetSequenceIndex from the word by adding the place of the alphabets in the alphabet set. In the ASCII table, the lower case alphabets are between 97 and 122, and the upper case alphabets are between 65 and 90. The lower and upper case alphabets have the same places. The AlphabetSequenceIndexScriptureReference is the books, chapters, verses separation in the scripture. The author will consider the chapter and verse place, forward and backward. Use the [AlphabetSequence.html](#) to calculate the computed values identified above. The AlphabetSequence is like [Gematria](#), [Misgar](#), [Hebhrachi method](#), [Titles of God](#).

The Remember Table

The Remember table tries to correlate the period between a prophecy and its fulfillment. The [terminus a quo](#) DatedFrom is when the prophecy begins, and it marks the date of issue or establishing of the prophecy. The [terminus ad quem](#) DatedUntil is when a prophecy partially or entirely comes to pass. " (Konia House). [DateDifference.aspx](#) is for calculating the difference between terminus a quo, versus terminus ad quem; the results are in days; biblical years, months, days; the Common Era. The inspiration for adding the Common Era comes from [wikipedia.org](#) by Jimmy Wales.

To determine the HisWord and Remember entries? The author chooses to separate the particular and prompted inputs ([Luke 4:19](#)).

APass

First, inside and last dates.

ActToGod

This is subjective work; the author applies intelligence to find patterns and resemblances in the Bible.

Designing Software Architectures: A Practical Approach Making Design Decisions

Principle 1: Use Facts
Principle 2: Check Assumptions

- This whole thing started with keeping [a work reference](#).
- Even though Yoruba is the native language of the author, he still and invariably relies on [translate.google.com](#).
- The author depends on a typing assistant.

Principle 3: Explore Contexts
Information re-use was the driving force of this software engineering. The author sought to learn programming and retain knowledge.
Principle 4: Anticipate Risks
The undesirable outcome and their probability of re-occurrence will include:

- Data loss or corruption because of issuing the database modification command and lack of timely archiving
- Hardware, software, or network failure
- [Vendor withdrawal of support](#)

Microsoft:

- Introduced .NET core and Model-view-controller (MVC).
- Inability to restore deprecated Microsoft SQL Server backup versions.
- Command-line reverse-engineering of database script does not conform with the newly released data types.

Principle 5: Assign Priorities
The author prefers to first build and implement his strengths and specialties in the back-end (database and process logic), prior to designing the creative user interface.
Principle 6: Define Time Horizon
[What period has God used?](#)

- In the year 1988 – military census age: I Am taking you on a journey. I was 20 years old, and this was 12 years, before the year 2000, the millennium ([Numbers 1:3](#) [Luke 2:42](#)).
- On 1997-12-31 – priesthood age: I have brought something against you, but I Am with you. My 30th year, and this was 2 years, before the year 2000, the millennium ([Numbers 4:30](#) [Matthew 2:16](#)).
- In the year 2007 – generation time span: this masturbation will bring water. My 40th year ([Numbers 14:33-34](#) [Numbers 32:13](#)).

Principle 7: Generate Multiple Solution Options
[How versatile am I...at attending others? I have to relay my perception to technology providers.](#)
Principle 8: Design Around Constraints
[Relational databases offer the ability to set constraints.](#)

- Data type
- Nullable
- Primary key and unique index
- Foreign key

Principle 9: Weigh the Pros and Cons

- Data import...data input: Initially, the author created an XML file and imported it into database tables via a C# program application. When this process malfunctioned, the author suspended his work. The author resumed work by doing data input via Microsoft SQL Server Management Studio grids. This diversion did not require database changes, achieving separation of concerns.
- The use of non-supported beautifying css is responsive web design.

(Humberto Cervantes, Rick Kazman June 2, 2024).

Hitachi Modern Data Infrastructure Dynamics Drowning in Data: A Guide to Surviving the Data-Driven Decade Ahead

- Microsoft SQL Server offers the capability to cut off the size of the result set. The GetAPage.html gets minute data from the various database tables and views. The user may be given the opportunity to customize which results to retrieve, for example, AlphabetSequence, BitMapWord, HisWord, or Dictionary. A literate person may not need as much data. Setting this restriction will be concise queries.
- An approach is to offload computing to the local host.

(Hitachi 2023).

Database Performance

- Query optimization: Server-side database processing offers the best performance scenario. The use of stored procedures and functions is recommended. The hold backs are their deployments and SQL variances. Prepared statements are fast, resource lenient, cached, and they prevent SQL injection attacks. The author falls back on dynamic SQL for complex queries.
- Indexing: The author is well aware of the pros of indexing, but its cons include additional space and effort. The less performant productive database objects are keys and constraints.
- Data Modeling: Normalization
 - First Normal Form (1NF): A relation meets this rule when each attribute has only one value. Another condition is that all the attribute values are atomic and non-composite. In the HisWord table there may be multiple contacts, but only the most prominent contact is recorded. A contact must be first created in the Contact table, prior to its referencing, to satisfy its referential integrity constraint. The author does abide with 1NF in the HisWord table. The URI column may contain multiple e-mail addresses. The scripture reference column may not be a unit.
 - Second Normal Form (2NF): The ActToGod table does not comply with this rule, since its Minor column is functionally dependent on its Major column. Computed columns minimize the potential for this.

(Craig Mullins, 2023-12-18)

Database Management System (DBMS)

There are 2 types of DBMS. These are:

- Shared file-based: For example, Microsoft Access
- Client/Server: For example, Oracle, SQL Server, MySQL

SQL Usage

Database Information

Statement	Commentary
sp_databases	The sole work of the author; the WordEngineering database size, is currently 33351360 bytes.
sp_server_info	The database version is Microsoft SQL Server 2025 - 17.0.1050.2
sp_spaceused	The WordEngineering database currently uses 32569.69 MB.
sp_statistics HisWord	The cardinality of the HisWord table is 121880.
xp_fixeddrives	Returns a list of physical hard drives and the amount of free space on each one.
xp_msver	Returns version information about SQL Server.

SQL Statement

Statement	Commentary
Select	The select statement for data retrieval is the most popular statement. Most select equates to Bible ..Scripture_View. Using the select statement is safe, but it may impact performance. An alternate replication target repository may serve queries.
Insert, Update, Delete	The insert, update and delete statements are for data maintenance.

Where Clause Operators

Operator	Commentary
=, <>, !=, <=, <, <=>, !=, <,>, >= !=>	The operators listed will check for a single value. The operators that consist of !=, will check for non-matches. In most cases, rarely is this in use ..!= or/and !=>. This is the first time...he is becoming aware...of these expressions. This is the first time...he is becoming aware...of these operators. Outcrops for a date or number will search for particular types.
BETWEEN	This is a range check that accepts a beginning and ending value. It is not highly used.
NULL	No value
IN	A comma-delimited list of valid options within parenthesis.
LIKE	Wildcard filtering

(Ben Forta, 2017)

Database Scaling

- The transition to computed columns results in smaller storage requirements.
- Microsoft SQL Server supports multiple databases; therefore, reducing archive needs.
- Normalization, object-to-relational mapping, is light load.

Database Exclusivity

Row Limit

Title	Commentary
TOP	Set a limit of the number of rows returned or a percentage of the rows from the source.
SET ROWCOUNT	The database will retrieve all the rows, but if there are excessive rows it will later link to repaired rows .

Where Clause

Title	Commentary
Like wildcard	Preceding or following restriction "%%"
Check for NULL	IS NULL versus (VS) IS NOT NULL
Between range check	Lower and upper limits
Logical comparison	<, >, =, <=, >=, <>
Table join supercedes the previous column key equal to	FROM table join primary and foreign key

Select Clause

The select clause may explicitly include a column list. Pre-compiled statements that implicitly cater for all the source columns, may not be up-to-date on the column-list.

Group By Clause

The group by statement is not for detail listing, except when it is used to regress to the distinct clause. Group by supports statistics, such as, count, sum, min, max, avg.

Having By Clause

The having clause augments the group by clause. It places restriction on the group(s) returned.

Insert Statement

Inserts give room to omit the default columns. The Identity Insert statement also grants explicit entry of its identity column.

Nullable Column

Information unknown is useful for forwarding processing, until and if the information is added. Outer Join stands for this purpose.

View

Enhances tables by compacting and/or extending the information set.

Constraint

Primary and foreign keys, unique indexes and check constraints.

Data Cleansing

- Is the source of bad data input internal, on-line users, or error in programming? He doesn't envision error in reference data.

- Title
- Abstract
- Acknowledgments
- Index
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prosechy and Fulfillment
- Autobiography
- State of Writing

- Does the vendor have data definition language (DDL) to pre-empt data corruption?
 - Data type and size: String, number, date, logic boolean?
 - Not nullable? Can not be empty?
 - Range check: Expense must be greater than zero? Dates of activities must be after the establishment creation date.
 - Check constraints, for schedule, dated from must precede dated until.
 - Non-surrogate primary and foreign keys with unique indexes help to ascertain data.
 - Default columns are probable system generated that the users may leave unfilled that are available from sequence, identity, system clock.
- Is the data incomplete, such as abbreviation, for example CA or California, telephone numbers without country or area code?
- Is it data manipulation language (DML) deadlock, arrangement of data modification? Transaction commit or rollback? Cascade?
- Duplicate entries are isolatable by using the group by clause.

The author prescribes the steps below to begin database set-up and usage

- Acquire a database management system (DBMS). Various varieties of DBMS are available. The user may download a DBMS, get a compact disc, or select from the cloud.
- Install a DBMS.
- Decide on a user interface for managing the database. For Microsoft SQL Server, the choices include the SQLCmd console utility or the SQL Server Management Studio or Azure Data Studio.
- Create database. Microsoft SQL Server supports multiple instances and databases.
- The data definition language (DDL) includes the commands to create, alter, or delete tables, views, primary and foreign keys, indexes, constraints and defaults.
- The data manipulation language (DML) are commands to insert, update, and delete the database rows and columns, with the option to use the where clause.
- The SQL Server maintenance plan is for database housekeeping, for example, backup, restore, and re-arrangement.
- Stored-procedures, triggers, and functions are programmable logic.

Indexing

The author manually indexes according to the following progression:

- The URI database is separable into the following tables:
 - URIChrist
 - URIEntertainment
 - URIGoogleNews
 - URIWordEngineering
- The SacredText table is for scripture reference.
- The Exact table is an index of the words in the King James Version (KJV) of the Bible.
- The source of information is in the bibliography section.

(Search engine indexing)

Structured Query Language (SQL)

Set theory

The set we will mostly deal with is the HisWord table. Is in order of occurrence.

Predicate logic

The choice of SQL Server impose datatype limits.

(Itzik Ben-Gan, 2023-07-03).

GitHub

The Author Uses the Git Code Repository		
Key	Value	Commentary
Universal Resource Identifier (URI)	github.com/KenAdenji	This is the home page for storing the repositories.
Date Created	2013-04-27	This is the date of creating the github.com account.
Version	git version 2.29.2.windows.3	The git --version command offers the release detail. The author is not sufficiently knowledgeable on tracking the version update.
Configuration Profile	git config --list	The commands below will set the profile: git config --global user.name "your-name" git config --global user.email "your-email"
GitHub.com WordEngineering repository clone	1. git clone https://github.com/KenAdenji/WordEngineering 2. git remote -v 3. git remote set-url origin git@github.com:KenAdenji/WordEngineering.git 4. git remote -v	
Change Tracking	git status	This will decide the differences between your local copy and the version control code repository.
Add Updates	git add	The git add . command will add all the updates, or the user may add particular directories and files.

Accessibility

- Image elements have alt attributes; so that the reader may perceive what it shows
- The software offers the option to generate an image in the .png format
- The author does not duplicate hyperlinks
- The user may solely use the keyboard navigation to tab between the various controls, this substitutes for the taborder attribute. The autofocus attribute is for setting the cursor on the first input control.

JavaScript Optimizing native JavaScript

- Excessive number of objects. Each web page mainly contains 2025-11-29T00:56:00 the minimalistic page_load() and query_submit() methods. Some web pages which use web services to retrieve information from the database also include <https://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> which contains 1 object for data render methods, and two dimension arrays for select options. 2025-11-29T10:11:00 A JSON is the result set... returned from the database.
- 2025-12-01T20:01:00 Unnecessary date manipulation: <https://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js> does 2 types of date calculations. These are the:
 - Call the explicit nonTimezoneOffset(), daysAdd(), daysDifference() variations
 - 2025-12-01T20:16:00 Implicitly insert the date difference into an HTML table, DateUntil - DatedFrom. 2023-02-17 BiblicalCalendar added to table, as a computation of FromUntil. <https://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordCoast/DonFeedAtBible.html> 2023-02-17...2025-12-01 = 1018 days (2 biblical years, 9 biblical months, 28 days) (2 years, 9 months, 2 weeks)
- 2025-12-01T21:17:00 Excessive error checking: The author does not do error checking, preferring to catch exceptions, for example in AJAX requests. <https://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js>

```
fetchJender: async function
(
    fetchJuri,
    fetchRequest,
    callback,
    uIdisplay,
    rowColumn
)
{
    const postData = {
        method: "POST",
        headers: {
            "Accept": "application/json",
            "Content-Type": "application/json; charset=utf-8"
        },
        dataType: "json",
        credentials: "include"
    }
    postData.body = JSON.stringify(fetchRequest);
    try {
        const response = await fetch
        (
            fetchJuri,
            postData
        )
        .then(response => {
            return response.json();
        })
        .then(responseJSON => {
            var dataset = JSON.parse(responseJSON.d);
            callback(dataset, uIdisplay, rowColumn);
        })
        .catch (e) {
            uIdisplay.innerHTML += e;
        }
    }
}
```

(Robert C. Etheredge, 2017)

Programming

The Author Programs in the Following Tiers and Languages		
Tier	Language	Commentary
Front-End Browser	HyperText Markup Language (HTML), Javascript, Cascading Style Sheet (CSS)	The front-end code may run on a desktop, laptop, or mobile telephone that offers a user interface (UI). The task is to accept the user query and to display the result. Initially, as a novice programmer, the author wrote specific code for each user request; later, the author rests on generic code which will handle multiple variety of requests. This is high-level programming, and the skill-set entry level is minimal. The author also believes that the users should not require any formal training to use his work. Customization is achievable by varying the request options, such as entry form selections, query arguments, or data attributes.
Middle-Tier Application	C#, Embedded-SQL	For backward compatibility, the author does not envision moving away from his legacy code investment in Microsoft. The only shift is positioning code away from database inconsistencies in back-end residency. To code, compile, debug, deploy, the experience of the author is with Microsoft Visual Studio and command-line tools.
Server-Side Backend	Standard Query Language (SQL)	The author most recent experience is with the Sybase and Microsoft Transact-SQL assortment. Now a days, to be compatible and after experimentation; the author rarely uses Standard Query Language - Common Language Runtime (SQL-CLR). The author does database data entry, maintenance, development by using the Microsoft SQL Server Management Studio.

JavaScript Basics: Data Types

- JavaScript supports three keywords for declaring variables. These are the var, let, const keywords.
- From its pre-conception, JavaScript supported the var keyword. When the author does not precede a variable initialization with a keyword, then the variable will have global scope. The author averts from variable hoisting. Variable definition with the var keyword is re-usable. The strict mode is a later addition to JavaScript that helps in enforcing variable rules.
- For one-time definitions, such as, issuing the document.getElementById command, the author relies on the const keyword.
- Unlike some typed languages, JavaScript does not support explicitly specifying the type of a variable.
- JavaScript string comparisons are by default case-sensitive.

Functions and Methods

- Methods are functions that are referable from a class. Methods support object orientation by offering encapsulation, inheritance, polymorphism. The author uses functions when placing localizable code inside the script section of a HTML file; otherwise, generalized methods are referenceable from a JavaScript library.
- JavaScript treats functions as first-class citizens, and they are passable as variables. This abstraction feature is rarely necessary. 2026-05-25T16:17:00 On several occasions, <http://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/GetAPage.html> calls the [https://github.com/KenAdenji/WordEngineering/WordUnion/9432.js](https://github.com/KenAdenji/WordEngineering/blob/main/ITS/WordEngineering/WordUnion/9432.js) sAjax() method, and it passes the successCallback method variable name.
- JavaScript does not support method overloading. The earlier arguments array variable and the later parameter default initialization supplements.
- The author consistently uses anonymous functions for processing the success and error returns when using jQuery to access web services.

Conditions

- The author emulates the Microsoft ASP.NET Page.IsPostBack property check, and when it is not so, parse the query arguments; otherwise, skip the parsing and proceed to page submission.

- [Title](#)
- [Abstract](#)
- [Acknowledgments](#)
- [Theory](#)
- [Results and Discussion](#)
- [Terminology](#)
- [References](#)
- [Appendices](#)
- [Background](#)
- [Prospect and Fulfillment](#)
- [Autobiography](#)
- [Style of Writing](#)

2. The web.config file does not explicitly mention the user login name nor password.
3. Give access rights to roles, not to specific login identities nor user names.

Database Data Types

1. Choose matching data types between the database and application layers.
2. Only pick varchar(max) and nvarchar(max) as the data type, when it is essential to store large data.
3. Prefer the decimal type; when recording the amount in currency rather than using the float type.

Nullable Type

1. Consider defaulting textual data to empty string; instead of NULL.

Indexes

1. Database changes lags with indexes.
2. The field sequence in indexes should follow the frequency of usage.
3. When using a composite index, place a clustered non-unique index on the major column.

Naming Conventions

1. Overall, consistency encourages lowercase keywords. Keywords in lowercase are mandatory in case-sensitive programming languages like C# and JavaScript, but not in SQL.
2. Use Pascal casing for naming literals, such as, tables, columns, stored procedures and functions.
3. Use Camel casing for naming parameters and local variables.

(ABB Asea Brown Boveri)

Performance

The web page components practice of the author, include:

1. Keep the count of web page components to a minimum
2. Specialize input entries by using the most simple and basic component
3. Reduce bloating by limiting the use of framework and library

(Stoyan Stefanov)

Performance Suggestion

1. The most consistent id="resultSet" is usually for AJAX. The self-descriptive tags that do not influence the result normally do not specify IDs, this is left to the browser's decision.
2. Browsers place restrictions on the number of concurrent connections to a particular domain and the overall parallel connections. Consider spreading out the resources to multiple domains.
3. The author standardized on the .png image format because there are few colors.
4. In the year 2008, when the author tried to move away from html table layout styling, the rendering was anaemic.

The Cascading Style Sheets (CSS) performance suggestions include:

1. Since, by default, CSS is a render-blocking resource, the author should take advantage of the critical rendering path with media types and media queries.
2. All the programming .html files refer to the common 9432.css file, except this ubiquitous 2015-10-23DoctoralDissertation.html documentation file which includes css.

The JavaScript performance suggestions include:

1. Make use of browser cacheable content delivery networks (CDNs). For example, <http://code.jquery.com/jquery-latest.js>

(Lara Callender Hogan)

High Performance Browser Networking

For Internet connections, the contributing factors include:

1. Propagation delay - The consideration is the speed of light in the medium of transport. On the Internet the speed varies according to the medium which may be (DSL, cable, fiber) in order of performance. The speed of light, which was presumably constant, but now, may be declining. The author chooses the most accessible route. Typically, working within the confines of a building. This research excludes other participants. The environment is transplantable for other uses. The route and environment impose limitations on the local host. The traceroute command on the Linux operating system, or the similar tracert or pathping commands on the Windows operating system, will give travel speed. The author will look into the last-mile tendencies of the Internet Service Providers (ISP) in the area. The receive window (rwnd) of the server should be adequate, since the users do not upload videos nor images.
2. Transmission delay - The time to input the packet into the link, which is determined by the length of the packet and the data rate of the link. On the author's behalf, the Bible book ID is transmitted to the client and convertible to the title by JavaScript. Formatting is done by the client.
3. Processing delay - The duration of processing the header, detect bit-level errors, and determine the other end. In an Intranet environment, this is done locally.
4. Queuing delay - The processing wait time is dependent on the browser supporting multiple page tabs, and other applications using the network?

Most of the work of the author is available at the following locations, in the order of accessibility:

1. The current web page, such as, 2015-10-23DoctoralDissertation.html file
2. The general Cascading Style Sheet, 9432.css file
3. The general JavaScript file, 9432.js file
4. The specific Web Service file, such as, ScriptureReferenceWebService.asmx file
5. The dynamic link library file, InformationInTransit.dll file
6. The database

The reason for noting this observation is that the Domain Name System (DNS) lookup time is low; since the author uses relative directory addressing as much as possible and only uses root addressing for calling web services. The .html and .asmx files are in numerous directories, because GitHub.com directories have content count limitations.

Images:

1. The author does not use background-image nor list-style-image
2. The thesis only contains images for database and object modeling
3. The author does not use ~~CSS sprites~~ since it requires additional storage space
4. The author does not use Data URIs
5. The author does not support nor take advantage of Expires Headers
6. This research excludes compression and minification, because the file sizes are low and technology conformity

(Ilya Grigorik)

Web Performance 101 JavaScript:

1. The author will not consider minification. Because he cannot justify compressed file duplicate mix-up. A single compressed file is less readable and maintainable. An automated build and deployment process may suffice.
2. DOM chattiness? The author currently builds the entire table, and he sets the innerhtml of the div. For faster visibility, the author may build a table by first setting its header, and appending rows.
3. The author should take advantage of the async script parameter. Because the actions of the scripts are invoked after the page load.
4. Code splitting with import serves well for web components and rare tasks.

Web Performance 101 Cascading Style Sheets (CSS):

1. Critical CSS is in the style sections of HTML files.

Web Performance 101 content delivery network (CDN):

1. The author is deprecating the use of the jquery library which was solely used for AJAX, in preference to the fetch statement. 2025-12-10T21:02:00 This removes single point of failure (SPOF).
2. The author only uses the latest version and a unique uri for each library available on CDN.

(Ivan Akulov)

Backup and Off-site Storage

The author archives the database and source files to the local computers, [Google](#), [Microsoft](#) drives, after changes. The author uses [Github.com](#) version control.

Development Time

The development time is separable into the time it takes to program, compile, test, deploy. The stored procedure, C#, ASMX, HTML files are build-able in one day, in most use-case.

Reproducible

The deliverable of the author is transferable to other environments to reach similar conclusions.

Database Deployment

The author suggests the following alternative methods for deploying the databases:

1. [Restore](#)

- Title
- Abstract
- Acknowledgments
- Thesis
- Results and Discussion
- Terminology
- References
- Appendices
- Background
- Prophesy and Fulfillment
- Autobiography
- State of Writing

- 2. Attach
- 3. Snapshot
- 4. SQL Server Data Definition Language (DDL)

Surrogate Keys

The author takes advantage of potential natural primary keys; otherwise, the author uses surrogate keys. A surrogate key may be an identity or GUID type column. URIs are examples of natural primary keys.
(Joseph Sack, 2008)

Application Programming Interface (API)

- The common url scheme, endpoint, that the author prefers for security reasons is <https://e-comfort.eohraimtech.com/WordEngineering>
- The Top Level Domain (TLD) is the same for both the website and the API, thereby allowing for sharing of cookies.
- Content Located at the Root: The practice of the author is to place the website and their companion API files in the same directories, as they are joinable. The author will not uniquely treat API files. The author makes a case for directory browsing, and there is a special help documentation file.
- Microsoft released ASP.NET MVC on December 10, 2007. <http://stackoverflow.com/questions/4190610/designing-rest-api-endpoints-nath-params-vs-query-params>
- Out of the Create, Read, Update, and Delete (CRUD) 4 operations, the API only supports the HTTP read, SQL select statement.
- Filtering Resources: SQL offers a column list, where, top, limit, and order by clauses for matching data.
- Body Formats: The load penalty in XML overweighs the reverse of the JSON transport medium.
- HTTP Status Codes: jQuery satisfactorily handles the success or error of an asynchronous operation.
- Expected Body Content: Each API may currently return either a dataset, datatable, or a top level JSON object. The URI database is maintainable via a Patch request type to update a particular record's subset of fields/columns.
- Versioning: The progress includes:
 - Migration to computed columns
 - Normalization
 - Naming Conventions, SQL for example, is generally case agnostic

(Consumer-Centric API Design)

Data Structures and Algorithm Analysis

The exact-match query is to search for a single Bible book, chapter, or verse. In the case of a verse, the top 1 clause is appropriate to efficiently return a single record. The range query is to search for information within a boundary. The Remember table's ResultOutputFirst bit column is a rare Boolean datatype. It is for documentation purposes and it says the FromUntil period is known and it is used to determine either the FromDated or UntilDated column. An identity column is a specialization of the integer data type, in that the database issues the next sequence. Most of the tables make use of the identity column as a surrogate primary key. The aggregate or composite type attempts to store each particular type in its own table, when this is not optimum then normalization calls for several tables distribution joined within one view. The contact record is a single logical datatype spread to multiple physical implementations.
When the author hears a word, what does he do with it? He dates the word, he expresses it grammatically, and he finds a place for it in his memory. For a later date, the author reminds himself.

Problems, Algorithms, and Programs

Problem

When we hear the word, how do we endeavor in Him?

Function, Input, and Output

The input is the word as the only parameter. The output will find meaning in the word of God. The response of the computer is within the range of the result set.

Sets and Relations

The alphabets and words make-up the author's work. The composition of the words is indefinite.

- The ASCII table set composes 26 upper and lower case alphabets. Their places will originally decide the AlphabetSequenceIndex.
- The digits and their larger representations of numbers are also in the ASCII table. These are computable in determining the AlphabetSequenceIndex.
- The null character is in the Word column, when there is only commentary.
- Cardinality: Microsoft SQL Server places a limit on the maximum size of a VARCHAR column type, 8000. When there are 2 or 3 words, the author does further computation.

Asymptotic Algorithm Analysis

The computer serves the author in due time. The size of the users' input, the number of users, and the complexity of their requests will weigh on the system. This is the approximation measurement of how long it should normally take to determine the AlphabetSequenceIndex. The prediction is the length of the word multiplied by the average period taken to determine the place of each alphabet. The growth rate is that the processing time increases, as the size of the input grows. There is linear growth, since the growth rate is constant.

Best, Worst, and Average Cases

There is no variation in time for determining the AlphabetSequenceIndex and AlphabetSequenceIndexScriptureReference. The size of the word will influence AlphabetSequenceIndex, but this should not be noticeable. When parsing and retrieving scripture reference and Bible word, there may be size and time differences.

Calculating the Running Time for a Program

The author uses a for loop to calculate the AlphabetSequenceIndex.

```
var alphabetSequenceIndex = 0;
word = word.ToUpper();
var ascIIA = 65;
for
(
    var index = 0, lengthSize = word.Length;
    index <= lengthSize;
    ++index
)
{
    if (IsAlphabetic(word[index]))
    {
        alphabetSequenceIndex += ((int)word[index] - ascIIA + 1);
    }
}
```

The cost of executing the for loop is O(word.LengthSize)

Lists

One of the few occasions that the author uses a list is when building the Exact table. The author creates a list of words and stores this transient information in memory. The author checks the existence of each word in the list. When it is a new word, the author appends it to the bottom of the list. Otherwise, the author increments its occurrence. At the completion of parsing the words, the author stores the list in a database table. Creating the exact table is a one-time operation, and it takes a couple of hours to complete.
The author is comfortable and familiar with using datasets and databables for work areas. The author uses JSON as a transport medium.

(Clifford A. Shaffer)

A generic grouping of concepts and their representation

Module	Unit
GetAPage.html	retrieveAlphabetSequence()
AlphabetSequenceWebService.aspx	Query(word)
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).
DataCommand.cs	DatabaseCommand()
WordEngineeringSchema.sql	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)

(Joost Visser)

GetAPage.html Program Flow

The event handlers are the first code the system executes. These are the page load, submit click, item change events. If this is a page load event, and it is not a [postback](#), and the [query string](#) has a word argument, then the processing of the word occurs. If this is a postback, then it is the user's data entry that the system processes. The term processing means the browser submits the word to the back-end asynchronous web services and renders each result.

International Standard ISO/IEC 25010. Systems and Software Engineering -- Systems and software Quality Requirements and Evaluation (SQuaRE) -- System and Software Quality Models. First Edition, 2011-03-01.

Software quality is demonstrable in eight characteristics: maintainability, functional suitability, performance efficiency, compatibility, usability, reliability, security, and portability.

Maintainability

Corrective Maintenance

This is error correction.

Adaptive Maintenance

Transition from building console to web applications.

Perfective Maintenance

The author now considers partial and lookback scripture references. Such as, when there is no book title, then this default to the earlier book title. Choosing the right [.NET Framework Data Providers](#). The author standardized on ODBC; the other choices are OLE DB, or SQLClient.

Preventive Maintenance

Servicing the system to avoid larger mishaps.

Metric Quality Profiles

Unit Size Quality Profiles

Module	Unit	Lines of Code
GetAPage.html	retrieveAlphabetSequence()	40
AlphabetSequenceWebService.aspx	Query(word)	10
AlphabetSequence.cs	ID(word) ScriptureReference(int alphabetSequenceIndex).	50
DataCommand.cs	DatabaseCommand()	90
SQL Server	WordEngineering.dbo.udf_AlphabetSequenceIndexScriptureReference(ID)	105
Sum		325

Determining the AlphabetSequence takes 325 lines of code, which starts and callbacks 40 lines of AJAX code and concludes with 200 lines of database interaction. A unit of code should not exceed 15 lines. All the web services (.asmx) files return JSON by default; the AlphabetSequenceWebService.aspx file, Query method, returns a hand crafted JSON which has a numeric AlphabetSequenceIndex and a string AlphabetSequenceIndexScriptureReference.

Limit the number of branch points per unit to 4

The C# compiler will translate code to an intermediate language (IL). This code runs Just In Time (JIT), according to the condition clauses and operators. In the case of dynamic SQL, re-compiling imposes cost.

The Twelve-Factor App

- Codebase: The WordEngineering application is storable in the [GitHub.com](#) version control with a one-to-one mapping between the codebase and the application. There are multiple but separate websites that access the InformationInTransit.dll. The author builds the InformationInTransit.dll in the developer's working directory, and deploys the InformationInTransit.dll in each production's website bin directory. The steps for storing files in GitHub.com are:
 - git status

2. git add
 3. git commit
 4. git push
2. Dependencies: The web.config file identifies the .net library versions that the environment should contain. The third-party supporting libraries are in the software bundle.
3. Config: The web.config file contains the database connection strings; web services use specific credentials. The system administrator at external locations may customize these information for their specific use.
4. Backing services: These are external independent resources, such as the database, SMTP.
5. Build, release, run: These are the stages that a code goes through. Code compilation is deferrable for scripting, as opposed to compilable languages. Ever since the advent of the Java programming language, Just-In-Time (JIT) execution has been the norm.
6. Processes: The author's earlier applications were stand-alone console applications that are run by the .NET Framework, later examples are the ASP.NET web pages and services. These applications run in a single thread, except they share static variables.
7. The SQL Server encompasses services which are stoppable to do data files backup.
8. Port binding: Web servers traditionally run on port 80, and SQL Server runs on the changeable port 1433. Javascript's Node and Python's Flask run on diversified ports.
9. Concurrency: The author isolate his applications from the particulars of the base scaling concurrency choice.
10. Disposability: The author's take on expendable work includes the following:
- Pure functions
 - On-demand compilation of web pages and services
 - Adjustable time-out setting for the database and web request threads
 - The .NET Framework minute work, such as, the singleton design pattern, and static method calling and variables initialization
10. Development/production parity: By fly finalizing non repetitive work, the author can now focus on specialization activities.
- The time gap: These include placing the common work in a central environment. Superseding the waterfall methodology with the more recent process, Agile and Scrum.
 - The personnel gap: DevOps expertise
 - The tools gap: The author prefers the stable infrastructure to the fly-by-night trends. Testing on the multiple operating systems and the various programming languages reflects the author's wish for compatibility. Prior to advent of the Internet, communication did not support a worldwide trend; therefore, the need for distributing scaling, that is remote applications depending on the scarce resources.
11. Log: The stat log, viewable in the Event Viewer: The author displays error messages to the user; the .NET Framework determines the detail, and the localhost address offers in-depth perusalities.
12. Administration processes: These are one-off tasks that the environment demands of the knowledge workers. The tools are available everywhere for achieving the goal. Prior to graphical user interface (GUI), these are command-line responsibilities.

The endeavor of the author is to share the word.

Utterances are storable in the Word column of the HisWord table. An expressible event is storable in the Commentary column. The information relay is the basis for more computation in the HisWord_View and Remember_View tables.

The AlphabetSequenceIndex may range between 1 and $(8000 * 26)$, 1...208000; 8000 being the largest length of a SQL Server VARCHAR datatype column, and the count of alphabets being 26. This is a discrete set; since it is finite

Each sentence will give the same result, and this value is a weighted value of the result set; please note that vowels are probably more popular than consonants, and parts of speech have different frequencies of occurrences

Statistics Top

Continuous

The

Discrete

The

Categorical

The Alpha

Binary

Th

Ordinal

The identity columns are all ordinal, following an ascending order

Key Terms for Rectangular Data

Data frame

The data storage is a relational database; other options include spreadsheet, comma separated value (CSV), eXtensible mark-up language (XML), JavaScript Object Notation (JSON) file format

Feature

The most important predictor columns are the Word, Dated, and ContactID

Outcome

The dependent columns include the AlphabetSequenceIndex, AlphabetSequenceIndexScriptureReference and FromUntil date difference

Records

A row in a spreadsheet is comparable to a database table record.

(Bruce et al. 2017)

This technology will make all the before and current versions of the code accessible, re-viewable, and testable

All the words that the author hears while sleeping are recordable and the author has never had any tendency to alter this utterance from the LORD. When the author is awake and he says something, out of his own volition and pre-meditation, he has massaged this information, but now he rarely does so. The words in the past and future event dates are useful for remembrance entries. As the author technically matures, he automates manual work.

The dreams are re-collect-able, and recallable (Numbers 12:6-8).

I have made what I have spoken, ready

The Bible fits man's perception. The author adapts to what he learns.

Project Management

The author is querying the Bible database. The first step of work is to store the Biblical text in an electronic medium. The second step of work is to create an application layer that will access this information in a non-proprietary format. The on-going work is to present as relevant today.

Information Architecture

How will this scriptural text bring new originality? What events of today, follow the text?

Page Design

What He brings to us, is a form of Him

This is useful for initializing static variables and building a class collection.
Method call	Commentary																				
Instance method call	Calling a method of a class instance																				
Static method call	Calling a static method of a class																				
Extension method call	Calling 2026-05-25T20:31:00 in instance a static method that was added to a class																				
Asynchronous method call	Calling a method and not waiting for the completion of the task																				
Base method call	Calling an inherited method which may have an override clause																				
Method overloading	Calling a method that exhibits the signature																				
Operator overloading	Concatenation is an example of the string addition operator, +, overloading. StringBuilder is preferred.																				
Constructor method	To create and initialize a class instance.																				
Constructor static method	To implicitly rely on the execution of a one-off method the first time the class is referenced. This is useful for initializing static variables and building a class collection.																				

Steer

Type	Commentary
Wake-up orientation database table	This information is currently being interpreted textually. An image, and even more so, a video of the changes in position and direction when sleeping will offer better insight. For the visually implied, the less bandwidth-intensive text may still be satisfactory.
Non-Alphabetic	AlphabetSequence may not be appropriate for people that use glyphs or sign languages.
Structured query language (SQL)	The proposed changes which will offer query customization? The author transitioned from a multi-column query to a single-line query which has a tendency to return more results because it is not particular. Context fine-tuning is a suggestion.

(Alberto Cairo, 2026).

2026-05-17T15:36:00 [What did he collect as a future?](#)

1. 2026-05-16T07:26:00 Scripture references uttered to you.

[What is best believable \(Deuteronomy 13:3 \)?](#)

[I am not asking You to take my word as Yours. I am asking You to change my word as ours \(Numbers 3:12, Numbers 3:41, Numbers 3:45, Numbers 3:46, Numbers 8:18, Acts 10:9-16, Romans 2:25-29, Colossians 2:11, 1 Corinthians 7:19, Galatians 6:12-13 \)?](#)

- In the HisWord table, the order of belief is:
 1. Scenery
 2. Commentary
 3. Word
 4. System generated: DateTime and Identity columns
 5. Association columns: ScriptureReference, ContactID, URIThe author is an authority on the HisWord table.
- SQL script generation, .sql, is better than Microsoft SQL Server backup, .bak. Text is more factual than video.

2026-05-14 Inconsistency —

2026-05-14T21:42:00 [The author has used different source from composing his work.](#)

2026-05-14T21:46:00 [How we are... in the midst... of each other.](#)

- AlphabetSequence language? The author does not make a distinction between the English and Yoruba alphabet sequence.
- Word of the author versus Bible versions — The correlation between the word of the author and the Bible differs and varies between the versions of the Bible.
- Dictionary — The author refers to dictionaries from multiple sources.

(Alberto Cairo, 2026).

2026-05-10T14:05:00 [What exact... has He notice... about you?](#)

1. 2026-05-10T14:05:00 Re-locate:
 1. Prior to 1988-10-15 First dream:
I Am taking you on a journey.
 2. 1998-05-08 Last word, before re-locating from Australia to the United States of America (USA).
Face to face: Out of Egypt, have I called My Son ([Hosea 11:1](#)).
 3. 1998-05-07 First word, after re-locating to the United States of America (USA).
Face to face, in the wardrobe, closet, of the master bedroom. Ie eyan mi lon lo yi. It is my person you are going to.

2026-05-02T21:30:00 [Could I re-write this... biblical?](#)

1. Power of the Holy Spirit ([2 Peter 1:21](#))

2026-04-27T16:01:00 WordEngineering query

1. WordEngineering query - database
Structured Query Language (SQL) specification parts include the select column list, where filter restrictions, and order by sort.
 1. Select column list: There is no universal standard for arranging the user-interface (UI) column names. The author displays the name of each person, title, organization name, and contact details.
 2. Filter restriction: A user may choose to return a large data set, or minimal data set. For example, contacts are query-able by their full names or their partial names — first name, other name, or last name. When a user knows the full name, this is the advised query filter. The last name is preferred over the first name since it is more cultural and regional specific, and it should return a lesser dataset. The first name is traditionally Anglo-Saxon, and it is probably a shortened version of their birth name. The author does not pre-select options.
 3. Order by sort: Sorting may be in either ascending or descending order. It is achievable either on the server-side, database via SQL, or the client-side, user-interface (UI) via JavaScript. The limitation of the current implementation is to sort numbers by ASCII digits, and not quantity, since the author does not specialize in each display by customizing datatype distinctions.
2. WordEngineering query - client
Technology include Document Object Model (DOM), XSL/XSLT, XPath, XQuery.
 1. Query arguments are passable to each client user-interface (UI) via hyperlinks or browser-specific address lines. Each form may also provide query options. The author makes all effort to provide reasonable defaults.
 2. Navigation: The ID attribute provides a document-wide unique identifier for an element. 2026-04-27T17:43:00 The author conforms by the Pascal notation.
 3. 2026-04-27T18:19:00 Find is useful.

2026-04-27T19:49:00 [To know at the start... what I Am?](#)

1. When I started Kowe. I was a deported Yoruba man.
 - 2026-04-27T19:59:00 This I will find useful... for my people.
 - 2026-04-27T20:13:00 I could use the computer... for my weakness.
2. When I started AlphabetSequence... 2026-04-27T20:22:00 [I must find... for what... He accumulated in the past \(Genesis 15:5, Revelation 16:12 \)](#).

2026-04-28T08:53:00 [How you are known... by them?](#)

1. The titles of God, and their translations ([Genesis 16:13](#)).
2. The identification of His creation. For signs, after death, substitute, beginning and end ([Hebrews 9:12](#)).

2026-04-15T05:43:00 [Feature highlight its strength and weakness?](#)

- Passover: 2026-04-02, 2027-04-22.
Feast of Unleavened Bread: 2026-04-03, 2027-04-23.
2026-04-15T05:23:00 I went to a man in the south-west quarter, and I took from him, 1 piece of fish, and 1 piece of meat.
Implementation options include parsing a data definition language script file (.SQL), or interrogating the database schema.
- Cross-check that all the tables and their columns have documented entries in the data dictionary, meta-data.
 - For the tables which have parent-child relationships, master-detail, make sure there are corresponding views. To determine the affected tables, check for the existence of primary keys which contain composite columns, and primary keys and foreign keys with referential integrity which protect against orphans. Suspect tables include the PurchaseOrder and PurchaseOrderItem related tables, and the Contact and its subordinate address tables.
 - 1. 2026-04-15T07:42:00 Make sure that the projected and potential primary columns are not nullable, and have defaults.
 - 2026-04-15T07:44:00 Natural primary key columns.
 - 2. 2026-04-15T07:46:00 These are, for example, ID identity or sequential, and dated timestamp columns.

2026-04-09T18:48:00

Relational Database Versus (VS) Artificial Intelligence (AI).

Microsoft SQL Server Versus (VS) Machine Learning (ML) Scikit-learn.

That is what they based the truth on.

Word	Microsoft SQL Server	Scikit-learn by David Cournapeau	Commentary
Author's experience	The author's experience with relational database commenced in 1988. The author installed Sybase in 1995. The author started work as a Microsoft SQL Server database administrator (DBA) in 1998.	The author solely designed and developed his 1st Scikit-learn application between 2024-07-29T06:53:00...2024-07-29T07:31:00. ConversionTableTemperatureMachineLearning.py	The traditional architecture is client/ server.
Software requirement	1. Microsoft SQL Server 2. SQL Server Management Studio 3. Author's HisWord database table that relates to the Bible database table for Bible versions, and dictionaries. These currently include: • Views • User defined functions (UDF) • Stored procedures 4. Application code layer: • .asmx • Business and database access code 5. User-interface (UI) layer: 1. Browsers 2. .html, .js, and .css files	1. Python 2. Machine learning library for example Scikit-learn 3. Generate training data ConversionTableTemperatureCommaSeparatedValueCSV.cs 4. Training data which is storable in a .csv file. ConversionTableTemperature.csv 5. Predictive data analysis ConversionTableTemperatureMachineLearning.py	• How proprietary is the architecture? • What is the portability of the code? • Shift away... from server to client. • The world has moved away from... packaged software to distributed software. • Offer only one functionality.

2026-03-21T08:17:00 What word did it lead me-and how did I direct it?

Progress	Commentary
Data entry	Word processing awards grades based on grammatical correctness. There must be uniformity in the language, spelling, and punctuation. 1. At Information Dialling Services (IDS) we commenced capturing telephone numbers, and movie text-to-audio. 2. At Wilson Market Research, we used consumer statistics and the viewing audience to target advertisements. • 2026-03-21T10:48:00 What do I capture... in hope of realizing? • 2026-03-21T11:59:00 What did he want to know as you...and how did you represent it? • 2026-03-21T14:40:00 When you do query? Chronology... relativity. Data type? Number, date time, string, boolean, image, voice, video. 34300 Seward Drive, Fremont CA 94555. I was at the intersection of Paseo Padre Parkway and Seward Drive, north-east, and I was turning eastward. Between 34316 Seward Drive, the house of the Santos family... 34320 Seward Drive, the house of the Sahani family, was an orange pumpkin, and my right palm and fingers, stretched eastward between a black painting and a blond vertical stalk.

2026-03-20T13:32:00 What alternate team... did He built...and why?

1. Unity (1 Samuel 25:7)
2. Sequential ([Psalm 110:1](#), [Matthew 22:41-46](#), [Mark 12:35-37](#), [Luke 20:41-44](#), [Acts 2:34](#))
3. Exemption ([Psalms 16:10](#))

To:
Subject: Your SQL Server background caught our HR -- 10-20 hrs/week, you set the pace

Hi Ken,

 SherlockTalent is hiring on behalf of an esteemed client:
 SQL Server DBA & User Support Specialist – 100% Remote – Hourly contract, flexible

- Job #: 7369
- Location: Remote (English speaker)
- Type: Part-Time Contract (est. 10-20 hrs/week, flexible scheduling)
- Rate: Hourly, commensurate with experience

If you're a seasoned SQL DBA who wants meaningful hands-on work without the full-time grind, this one fits.

What you'll own:

- SQL Server administration: schemas, permissions, stored procedures, index optimization
- Database documentation and visual architecture diagrams (Visio or equivalent)
- User access governance – provisioning, auditing, least-privilege enforcement
- End-user support: query troubleshooting, reporting validation, access issues
- Regular status updates and risk flagging to the Fractional CIO

Why this role:

- Pure execution – no enterprise politics, just solid DBA + support work
- Full remote flexibility with a schedule you control
- Bonus points for Azure SQL, SDRS, or Power BI data source experience

Not for you? Sherlock loves to share \$1,000 Referral Success Bonuses! Send referrals to referrals@sherlocktalent.com.

2024-11-13T19:12:00 Translation

1. 2024-11-13T19:16:00 Textual Basis: The author chose to find meaning to the word of God... with lesser emphasis on his personal subjective commentary.
2. 2024-11-13T21:17:00 Formal equivalence (word-for-word) versus (V5) Functional dynamic equivalence (thought-for-thought): [BibleWord.html](#) is the former.
3. 2024-11-15T14:06:00 Translator: [The author's first program is translation of English to Yoruba](#).

(Tim Wildsmith, 2024).

2026-01-28T19:01:00 Analytics

1. 2026-01-28T19:01:00 At Albertsons Lucky, Charter Square at the Bank of America (BoFA) customer service desk, the German Store Manager, John Holtz, was attending to an Asian father, older son, and younger daughter, who did acrobatics. The word came on Paseo Padre Parkway between Blackstone Way and Seward Drive, on an overhead bridge, Highway 880 south, at the south of the 1st of 4, driving lanes.
[When is it all he asked for... He persuaded in doing?](#)
New Testament

2026-01-10T10:37:00 Interpret

- 2026-01-10T04:43:00 I just saw the house of Mahdu. In the south-east, located on a support was a small black television, and there were other electronic appliances. With Hindi, in dreams, the location, artifact, and then probably the actor. Bollywood. Chemistry teacher at Baptist Academy who compared actors to also starring. Hindi are nomadic, they migrate. Other Asians are ancient, historic to Hindi realization on English people, Christianity, and Rome phase II. Dotun needs to nurture and have an impact on her church, family, and worldwide.

2026-01-13T08:18:00 Biblical Interpreters

1. Reverence to God ([Genesis 41:16](#), [Daniel 2:23](#), [Daniel 4:26](#), [Daniel 5:23](#))
2. Witness ([Genesis 41:13](#), [Genesis 41:54](#), [Daniel 5:31](#))

2025-12-26T15:49:00 To... the event of the day? Remain ([Genesis 22:14](#))

At Milk & Honey Cafe, I was attended to by Amy Hsueh-Tin, who previously said, I work here, and Audrey Russell. I saw a young Hindi couple sitting in the north-center. I saw some males, and a single woman at Yifang Taiwanese Fruit Tea, and at Albertsons Lucky, Charter Square. Their nationalities are Chile and Peru.

2025-12-25T12:26:00 Trend Analysis

- 2025-12-25T12:43:00 Quoting the Bible. 2018-12-25T12:53:00 God will place a thought on my mind, and I will meditate until a companion word comes.
 1. WordsInTheBible table: Includes the selection of a replica of a set of keywords in the Bible.

4. The Word column in the HisWord table is a determinant but, it is not always unique; therefore, it is not its primary key.

View

A view is a virtual table that does not reside permanently on a physical storage. The MyURI view is a union of all the URI tables. The ViewContactSet view is a join of the columns in the Contact and contact details tables. The HisWord_view view appends computed columns to the HisWord table.

Users

The general operating system and compact database are the 2 types of authentication.

(Allen G. Taylor, 2019).

Software Engineer versus (VS) Database Administrator

Keyword	Software Engineer	Database Administrator
Programming language	Instruction set: keyword, syntax, Application Programming Interface (API)	Structured Query Language (SQL) a data sublanguage
Focus language	Predominantly English	American Standard Code for Information Interchange (ASCII)...Unicode culture
Time frame	Development life cycle - limited by budget, Deprecated code. Automated jobs and events. How much data are we working with? What is the longevity? Asynchronous multitasking	Eternal - periodic operational cost. Expired data? Scheduled tasks and activities? Backup, housekeeping, sending e-mail, creating files and additional space.
Remember human versus reference identities? For example, Bible word versus (VS) scripture reference	Context-sensitive help	Auto-completion
Location	Read only memory (ROM), Random Access Memory (RAM), hard disk paging. Github.com version control. E-mail body, attachment. Internet front-end files (.html, js, .css).	Hard disk, Transaction log, backup files. Back-end data is accessible via web services. Separated into records and columns, tables, views, indexes, stored procedures, user-defined functions.
Threat? For example, virus	Memory, program file	Data file
Customization standard	Strict	Flexible
Law versus (VS) traditional practice	Sacrifice	Mercy
Compatibility	Legacy? Backward compatible...re-engineering. New, creativity. Framework.	Progressive

(Itzik Ben-Gan, 2023-07-03).

Scalability: The users have various options for sizing up their work. The author did not initially restrict the size of the data queried from the server; therefore, there was information overload on the data grid of the client. The tolerance for large data may be exacerbated vertically and/or horizontally. There may be a high count of rows or columns, thereby, demanding ranking and preferences for positioning.

Codd's 12 rules

Focusing on the Word.

Rule 0: The foundation rule: Since 2002, the author has adopted the relational model for storing his data. The author structures his data and queries his data by using the Structured Query Language (SQL).

Rule 1: The information rule: The physical store is the HisWord table's Word column. This information is later processed logically in the HisWord_View.

2024-06-15T21:28:00 What is certain to the data?

Prior to this word coming, I uploaded the 3 file formats of the dissertation files (.html, txt, .pdf) from the Windows operating system computer to the UNIX operating system computer Linux variety. I also read the counter-style of each file.

Rule 2: The guaranteed access rule: Specifying the primary key restriction in the where clause makes each datum reachable.

2024-06-16T16:30:00 To who... I exchange...my word?

Rule 3: Systematic treatment of null values:

2024-06-18T21:49:00 Unknown or inappropriate.

- Identity columns cannot be null
- DateTime type columns will default to the system's datetime
- The columns that are part of a primary key cannot be null

Rule 4: Dynamic online catalog based on the relational model:

INFORMATION_SCHEMA offers metadata, and it is questioned via SQL.

Rule 5: The comprehensive data sublanguage rule:

2024-06-20T18:39:00 It looks at the data as a whole.

Structured Query Language (SQL) sublanguage

Sublanguage	Command	Usage
Data query language (DQL)	Select	Is the most popular and non-risky. Except it may affect performance and bandwidth load consumption.
Data definition language (DDL)	Create or alter or drop schema objects	The create statement is used once for each new object. The alter statement is mainly for an existing object.
Data manipulation language (DML)	Insert, Update, Delete, Truncate	Manipulation may fail in the following cases: • Primary key or unique index duplication. A primary key column may not be null. • Invalid datatype or extra large data size or out-of-range • Constraint rule violation - entity, foreign key. The author rarely imposes constraints, like for example in Datedfrom versus (VS) DatedUntil, which may result in negative date differences. The Max datasize will truncate extra data, but SQL Server primary key indexes impose a size limit of 900 bytes. Whereas VARCHAR(MAX) is typically 8000 bytes.
Data control language (DCL)	Grant, Deny, Revoke	
Transaction control language (TCL)	Begin, Commit, Rollback transaction	

Rule 6: The view updating rule:

Only computed columns cannot be updated.

Rule 7: A single operation must support select, insert, update, and delete:

A base or derived relationship should comply with an operation to select, insert, update, and delete.

Rule 8: Physical data independence:

Batch and end-user operations are not impaired when changes are made to physical storage or access method.

2024-06-22T15:13:00...2024-06-22T15:15:00 There is no deterioration in data... when there is a restore, import, or bulk copy.

2024-06-22T15:36:00 What part of yourself... do I desire as My future?

Rule 9: Logical data independence:

2024-06-22T17:02:00 The opinion of someone else... is beside me.

Rule 10: Integrity independence:

The author is not implementing constraints.

Rule 11: Distribution independence:

The user is not aware that the data and log are in separate files. Replication and mirroring are other means of ensuring redundancies.

Rule 12: The nonsubversion rule:

Row processing such as cursor must abide by integrity rules and constraints like set processing.

(Edgar F. Codd, 1970).

Concept: GetAPage.html

1. User-facing: A user enters a received word, and there is a set of tabular responses.
2. Functional: This is a Single Page Application (SPA) that depends on AJAX, and it calls multiple web-services.
3. Behavioral: There are associations between the word and the Bible and the dictionaries' object-oriented classes and entities.
4. Independent: This is a composite of previous stand-alone work.
5. Purposeful: Based on user input, the system retrieves data, while also allowing further queries.
6. Reusable: The idea is to retrieve information from a set of sources and send the results to various destinations.
7. Valuable: The data is free, and the work is non-complex.

(Daniel Jackson, 2023-06-26).

The user-interface (UI) supports queries, and not database maintenance. The author builds an interface for each additional work that is customizable by the end-user, and independent of the environment of the author. A step... further... for... among us. The mundane query initiative can be participated in by everyone. The complicated tasks are reserved for skilled users.

(Daniel Jackson, 2024-01-08).

What did He dispose of in making man (Genesis 2:7, Genesis 6:3)?

(Matt Chanoff, Merrick Furst, Daniel Sabbah, Mark Wegman, Arvind Krishna, 2023-11-07).

A conversion page

Customize the content of an uri? This is how the web page implements this technology. This is how to implement it in your preferred technology.

Keyword	Find what	Replace with	Scripture Reference
Religion	Idolatry	Monotheism	Acts 7:40-43
Learning	Egyptian	Hebrew	Acts 7:22
Location	Egypt	Promised Land	Acts 7:3-7
Vocation	Ruler and a judge	Ruler and a deliverer	Acts 7:10, Acts 7:27, Acts 7:35

What is remembrance... associate?

- The 2 Transact-SQL functions that the author uses are DateDiff() and DateAdd() with the day metric unit.
- The author's source, Wikipedia.org, places dates in high visibility locations.
- For the most reliable date computations, the author depends on the Biblical calendar.

Discrete (countable)	Numerical
Continuous (measurable)	Date

(Jack Hyman, March 2024).

Time for?

- Birth (Acts 7:20.)
- Family (Acts 5:31.)
- People (Hebrews 1:9.)

Allowing a person the entirety of time

- Initially, the author's strength lay in the database. The author parsed XML data in datasets, datatables, datarows.
- The author's familiarization with JavaScript meant client-side work.
- What I am owed at death...is what life is good at making. (Genesis 41:32-57, Genesis 1:1-1:2, Genesis 4:26.)
- Derivation...variety: Processing of a word spoken by God to the author is initiated by GetAPage.html
 - 1. GetAPage.html serves as a gateway to specialized links.
 - 2. GetAPage.html saves users from having to remember specific URLs and opening multiple browser tabs.
- Technical writer: Do you write it as a manual? Do you write it as describing the functionality. (Daniel 9:24.)

O ti di computer

- To calculate the AlphabetSequenceIndex the attempts by hand may suffice
- BibleWord may not be deductible until ignoring the parts of speech
- Date difference difficulty lengths between the biblical and the Gregorian calendar

Microsoft SQL Server Management Studio: data entry

- You could say, this is what I do... Why I do it?
- I have had to balance migrating to an Internet interface via using Azure Data Studio, or continuing using the faster, stable, Microsoft proprietary SQL Server Management Studio.
- Where are the differences...companion?
- Experimentation...as the same?

Influence

- Data:
 - Biblical data is hosted locally and accessible via the Internet by linking to web addresses or placing web service requests.
 - For over 2 decades, the author has continuously received word that he constantly records and queries. Situates?
- Is there a creative need for new data? The Bible is complete, but do we have to find new ways of using it? Is there a divergence or supplement? How do we explain and analyze?
 - Language translation
 - Familiarity with the subject and tradition. Apply domain knowledge.
- Maturity and relevance to our time
 - Choosing a closer relationship with God.
- Software: Algorithms are patentable? The author has not sought to patent AlphabetSequence...it should be open to ideas. We all make our following.
- Hardware: Although the author's doctoral study was on intelligent appliances...he feels drawn to the Bible. God has reminded him of his success...when he is pertaining to Him.

(Andrew Glassner, 2021).

This data...where does it exist?

Legacy storage of some data types is unnecessary, since this data is computable. For example, concordances are automatically determinable. Dictionaries that contain the meaning of words are available on-line. Computers provide up-to-date versions and translations.

How-to display the data? After determining the AlphabetSequenceIndexScriptureReference the author currently retrieves and displays in particular the King James Version (KJV) Bible text, and the author provides a hyperlink to a scripture reference page for displaying other Bible versions. This practice follows Google's display of a Wikipedia's sidebar and providing a hyperlink to the particular Wikipedia url. For Bible literates, this reorgumitation may be redundant. What programming skills are in demand?

- Issuing a SQL select, and using a cursor to loop through a tabular or variable output, and building an HTML fragment
- Simply creating a HTML anchor to a source url
- Fetching, parsing, and building the results of a web service

Our compassing our trade. (1 Samuel 25.) To be conformable of age.

Talent and reward?

- What is the cost of entry? There is no monetary investment. The author started when he was unemployed.
- What is the skill-set? To do manually? The order of alphabets is the literacy competency level. To know how to spell words is also useful.

What opinion of the same do I have?

- Calendar - evening and morning, sun and moon, Passover
- Order of birth - genealogy, leadership - blessing, allotment

Word direction

- When I hear a word: I try to connect to occurrences
- When I read a word: I try to put it into my own words
- When I recall a word: Separated alike joined together (Joshua 1:8.)

Location of content

- Flat files (.html and .xml): Reasoning
- Database: Word From God
- Software: Automation of work

Laws of Communication

- The Law of Credibility:
 - HisWord table Word Column: As much as God spoke it
 - Period of Time tables: With respect to time
 - BibleWord table and GetAPage.html BibleWord section: King James Version (KJV) dependent
 - GetAPage.html HisWord section: Time variant
- For a period of time...we are as we seem we are? What needs a success. (Genesis 4:7, Matthew 14:8, Mark 6:25.)

(John Calvin Maxwell, 2023).

Chuck Missler versus (VS) the author	
Chuck Missler of Kolnonia House Inc., P.O. Box D, Coeur d'Alene, ID 83816	Author
2018-06-02 Candlelight Celebration of Life Service - Chuck Missler. Streamed live on Jun 2, 2018 On May 1st, 2018, our beloved Chuck Missler went into the arms of Jesus. This Celebration of Life service, held at Candlelight Fellowship in Idaho is our way of celebrating his life and the tremendous impact it had, and still continues to have on so many people. 2014-08-18 Stay the course. 2025-12-22T08:48:00 Teaching...navigator. 2014-08-18...2025-12-22T08:48:00+4144 days (11 biblical years, 6 biblical months, 4 days) (11 years, 4 months, 4 days) 2014-08-18 Stay the course. 2026-05-16T18:40:00 What is in dispute? 2026-05-28T17:17:00 The author associates Chuck Missler with teaching each story in the Bible. - Strategic trend. - Introducing other Bible scholars and mentioning their particular contributions. - Making laypeople teachers of the Bible. - Referring to terminology, Jewish history and practice, world events.	
2024-11-03 21:33:37.887 Pattern of assemblies.	
	2024-11-03T11:58:00 What we bring...as amount...to what?
Chuck Missler was not listening to his own word. Chuck Missler was listening to the Word read to him.	
Chuck Missler was preaching from his understanding of the Bible.	The author is relating the word spoken to him to the Bible.
Chuck Missler was trying to convert people to Christianity. Chuck Missler was trying to make believers out of the Bible.	The author is relating to people. Coming from experience with people.
	You were trying to reach the Bible...through your word.
	Interaction with Him...I start writing words received when I sleep. I introduced words when I shower.
	What I used...Chuck Missler used the Bible... I used myself?
2025-04-09T15:30:00 What did you set out to achieve as a personal notion? Hal Lindsey suggested to Chuck Missler that he convert a Christian ministry hobby to a profession. Reading the Coming Prince by Sir Robert Anderson changed the plans of Chuck Missler from pursuing a doctorate degree in Physics. 2025-04-10T14:14:00 How the Bible can be...worthv use? 2025-04-10T14:14:00 Jennifer Melow gave 2 breads bun to Danielle Hall to warm. Jennifer Melow was also carrying meat. Albertsons Lucky, Charter Square, south-center road. Career decision?	2025-04-10T04:17:00 Scene 1: Lauretta is driving me, and I mentioned the first name of Nada Madjar, but I did not disclose her last name; therefore, I am not gossiping. Lauretta plowed further and Lauretta asked if I was talking of Nadia that I now infer to be Nadia Cuneacci. Scene 2: A man concedes that he has lived in Fremont, since he moved from further away. 2025-04-10T04:46:00 Limitation per person. (Ezekiel 3:17-21.) AlphabetSequence takes specific places... out of the Bible. 2025-04-10T06:47:00 When did he desire...a people as I. (Genesis 2:20-25, Genesis 4:3-12.)

2022-05-26T14:05:00
What events in Abraham's life are additions?
2025-03-29T16:15:00
I am reminded of the presence of others (Ezekiel 33:12).

Word	Commentary	Scripture Reference
Partner	Sarah, Hagar, Keturah	Genesis 11:29

2008-03-11	Calendar	September 22	

Expendable Data

The Bible, dictionary and commentary databases should be accessible from central locations, and there should be no need for user storage. For the URI database, the date of publication is constant, but the date accessed may vary by users. Storing user's information is achievable by using local and session storage, cookies, and bookmarks. The date of publication recognition is determinable from Google's last update and YouTube.com. The directory listing includes the last modification date. The node's data-attributes and the time node may give date time information.

AlphabetSequence concerns include:

- How essential are we: to the personification of God?
- The spirit man holds
- When did He exchange...His view as ours (Genesis 18:19)?
- How are we acceptable: to what is new? How does God, build up, to His word (1 Samuel 9:15-12)?
- Copyright violation: Not giving credit to the original speaker
- Separating the word from the deed
- The grammar needs refining
- Name spelling, for example, Bryan versus Brian
- Non-English alphabets
- British versus American spelling
- Soundex, this is what I heard; this is the interpretation; such as, this versus these, has versus as, there versus their
- Inference, such as, abbreviation
- Differences in Bible verses (Matthew 23:14, Acts 8:37, Acts 15:34, 3 John 1:15)
- Naming of words (Genesis 32:28, Genesis 35:10, Genesis 47:42)
- We have been doing unconvincing power
- I said, I heard: 2021-04-11T08:37:00 In a location to the North, probably 99 Ranch Market or Marina Food, or Dato. A young Asian male 1st makes a selection. I am testing black rubber sandals shoes of different sizes, the shoe size written 6 9 is too short, tight, I said, 6 9, in my sleep, while dreaming, I heard (six ten). 2021-08-03T17:22:38 Where are we misguided by flight?
- What does He volunteer as time? AlphabetSequence is resource minimal:
 - Double by hand
 - Compute: Not technologically demanding
 - Maturity: Since 2002
- Separation into Segment.
- Is this a finalized work, and how is it accessible? It is a transient database.
- Scripture reference in context.
- To complete the life of pleasing God, as I chose men.
- Hearing and spelling the word... and not saved... by the grammatical correctness.
- To co-operate as we are: Robert Estienne English Alphabet

2017-03-06T00:00:00 A Comparance of Age

Divided as separated. Go this way, that way.
I want to program, but I don't want to match two programs together, except for deep thought.
See when God grants increase; such as in creation, when God counts the days, and separates it into evening and morning. Increase versus decrease were first explicitly mentioned during Noah's flood. These differences in size we can associate with signs - the sun and the moon. During the day, you need the sun for your activities; during the evening, it is not necessary. Rachel's prayer, and naming of Joseph; Joseph's dreams and interpretations. These counting is explicit, before Exodus, such as, the 10 plagues of Egypt (Genesis 37:5-11, Genesis 30:24, Genesis 40:41).
[2P][2] is separable into four layers; these are the link, Internet, transport and application layers. No breaking (Matthew 19:8).

Marriage

Marriage is not a practice, in the life after, resurrection (Matthew 22:30, Mark 12:25, Luke 20:35, Revelation 21:2, 2 Corinthians 11:2). Co-incidentally, the disciple, who Jesus love, John the apostle, does not mention this event, in the Gospel of John. It is more of a father that wants you, Jesus resurrected, after three days (Matthew 12:40, Matthew 26:61, Matthew 27:40, Matthew 27:63, Mark 8:31, Mark 14:58, Mark 15:29, Luke 2:46, John 2:19, John 2:20, 2 Corinthians 11:2, Revelation 21:2, Revelation 21:9, Revelation 22:12). The breaking of device (Psalm 34:20, John 19:36).
On the client, HTML is content, CSS is presentation, and JavaScript is behavior. Both ASPX and ASMX are server-side logic.
The application tier is in a dynamic link library (DLL), and it is separable into client, database, and application logics, but with the advent of language integrated query (Linq), this delineation is slowly diminishing. Linq rivals previous division of labor.
The database consists of tables, views, indexes, constraints, stored procedures and functions. These programming logic may be SQL or SQLCLR. SQL critics complain that while the rest of software development have progressed, we still use an archaic language; NoSQL is a challenge.

Visibility (John 4)

The client is accessible from the browser, both the user interface and the source code, along with the errors and exceptions. The interface is made-up of request and response. Text-to-Speech will aid the people with poor visibility. The client handles the human computer interface (HCI). The bible versions are selectable options in HTML or JavaScript.
The database contains the real information, that makes-up the result set.

Lifecycle (John 3:3, John 3:7)

In computing, we have had mainframes and terminals, client/server, Internet, mobile and now cloud. The trend has been from proprietary to open architecture.

Accompany (Matthew 4:6, Matthew 18:10)

What are the pairing?
The client started as HTML, but now has JavaScript and CSS.
CGI originally served the back-end. Flash and plug-ins have made way for other technology, such as HTML5 video and canvas.
JSON and XML have made in-roads.

To each resemblance

- Where His word, expected mine? When I get a word from God I could do the following?
 - Write the word in my notepad, and never refer to it again.
 - Record the word in the WordEngineering database, HisWord table, word column, and associate the accompanying columns.
 - Produce an artifact based on the word.

What do I desire, as part of gainfulness?

- Moses' Prophet (Exodus 4:10-16, Numbers 12:6-8, Deuteronomy 18:15).
- Abraham? Seed (Genesis 17:9, Genesis 15:2, Genesis 22:2, Genesis 22:12-18, Hebrews 11:17-19).

The drawback of the relational approach?

- Centralized versus (VS) distributed storage?
- Unique foreign key? Master-child? Hierarchical?
- Duplicable
- Maintainability
- Expertise and familiarity? Isolated.
- Spontaneous versus (VS) latency? What to place in the database, what to extract from it?
- When is capacity, full enough?
 - Databases may reside inside multiple files.
 - Although databases may store different file types. This wasn't the original intention.
 - Databases are abstractions.

Lacking expertise?

- Usability: The author has limited experience with building a user-interface (UI) with Cascading Style Sheets (CSS).
- Quality Assurance (QA): Some changes break existing code.
- Database neutrality: The database definition language (DDL) and embedded SQL are not portable across all databases. For example, SQLCLR, is in use.
- Adoption by emerging technology? Mobile, cloud...

2023-12-15T08:40:00 What substitution...we have ahead?		Scripture Reference
Post Resurrection	Pre Resurrection	
Tree of life	Bread of life	Revelation 2:7, Revelation 22:2, Revelation 22:14, John 6:35, John 6:48
Book of life	The word of God	Philippians 4:3, Revelation 3:5, Revelation 13:8, Revelation 17:8, Revelation 20:12, Revelation 20:15, Revelation 21:27, Revelation 21:9
Antichrist	Father's name	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, John 5:43
Man of sin	Comforter	2 Thessalonians 2, John 16:7

What did He find... as useful

Technology	Usefulness history
Microsoft Windows Operating System	Utility
Microsoft Notepad	Text editor, aged
Microsoft Internet Explorer (IE)	Browser, deprecated
Microsoft SQL Server	Relational database. Single repository which supports: - Client/Server autonomy. Client embedded-SQL. - The datetime column defaults. - The identity column is auto-generable. - Computed column: What can the computer do for us?
Microsoft sqlcmd	Command-line interface (CLI). Between the years 2000...2005.
Microsoft SQL Server Management Studio (SSMS)	Graphical user interface (GUI). Spreadsheet like editor.
Mozilla Firefox	Multi-tab browser

Network computers	4 including 1 running the Linux Operating System
Logical hard disk drives	4 including 1 solely for processing, and the other 3 drives mainly for archive.

Accessibility to name?

1. The first and only word spoken to me in the United States of America (USA) prior to my deportation is, I Am taking you on a journey. The first word spoken to me upon my return to the United States as I prepared to go to a christening in Los Angeles (LA) was lla eyan mi ion to yi. Translated it is my person's house you are going to. Location, movement, matters to God. The first word is in English, the colonized language. The second word is in Yoruba, my native language. Where is the expectation of good? Times are expectations.

Where will I be of the same?

Word	Scripture Reference
Burial place	Ecclesiastes 7:2 Genesis 23:20 Genesis 49:30 Genesis 50:13
Birth place	Matthew 2:6
Metnach's origin	Genesis 25:20 Genesis 28

Information Flow

Sharing His word; is following His deed.

(Charles M. Kozierok).

With .asnx web services, the author, standardized on JSON for returning data. The alternative is XML. The preference for JSON, is because of its lighter payload. Another difference, in the result set, the author chooses if to return a dataset, datatable, or scalar? The datatable is useful for a singular resultset. With SQL Query select statements, the column list may refer to *, for returning all the columns, in the order they are arranged in the container, table or view; or otherwise the stricter, specification of each column to return. The author restricts which rows to return, by issuing the conditional where clause; the top 1 select clause is useful, for quote of the day; as it supersedes the set rowcount 1, limitation. The author depends on the database order by clause, for sorting in ascending or descending order; Data is also rankable by clicking on the table's column header.

Basic Communication Modes of Operation

The author's SQL Server TCP/IP is turned off; because the author does not want interference from the outside. The author imposes an artificial Simplex Operation; only supporting external read requests, and not allowing updates; which is a one-way traffic of data from the server to the clients. The other options are Half-Duplex Operation and Full-Duplex Operation.

Quality of Service (QoS)

Most of the author's web pages transmit textual data; but a few pages offer text-to-speech or video capabilities; these rare application rely on high-grade speciality. The author as a programmer does not meddle with these intricacies; the technology provider takes care of the nitty-grity.

Parameter Standardization

The column name is kept consistent in the query string, up-to the naming convention and the case-sensitivity; this also applies to where we specifically refer to a column name in JavaScript. This is most seen, in the Scripture reference and Bible word variables, which the author shares around.

Global Resource Allocation and Identifier Uniqueness

The domain name is unique to the organization; and the Javascript code for AJAX explicitly mentions the virtual directory; the internet provider issues the IP address.

HisWord table nullable columns

All of the columns in the HisWord table are either system generable (HisWordID, Dated) or nullable ([1 Samuel 3:19](#).)

For	Against

Numbers in themes

• His expressed good as how He felt ([Genesis 1:4](#) [Genesis 1:10](#) [Genesis 1:12](#) [Genesis 1:18](#) [Genesis 1:21](#) [Genesis 1:25](#) [Genesis 1:31](#) [Genesis 2:9](#) [Genesis 2:12](#) [Genesis 2:17-18](#) [Genesis 3:5-6](#) [Genesis 3:22](#)).

• He expressed start and end of time ([Genesis 1:1](#) [Genesis 1:5](#) [Genesis 1:8](#) [Genesis 1:13](#) [Genesis 1:19](#) [Genesis 1:23](#) [Genesis 1:31](#) [Genesis 2:1-4](#)).

• King of the Jews ([Matthew 2:2](#) [Matthew 27:11](#) [Matthew 27:37](#) [Mark 15:2](#) [Mark 15:9](#) [Mark 15:12](#) [Mark 15:18](#) [Mark 15:26](#) [Luke 23:3](#) [Luke 23:37](#) [Luke 23:38](#) [John 18:39](#) [John 19:3](#) [John 19:19](#) [John 19:21](#)).

To be actual things

• Pronunciation ([Luke 1:13](#) [Luke 1:60](#))

• Application ([Luke 1](#))

• Spelling ([Luke 1:63](#))

• Reference ([Matthew 11:14](#))

In telling the future, there are two parts: prophecy and fulfillment ([Revelation 19:10](#)). The author feels that search engines and artificial intelligence (AI) have made sufficient inroads in interpretations.

What prize at the target?

What prize at the target?		
Prize	Target	Scripture Reference
Some are	Diversified language	Genesis 11:9 Revelation 7:9
http://qithub.com/KenAdeniji/WordEngineering/tree/main/ITS/Gradual	I have decided to work on a gradual improving system.	Psalms 133

SQL uses set theory, whereas most programming language clients, including LINQ, use row processing or procedural programming. Relational operations:

1. Projections: The author will use projections, select clauses, for retrieving the user-specified Bible version column.
2. Selections: The particular Bible row verse selections, where clauses, are built using dynamic SQL.
3. Joins: Normalization offers the opportunity to segment and in most cases defer from using the join clause. The contact view joins the contact table and its subsidiaries. C# provides datasets which contains datatables and ASP.NET uses GridView.

This is visible in:

.aspx	.aspx.cs
http://qithub.com/KenAdeniji/WordOfGod/blob/master/ContactMaintenance.aspx	http://qithub.com/KenAdeniji/WordOfGod/blob/master/ContactMaintenancePage.aspx.cs
http://qithub.com/KenAdeniji/WordEngineering/blob/main/ITS/Gradual/Contacts/ContactList.aspx	http://qithub.com/KenAdeniji/WordEngineering/blob/main/ITS/Gradual/Contacts/ContactList.aspx.cs

Theta join the old convention of placing columns relationships conditions in the where clause has been superseded by the ANSI/ISO join clause.

(Kevin Kline, Regina O. Obe, Leo S. Hsu).

logparser

The log files for this observation are between 2017-01-02 and 2023-06-08.

Elements processed: 938499

logparser.exe "SELECT sc-status, sc-substatus, COUNT(*) FROM *.log GROUP BY sc-status, sc-substatus ORDER BY sc-status" -i:w3c

sc-status sc-substatus COUNT(ALL *)

200 0 185115

304 0 9467

The count of requests served from the server; HTTP Status code of 200, clearly outweighs 304 HTTP status code, local cache.

HTTP 500 Status Code, internal server error, sum is approximately 6400.

Productivity

1. Productivity is the measure of unit tasks completed within a time frame or at a cost.
2. A project cost is its work hours. A work day is 8 hours. A work month is =176 work hours. A work year is =2000 work hours.
3. The degree of conceptual complexity increases when an expression contains various function calls and many parentheses. Scope complexity is the fitting between parts.
4. To predict productivity? Reuse.
5. Metric:
 - Executable Size Metric: Is the code largeness. It does not fully consider the uninitialized array data. It includes library code which reduces complexity. It is not a language-independent source. It is not CPU-independent.
 - Machine Instructions Metric: This is the size or count of the machine instructions.
 - Lines of Code Metric (LOC): It counts the number of source code lines. It is consistent across programming languages. It is CPU-independent. The Linux word count, wc, command will suffice.
 - Statement Count Metric: It excludes comments, blank lines, and counts as 1 a statement that spreads across multiple lines.
 - Function Point Analysis (FPA): It looks ahead and assumes the amount of work a program will require. It details the inputs, outputs and basic computation. FPA has become a postmortem (end-of-project) tool.
 - McCabe's Cyclomatic Complexity Metric developed by Thomas McCabe: It finds out the complexity by determining the paths through it.

(Randall Hyde).

Design Specifications

Design Specifications				
	Sample Specification and Categories	Constraints	User Specification (Demand)	User Specification (Want)
Function How it works	The current work meets the design of an Intranet. The test environment. 1. Performance 2. Energy			
Aesthetics How it looks	1. Geometry (e.g. Earlier work focused on generating Internet documents. The transition was from .html, xml/xslt, .aspx, and now AJAX.)			
Quality How well it is made	1. Materials The author's work is software specific. 2. Cost Open-source 3. Manufacture While it is Microsoft-centric for the back-end (.asmx, Transact-SQL, SQL Server database), the front-end is industry standard (.html, .js, .css).			
Safety	1. Time The time duration is minimal. 2. Transport The work is done on one computer. 3. Ergonomics The doctorate work consisted of a proof-of-concept that is easily replicable.			

(DeLean Tolbert Smith).

Brainstorming

Brainstorming	
Strategy	Description
Focus on quantity	AlphabetSequence includes the whole Bible. The author has not expanded the 2-words nor 3-words computation.
Want to judge	AlphabetSequence is relevant to the English language and the King James Version (KJV) Bible?
Think outside the box	While the initial focus was on the Bible, written word; research now includes spoken word.
Combine and improve ideas	The author solicits input from others.
Keep focus on the problem	Database recording resulted from the effort to determine when? The author has concentrated on this timeline.
Set a time limit	Elaborious work is avoided.

(DeLean Tolbert Smith).

Design Selection

- Agility: Ease and speed
- Flexibility: Adaptation to changes
- Component: Encapsulation

(DeLean Tolbert Smith).

Ease of Manufacturing

- Large number of independent parts: Team or solo development
- Parts accessibility: Build versus (V5) buy

(DeLean Tolbert Smith).

Decision-screening Matrix

The AJAX approach offers the following benefits in performance criterion and weight:

- Ease of manufacture
 - Engineering skill needed to build
 - Robust design
 - Primary function independence
- The competing solution will include:
- Server-side JavaScript, for example, Node
 - Front-end library and framework, for example, React

(DeLean Tolbert Smith).

To know my part as His?

- [ContactMaintenance.aspx](#) is a replica copy of a Microsoft wizard master-detail example.
- [I have decided to work on a spiritual microworld system](#) is a reverse-engineering clean room implementation of [Microsoft hotmail.com](#).
- What are you able to do now that you weren't able to do before? To recognize the following as 1 (2 Samuel 3:39) ?
- Who it comes to (Hebrews 11:24) ?
- What is the following? List of C-family programming languages
- The mechanism of selecting gender?
- What notion of the same do I have?
- What I keep member of (John 17:12) ?
- What did he find as suitable for him (Genesis 39:9, Daniel 1:12, Daniel 1:16, Genesis 1:26-27) ?
- What did he find re-occurring as him? Seed of Jesse, king like David, son of David

Fixing your website's JavaScript performance

- Long tasks:
 1. Yield to the main thread: the PageLoad event handler performs an IsPostBack check, and if it is not a PostBack, parses the querystring. 2025-07-12T03:19:00 [Sets the input value](#) of the various element IDs, and submits the query.
 2. Optimize your rendering patterns:
 - Eliminating layout thrashing: 2025-07-11T18:17:00 [AJAX...only refresh updates](#).
 - Using efficient CSS selectors: The simple 2025-07-11T18:37:00 [table inner elements sub-ordinates](#).
- Large bundle sizes: A bundle size is the total amount of JavaScript code that needs to be downloaded, parsed, and executed when a user visits a website.
 1. The author does not use inline JavaScript.
 2. The author minimally uses internal JavaScript for page-specific event handlers.
 3. The author always uses an external JavaScript file, [2432.js](#), for rendering dynamic data-driven HTML tables and selects. 2025-07-12T14:54:00 [What contribution I have... as someone else \(Mark 7 \)?](#) 2025-07-12T16:44:00 [What did he do?](#) [How did I do \(Luke 1:41, Luke 1:44, Matthew 3, John 3 \)?](#)

(Mozilla DebugBear, 2024-10-08).

Web Site Performance Metrics

The load time, and response time to user action and submission. The author tested the time, it takes to load each page, after development; and the wait period was satisfactory. For the Bible database, the author does not expect further increase in database size, which will put premium on the load. [Abime's Law](#) comes into recognition in [God'sPage.html](#), by performing multiple tasks with Web Services and measuring with [performance.now\(\)](#).

URL	Load time	Page size	Commentary
2015-10-23DoctoralDissertation.html	379 ms	33.5 kB	2015-10-23DoctoralDissertation.html This is the thesis document, and this is the initial finding, as there is progress and as the author reaches conclusions, the author estimates further increase in load time and page size.
http://e-comfort.ehraiintech.com/WordEngineering/WordUnion/BecauseWeAreNotThisIsOurDefinition.html	5.96 s	3.3 kB	BecauseWeAreNotThisIsOurDefinition.html is standalone, it does not load additional CSS, HTML files, nor does it make AJAX calls to the back-end.

Development History

A Causal to Hearing Words

He said and He did. Word work (Genesis 11:1-9). The authority to know...and discern...between things. At the beginning of WordEngineering, my practice will include

- In Australia, I got involved with the primary ministry at the Villetta Detention Center. The Christian missionaries that were serving felt like those migrants might aid in responding to new applicants. I was deported to my country of origin, Nigeria, from the United States of America (USA); therefore, I could share the plight of these inmates. I was also in the court process, so I could better understand Australia's law. Finally, my most productive contact consulting was at the Department of Training Education Council (OTEC), so I had an understanding of integrating and skill-relocating workers. I tried to share computer books, but inmates were undeterred by their relevance to their mission. They were expected to write letters to immigration officials. This influenced my desire to produce authentic Christian literature and improve my communication skills. What could I relate to less fortunate people? How may I be the one giving hope? Can I let the Holy Spirit partake on my wits? What are some rules for, and how will I be able to follow them? These questions became more complex as time went on. When would I get home? Would I ever see my family again? If yes, what side take the rest? "I am finding out...is now necessary! Am I as a person? How do you put it in participant?" What can you take from me, and make as your own? My words may not be what they said, but give your experience left say? Imagine your life will be lived, as you say. When the programming lines, lines of code, play out its scenario. So words make meaning as suffering. Whose life have I lived to complexity? To the full of his deed ([John8:12-24](#))? What can His prove relate to?

What did He know as one? First, pre-eminence
join,

Written about us how many?			
Word	Jew	Prince of the people that shall come	Scripture Reference
Weeks of Years	69	1	Genesis 9:24-27
Lineage	Most holy	Antichrist	Genesis 9:24-27
Image	Seal	Beast	Revelation 7
Trigger	Re-build Jerusalem	Sign a covenant with the many	Genesis 9:24-27

What do you want to use it for?

It is firstly a database work. That is the author records God's What the author hears, he relates to the Bible and the other scriptural sources. These information are all in database tables, giving the author the luxury of using relational technology. The benefit includes storage and archive, that is, the work is useful in tabular format. There is a copy of the information running Microsoft SQL Server on a Linux operating system; which the author switches to, by changing the database connection string of one node in the web.config. When the user decides to stabilize and admin no further changes; then there is no need to do additional database update work. As with such work, the database schema remains consistent, since the beginning. The choice of word, meets today's expectations. The addition of the ActToGod table, demonstrates the maturity of the author. This choice it advances from data to information.

The author, first wrote his history, in multiple stand-alone files .HTML, .XML. ([Acts 7:22](#)). This documentation didn't allow for enough dating, to track creation and change, nor easy querying. Therefore, the decision to move to a relational database; that will augment this fact.

The author uses Microsoft SQL Server Management Studio to document general information. When the author is offsite, text editors provides a place to scribble data manipulation language (DML) statements into SQL script files, for later execution. Please understand that both means mentioned above do not always support the checking of spellings nor grammar, and have limited formatting.

I have a product; where is the method

- Appendix 1
1. What is the minimum requirement? The author believes it is the Holy Spirit spreading the Word, and it is not him, making up the word. As long as you have the spirit of God, then you are receptive to this information sharing. The word is not always clearly heard, and the sighting is not always 20/20 visible.
2. What is the literary level requirement? If you know the alphabets arrangements, then you can determine the AlphabetSequenceIndex by hand. To determine the AlphabetSequenceIndexScriptureReference, you need to know, the count of chapters and verses. This manual work gives way to computation, which is not error prone.
3. What is the content and voice style and visions textually, without resorting to the database. Search Engines Crawlers parse the standard HTML files and rarely query the database. The calendar: years, months, days, may benefit from the stipulation and generability of the Common Era.
4. Where is the world leading and how do we follow it? The author fiddles with the idea of bringing technology to the Word of God. The author is unaware of the start and early beginnings of dictionaries, concordance and commentaries; but the author gains from this work as a reference. The wide acceptance of a work, accompanies preference and prevalence.
5. The New Testament Bible. The emphases of Jesus Christ and apostle Paul is the work for today? As the author sees from the Bible, Moses assigned intervention to leaders, and Moses went to God as a higher authority. Who is the work for? Who can benefit from reading this work?

Business Analysis Body of Knowledge (BABOK)

Tasks

How to go about it?

Purpose

The author's original intention was to record God's word. This later led to finding the word's background and implication

Inputs

The data input is currently being done manually, but the author looks forward to electronic automation. The identity and date are potential external inputs. The scripture reference requires Bible knowledge.

Element:

Word processing flows more naturally than data entry

Guidelines and tool

A relational database is a substitute for text processing.

Stakeholders

I am the primary contributor and beneficiary

Outputs

Out:

Lessons Learned

- **Estern word:** Leading up-to 2008-03-07, I was not fully recording the word of the LORD ([Job 23:12](#)).
- I used to ask God for a word? To realize where my opinion lies?
- **Familiarization with data.**
- You previously stored your work in a database. You worked on a text in .html files. 2022-10-23 You chose to return to database content. Who is this work intended for? Can somebody else take on the responsibility for specialization, localization, processing of your original work? Drawing intelligence from your work ([Isaiah 22:11](#))? One of My offering as many as I use?
- The earlier words between waking and walking outside were in the author's backpack's notebook for meditation. Note the earlier words from night to morning are stored in the author's bedside notebook. What I provided for other? Is how I needed Him.
- Putting Him into words.

Progress

After the author conceived the notion for AlphabetSequence, he stored the word spoken into XML files, along with manually determining the relevant Bible word. This, the author did, because the author thought and felt that the readers will prefer to read the recent information, and they do not have to reorguligate the entire database. The author was living at Newark, and working from Fremont.

The author recorded, the FromUntil Time Span, explicitly into the Remember's table commentary column. Now, there are three computed columns, managing this period(s); these are the days difference, the Biblical time period, and Common Era computation. The author is saving memory storage space this way. And, also offering the opportunity to other people, the possibility to calculate their preferred period.

Using the knowledge learnt from horizontal replication and partition, the audience are no longer forced to accept the author's calendar. The audience can choose their acceptable fact, and ignore nor standard derivation.

The history, this way, is to say; at the beginning, the author will record every entry after six p.m. as the next day saying, just like the Jewish day starts at 6 p.m. With the reasoning advent, the Tanakh, the New Testament, and the Koran, the truth partiality, is our governance.

The Basic of Facilitating the Truth

Most words have precedence, and do not exist in an emptiness. Words follow a trend. Are their supportive collaboration, to the utterance the author hears; these are linkable for historical evidence.

How do we give our actualities? I have found written text, the easiest and most applicable way of sharing thoughts. Words spoken, when passed from generation to generation, may gain legend status, and therefore, lose appropriateness.

Examine the course of history? You will find, that most truth, are actually realizing the dream. In my case, when I try to recall, the past, I search by keywords, numbers and dates. So, entries in the word, are most to realization. The first words spoken have higher importance and slower affinity; so also, prophetic application, have standard occurrence.

Our work, so much depends on data entry. The Remember table relies on relationship, deductive reasoning.

Can we look back at history, as we precede our future

An angel said to prophet Daniel, many shall run to and fro ([Daniel%2012:4](#))

Is this phenomenal traceable, Biblically, and can we name a person that bears similar resemblance? When we study, king David, we can see that David fled from king Saul, his predecessor; and two of his biological immediate sons, who purported, to overthrow him as king. In the Book of Revelation, the only three mentions of king David, talk of movement ([Revelation 3:7](#), [Revelation 5:5](#), [Revelation 22:16](#)). Joseph ([Genesis 37:2](#), [Genesis 37:9](#), [Genesis 37:19](#), [Genesis 39:12-18](#)).

Why we Accumulate the Same ([Matthew 26:53](#), [Revelation 9:16](#), [Revelation 7:4-8](#))

Samuel anointed David, during king Saul's reign. The choice, one makes, ahead ([Genesis 2:2-3](#), [2 Samuel 11:4](#), [2 Samuel 12:24](#), [Ruth 3:1](#), [Ruth 3:8](#), [Ruth 3:18](#)). Knew versus lay.

Wanting a Member of...

In the first words, in the Bible, God referred to the beginning, of His work, giving time, an annotation. God also mentioned two places, heaven and earth, creation generally centers on the activities on the earth; and God we understand, resides in the heaven, the last point for good on earth. To seek a development; it had a beginning.

In the second sentence, second verse, God mentions, that the earth was without form and void; meaning the earth was without content. Nothing was a member of the earth. Also, God's spirit, a member of God, moved across the water.

When time is maximal used; time is ideal allowed. When our association to follow; is association to the end.

What relates a place...as one another? Observance of a particular use?		
Place	Actor	Scripture Reference
Garden of Eden	Adam	Genesis 2:8 , Genesis 2:10 , Genesis 2:15 , Genesis 3:23-3:24
Field	Cain and Abel	Genesis 4:8-4:15
Land of Nod, on the East of Eden	Cain	Genesis 4:16
Enoch	Cain and Enoch	Genesis 4:17

What right of things?	
Word	Scripture Reference
Work word	John 14:10
Charity	
Timeliness	Deuteronomy 18:22

The business of telling us again?		
Word	Scripture Reference	Commentary
Naming	Genesis 2 , Genesis 4	The author registered a trademark name and much later created and maintained a contact database. The author received the title of a book that he wrote and afterwards a domain name.
Profession	Genesis 4	The author developed an interest in Biblical studies while undergoing tertiary education.

To help someone generate size?	
Keyword	Commentary
Light	Sun, Moon: Evening and day, Sabbath
Man	Image of God, helper, seed

What did He see as His? A remodelling of the lost ([Daniel 9:24-27](#), [Revelation 3:12](#), [Revelation 21:2](#), [Revelation 2:7](#), [Revelation 22:2](#), [Revelation 22:14](#))?

The author will want a conciliation with time?

AlphabetSequence is a novice attempt to tie what the author hears to the Bible. As one reads the Bible, they have a more familiar method of communicating. As we begin today, how can we let tomorrow?

That is what we are trying to say, how can we make ample use of time? Word of God. Word from God? The commentary is a human interpretation. You can fit more into time, by making a luxury of time. Why do we have to repeat the meaning in our words? Bible dictionary and commentary. As a result of who are we? When does the scenario introduce God ([Genesis 3:8](#))?

Description

Cross references to related applications

The author has filed 2 unsuccessful trademark applications. These trademark requests are WordEngineering and www.JesusInTheLamb.com. The first trademark application deals with the use of engineering to decipher the Bible. The second trademark effort is for the phrase, Walking in the Lamb, you shall follow Me.

Computer Listing

The software is available at <http://github.com/WordEngineering>. These include the source code and the data definition language (DDL). For size and privacy reasons, the data manipulation language (DML) is not available to the general public. The Bible versions, dictionaries and commentaries are available in the public domain. The author concedes that the length of the source code is large, but it is easily readable.

Technical Field

Seeing the Bible as enlightening to man.

Description of Related Art

To find if a relationship exists between the Bible and what we receive today?

2023-01-22T11:37:00 However, time substantiated itself. The author suggests that Baptism of the Holy Spirit ([Acts 1:2](#)), is achievable in individual locations as a message to the 3rd temple in Jerusalem.

Keyword	Scripture Reference
Place of Residence	Acts 1:4 , Acts 1:8
Sign	Acts 1:3 , Acts 1:5
Place of Worship	Acts 2:1
Speak with other tongues	Acts 2:2-2:14
Worshippers	Acts 2:5
Leader	Acts 2:14-2:47

The author does not have the advantage of a crawler; the author is querying a database in real time, without the benefit of search engine optimization (SEO).

RACI matrix. RACI is an abbreviation for Responsible, Accountable, Consulted, and Informed

Stakeholder	Task			
Responsible	The actual person doing the work.			
Accountable	The person that is answerable for the correct completion of the deliverable or task. Only one person is accountable for each task or deliverable.			
Consulted	The subject matter experts (SMEs) that participate in two-way communication.			
Informed	The recipients of one-way progress report.

(Alison Cox).

Database Modeling

Entity-Relationship (ER) Model

Entities

A relational database identifies an entity as a table. In object-oriented programming, an entity is referred to as a class. The author's specific work is in the HisWord, ActToGod, Remember, APass tables. The scripture table serves as input for scripture reference, Bible word search, and gauge for AlphabetSequence.

Attributes

The Holy Spirit informed the Word.

Identifiers

Previously, the author thought of the word as unique.

Relationships

In most cases, surrogate keys such as ContactID, HisWordID are pointers to associations.

Degree-Two Relationships

Normalization results in a master Contact table with multiple details. There is a one-to-many (1:N) relationship.

Cardinality

Maximum cardinality

- When making man, God made some choices?
 - Form: In His image
 - Location: Garden of Eden
 - Vocation: Caretaker
 - Helper: Eve
 - Model: First man, mother of all the living.
- How can we resemble His use?
 - As a software engineer, I replicate my work.
 - When I first started, I automated my manual task. I was working remotely, first at my work place, and later away from my family.
 - I initially saw my task as a software engineer, but later as a knowledge worker. Specializing on how to use and bring God.
 - I could start my day, reading the news, or scripture of the day. But for some time now, I have done data entry of the previous night and morning.
 - Who have I expected to contribute? Who will provide the next step? As a result of who am I? What informs our intelligence?

What did He associate with His being? What growing up have I chosen alike (Exodus 2:19)?

There are duplicates in the Bible		
Type	Commentary	
Name	Why the differing name? Man's name change? God name variance. Son of David versus (VS) Son of Man (2 Samuel 12:24, 2 Samuel 12:25, 1 Samuel 25:5, 1 Samuel 25:25).	
	- Giving a person's name to a place, such as, Enosh, Israel, Judah, tribes names - Name changes, such as Abram to Abraham, Sarai to Sarah, Jacob to Israel, Saul of Tarsus to apostle Paul - Name misspelling, Rahel for Rachel. A rewording of your view. - Referring to people with their alias, sons of Zebedee, sons of Thunder, Boanerges - Multiple people bearing the same name, such as John the Baptist, apostle John, the beloved disciple	
Historical Account	- Deuteronomy - Remembrance - Monarchy - Kings versus Chronicles - Gospels - Our LORD's, life story - Apocalyptic - Daniel versus Revelation	
Quotation	- Retelling previous events - Prophecy fulfillment - Answers based on scripture	
Discrepancy between question and answer	Joshua 5:13-15	
Canaan words repetition?	Genesis 12:5	

These duplicates may introduce statistical error and require clarification.

2025-04-30T04:03:00 Timeline of WordEngineering

Dated	Title	Commentary
2025-04-30T04:03:00	Bible relational database mapping.	There is a 1-to-1 mapping of each Bible version into a relational database table column.
2025-05-01T02:36:00	Where is place mention?	The Bible starts with the creation of the heaven and the earth in (Genesis 1:1). God planted a Garden eastward in Eden (Genesis 2:8).
2025-05-02T07:30:00	Influence of data.	When we think of a relational database and a Structured Query Language (SQL), we understand 2025-05-02T14:53:00 the separation of data into parts.

2025-05-15T05:45:00 Difference of many?

When your adopted father wrote the play that won him the William Shakespeare plays record album, he may have used a typewriter. With the Internet, client/server was obliterated.

- My countenances has yours.
- The last a man... has render as Himself (John 16:7, Matthew 16:18, John 4:14, John 6:35, Matthew 26:17-19) ?
- What did they produce (Genesis 4) ?
- Specialty of view (Genesis 12:11, Genesis 13:10, Genesis 22:14) ?

- 2025-05-15T04:51:00 When you work with database... you have found Management Studio to suffice.
- 2025-05-15T05:06:00 For a url, generate the bibliography? According to the various standards, or a user specification.

2025-04-25T10:53:00 What attribute the word? Autobiography... tying it into Biblical event.

www.JesusInTheLamb.com

Saint James the Apostle Catholic Church. 34700 Fremont Boulevard. At the intersection of Fremont Boulevard and Ferry Lane. On the 3rd day, he lifted up his eyes. 3rd block from east. 5 poles east. 3 poles west.

- Who? - Jesus Christ (John 8:56, Genesis 22:13)
- When? - Passover Lamb (John 1:29, Genesis 22:8)
- When? - So all the generations from Abraham unto David are fourteen generations; and from David unto the carrying away to Babylon fourteen generations; and from the carrying away to Babylon unto the Christ fourteen generations (Matthew 1:17)
- Where? - Golgotha (Matthew 27:33, Mark 15:22, John 19:12)
- Why? - And almost all things are by the law purged with blood; and without shedding of blood is no remission (Hebrews 9:22)

2025-04-05T09:04:00 Composable Design

2025-04-05T13:41:00 I have the sequence, the time, and the word. Coming from Union City BART Station, close to the intersection of Paseo Padre Parkway and Darwin Drive. How will I dictate His use as a person?

(Juval Löwy of IDesign, 2019).

2025-04-24T11:20:00 What did he see... as on their side?

- 2025-04-24T11:20:00 They expect you to make a call. Visitation... report.
- 2025-04-24T13:23:00 The work started as 2025-04-24T13:28:00 non-prophetic attempt to understand technology, and its application to Christianity. The only data observed at the beginning was the calculation of the crucifixion of Christ. This is not defamatory, nor inflammatory.
- 2025-04-24T13:45:00 While the author is aware of other sources of information and conjecture, the author is undaunted.

2025-04-07T09:40:00 What he found out... without?

- Faith (Hebrews 11:1-2, Hebrews 11:8-19)
- Without the camp (Hebrews 13:11-13)
- Rest (Hebrews 4:8)
- Reverence (Daniel 4:5)

2025-02-22T05:31:00 Our continuation of what we have here

2025-02-22T06:19:00 Akedah the binding of Isaac (Genesis 22:12, Genesis 22:20)

- Title

- Prospects and Fulfillment
- Autobiography
- State of Writing

2024-12-05T16:51:01 What comprehension we have of the same?

- Greatest ([Matthew 22:36-40](#), [Matthew 18:1-4](#), [Matthew 23:11](#))
- New ([John 13:34](#), [Hebrews 8:13](#), [2 Corinthians 5:12](#))
- 2...1 ([Genesis 2:24](#), [Genesis 41:25](#))

2024-12-02T20:31:00 What did He mean by all?

- Baptism of the Spirit ([Luke 24:49](#), [2 Thessalonians 2:7](#))
- Time representation ([Matthew 24:14](#))
- Trade of man ([Revelation 13:16-18](#))
- No changes to the Word ([Deuteronomy 4:2](#), [Revelation 22:18-19](#))
- End-times ([1 Peter 4:2](#), [Genesis 6:13](#))
- Recompense ([Job 42:10-17](#), [Job 1:2](#))

Entity-Relationship Model

2024-11-05T02:41:00 Who's personally... the story? The word of God is pure, but it is only recorded in the HisWord's table, Word column. Every other place... is man's correlation and hopefully collaboration. 2024-11-05T03:05:00 If only one column... What does? I have not? 2024-11-05T03:22:00 The datetime column type is useful for backdating. 2024-11-05T04:18:00 To delegate the user? 2024-11-05T05:13:00 Not looking hinder... but looking forward.

2024-11-03T03:58:00 Requirement: mandatory, significant, optional

1. 2024-11-03T04:26:00 Mandatory: It is absolutely essential that the database be accessible, and at a limit data entry is done, currently, SQL Server is a service.
2. 2024-11-03T04:52:00 Significant: What you do with so ever?, Microsoft SQL Server Management Studio.

(Allen G. Taylor, 2024).

2024-10-28T05:14:00 What are compatible... within my part?

In looking at the Bible, a decision was made to separate it into 2 parts, the former Old Testament, and the latter New Testament. This offered the Jews the opportunity to retain the Tanakh. This influenced the calendar breaking into B.C. and A.D. The Moderns, disillusioned with the proprietary Bible, got the Koran. 2024-10-28T05:45:00 A decision has to be made on your part... to follow the truth. 2024-10-28T06:06:00 What input has He contributed... that should be my output? I initially stored each day's work into separate files. For granularity reasons, I later chose to store each word in its own record.

2024-10-24T06:54:00 We have to accept... we are no.

The 3 private sector jobs I held in Charlotte, North Carolina (NC) were:
1. At Sunhealth Corporation, I upgraded a Microsoft Basic application to add columns to a printed report. Frank Veale worked on a database application for dating.
2. At Central Corporation, I upgraded a Borland Turbo C application to generate an additional tape print label.
3. At Mckey Real Estate, I worked on a R:base 5000 application.
These 3 non-academic Central Piedmont Community College (CPC) tutor jobs offered me the opportunity to complement my programming career with writing.

2024-10-19T03:08:00 What is suitable... for replacement?

Initially, I registered the trademark, WordEngineering. After offering me a book, Ocean Senior, I afterwards, was issued the domain name, www.JesusInTheLamb.com. ([Revelation 21:23](#), [Revelation 21:2](#), [Revelation 2:17](#)). At Baynet.com, I learned how to use Microsoft VisualStudio, and how to develop using dynamic link libraries (DLL). This method I applied at Daigaku Honyaku Center (DHC). I also copied code from ASP.NET Unleashed by Stephen Walkers. These were prior to Microsoft introducing Microsoft .NET Framework 3.5 and with it Language Integrated Query (LINQ) and ASP.NET Model-view-controller (MVC). 2024-10-19T03:47:00 What obviously did He use... to later Him? With HTML, you have elements and attributes. Choosing... to place alike. I personalize... the change. I use Google to check my terminology, and later correct my grammar. 2024-10-19T04:02:00 Begin as a representation. 2024-10-19T04:24:00 What will maintain... a... instance of myself?

2024-10-17T20:41:00 As a result of whom?

- Who is the quote from? Whose words am I reciting? Most words I give the Holy Spirit credit for. But if I recognize the voice, or I heard the person speak, then I record the contact. If this is a word from scripture, then I attribute the reference.
- 2024-10-17T21:38:00 I take the spirit... into human terms.
- I relate the words to external sources, such as the Bible, dictionaries, Wikipedia.
- I determine a historical timeline. For example, dates and intervals.

2024-10-17T01:20:00 Beloved, neglected... your striking understanding can never be underestimated.

- God chooses people to work with. For example, Abraham ([Ezekiel 33:24](#)).
- Consistency with the Bible ([Genesis 23:23](#))?

How they report you?

- 2007-03-14 Chester Gordon Bell <http://research.microsoft.com/bacs/mediapresence/hydridelits.aspx>
- 2019-12-07 <http://google.com/books/edition/Design-for-how-people-think/UF5ODwA0BA7Nl=en&oeqvc=1&printsec=frontcover>

Separating realizable

- Baptism of John... Baptism of the spirit ([Acts 2:1](#))
- Dead... resurrection ([Hebrews 11:12](#))
- Ishi, husband ([Hosea 2:16](#))
- Antichrist ([2 John 1:7](#))

No separation... in bonding. What did He ask for unity in? Land, man, Men, brother.

- God: Garden of Eden - Adam and Eve, Cain and Abel ([Genesis 2:8](#), [Genesis 2:15](#), [Genesis 3:23-24](#), [Genesis 4:10-12](#))
- Jesus Christ: Church - Peter ([Matthew 16:18](#))

You are not asking that you may become Him... you are asking that you become His subject?

2024-08-20T05:35:00 What did he find himself supporting?

2024-11-14T18:38:00 What... do I have for the vocation I participate in (Numbers 3:8, Numbers 24, Romans 1, Acts 13:38)?

I heard the front door forcibly open ajar.

- Strange land: Egypt for 400 years ([Genesis 15:13](#), [Acts 7:6](#))
- Maternal: Rebekah, Laban of Padanaram for 20 years, Esau ([Genesis 25:28](#), [Genesis 27:5](#), [Genesis 28:22](#), [Genesis 31:38](#), [Genesis 31:41](#))
- Children and grandchildren: Benjamin, Joseph, Judah ([Genesis 42:36](#), [Genesis 43:14](#))

This word must make remainder necessary. Does He use people as Him?

Word	Actor	Scripture Reference	Probability
Image	Man	Genesis 1:26-27 , Genesis 9:6	
Spirit	Adam	Genesis 2:7	
Only begotten Son	Jesus Christ	Genesis 22:2 , John 3:16 , John 3:18 , Hebrews 11:17 , 1 John 4:9	1
Part of the body	Jesus Christ	Isaiah 53:1 , Acts 13:22	1

2024-07-21T19:07:21 President Joe Biden Where I feel... we have opportunity?

- What the society produce? What the society produce... what can happen?
Ratio percentage versus (VS) quantity? At 3 for 9? GroupPrice.com
In the 1st scene, at Albertsons Lucky, Charter Square, in the north-west, I saw a set of transparent opened plastic containers. They were arranged in vertical rows, and horizontally placed. They contained aged, broken and cheaper cookies. They were priced at 3 for 9. In the 2nd scene, I was waiting on a public transport bus. A bus passed eastward. Other buses followed. I got on a bus, which was co-incidentally going towards my destination. When I got off the bus, inside a room, in the center, I saw uncle Jimi. It was the celebration of the birthday of aunt Taiwo. My twin sibling did not drive aunt Taiwo to the venue, since my twin sibling had other commitments. In the 3rd scene, inside a car in the south-east, a man spoke the words to me.
- Timeliness ([Daniel 5:5](#), [Daniel 5:14](#), [Daniel 5:26](#), [Daniel 5:30-31](#), [Genesis 4:3](#), [Genesis 4:8](#), [Genesis 4:12-14](#))
- Quantification ([Daniel 6:5](#))
- Original self ([Daniel 5:12](#))
- How we let Him know ([1 Corinthians 5:7](#), [Acts 23:5](#))?
- I didn't look...
I want not a... user meaning there are...
A person wants to log in, but they do not want to replicate the security activities of having a unique login ID or user. My twin sibling said I should select their login ID and configure a database record. 20:51 headache, urine.

Word Type

- Naming ([Genesis 2:19-20](#), [Genesis 2:22](#), [Genesis 3:20](#), [Genesis 4:1](#), [Genesis 4:25-26](#))
- Reverence ([Genesis 4:26](#), [Exodus 20:2](#), [Deuteronomy 5:11](#))
- Interpret ([Genesis 37:9](#), [Hebrews 11:23-30](#), [Daniel 5](#)) to each entirely its own.

2024-07-12T06:15:00 What do you do with software, once you produce? It specifies a beginning, and it specifies a period.

1. 2024-07-12T06:15:00 How much period... we have the same?
 - Teles integrates programmable script and audio recording. MP3 is an industry standard.
 - The author made a transition from one-time manufactured hardware to maintainable software.

What if we could give description?

- An instruction including a keyword and object(s): Let there be... An instruction accompanied by action(s) per day
- Observation of result: Good
- Identity: Day of the week, chronologically, naming
- Commentary with reference to living entities

International Business Machines (IBM):

- An association of being alike... is the assurance of the same.
- The continuation of myself... is all I am allowed.
- One side... the decider.

1. IBM PC compatible:

At Central Piedmont Community College (CPC), Charlotte, North Carolina (NC). The author tutored in the personal computer (PC) laboratory.

- The computers were IBM, Apple, Radio Shack
- The programming languages were Microsoft's Basic and Borland's Turbo Pascal
- The applications were WordStar wordprocessor, Lotus 1-2-3 spreadsheet, dBASE

2. IBM employee:

- In Ibadan, Lagos State, Nigeria, while the author was walking on the street, away from the premises of a client, Simeon Onasanya, an employee of IBM and the older brother of Tunde Onasanya, called him
- In Sydney, Australia, Alex Koutsombos, an IBM employee, sent periodic Java programming language e-mails

3. IBM event:

- In Sydney, Australia, the author received an end-of-year gift of wine from IBM
- In Sydney, Australia, the author interviewed for a Microsoft SQL Server database administrator (DBA) role with IBM for the Sydney 2000 Olympics
- In San Francisco, California, the author attended an evening after-work party that was organized by IBM
- In San Jose, California, the author attended a conference that was hosted by IBM. Among the invitees were an African American mother and daughter

(Tiffany McDowell, 2024-07-04).

How-to verify the work of the spirit?

- Is it compatible with the Bible ([John 10:30](#), [John 17:22](#), [1 John 5:8](#))?

Is this a link? ([Genesis 41:12](#), [1 Corinthians 15:45](#), [Acts 9:3](#), [Genesis 5:3](#))?

Data Storage

Data Storage Westpac

Where we reside... is where we realize our view.

During my 2nd contract with Westpac, I calculated financial information. I did not know how this data got into the database, nor was I aware of future data update. I am now writing historical experience, I am not writing technical understanding.

Data Storage - DataEntry table

What creates the desire... to be something?

The balance tradeoff... between a persistent table or a computed period? This table was explicitly created on 2024-06-10T03:13:00.

How as a... result of what? Take a word? Store as a record versus (VS) store as HTML file?

- Domain knowledge and expertise? Personal testimony
- Technical requirement? Data entry versus (VS) HTML performance penalty

What exactly can we expect... out of the Bible ([Daniel 5:31](#))?

1. When is the Bible specific about time ([Genesis 41:32](#), [Genesis 41:1](#), [Genesis 41:5](#), [Genesis 41:9](#), [Genesis 41:11](#), [Genesis 41:26-32](#), [Genesis 41:34-36](#), [Genesis 41:43](#), [Genesis 41:46-48](#), [Genesis 41:50-54](#))?

How admissible is the word ([Genesis 41](#), [Daniel 2](#))?

5/30/2026, 3:47 PM

- Title
- Abstract
- Acknowledgments

- Prophecy and Fulfillment
- Autobiography
- Style of Writing

Where is the knowledge added? The word column is how the author is up-to-date? The others are man's work.
Telling intelligence? What did Hagar say? Her only speaking was with the one that sees?

What specially like Him?

Event	Feature	Scripture Reference
Creation	Image of our ancestors	Genesis 1:26-27, Genesis 2:7, Genesis 6:3, Luke 3:38
Redemption	Image of the Son	1 John 3:2

Do you know mine? / Deuteronomy 18:15		
God	Actor	
	Moses	Jesus
Name	Jehovah (Exodus 6:3)	Father (Matthew 23:9)
Place of Origin	Egypt (Exodus 2:19)	Bethlehem (Matthew 2:1-18, Luke 2:1-20, John 7:42)

2022-08-08T19:00:00 Country

2025-04-17T04:38:00 We have considered place grouping, as in countries. Should we also consider 2025-04-1705:22:00 man grouping?
2025-04-1700:00:00 Epoch timestamp: 1744948000
2025-04-1705:22:00 Place grouping... man grouping 2025-04-1804:06:00 (Genesis 48:4)?
2025-04-17T06:16:00 Do we choose... a realization of him?
• 2024-07-09T18:30:00 He has always out it in... context of time.
• 2024-09-15T13:39:00 How our past... is new... design as lasting?
• 2022-08-08T19:00:00 Dispossess the Devil?
• 2024-07-23T09:22:00 To be an African's... Nation.
• 2024-09-24T11:01:00 I have brought shame to my people. The word came just before I got to the south of the Paseo Padre Parkway Highway 880 overland bridge, but I was asked to delay, suspend, interrupt writing the word, until I got to the north of the bridge. I saw a husband wearing a purple shirt, and a wife wearing a green shirt.
• 2022-10-08T11:08:00 To work as a part of Me?
• 2023-06-07T19:31:00 Do we accommodate the usual? Country of privilege? I saw Barney John and his wife, Bernadette John, of 4770 Canvasback Common. Country citizenship for Jews and Palestines?

Associated culture

1. Associated culture (Acts 7:22, Matthew 15:2, Mark 7:3, Daniel 1:3-5)

What I am rendering? To what particular use... is me (Matthew 16:18)?

What do I form out of this?

How do I expand on the word? Scripture reference or personal testimony (Genesis 2:18-25, Genesis 3:15, Genesis 41:45, Daniel 2:45)?

What is the reward of the past?

From that day (1 Samuel 16:13, 1 Samuel 18:9, 1 Samuel 30:25, Ezekiel 39:22, Ezekiel 48:35, Matthew 22:46, John 11:53)...

1. Salvation (Exodus 14:13)
 2. Commit (Luke 23:46, Psalms 31:5)
- What personifies the time?
1. First and Last Adam (1 Corinthians 15:45)
 2. Firstborn (Romans 8:29, Colossians 1:15, Colossians 1:18, Hebrews 12:23)
- What does authoring the word do? To shed as much light as our opening (Genesis 1:1-1:5, Luke 4:16-4:32, John 2:1-2:11).
- Why consider cannot be our end? AlphabetSequence is like a calculator. The logic is straight forward and it is not varying in part.

Spirit of the Antichrist

- Human sacrifice.
- Including love, hate, joy, sorrow... including love their own father.
- What I do was able to learn the importance of the disease... I am in a bus and I flirted with some females. I got off and I made my way home, westward. Again, I got off and I entered an office. Workers are giving away vouchers. I got some vouchers too even though I may not eligible. I entered a taxi. The driver accused me of being fraudulent. After some thought, I ran westward towards divided streets which may prevent me from being getting caught.
- According to worthiness (1 Timothy 6:17).

How do you reference the Bible?		
Word	Scripture Reference	Commentary
Prophecy fulfillment	Isaiah 61:2, Luke 4:19, Daniel 9:24-27, Matthew 5:18	Tota

Words are way.	
Word	Scripture Reference
Punctual	Genesis 1
Anti	Genesis 2:17, Genesis 3:3-4, John 12:34
Babel	Genesis 11:9
Stricter versus (VS) flexible	Matthew 18:22

Mentions the most?

Word	Reference
Calendar	Day, Month, Year
Direction	East, North, South, West

Count	
Word	Scripture Reference
Seed of Abraham	Genesis 26:4
Forgive	Matthew 18:21-22

Phases of Life	
Word	Scripture Reference
Moses - Egypt, Midian, Wilderness	Exodus 2, Hebrews 11:25

What is the Bible divisible to?	
Word	Reference
Heaven versus (VS) Earth? Salvation	Genesis 1:1, John 4:22
Dead versus (VS) Alive? Spirit	Genesis 1:2
Water versus (VS) Land? Israel	Revelation 17:1, Revelation 17:15
Prophecy versus (VS) Fulfillment? Word	Lamentations 3:37

Who am I after?	
Word	Scripture Reference
Birth right	Genesis 25:31-34
Genealogy	
Blessing	1 Chronicles 5:2
Avenger of Blood	Numbers 35
But we see Jesus, who was made a little lower than the angels for the suffering of death, crowned with glory and honour; that he by the grace of God should taste death for every man.	Hebrews 2:9
Disciple	Acts 22:3
Forerunner	

What spirit to say?	
Word	Scripture Reference
Holy Spirit	Genesis 1:2, John 4:24, Genesis 6:3, Genesis 41:38
Evil spirit	Judges 9:23, 1 Samuel 16:14, 1 Samuel 16:15, 1 Samuel 16:16, 1 Samuel 16:23, 1 Samuel 18:10, 1 Samuel 19:9, Luke 7:21, Luke 8:2, Acts 19:12, Acts 19:13, Acts 19:15, Acts 19:16
Lying spirit	1 Kings 22:22-23, 2 Chronicles 18:21-22
State of spirit	Genesis 45:27, Exodus 6:3, 1 Kings 10:5, 2 Chronicles 9:4

Word opposites	
Word	Reference
Anti	1 John 2:18, 1 John 2:22, 1 John 4:3, 2 John 1:7, Revelation 2:13
Un	Ungod, unholy, unrighteous

Beyond association of time... where am I?

Word	Scripture Reference
Role	Genesis 32:28
Place	Matthew 23:37
Times	Luke 21:24
Language	Genesis 11:9

Ras Kase telephone interview. What iterate a place?	
Word	Scripture Reference
Alter	Acts 6:13-14
Iterate	Jeremiah 25:11-12, Jeremiah 29:10
Utilize	Numbers 35:25, Numbers 35:26-28, Numbers 35:32, Joshua 21:13, Joshua 21:21, Joshua 21:27, Joshua 21:32, Joshua 21:38, 1 Chronicles 6:57
Utter	Judges 12:6

Why numbers are preferred?	
Word	Scripture Reference
Divine	Genesis 41:32
Alphanumeric	
Multi-Lingual	Psalms 81:5

- Autobiography
- Series of Writing

A remembrance of Himself in us?		
Word	Commentary	Scripture Reference
Shema	The term remember occurs 210 times in the KJV Bible.	Deuteronomy 6:4-9
Passover Lamb		John 1:29, John 1:36
10 Commandments	The 10 Commandments are separated into love for God and your fellow man like yourself.	Exodus 20:2-17, Deuteronomy 5:6-21
Prophecy and Fulfillment		Daniel 9:2
Book of the Law		Joshua 1:8
Deuteronomy	The title of the last book of Moses means remembrance.	Exodus 20:2-17, Deuteronomy 5:6-21
Sabbath-Day and Festivals	Periodic anniversaries of His work.	Exodus 20:11
Remember Lot's wife.		Luke 17:32

How to have association...with guidance?

Word	Scripture Reference
Greasily beloved	Daniel 9:23, Daniel 10:11, Daniel 10:19
Birthright	Daniel 1:3-4
Marital bestowment	Ruth 2:10

What describes people?

Word	Commentary	Scripture Reference
Role	Trying as a simple example of resemblance.	Genesis 4:26
Physical Appearance	Such as I choose of Myself?	Genesis 1:26-27, Genesis 5:3, Genesis 9:6, 1 Samuel 9:2, Isaiah 53:2, Zechariah 11:17

It is not how much you give; it is who you give, Oh LORD.

Word	Scripture Reference	Measurable
Holy Spirit	John 3:34	No
Babel	Genesis 11:2	No
Promised Land	Genesis 12:7, Genesis 13, Ezekiel 33:24	No
Census	1 Chronicles 21:2	Yes

Where do I call on change?

Word	Commentary	Scripture Reference
Actor	The law and the prophets: Can I prepare man for an event of time?	Amos 3:7
Event	When does man decide His future is as reminded? Connecting the past as I use.	Genesis 1, John 1

To Reckon as Size

- Light (Genesis 1:16)
- Sabbath (Genesis 2:2-3)
- Autonomy (Genesis 4:9)

What has this Research Revealed?

- GetAPage.html draws resources from a large part of the Bible. *What exactly I know, as necessary of me? How numerous we are made.*
- *You do remember based on the data, do you need to collect the data, if you don't do remember?*
- *What does he want as a saint? O pe. In Yoruba?*
 - Complete
 - Late
 - Call
 - Thanksgiving
- Where am I, as a human being?
- *The life of appointing something as myself.*

Word Inference

- A lot of Yoruba language words may mean ethnic conflict.
- The Bible is specific in relation to the Jews. The word, about, generally refers to the surroundings and the time of an event.

Preeminence of Data?

How suitable is the data for general use?

Coming from an Information Background

- Familiarize with keyword *Noun*.
- *Letters in the English language?*
- *The work? Is to associate the reference.*
- *How could I collaborate fact with what I know?*

On behalf, of someone, I seem

Actor	Type	Scripture Reference
Jesus Christ	Passover Lamb	John 1:29, John 1:36
John the Baptist	Forerunner	John 1:33
Moses	Prophet	Exodus 7:1, Numbers 12:6, Deuteronomy 18:15, Deuteronomy 18:18, Deuteronomy 34:10

What substitution lies ahead?

Actor	Type	Scripture Reference
Seth	Man	Genesis 4:25, Genesis 5:3
Abraham	Believe	Romans 4
Isaac	Land	Genesis 26:2, Genesis 26:12

The Accumulation of Age.

Title	Time	Scripture Reference
Creation	6 Days	Genesis 1
Exodus from Egypt to the Promised Land	40 Biblical Years	Exodus 16:35, Numbers 14:33-34, Numbers 32:13, Deuteronomy 2:7, Deuteronomy 8:2, Deuteronomy 8:4, Deuteronomy 29:5, Joshua 5:6, Nehemiah 9:21, Psalms 95:10, Amos 2:10, Amos 5:25, Acts 7:36, Acts 7:42, Acts 13:18, Hebrews 3:9, Hebrews 3:12
Weeks of Years	490 Biblical Years	Daniel 9:24-27
First Resurrection	1000 Biblical Years	Revelation 20:2-7

What did He see Himself as?

Alias	Scripture Reference
Son of God	Matthew 16:13-20
Son of David	Matthew 22:42
Son of Man	1 Corinthians 15:45
Word	John 1

There is more to you, than you are (Ephesians 3:18).

We want personal data, when is public data sufficient?

From...Until AlphabetSequence

- God expressed His wish for me
- God spoke intermittently
- God explicitly mentioned about some of the specific people that were in my life
- To acknowledge, where I am present. I had left Westpac, I was at DTEC. God asked me to leave my friends at Campsie and relate with Lakemba.
- God did not initially identify Himself, with a particular name

The author will not break each experience into sequences. At this late stage of the research, the author is content, with his original table design, and will elaborate, when it is appropriate, to newer suggestions.

(John Whalen).

How amenable am I the same?

Type	Commentary
Man	Election - Did He share His hope?
Place	Promised Land - Where I will inhabit?

As the Open?

Actor	Commentary	Scripture Reference
Adam	The first man will need a companion	Genesis 1:26-31, Genesis 2:6-25
Jesus Christ	Transformation of the spirit	John 3

Quality Assurance

- *Quality Assurance*
- To achieve performance beneficiary, the author uses AJAX, a single Javascript and CSS file, and minute images.
- The author's work is largely based on the SQL's SELECT statement, a matured declarative language, which the author uses to query God's word.
- The author relies on the Bible database, a recognized source of information, which has stood the standard of time.
- The reason for AlphabetSequence is because the author lacks Biblical knowledge. The author sought for a way to reconcile what he is hearing with the established word.
- The SQL COUNT(), AVG() and SUM() Functions are row-based.
- Code Analysis: *JSlim, ExCap*
- Questionaire: *RatingBank, InDefine*

Prepared for Time

On 2019-04-04T09:00:00 andre.nguyen@ggcm.com will telephone me about the role with Google's co-founder Larry Page [jobs.lever.co.uk/hawk.aspx?01c5d9a-2d8a-4727-a345-d4a93d6d4c277?agencyId=3b8e0b44-7127-4709-ad21-6eb8e5f7403](https://www.lever.co.uk/hawk.aspx?01c5d9a-2d8a-4727-a345-d4a93d6d4c277?agencyId=3b8e0b44-7127-4709-ad21-6eb8e5f7403) Andre

Nguyen asked how I spend my day? 2026-01-19T11:32:00 *You have tried to supplement... what God has given you.*

2026-03-03T11:24:00 *He compliments...our way,* was reading the Bible... He was giving me a word.

When I started AlphabetSequence, I ate my only daily meal at 6PM, read the Bible and went to bed. I could break my day into punctual scheduled activities, such as:

SQL Server Execution Plan

(Grant Fritchey)

SQL Server Execution Plan - ScriptureReference.html?scriptureReference=Genesis 22, Daniel 9:24-27, John 1:1, Jude

ScriptureReference.sql ScriptureReference.sqlplan ScriptureReference.pnq

The SQL script contains four scripture references; therefore, there are four execution plans. Three of these execution plans, Query 1, 3 and 4, will solely make use of the low cost clustered index primary key seek, PK_Scripture. These three have trivial

Query 2 does an Index Seek on the `IDX_Scripture_VerseIDSequence`, since the where clause is on the `VerseIDSequence` column. The `IDX_Scripture_VerseIDSequence` indexes on the `VerseIDSequence` column; it is not a covering index, since the `Select` column-list includes the `BookID`, `ChapterID`, `VerseID`; therefore, the `PK_Scripture` is referenced as well in a Key Lookup. Both the Index Seek and the Key Lookup have Seek Predicates, and the Nested Loops will join the results.

The Definitive Guide to SQL Server Performance

(Don Jones).

Performance Monitor - SQL Server Objects

SQL Server Objects	Commentary
SQLServer:Access Methods	Logical data access.
SQLServer:Buffer Manager Object	Physical data access. Such as, Buffer cache hit ratio, is how often, data is accessible from memory, rather than the hard disk.

Artifact Description

[2019-10-05ArtifactDescription.html](#)

Background

The author's country of birth, Nigeria, gained independence on, 1960-10-01, a **Biblical generation** before the end of the second **millennium** (**plural millennia**). There are 2570 days between 1960-10-01 and the author's date of birth, 1967-10-15. Nigeria became a republic in 1963-10-01; The difference in days between when Nigeria became a republic, 1963-10-01, and 1967-10-15; is 1475 days; 4 **Biblical** years, 1 month, 5 days; 4 **Gregorian** years, 2 weeks. The difference in days, between the creation of **Lagos State**, 1967-05-02 and the author's date of birth is 141 days (4 **Biblical** months, 21 days) (4 months, 2 weeks, 4 days).

1967-10-15 + 75 Biblical years is 2041-09-16 (Genesis 12:4)

1984-07-17 is the date of the author's 17th Biblical birthday (Genesis 37:2). The date of recording this information is 2020-10-23, Epoch timestamp: 1603454400

Jesus began His ministry at the age of thirty, and the zodiac is that He served for three years (Luke 3:23). The author was born on 1967-10-15 three years before the end of the second millennium. 1967-10-15, 2000-01-01 = 11766e days (32 biblical years, 8 biblical months, 6 days) (32 years, 2 months, 2 weeks, 3 days). 1967-10-15 B.C. = 1967-10-15 A.D. + 136515 days = 47196 months = 3933 years. My thirtieth, 30th, Biblical years birthday will occur on 1997-05-01, 1997-05-01 = 11766e days (32 biblical years birthday will occur on 2000-04-26. Between 1967-10-15 and 1968-04-04 are 172 days (5 biblical months, 22 days) (5 months, 2 weeks, 6 days). Between 1967-10-15 and 1968-10-15 are 366 days (1 biblical year, 6 days) (1 year, 1 day). Between 1967-10-15 and 1967-10-15, are 203 days (6 biblical months, 23 days) (6 months, 2 weeks, 5 days). Between 0032-04-06 and 1967-10-15, is 706935 days (1663 biblical years, 8 biblical months, 15 days) (1935 years, 6 months, 1 week, 1 day).

day) of [490,000,000](#) Jewish generations, 280,527,961 weeks of years.

At the age of [1833](#), Jesus Christ, His father and mother, worshipped at the temple, in Jerusalem. The author worshipped at St. Francis's Catholic Church, from 2002-07-01, 53 Biblical years, after coming to the U.S. ([Luke 2:22](#), [Matthew 2:20](#), [Mark 5:25](#), [John 4:19](#), [John 8:12](#), [John 10:22](#), [John 11:55](#), [John 12:1](#), [John 12:34](#), [John 13:34](#), [John 14:15](#), [John 14:26](#), [John 15:17](#), [John 16:32](#), [John 17:11](#), [John 18:20](#), [John 18:28](#), [John 19:28](#), [John 19:30](#), [John 20:17](#), [John 21:22](#), [John 21:23](#), [John 21:24](#), [John 21:25](#), [John 21:26](#), [John 21:27](#), [John 21:28](#), [John 21:29](#), [John 21:30](#), [John 21:31](#), [John 21:32](#), [John 21:33](#), [John 21:34](#), [John 21:35](#), [John 21:36](#), [John 21:37](#), [John 21:38](#), [John 21:39](#), [John 21:40](#), [John 21:41](#), [John 21:42](#), [John 21:43](#), [John 21:44](#), [John 21:45](#), [John 21:46](#), [John 21:47](#), [John 21:48](#), [John 21:49](#), [John 21:50](#), [John 21:51](#), [John 21:52](#), [John 21:53](#), [John 21:54](#), [John 21:55](#), [John 21:56](#), [John 21:57](#), [John 21:58](#), [John 21:59](#), [John 21:60](#), [John 21:61](#), [John 21:62](#), [John 21:63](#), [John 21:64](#), [John 21:65](#), [John 21:66](#), [John 21:67](#), [John 21:68](#), [John 21:69](#), [John 21:70](#), [John 21:71](#), [John 21:72](#), [John 21:73](#), [John 21:74](#), [John 21:75](#), [John 21:76](#), [John 21:77](#), [John 21:78](#), [John 21:79](#), [John 21:80](#), [John 21:81](#), [John 21:82](#), [John 21:83](#), [John 21:84](#), [John 21:85](#), [John 21:86](#), [John 21:87](#), [John 21:88](#), [John 21:89](#), [John 21:90](#), [John 21:91](#), [John 21:92](#), [John 21:93](#), [John 21:94](#), [John 21:95](#), [John 21:96](#), [John 21:97](#), [John 21:98](#), [John 21:99](#), [John 21:100](#), [John 21:101](#), [John 21:102](#), [John 21:103](#), [John 21:104](#), [John 21:105](#), [John 21:106](#), [John 21:107](#), [John 21:108](#), [John 21:109](#), [John 21:110](#), [John 21:111](#), [John 21:112](#), [John 21:113](#), [John 21:114](#), [John 21:115](#), [John 21:116](#), [John 21:117](#), [John 21:118](#), [John 21:119](#), [John 21:120](#), [John 21:121](#), [John 21:122](#), [John 21:123](#), [John 21:124](#), [John 21:125](#), [John 21:126](#), [John 21:127](#), [John 21:128](#), [John 21:129](#), [John 21:130](#), [John 21:131](#), [John 21:132](#), [John 21:133](#), [John 21:134](#), [John 21:135](#), [John 21:136](#), [John 21:137](#), [John 21:138](#), [John 21:139](#), [John 21:140](#), [John 21:141](#), [John 21:142](#), [John 21:143](#), [John 21:144](#), [John 21:145](#), [John 21:146](#), [John 21:147](#), [John 21:148](#), [John 21:149](#), [John 21:150](#), [John 21:151](#), [John 21:152](#), [John 21:153](#), [John 21:154](#), [John 21:155](#), [John 21:156](#), [John 21:157](#), [John 21:158](#), [John 21:159](#), [John 21:160](#), [John 21:161](#), [John 21:162](#), [John 21:163](#), [John 21:164](#), [John 21:165](#), [John 21:166](#), [John 21:167](#), [John 21:168](#), [John 21:169](#), [John 21:170](#), [John 21:171](#), [John 21:172](#), [John 21:173](#), [John 21:174](#), [John 21:175](#), [John 21:176](#), [John 21:177](#), [John 21:178](#), [John 21:179](#), [John 21:180](#), [John 21:181](#), [John 21:182](#), [John 21:183](#), [John 21:184](#), [John 21:185](#), [John 21:186](#), [John 21:187](#), [John 21:188](#), [John 21:189](#), [John 21:190](#), [John 21:191](#), [John 21:192](#), [John 21:193](#), [John 21:194](#), [John 21:195](#), [John 21:196](#), [John 21:197](#), [John 21:198](#), [John 21:199](#), [John 21:200](#), [John 21:201](#), [John 21:202](#), [John 21:203](#), [John 21:204](#), [John 21:205](#), [John 21:206](#), [John 21:207](#), [John 21:208](#), [John 21:209](#), [John 21:210](#), [John 21:211](#), [John 21:212](#), [John 21:213](#), [John 21:214](#), [John 21:215](#), [John 21:216](#), [John 21:217](#), [John 21:218](#), [John 21:219](#), [John 21:220](#), [John 21:221](#), [John 21:222](#), [John 21:223](#), [John 21:224](#), [John 21:225](#), [John 21:226](#), [John 21:227](#), [John 21:228](#), [John 21:229](#), [John 21:230](#), [John 21:231](#), [John 21:232](#), [John 21:233](#), [John 21:234](#), [John 21:235](#), [John 21:236](#), [John 21:237](#), [John 21:238](#), [John 21:239](#), [John 21:240](#), [John 21:241](#), [John 21:242](#), [John 21:243](#), [John 21:244](#), [John 21:245](#), [John 21:246](#), [John 21:247](#), [John 21:248](#), [John 21:249](#), [John 21:250](#), [John 21:251](#), [John 21:252](#), [John 21:253](#), [John 21:254](#), [John 21:255](#), [John 21:256](#), [John 21:257](#), [John 21:258](#), [John 21:259](#), [John 21:260](#), [John 21:261](#), [John 21:262](#), [John 21:263](#), [John 21:264](#), [John 21:265](#), [John 21:266](#), [John 21:267](#), [John 21:268](#), [John 21:269](#), [John 21:270](#), [John 21:271](#), [John 21:272](#), [John 21:273](#),

The singular word, centurion, occurs twenty-one times in the Bible; its plural word, centurions, occurs three times in the Bible; therefore, centurion(s), occurs twenty-four times in the Bible

In Australia, the author first worked at:

Australian Army Headquarters
Canberra, Defence

Suakin Drive
Georges Heights NSW 2088

Georges Heights NS
Telephone 61 2 9961

Fax 61 2 9960 9452

The word, covenant, occurs twenty-four times in the New Testament. The word, marriage, occurs sixteen times in the New Testament.

The United Nations began on 1945-10-24, between then, and 1988-10-15, are 15697 days (43 biblical years, 7 biblical months, 7 biblical weeks, 1 biblical day, 1966 Nigerian coup d'état occurred between 1966-01-15 and 1966-01-16 and the author was born on 1967-10-15. 638 days, after

Riadra commenced on 1967-05-30, and 1967-10-15 is 138 days, after.

Between when Summer traditionally begin, June 21, and October 15, is a span of (3 months)

October 15, is the forty-fifth day, in the September, October, November, December cycle.
Between September 22 and October 15, is 23 days (23 days) (2 weeks, 2 days).

Between October 15 and when Winter starts, December 21, is a span of 67 days (2 biblical months, 7 days) (2 months, 6 days)

Between October 15 and when Winter ends, March 20, is a span of 157 days (5 biblical months, 7 days) (5 m

During Leap years, between the preceding October 15, and May 7, are 205 days (6 biblical months, 25 days).

Military Occupation Six-Day War was fought between 1967-06-05 and 1967-06-10. I was born on 1967-10-15, and 9 Biblical months, before that, then, was, 1967-01-18. Between 1967-01-18 and 1967-06-10 is 143 days (4 biblical months, 23 days) (4 months, 3 weeks, 2 days)

2 Biblical years, after I was born, is 1969-10-04. Israel was accepted to the United Nations on 1949-05-11, between then and 1969-10-04, is 7451 days (20 biblical years, 8 biblical months, 11 days) (20 years, 4 months, 3 weeks, 2 days). The adoption of the

Prophecy & Fulfillment

Autobiography

At Central Piedmont Community College (CPCC), the major course, students and colleagues include:

- 1. An African American female senior, Gayle.
- 2. An African American male classmate, Virgil Hawthorne. Who waited for the completion of an higher than college degree, prior to attending the graduation ceremony.
- 3. Michael Peko, a Caucasian student colleague who wanted to come to the house to study together. He is mechanically inclined.
- 4. My twin sibling and I listened to American Top 40 with Casey Kasem, every Saturday morning, 2024-12-25T12:00:00 What ~~endrange~~ of the people?
- 5. I wanted to build a traffic light for a busy intersection.
- 6. A multicultural church where I was part of the congregation, Bernie Alsopugh mentored. Perry drove me to the church, I want to altar calls for masturbation prayers.

2024-12-25T19:12:00 When I had the action, I have ~~acriminated~~.

2024-12-25T19:23:00 Australia had brought me in, to drive me into the crowd.

What role he played in your life?

They had varying mother... but one father ([Genesis 22:28](#)).
2024-12-31T16:48:00 M Hain Located in: Paseo Padre Shopping Center. Address: 34380 Fremont Boulevard, Fremont, California (CA) 94555. At the intersection of Fremont Boulevard and Paseo Padre Parkway, 3 motorcyclists rode northward.
2024-12-31T19:55:00 A male-dominated family. [What adjustment did you need to make to your life? How your living resemble who?](#)
1. Post 9-year-old re-location from Ile-Ife to Lagos
1. Patriach, brother Yemo
2. Captain of the Nigerian national hockey team
3. Teacher for the 1st year of the Baptist Academy secondary school, evening schedule
4. The managing director of Gestco provided lunch money to eat at the Baptist Academy secondary school during form 2...5
2. Post-1988 deportation: You called him Daddy, that is what everybody else called him
• [Where did he serve... a resident?](#)
• [Where did I... remove myself from the past \(\[Genesis 31:41\]\(#\) \)?](#)
• [What apart... are new?](#)
• [Standing time... to reality?](#)

Faith An Yao

Age difference

1. Almost a Biblical generation, 40 years, separates Faith An Yao and the author.
2. 2023-08-31T08:57:00
 1. In the year 2024, the author will turn 57 years old.
 2. In the year 2024, Faith An Yao will turn 18 years old.
 3. In the year 2024, the combined years of Faith An Yao and the author will be 75 years.

Diaspora

1. The author's 1st workplace in Nigeria and Australia was with Ibos and Jews respectively. Chyke Onyekwere like the author, studied in America. Ralph Silverman was a South African Jew. The author lived and worked in Lagos and Sydney, the commercial centers of both countries. Our experience and education must align with the migrants. As in Daigaku Honyaku Center (DHC). Reminded of success? Kowe? Yoruba speaking. Muñoz? Oral communication and speech. [Where will I find the same... as me? I was netting trains on how to... place my work in life? Looking at me as a reflection of you.](#)

Education in Charlotte, North Carolina (NC)

In spite of racism...we can observe.

1. Between 1994-1996, I completed 2 years of education at Central Piedmont Community College (CPCC), Charlotte, North Carolina (NC)
2. I graduated with 3 Associate degrees in Electronics, Computers, and Electrical Engineering Technology from CPCC.
3. During the Summer of 1995, after completing the 1st Associate degree my twin sibling and I re-located to Atlanta, Georgia to live with my paternal uncle Niyi. Although I gained work employment at a fast food restaurant, I chose to return to CPCC to complete all 3 Associate degrees
4. Between 1996-1998, I attended the University of North Carolina, Charlotte (UNCC) and graduated with a degree in Electrical Engineering Technology - Computer Emphasis. I do not learn...out of others. My twin sibling and contemporaries are educational and career influences. I am a better tutor than a learner
5. • I contracted at Sunhealth Corporation. I added report columns. Legal (8.5 x 14 inches)
• I was hired at McKey Real Estate to develop a relational database application using R:Base 5000. My stumbling block was either to use the integrated development environment (IDE) wizard or learn from the manual
• In Charlotte, an African American male prospective employer asked me to learn the C programming language. At Central Corporation, I looked up to an African American male software engineer that came among others to install software. At Central Corporation, I also upgraded software developed using the C programming language by increasing the number of labels it prints for tape reels. [What do I need of a capable human being? What resemblance has He made \(\[Genesis 32:28\]\(#\) -\[Genesis 5:3\]\(#\) -\[Genesis 4:12\]\(#\) \)? What word reminds \(\[Mark 11:23\]\(#\) \)?](#)

Style of Writing

What has prompted your interest in the topic?

The driving forces of arriving at the author's work are:
• During his education in Australia, the author was exposed to Case-Based Reasoning and Unified Modeling Language. Both themes will suggest the future is made of the possibility. We do not arrive at the future, at once, we gradually move into it.
• The author was receptive and felt most at home during worship.
(Dennis Tenen)

What kinds of questions will you be asking?

How can no word be lost? How does the author preserve the word of God, audience, scenario, timing, reference? What retention has He made of His past?

How do your questions fit into the broader intellectual tradition?

The book, The Bible Code by Michael Drosnin, is the sole source for this religious work.

How will you answer your questions?

If love is not stupid, where is it needed?
